Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 15.27%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **53.80%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.78%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
STRATEGIC BOND

Identificativo della persona giuridica:
5493009E9QZ9NKKEW632

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **28.38%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.151 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.20 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.55% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐ Sì:

☐

In gas fossile

☐

In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato**
quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)**
investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)**
attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.09% e la quota di investimenti in attività abilitanti era pari allo 0.10%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.47%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **22.31%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.52%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS EURO HIGH YIELD BOND

Identificativo della persona giuridica:
E1BBUNTIB1P10L18SD26

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **43.32%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA BB-B EUROPEAN CURRENCY HIGH YIELD CONSTRAINED INDEX HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.487 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.315 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.28 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.16 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo

esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● In quali settori economici sono stati effettuati gli investimenti?

Settore	Sotto settori	% Asset
Corporate	Beni di consumo voluttuari	18.68%
Corporate	Comunicazioni	18.04%
Corporate	Banking	17.31%
Corporate	Beni di prima necessità	11.40%

Corporate	Settore Immobiliare (REIT)	0.32%
Forex	Forex	0.04%
Corporate	Società finanziarie	0.00%
Cash	Cash	-1.50%

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.69% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹ ?**

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

⁴Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari al 0.37%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 7.54%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **34.48%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 8.15%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO
HIGH YIELD SHORT TERM BOND

Identificativo della persona giuridica:
529900Q3IK91XCA88E07

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **41.45%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA Q759 CUSTOM INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● *Come si sono comportati gli indicatori di sostenibilità?*

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.567 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.309 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● *... e rispetto ai periodi precedenti?*

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.34 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.04 (D).

● *Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?*

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio

ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.79% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1?**

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.27%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 14.63%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **32.05%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 8.61%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL SUBORDINATED BOND

Identificativo della persona giuridica:
549300YM7XSURJOGN349

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 41.38% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **30% ICE BOFA CONTINGENT CAPITAL HEDGED INDEX + 15% ICE BOFA PERPETUAL PREFERRED SECURITIES HEDGED INDEX + 37.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL CORPORATE HEDGED INDEX + 17.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL HIGH YIELD HEDGED INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.506 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.420 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.51 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.50 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi

che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.

- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● In quali settori economici sono stati effettuati gli investimenti?

Settore	Sotto settori	% Asset

Corporate	Beni di consumo voluttuari	-0.04%
Forex	Forex	-0.37%
Cash	Cash	6.39%

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.21% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato
quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx)
investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx)
attività operative verdi delle imprese beneficiarie degli investimenti.

⁴Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 6.97%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **37.64%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le

attività economiche
ecosostenibili
ai sensi del
Regolamento (EU)
2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.53%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS PIO-NEER GLOBAL HIGH YIELD BOND

Identificativo della persona giuridica: 5493001ZUQBYXT5ICJ95

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **14.50%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG GLOBAL HIGH YIELD**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.102 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.259 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.09 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.24 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato

“Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- Voto: la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia:
Dal 01/07/2023 al 30/06/2024

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.23%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **9.24%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto

dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.26%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL HIGH YIELD ESG IMPROVERS
BOND

Identificativo della persona giuridica:
213800O2125EN6NGE460

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **31.60%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compact), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
- 2.- Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
- 3.- Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
- 4.- Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Il gestore degli investimenti ha focalizzato il processo di investimento su società/settori/paesi che hanno abbracciato, o abbracceranno, una traiettoria ESG positiva all'interno della loro attività. Il gestore degli investimenti ha individuato opportunità di investimento allineate con l'obiettivo di generare alfa, concentrandosi in particolare sull'inclusione di società/settori/paesi che saranno fortemente vincenti dal punto di vista ESG in futuro, che presentino (o presenteranno) un miglioramento positivo del profilo ESG, investendo al contempo in società/settori/paesi attualmente steward ESG.

Inoltre, il Comparto ha ottenuto un punteggio ESG del suo portafoglio superiore a quello del Benchmark. Il Comparto è stato confrontato con il punteggio ESG del suo Benchmark dopo che il 20% dei titoli con rating ESG più basso è stato escluso dal Benchmark.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.371 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.303 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.29 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.29 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● **In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?**

I principali effetti negativi sono gli effetti negativi più signifi-

cativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Qual è stata la quota di investimenti legati alla sostenibilità?

● **Qual è stata l'allocazione degli asset?**

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.

L'asset allocation descrive la quota di investimenti in asset specifici.

- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Cash	Cash	3.82%

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.03% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.18%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **24.23%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 7.36%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US
HIGH YIELD BOND

Identificativo della persona giuridica:
5493003QDKL8L48UQW51

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **18.26%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA US HIGH YIELD INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.238 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.457 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.28 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.16 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio

ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco. Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.25%.

sono

investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **9.01%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.25%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
EUROPEAN SUBORDINATED BOND ESG

Identificativo della persona giuridica:
2221006F1314ERENWD22

Si intende per investimento sostenibile un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **65.95%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.097 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.537 (C)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.93 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.55 (C).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco

d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

<i>Cash</i>	<i>Cash</i>	<i>1.48%</i>

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.28% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- fatturato** che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- spese in conto capitale(CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.56%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 12.91%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

● Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **61.90%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

● Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.78%.

● Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle

Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.84%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.942 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.488 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- **Dimensione ambientale:** esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- **Dimensione sociale:** misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- **Dimensione della governance:** Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.92 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.51 (C).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi

che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.

- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

- *Qual è stata l'allocazione degli asset?*

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Settore	Sotto settori	% Asset

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.06% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- fatturato** che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.10%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 12.60%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

 Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **31.05%** alla fine del periodo. Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

 Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.79%.

 Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL CORPORATE BOND

Identificativo della persona giuridica:
XJOH2VT7DMIW80J7DZ04

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 48.28% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.356 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.007 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.42 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.03 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**,

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.48% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.

- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1?**

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

- **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.12%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 8.09%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **44.23%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.98%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL CORPORATE ESG IMPROVERS BOND

Identificativo della persona giuridica: 2138002V2U9FP8L55Z17

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **61.75%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compact), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Il gestore degli investimenti ha focalizzato il processo di investimento su società/settori/paesi che hanno abbracciato, o abbracceranno, una traiettoria ESG positiva all'interno della loro attività. Il gestore degli investimenti ha individuato opportunità di investimento allineate con l'obiettivo di generare alfa, concentrandosi in particolare sull'inclusione di società/settori/paesi che saranno fortemente vincenti dal punto di vista ESG in futuro, che presentino (o presenteranno) un miglioramento positivo del profilo ESG, investendo al contempo in società/settori/paesi attualmente steward ESG.

Inoltre, il Comparto ha ottenuto un punteggio ESG del suo portafoglio superiore a quello del Benchmark. Il Comparto è stato confrontato con il punteggio ESG del suo Benchmark dopo che il 20% dei titoli con rating ESG più basso è stato escluso dal Benchmark.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.616 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.007 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri

pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.77 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.03 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco. Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.75% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.77%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 9.87%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **55.34%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.66%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS NET
ZERO AMBITION GLOBAL CORPORATE BOND

Identificativo della persona giuridica:
213800ZDJ7583Z2H5G06

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **66.22%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compact), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● *Come si sono comportati gli indicatori di sostenibilità?*

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è 0.537 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è 0.172 (D).

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 82.17.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 99.19

● ... e rispetto ai periodi precedenti?

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.52 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.18 (D). Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 120.64 Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 129.04.

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.

- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.63% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti

-spese in conto capitale(CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.04% e la quota di investimenti in attività abilitanti era pari allo 0.73%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 6.65%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

● Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **61.00%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

● Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.58%.

● Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice Solactive Paris Aligned Global Corporate USD Hedged Index¹¹. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 82.17
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 99.19.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un “Paris Aligned Benchmark” che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

- Il rating ESG medio ponderato del portafoglio è 0.537 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è 0.172 (D).

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 82.17
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 99.19

● ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice Solactive Paris Aligned Global Corporate USD Hedged Index11. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 82.17.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 99.19

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS GLOBAL HIGH YIELD BOND

Identificativo della persona giuridica:
222100AIHPWCQOF6UQ48

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **15.45%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.090 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.303 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.10 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.29 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento

della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- Voto: la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia:
Dal 01/07/2023 al 30/06/2024

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹?**

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.23%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **8.58%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri

per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.87%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL SHORT TERM BOND

Identificativo della persona giuridica:
213800N25O8X71K7M94

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 31.43% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **10% ICE BOFA GLOBAL HIGH YIELD INDEX + 80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.853 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.487 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi

sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti

dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.23% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.07% e la quota di investimenti in attività abilitanti era pari allo 0.11%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **25.46%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.74%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS OPTIMAL YIELD

Identificativo della persona giuridica: 549300SEXJO4VZFPO521

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **32.75%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.232 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.09 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti

dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: Dal 01/07/2023 al 30/06/2024

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.23% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.11% e la quota di investimenti in attività abilitanti era pari al 0.09%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 2.62%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **25.94%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.59%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
OPTIMAL YIELD SHORT TERM

Identificativo della persona giuridica:
549300NI6I5JE79M9X21

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **31.48%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.221 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.17 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***
Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.11% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.14% e la quota di investimenti in attività abilitanti era pari allo 0.24%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 4.86%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **22.25%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.12%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
STRATEGIC INCOME

Identificativo della persona giuridica:
5493004ZTK6D21CGCO05

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **18.38%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG US UNIVERSAL**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.461 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.356 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.53 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.38 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
TBIP USA 02/07/24	Tesoreria	Tesoreria	Stati Uniti	4.91%

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.

- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.38%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le

 Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **16.76%** alla fine del periodo. Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

attività economiche
ecosostenibili
ai sensi del
Regolamento (EU)
2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.62%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS NET
ZERO AMBITION US CORPORATE BOND

Identificativo della persona giuridica:
213800VWP1P2KAFPEU55

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **36.28%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.188 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.097 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **42.30**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **77.40**

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era **0.29 (D)** e il rating ESG medio ponderato dell'universo d'investimento ESG era **-0.07 (D)**. Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era **67.04** e l'indice di riferimento medio ponderato dell'intensità di carbonio era **90.46**.

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO₂ che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.

- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

Settore	Sotto settori	% Asset
Corporate	Banking	33.44%

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono diretta-

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

mente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.10%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.00%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **29.70%** alla fine del periodo.

sono investimenti sostenibili con

un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.57%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice MSCI USD IG Climate Paris Aligned Corp Bond. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **42.30**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **77.40**.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

● ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.188 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.097 (D)**.
- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **42.30**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **77.40**.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice MSCI USD IG Climate Paris Aligned Corp Bond. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **42.30**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **77.40**.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali. L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US
BOND

Identificativo della persona giuridica:
5493005LBJJ6BWRENA39

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **14.90%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BBLOOMBERG US AGGREGATE**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.511 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.464 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.60 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.49 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il

nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.02%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.14%.

sono

investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **13.60%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.30%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

Gli indici di riferimento sono indici atti a misurare se il prodotto

finanziario rispetta le caratteristiche ambientali o sociali che promuove.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US CORPORATE BOND

Identificativo della persona giuridica: 222100LE431F865A4S54

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **30.82%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG US CORPORATE INVESTMENT GRADE**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compact), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● Come si sono comportati gli indicatori di sostenibilità?

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.122 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.307 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***...e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.17 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.24 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro “non arrecano un danno significativo” (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un’intensità di CO2 che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell’ambito della propria politica di esclusione, facente parte della Politica di Amundi per l’Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell’ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE¹?**

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emis-

sione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.07%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.30%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.04%** alla fine del periodo. Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

economiche
ecosostenibili
ai sensi del
Regolamento (EU)
2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.79%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento
sono indici
atti a misurare
se il prodotto
finanziario rispetta
le caratteristiche
ambientali o sociali
che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS US SHORT TERM BOND

Identificativo della persona giuridica:
549300QBCEQZSOFGDW23

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli **investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **18.24%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 0-1 YEAR US CORPORATE INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.386 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.215 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.29 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio

dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.70%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **15.46%** alla fine del periodo. Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.78%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS ASIA INCOME ESG BOND

Identificativo della persona giuridica:
213800UVZ2BRX4N1ZK70

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 36.66% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento 90% JP MORGAN ASIAN CREDIT INDEX (JACI) + 10% MARKIT IBOXX ASIAN LOCAL BOND INDEX (ALBI) (EX HSBC HSLI). Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

A giugno 2024, il fondo ha riportato 4 indicatori di impatto per valutare la qualità ESG del portafoglio. Per i quattro indicatori rappresentativi che riguardano l'ambiente (impronta di carbonio), il sociale (gestione della catena di approvvigionamento, coinvolgimento della comunità e diritti umani) e la governance (strategia aziendale ESG), il portafoglio ha sovraperformato l'universo d'investimento con una copertura del rating superiore al 90% dei titoli in portafoglio soggetti a rating.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.319 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.280 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a

livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***
Descrizione particolareggiata:

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.

- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2024**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.05% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.10%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.51%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
EMERGING MARKETS BLENDED BOND

Identificativo della persona giuridica:

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli **investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **16.62%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.110 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.153 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.03 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.16 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei

dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di

o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispon-

derimento ha investito lo 0.02% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹ ?***

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

denti alla migliore prestazione.

Le attività allineate alla tassonomia

sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.86%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **14.86%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.74%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS EMERGING MARKETS BOND

Identificativo della persona giuridica:
549300KZW6KQ7WLJO866

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli **investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **13.47%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **50% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% JP MORGAN CEMBI BROAD DIVERSIFIED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.018 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.155 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.11 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.17 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano,

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia

sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.03%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.36%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **12.39%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.06%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI
FUNDS EMERGING MARKETS
CORPORATE BOND

Identificativo della persona giuridica:
529900YJOJ3E3FRQQ325

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **35.38%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN CEMBI BROAD DIVERSIFIED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.003 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.157 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.11 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.17 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia:
Da 01/07/2023 a 30/06/2024

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● In quali settori economici sono stati effettuati gli investimenti?

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.04% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

zione.
Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 2.67%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **29.25%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.09%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
EMERGING MARKETS GREEN BOND

Identificativo della persona giuridica:
2138001AOC3QUTY9SA42

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 71.39% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN GREEN BOND EM CREDIT DIVERSIFIED COMPOSITE HEDGED INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il comparto ha mantenuto la quota impegnata della sua allocazione investita nell'uso di green bond.

L'obiettivo dei green bond è quello di finanziare progetti che generano un impatto positivo e misurabile sull'ambiente. L'indicatore chiave per misurare l'impatto dei green bond è "tonnellate di emissioni di CO2 evitate per milione di euro investiti in un anno". Al di là dell'analisi finanziaria quantitativa e qualitativa delle obbligazioni che probabilmente andranno a comporre il portafoglio, il processo di selezione comprende una valutazione della strategia ESG a livello di emittente e una valutazione dei green bond in base a diversi punti di analisi:

1. Amundi ha sviluppato un sistema esclusivo di punteggio ESG basato su una scala di sette lettere, che va da A a G, dove A rappresenta il rating migliore e G quello peggiore. Qualsiasi emittente con rating G è escluso da tutti i portafogli gestiti attivamente di Amundi. Implementiamo la verifica del rating ESG dell'emittente e controlliamo la conformità del rating ai criteri del relativo fondo. Come indicato in precedenza, gli emittenti con un rating G nella scala di rating ESG di Amundi non sono idonei all'investimento. In caso di punti deboli, il team di ricerca ESG cercherà di approfondire le controversie sul relativo pilastro (A, S e G).
2. Valutazione dei green bond in termini di: (i) analisi del progetto, attraverso l'analisi dell'ubicazione geografica degli asset, l'azione sugli asset, la valutazione di qualsiasi impatto aggiuntivo del progetto green sull'ambiente, sulla biodiversità, sulle comunità locali o su altri aspetti sociali (Do no significant harm, ovvero "non arreca un danno significativo"), l'allineamento agli standard di settore (ad esempio, l'allineamento ai Green Bond Principles dell'International Capital Markets Association, alla Climate Bond Initiative, alla tassonomia dell'UE). (ii) analisi dell'emittente a livello di strategia ESG globale e di controversie, (iii) logica di finanziamento green (tipo di progetti finanziati, allocazione dei green asset, tipo di strumenti di finanziamento dei progetti green) e (iv) trasparenza (rapporto sui green bond, esistenza di un parere di terze parti).
3. Monitoraggio continuo (investimento ex-post), che comprende l'esame regolare dell'allocazione e del rapporto sull'impatto del green bond, delle controversie in cui l'emittente è coinvolto e della strategia ambientale dell'emittente.

Infine, tutti i Green Bond selezionati dovranno soddisfare i criteri e le linee guida dei Green Bond Principles pubblicati dall'International Capital Market Association. Per maggiori dettagli su quanto sopra, si prega di visitare la Politica di investimento responsabile di Amundi.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.130 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.006 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;

- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

Alla fine del periodo, il portafoglio detiene l'**89.04%** di obbligazioni verdi.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.12 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.17 (D). Alla fine del periodo precedente, il portafoglio deteneva l'85.42% di obbligazioni verdi.

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● **In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?**

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la

parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.

- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● In quali settori economici sono stati effettuati gli investimenti?

Settore	Sotto settori	% Asset
Corporate	Elettricità	26.58%

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.25% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato
quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx)
investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx)
attività operative verdi delle imprese beneficiarie degli investimenti.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 37.21%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **71.13%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economi-

che ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 0.00%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
EMERGING MARKETS CORPORATE
HIGH YIELD BOND

Identificativo della persona giuridica:
5493006QGDCTMW9Y1N50

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli **investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **22.64%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.038 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.133 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era -0.04 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.18 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti

umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle

controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2Altricomprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?***

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia

sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.45%.

 sono investimenti sostenibili con un obiettivo ambientale che non tengono conto

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **19.76%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

dei criteri per le attività economiche ecosostenibili conformemente alla tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.87%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
EMERGING MARKETS HARD CURRENCY
BOND

Identificativo della persona giuridica:
549300CF4H3SXCNRP626

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 15.82% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.119 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.153 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.07 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.16 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio

ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- Voto: la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una

valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.02% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.60%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **14.79%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.01%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

BOND

Identificativo della persona giuridica:
549300JJ3276S8R63L30

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli **investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **7.90%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **80% JP MORGAN GBI EM GLOBAL DIVERSIFIED COMPOSITE + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.328 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.186 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.30 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.17 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della

sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.

- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.00% in investimenti sostenibili allineati alla tassonomia dell'UE.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.30%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **5.73%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.17%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Sì

X

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 23.00% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.019 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.201 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.06 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.21 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti

umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emis-

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di

sioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

riferimento ha investito lo 0.08% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?**

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

- **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.07% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.40%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **20.04%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.88%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS ASIA
MULTI ASSET TARGET INCOME

Identificativo della persona giuridica:
213800D8TH8Y8YWFBV59

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **27.54%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **30% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% MSCI EM (EMERGING MARKETS) + 20% JP MORGAN CEMBI BROAD DIVERSIFIED**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.150 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.126 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Settore	Sotto settori	% Asset

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono

investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **18.85%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 8.69%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO
MULTI-ASSET TARGET INCOME

Identificativo della persona giuridica:
549300MRV3FILX0BHB52

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **31.23%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.674 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.73 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO₂ che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

- Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.62% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari allo 0.51%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 4.92%.

sono

investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **24.55%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.06%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche

ambientali o sociali
che promuove.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL MULTI-ASSET

Identificativo della persona giuridica:
549300OD7WDES3BYBD54

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **34.23%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● *Come si sono comportati gli indicatori di sostenibilità?*

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.313 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● *... e rispetto ai periodi precedenti?*

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.49 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● *Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?*

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: Da 01/07/2023 a 30/06/24

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
AMND GOLD LBMA ETC(PAR)	Finanziari	Fondi comuni di investimento	Irlanda	4.23%

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.37% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
-**turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
-**spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1²?**

- ☐ Sì:
- ☐ In gas fossile ☐ In energia nucleare
- ☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.42%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 2.28%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **29.06%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.80%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario raggiunge

le caratteristiche ambientali o sociali che promuovono.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
GLOBAL MULTI-ASSET CONSERVATIVE

Identificativo della persona giuridica:
549300B1R0N20X3Z5K83

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Sì

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **31.75%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.633 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (C)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.62 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (C).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: Da 01/07/2023 a 30/06/24

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.37% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.43%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 2.89%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al 27.26% alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.12%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL MULTI-ASSET TARGET INCOME

Identificativo della persona giuridica: 549300MJSB1OV3IZ3T98

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **30.64%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.506 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.52 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti

umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.46% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato
quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale (CapEx)
investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx)
attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.40%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.28%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **23.79%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.38%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
NET ZERO AMBITION MULTI-ASSET

Identificativo della persona giuridica:
549300UWEKCHQNE88693

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **60.28%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compact), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● *Come si sono comportati gli indicatori di sostenibilità?*

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è 0.519 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è -0.012 (D).

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 93.73
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 110.21

● ... e rispetto ai periodi precedenti?

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.46 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.04 (D). Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 122.08 e l'indice di riferimento medio ponderato dell'intensità di carbonio era 127.65¹.

● Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

¹ Nel corso del 2023 l'indice di riferimento è stato sostituito con il 50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index e per coerenza abbiamo riportato l'intensità di carbonio di tale indice anche per il periodo precedente.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.68% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale(CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

☒ Si:

☐ In gas fossile ☒ In energia nucleare

☐ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di

investimenti in attività abilitanti era pari allo 0.52%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 10.80%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **49.44%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.17%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice composito 50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate

finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Change Corporate Bond Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 93.73.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 110.21

● ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Climate Transition Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

● ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

- Il rating ESG medio ponderato del portafoglio è 0.519 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è -0.012 (D).
- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 93.73
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 110.21

● ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice composito 50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
MULTIASSET REAL RETURN

Identificativo della persona giuridica:
222100UNVFMGHI5DQJ57

Si intende per investimento sostenibile un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **42.84%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.770 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.80 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco. Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- Voto: la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.06% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per

quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- fatturato** che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- spese in conto capitale(CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1?**

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 7.85%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **37.42%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.36%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

Gli indici di riferimento sono indici atti a misurare se il prodotto

finanziario rispetta le caratteristiche ambientali o sociali che promuove.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
MULTIASSET SUSTAINABLE FUTURE

Identificativo della persona giuridica:
549300E1QOFTUCHMCV76

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **67.59%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **30% MSCI WORLD + 70% BLOOMBERG EURO AGGREGATE (E)**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

Alla fine del periodo:

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
 - Esclusioni legali di armi controverse
 - Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compac), senza misure correttive credibili;
 - Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.104 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.718 (C)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.14 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.75 (C).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● **In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?**

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro “non arrecano un danno significativo” (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un’intensità di CO2 che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell’ambito della propria politica di esclusione, facente parte della Politica di Amundi per l’Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell’ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.04% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato

che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti

-spese in conto capitale(CapEx)

investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx)

attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.85%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 12.17%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al 56.84% alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.71%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
PIONEER FLEXIBLE OPPORTUNITIES

Identificativo della persona giuridica:
5493000SYHI3US1RDZ90

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **38.25%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.509 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.43 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario. **#2 Altri** comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.13% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.03% e la quota di investimenti in attività abilitanti era pari allo 0.99%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 11.07%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

● Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.95%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

● Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 8.96%.

● Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
INCOME OPPORTUNITIES

Identificativo della persona giuridica:
549300ILVTGROHRV6666

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **32.49%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.280 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.046 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato

denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: Dal 01/07/2023 al 30/06/2024

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
SHELL PLC	Energia	Petrolio, gas e combustibili di consumo	Regno Unito	3.20%
INTL BUSINESS MACHINES CORP	Tecnologie dell'informazione	Software e Servizi	Stati Uniti	2.78%
ABN AMRO BANK NV-CVA	Finanziario	Banche	Paesi Bassi	2.51%
KB FINANCIAL GROUP INC	Finanziari	Banche	Corea	2.33%

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Settore	Sottosettori	% Asset
Altri	Altri	22.35%
Securitized	Agency MBS	16.18%
Finanziari	Banche	8.54%
Corporate	Banking	6.78%
Finanziari	Servizi Finanziari	5.42%
Energia	Petrolio, gas e combustibili di consumo	4.40%
Finanziari	Assicurazioni	4.04%

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?**

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.01%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **26.46%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.02%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identificativo della persona giuridica: 549300B49TP3UV3FOI07

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X

No

Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato degli investimenti sostenibili con un obiettivo sociale: _____

Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 31.88% di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma non ha effettuato alcun investimento sostenibile

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 5% BLOOMBERG COMMODITY INDEX (VALO) + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Food Beverage & Tobacco -IG + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA GLOBAL INFLATION-LINKED GOVERNMENT INDEX + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata

confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.533 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.045 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.64 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.1 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di “best performer” si basa sull’esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un’impresa beneficiaria di investimenti. Per poter essere considerata “best performer”, un’impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L’identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l’impresa beneficiaria degli investimenti non dovrebbe avere un’esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d’azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell’impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo (‘DNSH’), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l’intensità carbonica) e specifiche soglie o regole (per es. che il livello dell’intensità carbonica dell’impresa beneficiaria degli investimenti non rientri nell’ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell’ambito della propria politica di esclusione, facente parte della Politica di Amundi per l’Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell’ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro “non arrecano un danno significativo” (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un’intensità di CO2 che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell’ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani?***

Descrizione particolareggiata: Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.

- La sottocategoria **#1B altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

Settore	Sotto settori	% Asset

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **fatturato** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?**

☐ Si:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 6.07%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **21.38%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.49%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
TARGET COUPON

Identificativo della persona giuridica:
2221009D0WCSI3Q32Q11

Si intende per investimento sostenibile un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **57.94%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.561 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.99 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio

ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri

fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- Voto: la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
AMUNDI REVENUS - OR	Finanziari	Fondi comuni di investimento	Francia	100.09%

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

Settore	Sottosettori	% Asset
<i>Finanziari</i>	<i>Fondi comuni di investimento</i>	100.09%
<i>Cash</i>	<i>Cash</i>	-0.09%

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.96% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato
che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti

-spese in conto capitale(CapEx)
investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx)
attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari allo 1.26%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 0.00%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **53.38%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.60%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Si intende per investimento sostenibile un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La Tassonomia dell'UE è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **37.39%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.507 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.29 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione

regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a

tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.02% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
-fatturato che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
-spese in conto capitale(CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

- Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 10.46%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **33.61%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.76%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

- **In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?**

Questo prodotto non dispone di un Benchmark ESG.

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche

ambientali o sociali
che promuove.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
ABSOLUTE RETURN MULTI-STRATEGY

Identificativo della persona giuridica:
549300G94XO1UF8XMQ66

Si intende per investimento sostenibile un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo ad alcun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia dell'UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **32.62%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.466 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.58 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti

umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.22% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di: -turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti. -spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde. - spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.50%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.81%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

● Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al 26.26% alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

● Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.13%.

● Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Modello di informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
ABSOLUTE RETURN GLOBAL
OPPORTUNITIES BOND

Identificativo della persona giuridica:
549300BBK38MPT8QZI59

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Sì

X

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **34.92%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso **caratteristiche di A/S**, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG GLOBAL AGGREGATE**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.876 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.699 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.94 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione

regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu
Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro

meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati.

Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.22% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- **Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?**

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
 - **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
 - **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
 - **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.06%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 10.35%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **31.94%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.76%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
QUANTITATIVE GLOBAL ABSOLUTE

Identificativo della persona giuridica:
213800ADK5DD5CTZQ486

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **18.52%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.067 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.21 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2023 al 30/06/2024**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.05% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra

corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.01%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.47%.

sono investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **16.97%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.50%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● *In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?*

Questo prodotto non dispone di un Benchmark ESG.

● *Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?*

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
MULTISTRATEGY GROWTH

Identificativo della persona giuridica:
549300U03843Z1MQX452

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **26.65%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.386 (D)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.54 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti

negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la quota maggiore degli investimenti del prodotto finanziario durante il periodo di riferimento, ossia: Dal 01/07/2023 al 30/06/2024

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili con obiettivi ambientali o sociali;
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.15% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹ ?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie.

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** che riflettono attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.18%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.12%.

sono

investimenti sostenibili con un obiettivo ambientale che non tengono conto dei criteri per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **20.79%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.71%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati.

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS
PROTECT 90

Identificativo della persona giuridica:

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

X No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **32.67%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo **INDEX AMUNDI RATING D**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.648 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.71 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.00 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

Settore	Sottosettori	% Asset
Finanziari	Fondi comuni di investimento	95.52%
Corporate	Banking	1.49%
Corporate	Settore Immobiliare (REIT)	1.18%
Altri	Altri	0.13%
Forex	Forex	0.05%
Tesoreria	Tesoreria	0.00%

Cash	Cash	1.64%

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.36% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti

-spese in conto capitale(CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari allo 0.36%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 3.34%.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.21%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.10%.

Quali investimenti erano compresi nella categoria "altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS CASH
EUR

Identificativo della persona giuridica:
5299002SSK89DA5VPJ96

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **59.52%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori di sostenibilità misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.849 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.051 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.66 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.04 (D).

● ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio

ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo

esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- **Voto:** la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Settore	Sotto settori	% Asset
Corporate	Banking	51.74%
Tesoreria	Tesoreria	12.53%
Altri	Altri	10.39%
Legato allo Stato	Agenzie	7.27%
Corporate	Beni Strumentali	5.71%
Corporate	Beni di prima necessità	4.57%

Corporate	Comunicazioni	3.14%
Corporate	Tecnologia	3.13%
Securitized	Attività ipotecarie	2.31%
Corporate	Società finanziarie	1.75%
Corporate	Beni di consumo voluttuari	1.16%
Corporate	Industria di base	1.01%
Corporate	Altre attività finanziarie	0.31%
Cash	Cash	-4.38%

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.63% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE 1¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per **quanto riguarda l'energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse

emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

- fatturato** che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti
- spese in conto capitale(CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.*

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● **Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?**

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.46%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● **In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?**

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 1.21%.

 sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

 Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **57.91%** alla fine del periodo. Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

 Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 0.97%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2a, del Regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS CASH
USD

Identificativo della persona giuridica:
529900YRTK94MJYXUO62

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

Si

No

Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____

in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

Ha effettuato **degli investimenti sostenibili con un obiettivo sociale:** _____

Ha promosso **caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **51.17%** di investimenti sostenibili

con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

con un obiettivo sociale

Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli indicatori

di sostenibilità

misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

● **Come si sono comportati gli indicatori di sostenibilità?**

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.736 (C)**.
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.051 (D)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

● **... e rispetto ai periodi precedenti?**

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.62 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.04 (D).

● **Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?**

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti

sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG (Amundi ESG Regulatory Statement) nel sito www.amundi.lu. Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

● ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ('DNSH'), Amundi si avvale di due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre agli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

- Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Sì, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il

nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato “Coinvolgimento della Comunità e Diritti Umani” che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell’andamento e delle misure adottate per porvi rimedio.

La Tassonomia dell'UE stabilisce il principio “non arreca un danno significativo”, in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di “non arreca un danno significativo” si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all’Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- **Esclusione:** Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull’Informativa (Disclosure).
- **Integrazione dei fattori ESG:** Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell’approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- **Engagement:** il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L’obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell’emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell’emittente per migliorare l’impatto delle attività di quest’ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l’economia globale.
- **Voto:** la politica di voto di Amundi risponde a un’analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- **Monitoraggio delle controversie:** Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono la **quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Da 01/07/2023 a 30/06/24**

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation
descrive la quota di
investimenti in asset
specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- la sottocategoria **#1B Altri investimenti allineati alle caratteristiche A/S** che contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

● **In quali settori economici sono stati effettuati gli investimenti?**

Settore	Sotto settori	% Asset
Corporate	Banking	51.90%
Altri	Altri	15.05%
Corporate	Comunicazioni	7.70%
Corporate	Elettricità	5.13%
Corporate	Beni di consumo voluttuari	4.07%
Finanziari	Fondi comuni di investimento	3.00%

Corporate	Tecnologia	1.67%
Corporate	Beni di prima necessità	1.66%
Securitized	Attività ipotecarie	1.17%
Corporate	Beni Strumentali	0.96%
Corporate	Gas naturale	0.71%
Corporate	Assicurazioni	0.71%
Legato allo Stato	Agenzie	0.70%
Cash	Cash	7.96%

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.39% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito all'obbligo di mitigazione dei cambiamenti climatici o agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE ¹?

☐

Si:

☐

In gas fossile

☐

In energia nucleare

☒

No

Nel periodo in esame non erano disponibili dati affidabili sull'allineamento alla tassonomia dell'UE per il gas fossile e l'energia nucleare.

¹Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia dell'UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non arrecano un danno significativo ad alcun obiettivo della tassonomia dell'UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Per conformarsi alla tassonomia dell'UE, i criteri per il gas fossile includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'energia nucleare, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

Le attività abilitanti consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra

l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:

-fatturato

che riflette la quota di entrate da attività verdi delle imprese beneficiarie degli investimenti

-spese in conto capitale(CapEx)

investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.

- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

* Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.

● Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Al 30/06/2024, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari allo 0.22%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

● In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

Alla fine del periodo precedente, la percentuale di investimenti con allineamento alla tassonomia era del 2.34%.

sono investimenti sostenibili con un obiettivo ambientale **che non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (EU) 2020/852.

● Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **48.33%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

● Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.45%.

Quali investimenti erano compresi nella categoria “altri”, qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

“#2 Altri” include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su <https://about.amundi.com/esg-documentation>, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

● In che modo l'indice di riferimento differisce da un indice generale di mercato pertinente?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Questo prodotto non dispone di un Benchmark ESG.

● Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?

Questo prodotto non dispone di un Benchmark ESG.
