GENERAL INFORMATION

The ICAV was incorporated initially in Ireland on 11 June 2010 and commenced operations on 1 October 2010 as an investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds pursuant to the Companies Act 2014. It converted to an Irish Collective Asset-management Vehicle pursuant to the Irish Collective Asset-management Vehicles Acts 2015 to 2021 as amended (the “Acts”) and commenced operations as an ICAV on 18 March 2016. Waystone Management Company (IE) Limited (the “Manager”) has been appointed as manager to the ICAV.

The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

The ICAV is constituted as an umbrella fund insofar as the share capital of the ICAV is divided into different classes of shares with one or more classes of redeemable participating shares representing a portfolio of assets which comprises a separate fund (each a “Sub-Fund”). Assets and liabilities are segregated between each Sub-Fund.

The investment objective and policies for each Sub-Fund will be formulated by the Directors at the time of creation of such Sub-Fund and will be set out in the relevant Supplement to the ICAV’s Prospectus for the time being in issue (“Prospectus”).

Shares representing any Sub-Fund may include shares of different classes to accommodate different subscription and redemption charges, dividends and fee arrangements. A Sub-Fund may hedge the foreign currency exposure of individual share classes against the Base Currency of a Sub-Fund or the currencies in which the assets of a Sub-Fund are denominated. A separate pool of assets is not being maintained for each class.

The following table details the Sub-Funds currently available for subscription. Investors should note that there can be no guarantee that any Sub-Fund will achieve its investment objectives.

Sub-Fund Name	Launch Date	Investment Objective
1OAK Multi Asset 40 UCITS Fund	To be launched	The Sub-Fund aims to achieve long term capital appreciation while maintaining a level of investment risk typically associated with a long term portfolio allocation target of 40% to equities and 60% to bonds.
1OAK Multi Asset 60 UCITS Fund	To be launched	The Sub-Fund aims to achieve long term capital appreciation while maintaining a level of investment risk typically associated with a long term portfolio allocation target of 60% to equities and 40% to bonds.

DEPOSITARY REPORT TO SHAREHOLDERS

For the year ended 31 December 2024

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed as Depositary to the ICAV, provide this report solely in favour of the shareholders of the ICAV for the year ended 31 December 2024 (the “Annual Accounting Period”). This report is provided in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, which implemented Directive 2009/65/EU into Irish Law (the “Regulations”). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the ICAV for this Annual Accounting Period and we hereby report, thereon to the shareholders of the ICAV as follows:

We are of the opinion that the ICAV has been managed during the Annual Accounting period, in all material respects:

- (i) In accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the constitutional documents and by the Regulations; and
- (ii) Otherwise in accordance with the provisions of the constitutional documents and the Regulations.

For and on behalf of:
Northern Trust Fiduciary Services (Ireland) Limited
Georges Court
54-62 Townsend Street
Dublin 2
Ireland

30 April 2025

DIRECTORS' REPORT

For the year ended 31 December 2024

The Directors of MontLake UCITS Platform ICAV submit their Annual Report and Audited Financial Statements for the year ended 31 December 2024 to the Shareholders. The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). It converted to an Irish Collective Asset-management Vehicle pursuant to the Irish Collective Asset-management Vehicles Acts 2015 to 2021 (as amended the "Acts") and commenced operations as an ICAV on 18 March 2016.

The Sub-Funds presented in these Financial Statements are listed on page 123.

Segregated Liabilities

The ICAV is an umbrella fund with segregated liability between Sub-Funds.

Activities and Business Review

A detailed review of the ICAV's activities for the financial year ended 31 December 2024 is included in the Investment Managers' Reports and significant events during the year are outlined in Note 16 to these Financial Statements.

Future Developments

The ICAV will continue to act as an investment vehicle as set out in the Prospectus.

Risk Management Objectives and Policies

The principal risks and uncertainties faced by the ICAV are the investment risks associated with the portfolio of investments held for the account of each of the Sub-Funds and the operational risks associated with its management and administration.

The information required under the accounting standard adopted by the ICAV, International Financial Reporting Standards as adopted by the EU ("IFRS"), in relation to the use for the account of the Sub-Funds of financial instruments, the financial risk management objectives and policies of the ICAV and the exposures of the Sub-Funds to market risk, currency risk, interest rate risk, liquidity risk, credit risk, price and cash flow risk are outlined in Note 10 to these Financial Statements.

Directors who held office during the year

The Directors who held office at any time during the year were: Cyril Delamare, David Hammond, David Tease (resigned 31 December 2024), and Raymond O'Neill.

Directors' Interests in Shares of the ICAV

Cyril Delamare was the beneficial holder of the following shares as at 31 December 2024: 1,739 (31 December 2023: 1,739) shares in the EUR Institutional Class Shares of DUNN WMA Institutional UCITS Fund, and 300 (31 December 2023: 300) GBP Institutional Class A Shares and 500 (31 December 2023: 500) Euro Institutional Class A Shares of Crabel Gemini UCITS Fund.

No other Director, nor the Company Secretary, had any beneficial interest in the shares of the ICAV or its Sub-Funds during the year or in the prior year.

Transactions involving Directors

Other than as disclosed in Note 13 to these Financial Statements, there were no contracts or agreements of any significance in relation to the business of the ICAV in which the Directors had any interest, as defined in the Act, at any time during the year.

Transactions with Connected Persons

The UCITS Regulations require that any transaction carried out with the ICAV by its manager or depositary, the delegates or sub-delegates of the manager or depositary, and any associated or group companies of such a manager, depositary, or a delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the year complied with these obligations.

DIRECTORS' REPORT (CONTINUED)

For the year ended 31 December 2024

Transactions with Connected Persons (continued)

The connected persons are the Manager, any appointed investment managers (the "Investment Managers"), Northern Trust International Fund Administration Services (Ireland) Limited (the "Administrator") and Northern Trust Fiduciary Services (Ireland) Limited (the "Depository") and their associated firms. The relevant fees charged by connected persons are detailed in Note 5 and the Statement of Comprehensive Income.

Statement on Relevant Audit Information

In accordance with the Acts, each of the persons who are Directors at the time the report is approved confirm the following:

- So far as the Director is aware, there is no relevant audit information of which the ICAV's statutory auditors are unaware, and
- The Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

Corporate Governance Code

Irish Funds, the association for the funds industry in Ireland, has published a corporate governance code (the "Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Board of Directors has adopted the Code, and the ICAV was in compliance with all elements of the Code during the year.

Results

The results of operations for the year are set out in the Statement of Comprehensive Income on pages 93 to 97.

Key Performance Indicators

The key performance indicators monitored for each Sub-Fund include the performance of the Sub-Fund, the level of subscriptions and redemptions and compliance with investment restrictions and risk limits. The performance of the Sub-Funds is reviewed in the Investment Managers' Reports on pages 17 to 68.

Accounting Records

The Directors believe that they have complied with the requirements of Sections 109 to 115 of the Act with regard to keeping adequate accounting records. The Directors have appointed the Administrator to maintain adequate accounting records. The records are maintained by the Administrator at its offices at:

Georges Court
54-62 Townsend Street
Dublin D02 R156
Ireland

Dividends

It is intended that dividends will be paid quarterly in respect of the distributing share classes in 10AK Multi Asset 80 UCITS Fund, Crabel Gemini UCITS Fund, Descartes Alternative Credit UCITS Fund, DUNN WMA Institutional UCITS Fund, Invenomic US Equity Long/Short UCITS Fund, One River Risk Responders UCITS Fund and, prior to its termination during the year, Kayne Anderson Renewable Infrastructure UCITS Fund. The Directors do not intend to declare dividend distributions in respect of the other Sub-Funds or classes. Accordingly all income and capital gains in respect of the other Sub-Funds and classes will be reinvested by the Sub-Funds and shall be reflected in the Net Asset Value per Share of the Sub-Funds and classes. Dividends declared and paid during the year are detailed in Note 15.

Significant Events During the Year

Any events which are material in the context of these Financial Statements during the financial year are detailed in Note 16.

Subsequent Events

Any subsequent events which are material in the context of these Financial Statements since the financial year end date are detailed in Note 17.

Independent Auditor

In accordance with Section 125 of the Act, KPMG, Chartered Accountants and Registered Auditors, have expressed their willingness to continue in office as the ICAV's auditor.

DIRECTORS' REPORT (CONTINUED)

For the year ended 31 December 2024

Manager

The Manager is responsible for the maintenance and integrity of the corporate and financial information relating to the Sub-Fund included on the Manager's website. Legislation in Ireland governing the preparation and dissemination of Financial Statements may differ from legislation in other jurisdictions.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

The Financial Statements are required to give a true and fair view of the assets, liabilities and financial position of the Sub-Funds at the end of the financial year and of the profit or loss of the Sub-Funds for the financial year. In preparing these Financial Statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the Financial Statements;
- assess the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Sub-Funds or cease operations, or have no realistic alternative but to do so. Please see Note 1 for details of Sub-Funds for which the Financial Statements have not been prepared on a going concern basis.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Sub-Funds and enable them to ensure that the Financial Statements comply with the Acts and the Central Bank UCITS Regulations.

They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Sub-Funds. In this regard they have entrusted the assets of the Sub-Funds to the Depositary for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Act.

On behalf of the Board

INVESTMENT MANAGERS' REPORTS

1OAK Multi Asset 80 UCITS Fund 2024 Performance Review

The Sub-Fund achieved a net performance of 12.15% for the year (GBP B Class shares) driven primarily by global equity markets. This was largely due to the Sub-Fund's average 86% allocation to equities and a strong 2024 performance for risky assets.

The fixed income allocation, in aggregate, contributed a negligible 0.11% to the Sub-Fund's performance. The normalisation of interest rates led to bond prices adjusting to fair values, while reductions in U.S. interest rates failed to boost bond prices significantly.

U.S. equities were the largest contributor, accounting for approximately 9.6% of the Sub-Fund's return. With an average 57% allocation to this asset class, the Sub-Fund's largest investment, it benefited from the S&P 500 reaching record highs in 2024. U.S. mega-cap technology companies were key drivers of this positive performance. Other notable contributions came from Japanese equities (+1.5%) and the Eurozone (+0.5%), with no equity investments incurring losses during the year.

Corporate bond investments delivered mixed results. Notable performers included:

- iShares JP Morgan USD EM Corp Bond UCITS ETF (+6.33%)
- iShares Core EUR Corp Bond UCITS ETF (+5.70%)
- iShares USD Corp Bond Interest Rate Hedged UCITS ETF (+4.28%)
- iShares J.P. Morgan USD EM Bond UCITS ETF (+5.71%).

Despite these strong performances, their small allocation meant they contributed just 0.18% to overall returns. The Sub-Fund's largest fixed income holding, the iShares USD Treasury Bond 20+yr UCITS ETF, weighed on performance, with a 6.97% decline as 20-Year Treasury Bond prices fell during the year.

The alternative allocation also underperformed, contributing negatively to the Sub-Fund's performance. The allocation, an absolute return certificate comprising CTA, FX, and global macro strategies, performed well until May 2024 but gave back all gains, closing the year down 0.30% (in USD).

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

ABR 75/25 Volatility UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund for the year (USD E Class Pooled shares) was +12.46%.

ABR Dynamic Funds, LLC is pleased to review the performance of the Sub-Fund from 1 January 2024 through 31 December 2024. The investment object of the Sub-Fund is to seek long-term capital appreciation. Investors should note that there can be no guarantee that the Sub-Fund will achieve its investment objective.

The Sub-Fund seeks to achieve the investment objective by investing in securities and derivative instruments that provide (i) long exposure to CBOE Volatility Index (the "VIX Index") futures, Exchange-Traded Funds ("ETFs") and Exchange-Traded Notes ("ETNs" and, together with ETFs, "ETPs"), (ii) long exposure to S&P 500 Index futures and ETPs; (iii) short exposure to VIX Index futures and ETPs; (iv) long exposure to long-dated U.S. treasury securities; and (v) exposure to cash. The Investment Manager's approach to managing the Sub-Fund involves creating a 75/25 blend based on the Fund's net assets, of (i) the Investment Manager's Long Volatility Strategy; and (ii) its Short Volatility Strategy (each as further described below). The strategies are model-based and rely on various measures of equity volatility to assess the level of volatility in the market environment.

Long Volatility: In low to medium volatility environments, the long volatility model typically targets a larger long exposure to S&P 500 Index futures and S&P 500 Index ETPs and a lesser long exposure to VIX Index futures and VIX Index ETPs. This lesser long exposure to VIX Index futures and VIX Index ETPs in low to medium volatility environments is intended to provide long volatility strategy exposure while also potentially reducing any possible drag on returns. In medium to high volatility environments, the model typically targets a lesser long exposure to S&P 500 Index futures and S&P 500 Index ETPs and a larger long exposure to VIX Index futures and VIX Index ETPs.

Short Volatility: In low volatility environments, the short volatility model typically targets a larger long exposure to long-term U.S. Treasuries and a lesser, but still meaningful, short exposure to VIX Index futures and VIX Index ETPs. This lesser short exposure to VIX Index futures and VIX Index ETPs is intended to provide meaningful exposure to the risks and expected returns of a short volatility strategy while also providing some mitigation in the event of sudden and rapid appreciation in the prices of VIX Index futures and VIX Index ETPs. In medium volatility environments, the model typically targets a lesser long exposure to long-term U.S. Treasuries and a larger short exposure to VIX Index futures and VIX Index ETPs. In high volatility environments, the model sometimes targets a lesser long exposure to long-term U.S. Treasuries and short exposure to VIX Index futures and VIX Index ETPs, with a larger exposure to cash.

2024 brought a continuation of the equity bull market, despite various geopolitical concerns and political elections. There were, however, two days during which the VIX Index made noteworthy moves.

On 5 August 2024, the VIX experienced its third largest one-day increase, in percentage terms, rising from 23.39 to 38.57 on concerns out of Japan and the unwinding of the yen "carry trade." Despite the headlines, a mere 4 days later, the VIX was back down to about 20, completing a full retracement.

On 18 December 2024, the VIX experienced its second largest one-day increase, again in percentage terms, rising from 15.87 to 27.62. And once again, just 4 days later, it had quickly reversed lower to close below 15.

The Sub-Fund primarily utilises a volatility trend-following model (with some elements of mean reversion). Rapid reversals generally present an unfavorable environment for a trend-following model. However, in these instances, the Sub-Fund's model was able to navigate the environments reasonably well.

For the full year, the S&P 500 Index was up 25.2%. Interestingly, and generally as a result of the two rapid reversals discussed above, both long exposure to VIX futures (SPVIXSTR Index) and short exposure to VIX futures (SPVXSPI Index) were meaningfully down on the year (-25.6% and -27.8%, respectively). Long-dated U.S. Treasuries were also down for the year (-8.0%, LT11TRUU Index). Despite this backdrop, the Sub-Fund succeeded in delivering its objective of capital appreciation, gaining 12.46%.

Sub-Fund performance figures refer to the USD E Pooled Class shares class. Different share classes may have different expenses and produce different returns.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Advent Global Partners UCITS 2024 Performance Review

Performance Returns

The Sub-Fund returned -0.57% net for the month of December resulting in a net 2024 return of +9.57% (USD Institutional Founder Pooled share class).

The Manager

The Sub-Fund is managed by Advent Capital Management, LLC ("Advent"). Founded in 1995, Advent has extensive experience investing in global convertibles, credit and equities. As of December 2024, assets under management are approximately \$8.2 billion.

Investment Objective & Strategy

The strategy primarily employs convertible bonds, credit and equities when managing and allocating capital to the Sub-Fund's sub-strategies: Idiosyncratic Volatility, Event Driven, Credit and Short Opportunities. The strategy seeks to generate strong absolute returns over a market cycle by identifying compelling long and short opportunities that may include single name convertible bonds and equities, capital structure arbitrage and other positively asymmetric event driven opportunities. Sub-strategy allocation decisions are based on the current and expected opportunity set and all sub-strategies may not be allocated to at all times.

Market Review

U.S. equity markets declined during the month of December, with the S&P 500 equity index returning -2.50%, but the index ended the year strong up +25.02%. Despite an additional rate cut by the U.S. Federal Reserve ("Fed"), markets were volatile as the sustainability of high equity valuations and the year-to-date rally sparked concern amongst investors. Equity index volatility, as measured by the VIX, spiked 74% mid-month to 27.62, up from 15.87 the previous day, after the Fed's forecast of fewer rate reductions in 2025. This, coupled with slowing progress on inflation, also weighed on equity markets. Small caps underperformed large caps during the month as the Russell 2000 was down -8.26%.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Advent Global Partners UCITS 2024 Performance Review (continued)

Market Review (continued)

In fixed income markets, the yield curve steepened and un-inverted for the first time since mid-2022, with the 2-Year and 10-Year Treasury Yields increasing by 12 basis points and 40 basis points respectively. Credit spreads also increased modestly during the month, but the shorter duration of high yield helped the ICE BofA U.S. High Yield Index (H0A0) index (-0.43%) outperform the ICE BofA U.S. Corporate Index (C0A0), which returned -1.78%. The convertible market, represented by the ICE BofA U.S. Convertible Index (VXA0), decreased during the month returning -3.98%.

There was \$12 billion of global convertible issuance in December, bringing 2024 total issuance to \$127.8 billion, a 42% increase compared to the strong primary market seen in 2023 and exceeding the range of \$80-\$100 billion of issuance expected during a healthy calendar year. The majority of new issue transactions were from U.S. companies, including a \$1.61 billion deal from PG&E, a \$1.40 billion issue from BILL Holdings, a \$1.1 billion deal from Live Nation, and a \$1 billion issue from Datadog.

Portfolio Discussion¹

The strategy returned -0.57% net in December. After a strong rally in November following the U.S. Presidential election, the convertible market took a breather in December. Concerns on further new issuance in the crypto/AI data center space cheapened the valuations in this sector, which served as a catalyst to cheapen prices more broadly across sectors. Moreover, the sharp rise in interest rates during the month – close to 40 bps on the 10th year – also weighed on valuations. In the portfolio we looked to exit several of the higher profile crypto-related convertible issuers, as we expect the ongoing capital needs will drive further new issuance, pressuring outstanding convertibles. We will look to redeploy this capital in new refinancing and volatility positions. During the month, we established a new position in Fluence Energy 2.25% convertible bonds. Fluence is an energy storage technology company. The convertibles were issued at a deep discount to the realised volatility of the equity. Another addition to the portfolio was the Southwest Airlines short-dated convertibles due May 2025. We modeled the embedded equity optionality as cheap to potential stock movements over the next several months, as well as the potential for a refinancing into a new convertible deal. We exited most of the new deals we purchased in December, as we felt that they richened to fair value and no longer represented an attractive return profile for the portfolio.

The top monthly performers included Fluence Energy, an energy storage technology solutions provider, and The RealReal, an online luxury resale marketplace. The largest detractors from performance included MARA Holdings, a bitcoin miner, and TeraWulf, an environmentally clean bitcoin mining operator.

A top performer was our position in the Fluence Energy new issue. The company is the market leader for grid-scale energy storage and software. The new issuance terms were highly attractive as Fluence Energy issued the convertible with a 2.25% coupon and an implied option value of ~50, while the 250-day realised volatility was approximately 75 – a substantial discount. Moreover, the equity has bouts where short-term volatility will rise well above 100. The bonds richened several points post deal. We trimmed the position into month-end as the 5-Year term was a bit longer than we ideally prefer. We still maintain that the position will provide an attractive risk-adjusted return.

Another top contributor was our yield-oriented convertible position in The RealReal 1% convertible bonds due 2028. The company stumbled over poor business execution and diminishing earnings over the last several years, resulting in the equity declining by over 90%, and the convertibles traded at big discounts. Early in the fourth quarter, our research indicated that the company was well advanced in a turnaround with expected growth in both revenues and EBITDA. During December the equity rose over 70%, and the convertible bonds increased over 8 points as the market dramatically tightened the credit spread assumption for the company's debt. The convertible had a very low delta. The majority of the gain was from credit improvement and the increasing expectation that the company would be able to access the convertible markets for a potential refinancing of the shorter-term convertible debt.

¹ The holdings identified as top contributors to or detractors from performance do not represent all of the strategy's holdings during the period. Past performance does not guarantee future results.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Advent Global Partners UCITS 2024 Performance Review (continued)

Portfolio Discussion¹ (continued)

MARA Holdings was a bottom performer in December. They issued a large well-received \$1 billion convertible last month, and they unexpectedly issued another convertible debenture in December. As a result, our position cheapened due to the increase of MARA convertible bonds. Additionally, most Bitcoin-related companies traded lower after a meteoric rise in November, and MARA equity sold-off sharply. These factors contributed to giving up prior gains on the position. By month-end we maintained a position in MARA as we felt that the cheapening was temporary, and the bonds had gotten to highly attractive valuation levels. As has been the case historically, selloffs such as these have served as excellent opportunities to establish, maintain, or add to positions.

TeraWulf detracted from performance. The power generation company initially focused on bitcoin, but it is shifting towards AI data center growth and is part of our event sub-strategy. The company has been actively negotiating AI conversion contracts with power generation for AI data centers. Our research indicated that the company would announce a 500 megawatt deal with a technology company by year end. They instead announced a 65 megawatt agreement, disappointing investors. This, coupled with poor sentiment broadly in the bitcoin-related space in December, caused the equity to decline over 25% during the month, yet it was still up 130% on the year. We expressed our long-term view by holding the convertible discount bonds on a lighter equity delta than market delta, given the positive asymmetry that the discount convertible provided. We maintain our position as we expect further announcements in 2025 that will likely trigger continued volatility in the stock.

Outlook

A new U.S. administration, coupled with ongoing uncertainty over monetary policy, will create high levels of financial asset volatility in 2025. Whether or not President Trump reruns the same playbook as his first administration, it is likely that his policies will create large price movements as they did previously. In addition, Trump's actions may serve to reignite inflation, which was not an issue during his initial term, further magnifying asset price volatility. As has been the case historically, this market environment is positive for the strategy, and we believe the Sub-Fund is well positioned to continue to generate attractive returns.

Portfolio Managers**Tracy Maitland**

Mr. Maitland serves as President and Chief Investment Officer of Advent Capital Management. Prior to starting Advent Capital Management in 1995, Mr. Maitland was a Director and National Sales Manager in the Convertible Securities Department in the Capital Markets Division at Merrill Lynch. During his 13-year tenure at Merrill Lynch, Mr. Maitland advised institutions on investing in specific convertible issues in their respective convertible, fixed income and equity portfolios. The extensive investing knowledge that Mr. Maitland developed at Merrill Lynch inspired him to create Advent Capital Management in order to satisfy the growing demand for investment expertise in convertible securities and other parts of the capital structure that are influenced by convertible valuations such as high yield and bank debt. Mr. Maitland is a graduate of Columbia University.

Odell Lambroza

Mr. Lambroza joined Advent in 2001 as a Principal and serves as a portfolio manager on the strategy. Prior to Advent, Mr. Lambroza was Head of Convertibles and Equity Derivatives at Société Générale. Previously, Mr. Lambroza managed the sales and trading departments at HSBC Securities and Bankers Trust. Mr. Lambroza began his career at Merrill Lynch and served as Vice President of Convertible Trading, Structured Equity Derivative Products and Asset Swaps. Mr. Lambroza is a graduate of Cornell University and has over 30 years of industry experience.

Total assets \$ 131.05 MM. Performance shown is that of the FIUI class shares.

Global markets delivered remarkable performances across various sectors, with the S&P 500 (SPY) and Nasdaq 100 (QQQ) achieving over 25% year-to-date. Large-cap growth (iShares S&P 500 Growth ETF) led the charge with an exceptional 35.82% gain, while large-cap value (iShares S&P 500 Value ETF) experienced a modest 12.04% rise. Small-cap stocks showed mixed results, as the small-cap value ETF (iShares S&P Small-Cap 600 Value ETF) closed the year up 7.34%. In Asia, China's equity markets rebounded positively amid significant monetary and fiscal stimulus measures. The People's Bank of China (PBoC) reduced policy rates and announced substantial stock market support, boosting investor sentiment despite persistent economic challenges. Emerging markets experienced varied outcomes; while some benefitted from easing monetary policies and strong commodity prices, others faced geopolitical tensions and economic instability. Developed markets outside the U.S. and Europe underperformed, with the Bloomberg Developed Markets ex-U.S. Index gaining only 5.5%, though currency-adjusted returns showed slight improvement.

In the U.S., the Federal Reserve's monetary policy played a pivotal role in shaping market dynamics. Throughout 2024, the Fed adjusted the Federal Funds Rate, concluding the year at approximately 4.5%. These actions aimed to balance inflation control with economic growth support. The yield curve's spread between 2-Year and 10-Year Treasury Yields, at 0.41% by mid-January 2025, indicated moderate economic growth expectations and a positive outlook for inflation stability. Historically, a positive yield curve spread is associated with economic confidence, contrasting with the recessionary signals of an inverted yield curve.

2024 Summary

The second half of 2024 was marked by dynamic developments in fixed income markets and monetary policy. July started with mixed performance in U.S. markets, as the Nasdaq 100 declined by 1.59% while the S&P 500 rose by 1.22%. Inflation showed signs of cooling, with Core CPI coming in below expectations, prompting the Federal Reserve to hold rates steady. The Investment Grade and High Yield indices posted solid returns, and the 10-Year Treasury Yield fell to 4.02%. The Sub-Fund delivered a 1.59% return in July, underperforming the benchmark's 2.27%, but made key strategic moves, including purchasing Phoenix Group Holdings bonds and reallocating toward European investments.

August saw a continued decline in yields, driven by weaker payroll data and a shift in market expectations toward rate cuts. By September, the Federal Reserve enacted its first rate cut in years, reducing rates by 50 bps, emphasising labour market conditions over inflation. While yields declined initially, market conditions remained tight, reflecting limited loosening of financial conditions.

October proved challenging, with rising Treasury yields and weaker bond performance across Investment Grade and High Yield markets. The U.S. economy displayed resilience with robust job growth and wage increases, though inflation continued to slow. Market expectations for rate cuts softened, adjusting to a more measured pace.

In November, Donald Trump's election victory initially pushed yields higher, but subsequent declines were supported by softer employment data and moderate inflation. Treasury and corporate bonds rebounded, particularly in the High Yield space, while derivative trades contributed positively to portfolio performance.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Alpha Fixed Income UCITS Fund 2024 Performance Review (continued)

2024 Summary (continued)

December capped the year with increased market volatility. The Federal Reserve cut rates by 25 bps but maintained a cautious outlook, signaling limited additional easing. Treasury yields climbed, driven by expectations of fiscal measures from the incoming Trump administration. The Sub-Fund navigated these conditions with mixed results, benefiting from yield curve steepening trades but offset by losses in other positions.

Outlook for 2025

The Sub-Fund anticipates 2025 to be shaped by evolving monetary and fiscal policies, as well as geopolitical developments. The Federal Reserve is expected to maintain a cautious approach to rate cuts, prioritising labour market stability and financial conditions. While inflation appears to be moderating, potential fiscal measures from the Trump administration, such as tax cuts and tariffs, could reignite inflationary pressures and lead to further yield curve steepening.

In fixed income, corporates are expected to perform well, with spreads remaining tight. Current market dynamics suggest that spreads over 300 basis points are unlikely, reflecting strong fundamentals and investor appetite for higher-quality credits. We foresee opportunities in shorter-duration bonds and selective corporate credits, particularly in Europe, where macroeconomic conditions are improving. European financials, industrials, and luxury goods sectors remain attractive, supported by robust fundamentals and diversification potential. Emerging markets may offer selective value, but we will approach with caution given heightened geopolitical risks.

In derivatives, the Sub-Fund will focus on hedging currency exposure and capitalising on relative value trades, particularly in yield curve positioning and FX carry strategies. Tactical allocations will prioritise resilience in a potentially volatile environment, while maintaining liquidity to seize opportunities as they arise.

Overall, the Sub-Fund is positioned to navigate a complex economic landscape, balancing growth opportunities with prudent risk management to deliver sustainable performance in 2025.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

AlphaQuest UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund for the year was -2.31%.¹The Sub-Fund faced the headwinds of an exceptionally strong risk-on environment in 2024 following a similarly exuberant 2023. Historically, equities have, on average, faced a more challenging environment following a strong two-year run. We believe that investors are likely to benefit from the statistical insurance the Sub-Fund provides in a portfolio should a significant correction occur in the near or intermediate term.

Through the first four months of 2024, the Sub-Fund performed strongly, benefiting from short positions in the yen and long positions in gold and equities. The Bank of Japan had kept interest rates lower than other countries, despite inflation being elevated and above the 2% target for over two years, causing the yen to fall to its weakest level versus the U.S. dollar since 1986, a trend the Sub-Fund recognised and profited from. As a result of this move, Japanese authorities intervened in the currency markets to support the yen and lifted interest rates for the first time in 17 years. This reversal meant that some of the profits in the first half of 2024 were subsequently given back. Within currencies, the Sub-Fund also incurred losses from a long position in the euro (vs. the USD), concentrated in the summer months.

Within commodities, a long position in precious metals throughout the year bolstered the Sub-Fund's performance. During 2024, because the central banks of G7 countries (excluding Japan) moved to cut interest rates for the first time in years, the relative attractiveness of gold as a safe-haven (and zero yielding) asset was further supported, in addition to the move by many central banks to increase their gold reserves, especially China. The rising price of gold was a trend the Sub-Fund's models acknowledged and captured, leading it to be the best performing asset during 2024.

While some commodities like gold were profitable for the Sub-Fund in 2024, crude oil proved challenging for the strategy, particularly in the latter half of the year. These losses were caused by whipsawing of the price of oil, particularly in the fourth quarter around the U.S. election. The price of oil was choppy, narrow and volatility compressed throughout the latter half of the year, a headwind for trend following managers in general, and resulting in the largest losses for the Sub-Fund in 2024.

Despite the challenging market conditions, the Sub-Fund demonstrated its ability to adapt and navigate through volatility. The Sub-Fund's performance was marked by significant gains in the first half of the year, followed by challenges in the latter half due to geopolitical events and central bank interventions. Overall, the Sub-Fund's performance in 2024 highlights its resilience and adaptability in a complex market environment.

¹Performance figures are representative of the USD Institutional Share Class.

INVESTMENT MANAGERS' REPORTS (CONTINUED)**Chelverton Select Consumer Staples Fund 2024 Performance Review***

The Class A shares of the Sub-Fund finished down -4.82% in EUR in 2024, lagging behind markets that were largely driven by strong gains for a small number of mega-cap technology companies. Our exposure to the beauty and spirits industries had the most notable impact on returns, with the U.S. (spirits) and China (beauty) markets being particularly weak. We continue to believe that these are the two most attractive sub-sectors of the broader Consumer staples industry, as they earn the highest gross margins. This, in turn, allows for the highest marketing support behind brands that can travel internationally, in a way that other sub-sectors cannot. Although we are always disappointed to see a period of negative returns, we are reassured by the future growth prospects for the underlying earnings and cash flows of the portfolio. We continue to believe that the steady and consistent compounding characteristics of our strategy will deliver attractive returns over an extended period of time.

Our work, using over 40 years of data, shows that the Consumer staples sector has generated higher returns than the wider market, but with lower risk, and in that period the strategy has never lost money over any holding period of five years or more. Not all Consumer staples companies are reliable compounders, and there are of course companies in other industries that can also sustain steady growth, but we are confident that there are enough high-quality Consumer staples companies in our universe that we can spend 100% of our time on this sector.

The critical factor in the success of consumer staples companies is consistency; growth is steady and does not require lots of capital investment, giving scope for attractive dividends or share repurchases instead. Consumer staples is rarely the most exciting sector in stock market terms and doesn't produce the instant gratification that investors often seem to seek, but it is relatively immune from the cyclical and technological or fashion changes that hold back returns elsewhere.

Brands such as Campari, Heineken, Lindt and Nestlé are amongst the world's oldest and most iconic. The fact that the businesses and brands in our portfolio have been around for so long gives us a lot of comfort. Consumers come back to brands they know and trust in the developed world, and they are aspirational to large swathes of the growing middle classes in emerging markets. It is these brands that allow their owners to generate high and sustainable margins and underlying returns on capital.

We aim to run a high-quality, concentrated portfolio of 25-35 stocks. We seek to own businesses which we believe are capable of compounding earnings and cash flows at attractive rates for the foreseeable future, so we also expect portfolio turnover to be low.

The biggest contributor to performance in 2024 was L'Occitane, which was the largest position in the portfolio at the start of the year. The Chairman and majority shareholder Reinold Geiger announced a plan to take the company private which, although it resulted in the shares rising over 50%, did also mean that we lost a highly attractive business that we had expected to own for the next 5 years or more. Whilst we never buy a stock in the hope it will get taken over, it is a natural (& attractive) feature of our strategy that if we own good brands that are managed by good people, there will always be a (long) list of potential industry acquirers. Given the cash flow profile of the industry, this is a natural way for the larger companies to invest. L'Oreal, for example, owns 47 brands and has acquired all but two of them over the last 60 years.

The second biggest positive contribution to performance in the year was BellRing Brands, the owner of the Premier Protein and Dymatize brands. Although the company was only listed in 2019, the 2 main brands are over 25 years old and have both been gaining share in the attractive and fast-growing protein drinks and powders category. Premier Protein is now the no.1 brand in the Ready-to-Drink protein category, with a market share of over 20% (it was less than 5% when the company had its IPO). It was the main addition to our portfolio in 2022 and performance was initially held back by capacity constraints. As these have eased, sales growth has accelerated, enabling Premier Protein to achieve market leadership.

The other significant positive contribution came from Unilever, which is enjoying the start of what should be a sustained period of strong performance under a new leadership team. The Board and Executive team have been transformed under the guidance of Nelson Peltz, in a manner reminiscent of the changes he achieved at P&G just over 5 years ago – changes that were vital in driving the improved performance of that business. New Unilever CEO Hein Schumacher, and his highly capable CFO Fernando Fernandez, have created a clarity of thought that had long been missing under the previous team. The speed of improvement in performance highlights just how strong the underlying businesses are, with probably the best emerging markets footprint of any large Consumer staples business. We believe this improved performance has many years of continued growth ahead of it.

Performance from our Asian beauty stocks, other than L'Occitane, was disappointing. There was a strong and accelerating recovery in Japan, benefiting from both domestic demand as well as increased inbound tourism. Despite this, economic weakness in China and problems with informal, cross-border trade offset the domestic recovery and weighed adversely on sentiment. Estée Lauder was also a casualty of these trends, although we had reduced our position a few years ago and so we were able to double the weighting towards the end of the year, after the shares had fallen over 70% from the peak.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Chelverton Select Consumer Staples Fund 2024 Performance Review* (continued)

To replace the holding in L'Occitane, we added a new position in Colgate, as well as adding to a number of others, notably Jamieson Wellness, Reckitt, Fever-Tree and Estee Lauder (as above). We believe Colgate is in a similar position to Unilever, enjoying a period of sustained sales growth and margin expansion after it re-built the advertising support behind its key Oral Care franchise. After the initial hit to margins, market share is now growing and margins are following.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Collidr Adaptive Global Equity UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund for the year 2024 was +6.90% (GBP Institutional A Class shares).

2024 was another strong year for equity markets. Similarly to 2023, returns in global equity markets were dominated by large cap U.S. equities, with returns from the rest of the world lagging behind. For the second year in succession, U.S. equity markets produced a return in excess of 20% over the year. Once again, returns in the U.S. were dominated by a small group of stocks, namely growth and technology stocks, which now constitute a large proportion of the overall index. Therefore, the narrative was very similar to 2023.

To say that it was a re-run of 2023 would, however, be disingenuous. There were other metrics at play. Firstly, inflation figures started to fall, encouraging investors to expect the U.S. Federal Reserve ("Fed") to cut interest rates heavily. While the Fed did reduce interest three times in 2024, this was less than the market expected and there was some volatility, particularly in the growth sector, while the market re-adjusted its expectations. Towards the end of the year, the U.S. Presidential election had a substantial impact on U.S. equities. The strength of the victory removed concerns of any challenge to the result, giving U.S. equities, and particularly growth and technology names, a boost over the last two months.

Elsewhere in the world, political issues continued in Europe, particularly in both Germany and France. There was also a general election in the UK, with Labour returning to power after 15 years in opposition. The existing productivity and growth problem in the UK remains a challenge for the new Chancellor. China introduced some stimulus measures in late September to help improve the economy. Japanese equities had a strong start to the year, with substantial returns in January and February, before remaining rangebound for the rest of the year. Overall, U.S. equities were dominant in returns and investors who were underweight the U.S. and underweight the growth and technology sector are likely to have struggled.

The Sub-Fund uses a quantitative system to direct the level of market exposure taken by the Sub-Fund. This system uses various metrics involving sentiment, technical and volatility factors to adapt to market conditions.

The Sub-Fund maintained participation levels with global equity markets in the first quarter. However, as growth and technology stocks started to dominate, the Sub-Fund began to underperform slightly. This was particularly noticeable post the U.S. election result, as the growth sector substantially outperformed the value sector going into the year end. This resulted in the Sub-Fund's U.S. stock book underperforming the index. Over the year, the UK, European and Japanese stock books all traded in line with their respective indices. Overall, performance was positive and in line with expectations for the Sub-Fund.

Going forward, the quantitative system will continue to direct the level of beta taken by the Sub-Fund. The Sub-Fund started 2025 with full market participation. The level of beta is determined on a daily basis and the Sub-Fund retains a strong exposure to equity markets but is ready to reduce exposure should signals dictate. The Sub-Fund will continue to adapt to market conditions to ensure the appropriate level of market exposure is taken to remain in line with the Sub-Fund's mandate.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Cooper Creek Partners North America Long Short Equity UCITS Fund 2024 Performance Review

Over the past 12 months, the Sub-Fund (USD Institutional Class shares) has generated a 11.58% return, averaging -3.7% net long exposure, with a slightly negative beta and negative correlation to the Russell 2000 of -0.04 and -0.11, respectively. Longs contributed 14.1%, while shorts detracted 2.5%.

On a last-36-month-trailing basis, the Sub-Fund has generated a 17.1% annualised return, with a beta and correlation to the Russell 2000 of 0.05 and 0.12, respectively, while averaging 0.6% net short exposure.

Since inception in 2008, the Sub-Fund has generated a 12.7% annualised return, with 1.9% average net exposure, while exhibiting a 0.06 beta and 0.14 correlation to the Russell 2000.

In 2024, eleven longs and five shorts each contributed 100 basis points or more to performance. The top contributors included MasTec (MTZ), Planet Fitness (PLNT), CoreCivic (CXW), The GEO Group (GEO), Newell Brands (NWL), Bath & Body Works (BBWI), Genius Sports (GENI), and Nordstrom (JWN) on the long side, as well as three "Peak Margin Stories" and one "Unsustainable Dividend Yields" situation on the short side. During the year, eight of our top 20 short winners cut their dividends, the best hit rate in this category since inception. We remain optimistic about opportunities in this short category.

As we look to the year ahead, we anticipate an increase in volatility from 2024. We expect headline and actual risk in the first few months of the new U.S. presidential administration, due to the inherent uncertainty around Trump's agenda and how quickly and forcefully certain tenets will be implemented. While Trump's push for deregulation should clearly benefit the economy, many of his other policies may have positive or negative effects based on how they are executed. For example, the Department of Government Efficiency ("DOGE") team has had over a month to prepare its "target list" for government cost cutting. This team may act quickly on its government rationalisation efforts or may be put on the back burner as other initiatives are prioritised. While the long-term effects of reduced waste in government spending should be a net benefit to the U.S. economy, the short-term effects of the DOGE team's actions may be quite harmful. For example, government worker firings, as well as reduced or cut contracts with private sector public companies, could be a negative shock to the overall U.S. economy and future public company earnings. Therefore, we believe these Trump initiatives will result in increased volatility and uncertainty.

Tariff headlines, and any implementation of tariffs, represent an opportunity for us, creating differentiation between companies in the same subsectors and significant winners and losers. While these tariffs add risk to the equity markets and the companies we follow, one could argue that tariffs, if implemented in a direct, immediate, and forceful way will likely shock the US economy, creating a binary event. However, if tariffs are phased in gradually, i.e., a small amount each month or year, rather than as previously described, the equity markets may be relieved and cheer such a decision as the worst-case scenario will have been avoided. It is for this reason that we maintain a balanced portfolio, seeking potential beneficiaries and losers within the sectors in which we invest, continuing to rely on stock-picking, rather than the beta of the market to generate our returns.

Thus, we expect to be able to continue applying the "Cooper Creek playbook" successfully in a volatile, headline-driven market, creating significant idiosyncratic opportunities on both sides of the portfolio. We have integrated our learnings from the past 16 years, made slight tweaks over time to risk management and trading orientation, and continue to apply those lessons as we maneuver throughout 2025.

We begin 2025 fully invested, encountering intriguing opportunities on each side of the portfolio. On the long side, we continue to own all of 2024's largest winners, though MTZ and JWN are materially smaller positions. Newell Brands (NWL) remains one of the top positions. Newell is a compelling operating margin turnaround story led by a strong new management team. This consumer company has been hampered by a messy past and one-time issues related to inventory de-stocking and replacement cycles. Trading at a severe discount to its historical multiple, we see material upside to revenue and margins regardless of the consumer backdrop over the next several years, and a multiple rerating as the company rebrands itself to equity investors.

On the short side, the largest area of focus continues to be upon equity opportunities stemming from balance sheet issues. We are intrigued by six new companies, including Kohl's (KSS), Vail Resorts (MTN) and Bloomin' Brands (BLMN), with stretched balance sheets and high leverage ratios, resulting in the potential for dividend cuts or other shareholder destructive actions. Moreover, with continued geopolitical risks and shifts in conflict areas, alongside a volatile presidential agenda, we expect to encounter many companies with elevated margins with one-time events to drive downside. The backlog of new ideas remains robust and we expect to continue to operate with a fully invested portfolio over the coming months, but with the potential for an increasing turnover ratio.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Crabel Advanced Trend UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (USD Founder Class shares) for the year was -0.61%. After a very strong start to the year through April, the Sub-Fund struggled to gain traction over the final eight months of the year. While positive return attributions were sourced in both the equities and fixed income sectors, losses elsewhere pushed the Sub-Fund to negative on the year. In particular, the foreign exchange sector saw the largest negative attribution. To better understand why the year was challenging, it is helpful to give a broad overview of macro events that confounded financial markets in several spots.

Coming into the year, it was believed the Federal Reserve was likely to make substantive cuts to the Federal Funds Rate. Indeed, there were several cuts over the second half of the year, but the reduction in interest rates proved far smaller than expected. Still, the constructive sentiment earlier in the year pushed equities higher over the first half, which proved the most rewarding trend for the Sub-Fund over that time span. From a fixed income perspective, the first half of the year proved valuable as several large U.S. interest rate markets provided good returns. As an example, several U.S. treasury markets from across the maturity spectrum were among the 20 strongest attributions through the month of April. There were other notable moves early in the year, including in Cocoa and Gold. The Sub-Fund did not have direct exposure to Gold and Silver but were indirectly exposed as part of the SFI note held. Both rallied aggressively and provided good returns for the Sub-Fund. However, as the year progressed towards the middle third, several large macro factors began to weigh more meaningfully on market moves.

The unrest in Ukraine continued and grew intractable as both sides became entrenched. The conflict in the Middle East became more severe and raised alarms throughout the region and beyond. Further, inflation, which was expected to show meaningful signs of a slowdown, proved far stickier than expected. These factors and others disrupted the trends established over the first half of the year. Further, as market participants began to focus on the U.S. Presidential election in November, uncertainty surrounding President Biden's potential candidacy added to the unease. The result was several large macro shifts over the second half of the year that toggled positions back and forth.

The U.S. Dollar weakened aggressively through the middle of the year, coinciding with a downtick in yields and rallying interest rate futures markets. Additionally, while equity markets generally remained strong and the Sub-Fund solidified its bullish holdings, markets suffered from sudden sharp pullbacks and whipsaws. Most notably, over the first two trading days of August, Japanese equities saw one of the most precipitous sell-offs in recent memory. Adding to the difficulties, the energy sub-sector in the commodities sector whipsawed aggressively before settling into an ever-tighter trading range over the last quarter of the year. While these moves, at times, provided opportunity, the Sub-Fund toggled long and short several times, particularly in equities and foreign exchange, resulting in losses. Additionally, one of the value propositions of the Sub-Fund is its relatively fast reactions to sharp market sell-offs. This is particularly valuable when a meaningful risk event over a day or two precedes a much larger deleveraging. The Sub-Fund responds by utilising stops to reduce risk, and, depending on the size of the move, dynamically and systematically adjusting to medium-term trend strategies, away from longer-term.

The impact of this in 2024, however, was negative, as adverse market moves generally reverted quickly. As a result, the Sub-Fund's purposely faster response time meant strategies were often underweight in the quick snap-back V-shaped recoveries. This was most evident with the move in the Nikkei 225 Index over the first trading days of August. However, despite a sub-optimal environment in 2024 for long-term trend, the Sub-Fund was able to avoid large losses. Other markets such as Cocoa, Gold, and Coffee were able to add nicely to returns. While foreign exchange trading was frustrated by geopolitical uncertainty and inflationary concerns, several markets were able to post good returns, including the Korean Won and the British Pound/Australian Dollar cross. Further, a disappointing overall year for the Sub-Fund provided strong continued motivation to improve through fresh research.

A number of key research initiatives provided excellent strategy additions to complement the core trend methodologies. Already, several of these position modifiers have been able to add to returns. Additionally, with a relentless pursuit of reduced execution slippage, 2024 proved one of the lowest slippage years on record. All these factors, as well as the often-cyclical nature of trend following returns, provide grounds for possible optimism heading into the new year.

Crabel Capital Management, LLC

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)**Crabel Gemini UCITS Fund 2024 Performance Review**

The net performance of the Sub-Fund (USD Institutional Class shares) for the year was +0.70%. The fixed income sector provided the largest boost to performance on the year. The equities sector was also able to post a meaningfully positive attribution. However, the foreign exchange sector proved mixed, ending flat on the year, while commodities struggled to a negative attribution. Many of the largest, most liquid markets lacked multi-day to multi-week directional follow-through during the year. As an example, in anticipation of possible U.S. Federal Reserve action to lower the Federal Funds Rate, fixed income markets strengthened mid-year after a generally increasing interest rate environment. Similarly, inflation was initially believed to have peaked and was expected to recede, but this proved optimistic and sticky inflation prints confused market participants, driving erratic market behavior. These factors also impacted foreign exchange markets where at times the U.S. Dollar weakened, before appreciating more meaningfully in the final months of the year.

Continued conflict in Ukraine and sporadic unrest in the Middle East fueled extremely choppy energy markets. As a result of these conflicting price signals, markets operated without significant, sustained follow-through. In some cases, for instance in the fixed income sector, price movement was sufficient for some strategies, most notably in the Opportunistic strategy category, to gain traction. In others, such as energy, the environment of choppy moves within tight ranges made trading very difficult for core strategies.

While Reversal strategies were able to take advantage of indecisive market price action in the commodities sector, Volatility Breakout had a difficult time and traded to a meaningful loss, particularly in energy markets. Overall, Volatility Breakout strategies lost money in all four market sectors. In that sense, it would be fair to suggest that 2024 was a sub-optimal and whipsaw-oriented market environment for core directional strategies. There were, however, meaningful exceptions to the generally difficult market environment. For example, at the start of August, a sharp equity sell-off caught markets desperately unaware. Some equity indices, most notably the Nikkei 225 Index, sold off well into the double digits over the first two trading days of the month. Then, markets reversed just as aggressively on the third trading day of August. This type of market behavior, where markets move energetically beyond their typical recent range profiles, can provide fuel the Sub-Fund can use to its advantage.

Indeed, with the fresh breeze of large price moves, the Sub-Fund enjoyed its second strongest month since inception in August. Because of the sharp reversal, Reversal strategies were the cornerstone driver in August. Similarly, as markets digested the dramatic move early in the month, continued price discovery and movement catalysed a strong Volatility Breakout performance month in late August that continued into September. These spots of volatility in markets were not the only bright spots for the Sub-Fund. Several foreign exchange markets also experienced meaningful price moves. As an example, the Japanese Yen at times showed strong price directionality as market participants took advantage of the historic carry trade opportunity in Yen crosses. The Yen weakness reversed aggressively mid-year as the carry trade unwound, before resuming over the final third of the year. Both the migration into carry, and aggressively out of it, provided opportunity across multiple strategies for the Sub-Fund. Partly as a result, three of the eight best markets traded on the year were foreign exchange crosses relative to the Japanese Yen.

In many ways, 2024 proved a particularly challenging environment for directional short-term trading strategies. This is represented in the negative attribution from the Volatility Breakout strategy category. That said, other diversifying strategy categories all posted positive results to push the Sub-Fund into positive territory.

Further, a challenging year for core directional strategies provides opportunity for continued refinement. With a year defined by indecisive macro conviction across market sectors, opportunity could arise for meaningful macro-driven directional moves to come. If this proves the case, 2025 could provide heightened opportunity for the Sub-Fund's core directional strategies. Further research improvements, not only into new strategies and allocation concepts, but also into trade execution, could further advantage the Sub-Fund. As an example, in 2024 the Sub-Fund was not only able to provide a meaningfully higher volatility profile – something that should continue going forward – but also experienced historically low slippage impact. These factors and others suggest grounds for optimism heading into the new year.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

DART Fund 2024 Performance Review

The net performance of the Sub-Fund for the year was 9.51% (Founder class).

The Tosca Market Thinking Fund (17 January 2025: renamed the DART Fund (Dynamic Absolute Return Thematic Fund)) is a Global Equity Fund that instead of picking individual stocks allocates to a number of Thematic baskets, overwhelmingly in the form of large and liquid third party ETFs and ETNs. In recent years the number of these products has risen exponentially, allowing investors to now gain diversified exposure to long term global themes while diversifying away stock specific risk. The Sub-Fund employs a proprietary conviction score process to drive portfolio construction with the aim of participating in themes that are in bull phases while avoiding ones that are in bear phases.

The Sub-Fund also uses a number of leading edge AI processes to assist the managers, both in the research and selection of themes and the risk management of the selected baskets. The unconstrained nature of the Sub-Fund means that when the managers cannot find any suitable underlying investments that meet the conviction criteria, the Sub-Fund can instead hold cash. This is different from a top down market timing tool, but acts as a form of automatic stabiliser, allowing for the Sub-Fund to have lower drawdowns and lower volatility than the broad global benchmark.

During 2024, the Sub-Fund was fully exposed to global equity markets through a combination of around 16 different global themes and factors, with the portfolio construction varying during the course of the year. Towards the end of the year, the AI enhancement allowed the managers to add several new and emerging themes, which allowed some further diversification but also added some more beta to the process as the newer themes tend, on average, to be more volatile.

The macro environment during 2024 was dominated, with hindsight, by the election of Donald Trump, but there were many other factors driving things in the earlier part of the year. Markets began the year highly optimistic on bonds, for example, before turning negative in the first quarter and continued to alternate between optimism and pessimism throughout the year, creating a noisy background for markets. There was a lot of political noise too, with the French and the British both calling early elections, but that was mainly played out in FX markets and, of course, Gold – one of our themes.

Mid-year, the US political scene began to heat up, including an assassination attempt on Donald Trump that shifted the market mindset towards a Trump White House, but markets were also caught out by Japan, where a small interest rate move triggered some powerful market mechanics in the form of a partial unwind of the long running Japan carry trade in the third quarter. One of our successful themes has been exposure to the Japanese wholesale conglomerates – a play on global growth, trade and commodities with a relatively high yield. Sometimes known as the Buffet Japan trade, this had a volatile month, which we sat out before exiting on the bounce.

Towards the end of the third quarter, we saw the other side of the allocation, when Chinese stocks leapt by almost 50% in a few days, having been deeply out of favour. We had China tech as a theme but with very low exposure and didn't chase the short squeeze immediately, waiting for a correction (which came) before starting to increase our exposure towards year end. Our aim is not to try and pick the lows or the highs in markets but to participate in positively trending themes and avoid getting caught in short term trading volatility.

Our philosophy is to adapt rather than try and predict and our portfolio diversification is structured to be beneficial of a weaker dollar without requiring it to happen, with exposure to Gold, Emerging markets and commodities, as well as Japan and Europe via financials. We also have a strong bias towards tech, with allocations to FinTech, Digitalisation, Robotics and Automation and Digital Security, but not as concentrated an exposure to the Mega Cap Tech stocks as the S&P500 that once again dominated market returns in 2024. Some of the newer themes we brought into the portfolio towards year end, such as Defence, Space, Telemedicine and Nuclear saw some short term profit taking – not least because they are more retail focused than some of our longer term positions – an effect that depressed our December numbers. However, we are comfortable with the way in which they have since continued to demonstrate strong uptrends.

The sell off in December meant that overall the Sub-Fund returned 9.51% for the calendar year, but we are comfortable with our target absolute return of 10-15%.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Descartes Alternative Credit UCITS Fund 2024 Performance Review

2024 Review

The net performance of the EUR Institutional Founder Class shares has been 14.15% for the period from 1 January 2024 to 31 December 2024 and 12.55% for the EUR Institutional Class A Pooled shares. The Descartes Alternative Credit Fund has benefited from a number of tailwinds throughout the year: the revised macro-economic environment with a more constructive outlook, the large cash holdings from credit investors which were still underweight credit assets generally, and Collateralised Loan Obligation (CLO) tranches in particular, and the still generous carry offered by the CLO asset class vs any other European credit asset.

Despite the flurry of new issues, the sizeable volume of CLO liquidations has mechanically increased the demand for new assets as institutional investors were incentivised to redeploy rapidly their cash.

The remaining convexity offered by secondary BB and B tranches has been another supporting factor illustrating the strong appetite on the secondary market all along the year.

Finally, senior loan market prices have increased with the spread tightening observed across the refinancing activity as a result of a sound and better outlook for corporate activity. European CLO managers have been proactive in controlling their CCC exposures by using unrealized gains on performing loans to monetize the loss on some discounted loans, under technical restructuring, such as for Altice, Altra, Lipton.

As a consequence, the full-year performance of the Sub-Fund has been very solid, reaching around 13% across share classes denominated in Euro.

The most noticeable trends have been seen in BBB and BB secondary CLO tranches where credit spreads have tightened by 100-150 bps, not only for conservative CLO managers, but also some less well-known managers. In fact, the spread dispersion has somewhat been reduced over time.

In term of flows, our investor base remained sticky with a little bit of profit taking towards the end of the year. On the other hand, we have seen regular inflows often from existing clients and some new investors joined the momentum.

On the Sub-Fund portfolio, our assets value benefited clearly from the relentless demand for secondary CLO tranches and we took profit from the carry and the spread compression.

We decided in the fourth quarter that we should start on an opportunistic basis to increase credit duration through the purchase of longer dated BBB assets, with a few BB assets, where the spreads offered on some under-rated CLO managers were still large.

As a result, our non-investment grade exposure moved slightly up above 50% at the end of 2024.

Perspective for 2025:

We remain relatively constructive for 2025 as default rates should stay low and corporate forward earnings should remain satisfactory.

Furthermore, corporate balance sheets on average are healthy and the senior loan maturity wall has been pushed back even more to 2028-2029 (only 6% of the European loan market will come to maturity by the end of 2026) following the huge refinancing activity from many issuers (amend & extend high volume of around €55 billion).

We will still benefit from a good carry this year and spread compression should be more limited compared to last year, so we will be careful to maintain our credit duration around 4.0-4.5 at most.

The yield-to-maturity of the Sub-Fund at the end of 2024 was 7%, still above the equivalent yield to maturity of most European high yield funds.

We do not exclude the possibility of credit spread volatility picking up at some point this year, depending on inflation data, hence our rather defensive beta profile remains key to offering the right protection for this year.

February 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

DUNN WMA Institutional UCITS Fund 2024 Performance Review

The net performance of the USD Institutional Class A shares for the year was 9.78%. Gains made in agricultural, stock indices, short-term interest rates and currencies outweighed the losses in metals, long-term interest rates, energies and volatility. A brief analysis of portfolio risk targeting, attribution, and positioning on a sector-by-sector basis follows below:

- Value at Risk (VaR): The Sub-Fund entered 2024 targeting a monthly VaR (at the 99% confidence level) of approximately 9%, above the expected long-term average of 7.5%. The Adaptive Risk Profile (“ARP”) targeted a steadily increasing VaR through the first 6 weeks of the year as it responded to increasing trend strengths and stable volatility combined with relatively low correlations of portfolio positions. Monthly VaR peaked around 10.5% in mid-February, then ticked back down as trends lost some momentum through the second half of the quarter. This reduction in VaR continued through the first half of second quarter, touching a low of 7.9% in mid-May as trend signal strengths further waned and correlations and volatility increased. Over the last six weeks of second quarter, the ARP ratcheted exposure back up as correlations of portfolio positions came down significantly. Targeted VaR peaked in early July at 10%, then began a steady reduction through the third quarter as signal strengths declined and volatility and correlations both increased. Exposures were contracted accordingly throughout the third quarter. VaR again increased through early fourth quarter as the system developed uncorrelated positioning with large positions long stocks and short bonds. VaR maintained an elevated target throughout November and December with the Sub-Fund closing the year targeting a monthly VaR of 9.7%.

- Interest Rates (Portfolio Allocation: 8% Short-End, 18% Long-End): The Sub-Fund’s portfolio came into 2024 with short positions across most of the yield curve while holding long positions in the JGB, Italian Bond, Australian Bond, and SONIA. Expectations for multiple interest rate reductions by central banks were the main focus early in the year, keeping the sector on edge for much of the quarter. But these expectations never materialised, as strong employment in the U.S. coupled with higher inflation readings kept the Fed on hold. Late in the first quarter, a rate hike by the BOJ, its first in 17 years, brought an end to negative interest rates in Japan. The Sub-Fund trimmed its long JGB position slightly but remained long the Japanese Bond. The Sub-Fund’s models held mostly short positions entering the second quarter. With the global economic landscape looking uncertain, rate cut expectations continued to grow. The Sub-Fund moved to small long positions mid-second quarter in U.S. Bonds and Long Gilts. The Bank of Canada and ECB both cut rates by 25 basis points early in June. Prices continued to move higher in third quarter as expectations for central bank rate cuts were at the forefront. A surprise rate hike by BOJ early in the third quarter sent JGB prices higher. The Bank of Canada, BOE, ECB, Fed and others cut interest rates during the quarter, keeping fixed income prices bid into quarter-end. Fixed income prices reversed course in the fourth quarter as the focus shifted to a pause in rate cuts and a U.S. election. The Sub-Fund moved to liquidate long positions early in the quarter, leaving long positions in Canadian and Italian bonds as well as Euribor and Short Sonia contracts. The Sub-Fund ended the year primarily short overall with the same positioning it had moved to early in the fourth quarter. For 2024, the Sub-Fund generated a gross gain in short-term interest rates of 1.09%, led by positions in the Schatz and SOFR contracts. The long end of the sector produced a loss of 2.99%, with positions in JGBs and SFE 10-Year and 3-Year contracts making up a large part of the losses.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

DUNN WMA Institutional UCITS Fund 2024 Performance Review (continued)

- Energies (Portfolio Allocation: 10%): Coming into the year, the Sub-Fund held long positions across most of the energy sector, less short positions for Natural Gas contracts. For much of the first quarter, energy prices moved higher as a result of geopolitical tensions and OPEC production cuts. The Sub-Fund's models increased positions for most of the sector during the first quarter. Natural Gas prices moved higher late in March as supply cuts and attacks on Russian refineries kept market participants on edge. The program's models responded, covering short positions in Dutch Natural Gas. Positioning remained the same, directionally, for the second quarter. Prices moved lower into May as expectations for supply disruptions from global tensions decreased, coupled with concerns for economic weakness slowing demand. The Sub-Fund lightened positions in most products by mid-quarter. Energy prices received a boost after the OPEC+ meeting in early June where they decided to extend production cuts into next year. The Sub-Fund added back into long positions by end of June. The portfolio held moderately sized long energy positions at the end of the second quarter, except for small shorts in Natural Gas contracts. Energy prices sold off early in the third quarter as markets focused on slowing global growth and weakening global demand for oil. The Sub-Fund transitioned to short positions by mid-quarter in Heating and Gas Oil contracts. Prices remained in the low part of the range for the quarter with the Sub-Fund's models ultimately moving to small short positions in Crude and Brent Oil by the end of the third quarter. The models held mostly short positions in the sector less small long positions in RBOB Gasoline and Dutch TTF Natural Gas contracts. Energy prices found a base in early fourth quarter as demand for energy products increased. The Sub-Fund transitioned out of short positions in Brent and WTI Crude Oil early in the quarter while remaining short heating products. This positioning remained until the year's end with the sector realising a gross loss of 1.90% for the year. Gains made in Dutch Natural Gas were unable to offset losses in the rest of the sector.
- Metals (Portfolio Allocation: 12%): The Sub-Fund began the year with a small long position in Gold and a larger long position in Iron Ore, while holding short positions in the rest of the metals sector. Metals markets looked for direction as central bank rate cuts remained elusive. Gold prices moved lower into mid-quarter which put the Sub-Fund's models into motion, transitioning to a small short position. Prices for most metals drifted higher on rate cut expectations going forward. The Sub-Fund trimmed much of its short positions by the end of the first quarter while also transitioning back to a small long position in Gold. Metals moved higher into mid-second quarter as expectations for central bank easing continued to grow. The Sub-Fund transitioned out of its short Platinum position by mid-quarter and added onto long positions in precious and base metals simultaneously. The Sub-Fund's models held onto its precious metals long positions but lightened long positions in base metals contracts by end of the second quarter and moved to a small short position in Nickel. Metals prices remained weak during the first half of the third quarter, and the Sub-Fund's models lightened positions accordingly. The Sub-Fund moved to a small short position in Aluminum early in the quarter as base metal prices remained soft with uncertainty focused on global demand. The strongest headwinds for metals, global demand and higher interest rates, began to fade during the third quarter as central bank rate cuts became reality. Metals prices moved sideways to lower in the fourth quarter as Dollar strength put metals price appreciation on hold. The Sub-Fund held on to most of its positions during the fourth quarter except for transitioning to small short positions in Platinum and Copper. At the end of the year positioning was evenly mixed long and short. The sector's 2024 attribution was a loss of 5.79%, as gains in Gold were unable to offset losses in the rest of the sector. The Sub-Fund has no direct exposure to commodities.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

DUNN WMA Institutional UCITS Fund 2024 Performance Review (continued)

- Currencies (Portfolio Allocation: 12%): The Sub-Fund held long positions in most currencies versus the U.S. Dollar coming into 2024, except for short positions in the Canadian Dollar, Euro, and Japanese Yen. The U.S. Dollar moved higher early in the quarter as inflation continued to be stubborn, thus keeping central bank rate cuts on hold. The Sub-Fund transitioned out of long Australian and New Zealand Dollar positions in January. The Swiss Franc continued to sell-off in the first quarter, and the Sub-Fund moved to a short position in this contract by mid-quarter. The Bank of Switzerland surprised with a small rate cut late in the first quarter, which had surprisingly little impact on Swiss Franc prices. The U.S. Dollar continued to strengthen into the quarter-end as rate cuts looked further out on the horizon in the U.S. The Sub-Fund remained long the British Pound and Mexican Peso while short the rest of the sector at the end of March. The U.S. Dollar remained largely range bound in the second quarter with an uncertain economic landscape and rate cuts anticipated globally. Rate cuts materialised in the EU and Canada and the Sub-Fund trimmed shorts in those currencies. The Sub-Fund pared long positions in the Mexican Peso early in the quarter as prices pulled back with the U.S. Dollar trending higher. The U.S. Dollar's weakness made a new leg lower during the third quarter as the beginning of the Fed's rate-cutting cycle was expected. The BOJ surprised markets with a rate hike of its own, the first time rates there went above 0% in 17 years, aimed at strengthening the yen. The Sub-Fund had already been cutting back on its short Yen position prior to the move, which helped to mitigate losses from the unexpected news. The U.S. Dollar continued lower into mid-quarter as multiple central banks began cutting interest rates. The Sub-Fund's models switched to long positions in all currencies except for a small short Yen position by the end of August. The U.S. Dollar found a base early in the fourth quarter as optimism for rate cuts lost steam and election results in the U.S. helped the U.S. Dollar strengthen. The Sub-Fund moved to short positions in most currencies by mid-quarter, less a small long position in British Pounds. These positions remained through year end as the sector generated a gross gain of 2.36%. Gains made in Japanese Yen, Euro and the Canadian Dollar were the best performers, offsetting losses in the rest of the sector.
- Agriculturals (Portfolio Allocation: 19%): Coming into 2024, The Sub-Fund was short most markets in the agricultural sector, except for long positions in Cattle, Cocoa, Sugar and Coffee. Grain prices continued to trend lower in first quarter as supply carryover from 2023 weighed on prices. Lean Hog prices rallied into the quarter, and the Sub-Fund reversed course going long by mid-January. Cotton prices found a base early in January moving higher through mid-quarter, and the Sub-Fund transitioned to a small long position accordingly. The Sub-Fund's long Cocoa position was the strongest in the sector for the first quarter as prices experienced multiple all-time highs throughout the quarter. The Sub-Fund did trim the cocoa position a bit due to increased volatility and risk. Positioning in the second quarter remained steady as agriculture prices generally remained weak during the second quarter. The Sub-Fund transitioned to short positions in Lean Hogs and Cotton during the second quarter as weakness persisted. Agriculture prices remained largely on trend for most of the Sub-Fund's markets during the third quarter. Lean Hog prices found a base early in the third quarter and moved higher for much of the quarter. Increased pork demand globally kept prices bid as the Sub-Fund's models moved to a small long position by end of the third quarter. Most markets in the sector continued to stay on trend during the fourth quarter, primarily led by soft commodities. The Sub-Fund's models slightly increased position sizing into year end with most positions in the sector larger than at the end of the third quarter. As the year closed the program remained short in most markets, except for longs in Cocoa, Coffee, Lean Hogs and Cattle. For 2024, the agricultural sector generated a gross attribution of 11.18%. Positive contributions were led by Cocoa, Corn, Soybeans and Coffee, offsetting negative contributions from Sugar and Lean Hogs. The Sub-Fund has no direct exposure to commodities.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

DUNN WMA Institutional UCITS Fund 2024 Performance Review (continued)

- Stock Indices (Portfolio Allocation: 18%): The Sub-Fund entered 2024 long all equity positions, except for a short position in the Hang Seng. Equities continued to move higher in the first quarter as rate cut expectations were the main focus for the sector. The Sub-Fund moved to a small short FTSE position early in the quarter as inflation ticked up in the UK. Stock prices pressed higher for the remainder of the quarter as the rate cut question was viewed as a matter of “when” and “how many”, and not “if” they would happen. The Sub-Fund transitioned back to a small long position in the FTSE late in March, leaving the Hang Seng position as the lone short in the sector at the end of the first quarter. The program lightened stock index positions early in the second quarter as economic uncertainty kept price appreciation on hold. Prices moved somewhat higher mid-quarter hoping that rate cuts would be in the near future. Equity moves were subdued early in the third quarter as global growth concerns were the primary obstacle to price appreciation. Central bank rate cuts began by early August, helping fuel stock rallies across many of the Sub-Fund’s positions. The surprise rate hike out of Japan pressured the Nikkei and TOPIX markets with the Sub-Fund lightening positions accordingly. As expected, the Fed came through with a sizeable rate cut of its own late in the quarter. The Sub-Fund’s only change for the third quarter was a move to a long position in Hang Seng. Stock indices trended higher early in the fourth quarter as optimism for growth and lower rates continued to be the main catalyst. However, by mid-fourth quarter the landscape for equities became a bit clouded as the Fed indicated that there would be less cuts in 2025 than originally forecast, forcing markets to give back some of the gains made earlier in the quarter. The Sub-Fund stayed with similar positions in the sector less the transition to short CAC40 mid-fourth quarter. For the year, the equity index sector generated a gross gain of 2.26% led by Japan’s Nikkei 225 and TOPIX, along with the S&P 500 and NASDAQ indices.
- Volatility (Portfolio Allocation: 3%): The program entered 2024 flat the VIX contract. The models moved to a small short VIX exposure early in first quarter as equity prices moved higher in January. Equity markets continued higher during the quarter as markets looked for rate cut signals from the central banks. The VIX models moved to a long bias by mid-February and built onto that position into the end of the quarter as equity prices (and resulting volatility) soared. The program moved to a short position early in the second quarter as economic uncertainty kept rates on hold. The S&P 500 moved higher mid-quarter with Volatility models switching back to long positions into mid-year. The VIX spiked in early third quarter, due to unwinding of Yen carry trades from the surprise BOJ rate hike and a weak U.S. employment report, sending equity markets lower. The models temporarily increased the long-biased VIX positioning as markets continued lower into early August. Equity markets found footing as lower interest rates through central bank rate cuts helped equity prices stabilise and move higher into quarter-end. Stocks continued higher into the fourth quarter as participants remained optimistic for growth and rate cuts by central bankers. The VIX prices moved lower through much of the quarter but again spiked on the Fed dot plots showing only two cuts for 2025. With stocks remaining on an uneven path into year’s end, the sector experienced a gross loss of 0.22% for 2024.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Green Court All China Equity Fund 2024 Performance Review

The net performance of the Sub-Fund for the period was 17.32%. Over the same period, the benchmark index, the MSCI China All Shares Index, returned 16.67%.

In 2024, Greater China equities remained volatile across both the onshore and offshore markets, with a sharp correction at the beginning of the year followed by a swift rebound after a flurry of supportive policies was rolled out to stabilise the housing market and shore up investor confidence. Chinese equity markets underwent another correction from the end of May as high frequency data indicated that the pace of economic recovery remained slow, but the pivot in the top leadership's policy stance at the end of September fueled a strong rally as policymakers stepped up monetary and fiscal stimulus. While the optimism quickly faded in mid-October as investors awaited further details on stimulus measures, Greater China equity markets ended the year with positive gains after a three-year correction.

In our view, China's economic growth will continue to be supported by domestic policy stimulus. The policy easing since late September represents a fundamental shift in the top leadership's stance on domestic economic conditions, including an acceptance of the challenges that the Chinese economy faces and a comprehensive playbook of how to best address them going forward. The recent Central Economic Working Conference indicated incrementally larger consumption support, faster housing inventory digestion and more efforts on promoting central-local fiscal reforms. To that end, further stimulus details and more explicit fiscal support are expected to be announced at the annual parliamentary 'Two Sessions' meeting in March 2025 when policymakers tend to provide more details on economic targets and growth guidance. While equity markets may remain volatile given potential tariff hikes on China under Trump 2.0, we believe procyclical support measures can mitigate near-term risks in the economy as the policies take effect. In turn, this should enable our portfolio companies in the Sub-Fund to deliver an improving earnings outlook.

Green Court Capital Management Limited

January 2025

The reporting period refers to 12 August 2024 to 31 December 2024. Green Court All China Equity Fund was launched on 12 August 2024. Fund performance is that of the Sub-Fund's Class I USD shares and is net of fees. Investors who subscribe in a currency other than the base currency of the Sub-Fund should note that returns may increase or decrease as a result of currency fluctuations. The Sub-Fund's performance does not take account of any commission or costs incurred by investors when subscribing for or redeeming shares.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Invenomic US Equity Long/Short UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (USD Institutional Class Pooled shares) for the year was -8.51%. The average net exposure was 16.2%. As we reflect on 2024, we are disappointed that we ended the year in a drawdown but take solace that we managed risk in the portfolio despite the historic headwinds that we experienced. While we never like to lose money for our investors, the most important thing is to minimise losses when market conditions are not in our favor.

The end of 2024 marks 25 years since the turn of the century. The Bloomberg Pure Momentum Factor had its second strongest year in the last quarter century, up 10.34%. The spread between value and growth has been building over the past 24 months, creating extreme imbalances in capital markets. This can be seen in the rolling 24-month excess return for the Russell 1000 Growth Index which has exceeded the peaks of the dotcom bubble in early 2000.

Source: Invenomic, Morningstar Direct. January 1979 through December 2024

The momentum rally that started on 3 February 2023 is almost twice as strong as any similar period since July 2008 (the start of the daily data for the index). These market anomalies created extremely stretched valuations that we are excited to take advantage of in our portfolio. The forward 1YR P/E ratio on the S&P 500 Index at year-end was 26.5x. Historically, returns over the next ten years when the P/E ratio reaches that level are less than 0%. We remain shocked that most market participants are blissfully ignorant of this dynamic. We cannot identify when market sentiment will shift but typically when it does, it happens swiftly and sharply.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Invenomic US Equity Long/Short UCITS Fund 2024 Performance Review (continued)

Source: LPL Research, FactSet, Haver Analytics, Yahoo Finance, 28 October 2024

Our drawdown in 2024 was largely the result of underperformance in our long portfolio, which returned 8.85% (gross) compared to the Russell 3000 Value Index which was up 13.61%, resulting in us trailing by 4.76%. Conversely, the short portfolio lost 18.59% (gross) compared to +34.41% for the Russell 3000 Growth Index, resulting in an outperformance of 15.82%. While we are frustrated with the performance of our longs over the course of the year, we are excited about their prospects looking forward. Because our longs typically generate strong free cash flow, there are many levers they can pull to improve performance, including but not limited to, stock buybacks, debt repayments and organic growth investments.

The best performing sectors in the long portfolio in 2024 include Financials (+3.39%), Industrials (+3.04%) and Materials (+1.49%). The worst performing sectors in the short portfolio include Information Technology (-7.09%), Consumer Discretionary (-4.39%) and Financials (-3.59%). The biggest long contributor added 0.99% and the biggest short detractor cost 1.24% while the biggest short contributor added 0.47% and the biggest long detractor cost 1.25%.

While it is unlikely that the current market dynamics will change just because the calendar moves from one year to the next, the opportunity set is as compelling as we have seen since late 2020. We cannot predict what will happen in the short term; however, we continue to follow our process which has served us well over the long term.

February 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Ironshield Credit Fund 2024 Performance Review

Performance Overview

The net performance of the Sub-Fund (EUR Institutional Class A shares) for the year was +5.46%.

The second half of 2024 was characterised by significant market volatility, influenced by evolving macroeconomic conditions, central bank policies, and geopolitical developments. Despite periods of turbulence, the Sub-Fund demonstrated resilience, leveraging market dislocations and credit-specific opportunities to generate strong risk-adjusted returns.

Market Environment and Key Developments

The period saw fluctuations in global risk sentiment, with market movements driven by central bank rate decisions, political uncertainty in Europe, and shifts in inflation expectations. The U.S. Federal Reserve's decision to cut rates in September, following weaker labour market data, initially boosted sentiment. However, later in the year, both the Federal Reserve and the European Central Bank adopted a more cautious outlook on future rate cuts, leading to renewed volatility in government bonds and risk assets.

European markets faced headwinds from political uncertainty, particularly in France, where budgetary concerns and instability led to periods of weakness in French assets. Meanwhile, in the U.S., equity markets experienced robust gains, particularly in November, before encountering a bout of profit-taking in December.

Corporate credit remained a bright spot, particularly in high-yield markets, where spreads tightened despite broader equity market volatility. This trend was supported by continued refinancing activities and resilient earnings across several sectors.

Sub-Fund Performance and Strategy

The Sub-Fund's strategy focused on identifying and capitalising on credit opportunities in both stressed and special situation investments. Key contributors to performance included a UK bank, which continued to show progress towards profitability, and a British sports car manufacturer, which benefitted from capital-raising activities. Additionally, a position in a French PVC producer provided gains as construction permit stabilisation and improved pricing trends emerged in the sector.

Other notable contributions came from a European real estate investment company, a UK-based telecoms company completing a financial restructuring, and an online retailer executing a successful refinancing. The Sub-Fund's approach of balancing high-quality credits with opportunistic plays in distressed assets was instrumental in achieving positive returns.

While the Sub-Fund benefited from well-timed credit selections, certain positions faced temporary setbacks. A Spanish manufacturer of vehicle interior components and a German lighting fixtures company were impacted by sector-specific challenges. However, these positions were managed carefully, mitigating their overall impact on portfolio performance.

Outlook

Looking ahead, the Sub-Fund remains well-positioned to navigate an increasingly complex financial landscape. The bifurcation between high-quality credits with strong fundamentals and lower-quality, distressed credits is expected to persist. This dynamic presents opportunities for selective credit investments, particularly within sectors facing structural headwinds such as real estate and telecoms.

A key focus for the Sub-Fund will be the rising trend of creditor activism in Europe, mirroring developments in the U.S. The growing involvement of investors in restructuring discussions is expected to create a rich pipeline of distressed opportunities. Furthermore, the anticipated wave of EU high-yield bond maturities in 2026 is likely to generate additional investment prospects in the coming years.

In conclusion, the Sub-Fund will maintain its disciplined investment approach, prioritising high-yielding, event-driven credit opportunities while managing risks effectively. By leveraging market inefficiencies and capitalising on credit-specific catalysts, the Sub-Fund aims to continue delivering attractive risk-adjusted returns amid evolving market conditions.

Ironshield Capital Management, LLP

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Ironshield High Yield Alpha Fund 2024 Performance Review

Performance Overview

The net performance of the Sub-Fund (USD Institutional Class A Pooled shares) for the year was +6.04%.

In the second half of 2024, the Sub-Fund continued its positive trajectory, generating uncorrelated returns amid volatile market conditions. The Sub-Fund's market-neutral strategy once again demonstrated resilience with only positive months in the second half, delivering steady performance while maintaining low volatility. Through disciplined portfolio construction and dynamic hedging, the strategy effectively navigated fluctuating macroeconomic and geopolitical landscapes.

The Sub-Fund's consistent outperformance was primarily driven by strong single-name credit selection, combined with tactical hedging strategies that helped mitigate risks during market corrections. Despite periods of heightened volatility in equities and rates, the Sub-Fund maintained a stable return profile, underscoring the robustness of its long/short approach across the cycle.

Market Summary

The second half of 2024 was characterised by market fluctuations influenced by macroeconomic developments, monetary policy shifts, and geopolitical events.

July and August: The period began with a rebound in risk assets, supported by easing political concerns in Europe and a cooling U.S. economy, which increased expectations of Federal Reserve rate cuts. However, a sharp sell-off in early August, triggered by fears of a U.S. recession and an unwinding of yen carry trades, briefly disrupted markets. The Sub-Fund capitalised on these movements through effective macro hedging, outperforming despite the turbulence.

September and October: Market sentiment improved following a surprise 50bps Fed rate cut, the first since the 2022 hiking cycle. This shift, coupled with economic stimulus measures from China, led to a rally across risk assets. While geopolitical tensions persisted, particularly in the Middle East, their immediate impact on markets remained contained. European high-yield credit performed well, and the Sub-Fund's credit selection, particularly in retail and auto parts sectors, contributed positively.

November and December: The final months of the year saw diverging trends between the U.S. and European markets. While U.S. equities surged to record highs, European markets lagged due to political instability and ongoing budgetary concerns, particularly in France. Sovereign yields fluctuated as central banks signaled a more cautious approach to future rate cuts. December saw a broad market correction, with equities declining amid profit-taking, while corporate high-yield credit remained resilient. The Sub-Fund's ability to navigate these conditions through strategic positioning in cash bonds and synthetic credit instruments resulted in a strong finish to the year.

Overall, the Sub-Fund's combination of fundamental, quantitative, and relative value strategies continued to drive alpha. The disciplined approach to portfolio construction and risk management ensured stability amid a shifting macroeconomic environment.

2025 Outlook

The high-yield credit market enters 2025 with stretched valuations, increasing the risk of a sudden repricing. Several factors are likely to shape the market landscape in the coming months:

- **Interest Rates:** While rate cuts are expected, central banks remain cautious, and borrowing costs will stay elevated. This environment may put pressure on overleveraged companies.
- **Corporate Earnings:** Despite a resilient 2024, visibility on future earnings remains uncertain, with potential headwinds from inflation and slowing consumer demand.
- **Market Dispersion:** Increased credit spread dispersion presents opportunities for long/short positioning, particularly in sectors with deteriorating fundamentals.
- **Geopolitical Uncertainty:** Political developments, including the U.S. new government and European fiscal policies, could drive volatility in global markets, reinforcing the need for a risk-balanced approach.

The Sub-Fund remains well-positioned to capitalise on these dynamics through rigorous credit selection, strategic hedging, and disciplined risk management. With a diversified portfolio and a market-neutral strategy, the Sub-Fund aims to continue delivering steady, uncorrelated returns in the year ahead.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund 2024 Performance Review

Investment Objective

The net performance of the Sub-Fund (USD Leaders Class Pooled Accumulating shares) for the year 2024 was 9.47%.

The Investment Strategy is Total Return focused (Benchmark BlackRock 60/40 Portfolio Index) with the goal to achieve 8-12% pa on average over the long-term, with lower volatility than the MSCI of around 12-14%. The investment objective is to achieve strong capital growth combined with rigorous capital preservation. This objective is pursued by implementing a strategy that manages downside risk, utilising up to 100% cash (1-12 months U.S. T-bills) and employing an intelligent, market-adaptive fully Artificial Intelligence (AI) driven investment approach to stock-pick from a clearly defined universe of large and mega-cap global quality brands listed in developed markets, with high ESG ratings (min BB). The aim is to achieve an average MSCI ESG portfolio rating of AA.

Our portfolio is managed using proprietary “supervised” AI technology on a cutting-edge AI-powered investment platform. This platform was developed over more than 12 years by a team of highly skilled AI and investment experts with over 25 years of experience in combining asset management with AI and machine learning.

AI-driven Investment Approach

The investment decision process is systematic and objective, based on a comprehensive analysis of fundamental market, economic, and company-specific data. This is implemented on a robust technology platform powered by AI and machine learning (ML), which has a proven track record of success.

- The investment universe consists of approx. 500 highly liquid Global Large & Mega Cap Quality Brand companies across three sectors: Consumer, Technology and Healthcare.
- The process includes monthly rebalancing of the core portfolio of approx. 50 companies that are carefully selected by the ML-driven investment strategy from the universe (point 1) to adjust the portfolio dynamically to the market and economic environment, sentiment and outlook.
- Markets are monitored 24/7 to adjust the asset allocation dynamically to market risks and opportunities.

Beta is reduced in times of high market volatility and rising risks (cash hedge – following Nobel Prize Winner Franco Modigliani's conviction that cash is the best hedge) for a “Peace of Mind” approach.

Alpha capture overlay is added in a blue sky environment to take advantage of strongly rising markets, aiming to enhance performance additionally (the core portfolio is net long 100% at all times).

Performance Review

During 2024, the investment strategy maintained on average 70% Equities and 30% Cash. Only toward year end was the equity allocation increased to 85% and 15% Cash. This was due to concerns over a potential slowdown in the U.S. economy due to persistent high inflation. However, following in December the election of President Trump, the market experienced a notable uptick, particularly in the technology sector, prompting our portfolio to undergo strategic adjustments.

The Sub-Fund was launched on 16 November 2018, and returned 2019 +13.6% (net of fees), 2020 +4.93%, 2021 +20%, 2022 -23.7%, 2023 +11.9% and 2024 +10%.

Since launch, the Sub-Fund strategy and cutting-edge AI-driven investment approach has demonstrated its proof of concept particularly during the first outbreak of the COVID-19 pandemic at the end of February 2020. The strategy demonstrated its efficacy, with 50% equities and 50% protective cash buffer at the market's low point, resulting in a maximum loss of only -20%, while major equity indices declined up to 40%. In 2022, the market decline and high volatility triggered by the Ukraine-Russia conflict was challenging. However, the strategy performed within the given guidelines.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund 2024 Performance Review (continued)

Outlook 2025

We anticipate market volatility and our strategy is well prepared for that, as it is managed dynamically and is adapting to the market environment. In the event of a deterioration in the economic and financial market outlook, the asset allocation is anticipated to undergo an adjustment, with an increased allocation to cash. In the most unfavourable scenario, this will reach 100% cash (U.S. T-Bills). This strategy offers investors the opportunity to benefit from strong capital growth while enjoying peace of mind knowing that we have a built-in 24/7 market monitoring system. Our AI is self-learning (human supervised) and has been live for over six years, giving us confidence that our investors will achieve attractive long-term growth with lower volatility.

Conclusion

The Sub-Fund's AI-driven strategy identifies the most attractive stock opportunities every month. It is based on a universe of approximately 500 large-cap, high ESG-rated quality brands from three sectors: consumer, healthcare and tech. The strategy's objective is to achieve an optimal asset allocation that continually adapts to the evolving economic and stock market outlook. This investment strategy is based on highly intelligent, self-learning AI, which is human expert supervised. This enables the strategy to either protect its fund assets rigorously or capitalise on bullish markets with unlimited upside potential - Investors can therefore enjoy a rewarding Peace of Mind approach.

February 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Mygale Event Driven UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (USD Institutional Class shares) for the year was +6.85%.

Adjusted for growth, a prolonged period of lacklustre M&A activity saw 2023 deliver the worst bear market for M&A in three decades. Unsurprisingly, this also brought with it the most challenging environment for our strategy since inception. However, in the summer of 2023, we circulated a contrarian outlook for an immediate and sustained pick-up in global activity with a key focus on Europe and the UK. Consistent with our expectations, activity in the final three months of 2023 increased to over \$1 billion in value. Fast forward to today, and global activity for the first three quarters of 2024 was 22% higher than the same period in 2023. In the case of Europe and the UK specifically, both the 2023 year-end flurry and buoyant first three quarters of 2024 were even more pronounced; a 125% increase over 2023 year-end, and over 33% more activity in the first three quarters of 2024 than in the same period of 2023, with data from Morgan Stanley putting this as high as 49% year-over-year.

Whilst a consistent theme over 2024 was the beginning of a cyclical and structural recovery in M&A activity, crowding in a number of volatile situations in the United States and Asia, combined with a backdrop of global regulatory uncertainty, delivered an active but challenging year for the event driven space. As a result, success in 2024 was limited to strategies with selective investment processes and well diversified portfolios. This was an environment that flattered the Sub-Fund's disciplined investment approach, yielding strong performance for our strategy on both an absolute and relative basis.

Stronger performance was not only a function of an improved M&A environment, but also the return of a better functioning equity market in Europe. The shift revived an investor base that, after a long hiatus, began to more appropriately value companies and crucially, in a takeover situation, fight to ensure assets were not sold cheaply to acquirers.

In Europe over 2024, approximately 20% of deals saw bids either raised or met with counterbids. With median offer increases of 15%, as well as some notable increases in excess of 30%, on average, bumps far exceeded the 9% median recorded over 2022-2023. The start of a much-anticipated bidding war for Applus in January was symbolic of this: Applus was a long-held investment that was significantly undervalued by the market when we first invested a few years ago, and where the expected catalyst of a takeover took longer to materialise than initially projected. However, in April 2024 the process culminated in a highly competitive sealed-envelope auction process at a bid around 70% higher than the undisturbed share price.

Strong performance over the first quarter and through April and May gave way to more muted performance at the end of the second quarter as investors took advantage of strength in a handful of our long-held Relative Value and Catalyst situations, followed by a typically quiet August until activity started to improve in late summer. However, October brought a few challenges for the event driven space with regulators in Asia blocking the takeover of Chinese Traditional Medicine, and in the US, antitrust regulators also blocking Tapestry's \$8.5 billion acquisition of Capri Holdings. The Sub-Fund identified potential antitrust issues in Capri early in the process and, as a result, had no exposure either to this deal or, similarly, to the Chinese Traditional Medicine deal. However, with both names suffering approximately 50% falls, there was significant pain across the peer group with several funds forced to unwind positions or close portfolios entirely. Consequently, many Merger Arbitrage and Catalyst Driven names saw spread widening as some funds were forced to unwind positions or close portfolios entirely.

Portfolio performance, both during periods of heightened volatility and throughout the year, served to demonstrate the strength of the portfolio's construction. The combined sub-strategies delivered a positive, consistent and well-distributed stream of uncorrelated returns over each quarter. With an increasing number of attractive situations over the year, leverage in the portfolio increased to a high of 145%, whilst volatility remained in line with long-term averages and the portfolio exhibited near zero.

Outlook

As ever, confidence and stability are among the most essential ingredients for deal activity. Despite leaving behind a year where over half the world's GDP went to elections, the current economic and geopolitical backdrop will undoubtedly continue to influence dealmaking and broader market activity. However, last year saw the M&A market gradually rebound, as regulatory and monetary dynamics began to normalise, sponsors started to capitalise on lower valuations outside the United States, and strategic acquirers navigated a coming wave of potentially generation-defining disruption. If 2024 showcased green shoots and pockets of strength in M&A activity, then 2025 is a year where we expect the start of a broad-based, sustained recovery in dealmaking, and the beginning of a prolonged, multi-year M&A cycle.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Mygale Event Driven UCITS Fund 2024 Performance Review (continued)

Outlook (continued)

Many organisations face significant challenges to digitalise their businesses and stay ahead of the technology curve, with the disruptive impact from AI the most recent addition to an already rapidly changing landscape. At the same time, the ongoing drive toward net-zero strategies and ambitious emission targets continues to fuel momentum in the energy transition. This is particularly evident as industries reassess supply chains to safeguard the supply of scarce components, minerals and infrastructure that are critical to meeting these targets. Similarly, the growing imperative for companies to balance effective ESG strategies with traditional value creation remains a driver behind many transactions. Data from Goldman Sachs reveals that corporates accounted for 70% of total M&A activity during the first three quarters of 2024, up from 60% across 2021 and 2022, a resurgence propelled by a combination of several periods of below average activity, robust balance sheets, and the need to acquire future-proofing capabilities and build long-term competitive advantages. M&A in any context is an important part of corporate strategy, but is vital in an environment where the opportunity for organic business growth is low, and the rate of disruptive structural change is high.

The shift in M&A activity over the last 12 months has been notable and has provided respite from the deal vacuum of prior years. However, the broad-based rebound in global M&A that many anticipated was elusive, with recovery limited to select areas of strength. Transaction values remain below historical averages and have significant room for growth with M&A as a proportion of global market cap at a 20-year low of 3%, compared to a long-term average of 4-6%. Key tailwinds many hoped for in 2024 did not materialise as expected, and in some respects, headwinds from 2023 remained throughout 2024. Interest rates, for example, remained elevated and depending on region, were not dissimilar to the restrictive levels seen in 2023, with 2-Year U.S. Treasury Yields ending 2023 and 2024 within a single basis point of each other. Whilst the direction of travel for inflation and monetary policy remains uncertain, intra-year dips in funding costs were sufficient to spark renewed activity from the more rate sensitive acquirers such as private equity. Looking ahead, lower financing costs are one of many significant drivers of activity that dealmakers anticipate will materialise in 2025 and beyond.

For private equity, despite it now being a well-trodden theme, appetite for quality assets with strong earnings potential and, in some cases, synergies with existing portfolio companies, remains robust. However, whilst buyout activity in the first three quarters of 2024 rose 24% compared to the same period in 2023, sponsors are under pressure to deploy committed capital and increase distributions, with the former at a record \$2.62 trillion according to S&P Global, and the latter at lows with distributions to paid-in capital at their lowest levels since 2008. Whilst a focus on liquidity has seen a sharp increase in secondaries, up nearly 140% over the first three quarters of 2024, and the use of more creative liquidity tools, a focus on deployment accelerated take-private activity in Europe and the UK.

The valuation gap between Europe and the United States has reached one of its widest points since the Sub-Fund's inception. At year end, forward price/earnings multiples for MSCI Europe and MSCI UK were at a -37% and -47% discount to the S&P 500, respectively. As a result, it is not surprising that Europe was the region that experienced the strongest momentum in take-private activity over 2024, increasing 34% year-over-year. In the UK specifically, momentum was the most pronounced, with take-privates increasing 84% year-over-year according to data from Dealogic, in part due to an uptick in activity in the technology sector. Whilst sponsors have dominated the M&A landscape in recent years, strategic acquirers represented 67% of UK activity in 2024, the second highest level in six years. With the pick-up in UK private equity activity towards the end of the year, and still structurally rock-bottom valuations, it will be interesting to observe how this dynamic develops in the years ahead as both financial and strategic bidders compete for quality assets.

Looking ahead, we expect a strong opportunity set in 2025 as several key drivers of M&A converge. In Europe, industries must transform amid widespread disruption in both the 'old economy' and high growth sectors to remain globally competitive, financial acquirers remain poised to deploy a near-record surplus of dry powder, while corporate confidence is set to grow with improved macroeconomic clarity and the prospect of more supportive regulatory policy in both the United States and Europe.

In summary, the compelling outlook for our European-focused event driven equity strategy is underlined by our expectations for: falling interest rates to provide increased market confidence and reignite interest from rate sensitive acquirers; M&A regulation in Europe to increase focus on scale and global competitiveness; the pro-business 'Trump effect' to increase confidence and spur dealmaking both in the United States and abroad; structurally low valuations outside the United States to continue driving European and UK deal flow and growing M&A pipelines and pent-up demand to drive a sustained period of heightened activity from both strategic and financial acquirers.

Mygale LLP

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Nutshell Growth Fund 2024 Performance Review

The net performance of the Sub-Fund (GBP Institutional Founder Class shares) for the year was +26.73%, outperforming the MSCI World Index (which returned +19.19%). Throughout the year, we have maintained a focused strategy with a concentrated portfolio of quality, resilient, exceptional companies at reasonable valuations.

The bulk of the Sub-Fund has continued to be invested in U.S. Dollar denominated stocks (although the overall weighting decreased over the year from 72% to 57%). As Sterling depreciated over the year (by around 1.75%), this allocation to the U.S. Dollar added slightly to returns.

2024 was a strong year for equity markets globally. Developed market equities delivered impressive total returns of around 20%, driven by continued strength in the U.S. economy. Emerging markets also performed well, with a late rally in Chinese equities and strong results from India and Taiwan contributing to an 8% return. The U.S. stock market saw significant gains, with the Morningstar U.S. Market Index closing up more than 24% for the year. This was fueled by solid economic growth, falling inflation, Fed interest-rate cuts, and robust corporate earnings. The artificial intelligence boom also played a key role, leading to outsized gains for Big Tech stocks. Focusing on sector performance, Technology and Communication Services stocks were standout performers. Growth stocks outpaced value stocks, and large-cap stocks outperformed small-cap.

The year presented numerous opportunities for our nimble and dynamic trading approach, allowing us to capitalise on market shifts effectively. As 2024 came to a close global equity markets experienced a pullback in December, driven by the U.S. Federal Reserve's release of more hawkish interest rate projections for the coming year. As we enter 2025, we remain confident that our process will continue to deliver attractive, long-term, risk-adjusted equity returns.

The Sub-Fund itself increased its large allocation to the Information Technology sector over the year from 19% to end the year at around 44%. This was mostly due to the buying of positions such as Adobe, Fortnox, Taiwan Semiconductor and Nvidia. This was offset by a decreased weighting in Consumer Discretionary stocks which throughout 2024 decreased from 18.7% to just 8.7 % through selling out of positions such as AutoZone, Dollarama and LVMH. Weighting to Health Care, Industrials and Consumer Staples also decreased, whilst Financials had a small increase and Communication Services remained mostly constant throughout.

Focusing in on performance attribution, most sectors had a positive impact on Sub-Fund returns, with, unsurprisingly Information Technology stocks driving the numbers with a contribution of nearly 15% to overall performance. Consumer Discretionary, Communication Services and Financials sectors all added in the 4%-7% range. Drilling down to stock specifics, Arista Networks, the American cloud networking company was the top performer, followed by Nvidia and Fortinet. Within the Communication Services Sector we saw Rightmove, Meta and Alphabet all driving the solid returns, whilst AutoZone and Dollarama were the top performers within Consumer Discretionary. On the flip side, Shift (Information Technology), Moncler (Consumer Discretionary), China Overseas Property Hold (Real Estate) and Starbucks (Consumer Discretionary) were the weakest performers.

As long-term investors, although we are very interested in the macro environment, we understand that the market, viewed one way, is a time series of adverse events and headlines that could shake one's resolve. It is necessary therefore to stick to the plan, knowing that these events will pass and that more fruitful times are characterised on the other side. As such, we remain positive in the knowledge that we own a portfolio of truly high-quality companies, with wide moats and high, stable profit margins, at little premium to the market as a whole.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

One River Risk Responders UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund for August – December 2024 was -1.96%.

Monthly Performance

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD
2024								-2.0%	2.9%	-4.7%	2.0%	0.0%	-1.96%

The performance figures quoted above represent the (net of fees) performance of the Sub-Fund, USD Founder Share Class, since launch on 1 August 2024. These performance figures refer to the past and past performance is not a reliable guide to the future performance.

The Sub-Fund is comprised of three sub-strategies: Dynamic Convexity, Systematic Trend and Systematic Alternative Markets Trend.

Dynamic Convexity is a fully systematic long equity volatility strategy that seeks to maximise convexity gains in a crisis and minimise benign-market bleed. Over the partial-year 2024 period from August to December, volatility markets saw one major volatility spike and crash in early August that led to a full giveback of significant intra-month gains. Further, in November the U.S. election brought about material instability concerns in U.S. markets, which saw our process build up risk and generate losses after the election as markets switched to an aggressive risk-on footing.

For both events, our process was well-positioned heading into the potential market crises in the event that they turned out to be significant market disruptions. However, both of those periods resulted in significant gains across all major equity indices, and so these long volatility exposures generated expected losses.

The Core and Alternative Trend strategies began August net short commodities, net short CDS, net long equities, net short the U.S. Dollar, and net long bonds. August was also a difficult month for trends across the asset classes and notably in equities, as the long positioning faced large detractions. Over this partial year period, bond markets faced a number of reversals, resulting in losses and a switch to net short bonds positioning by the end of the year. At the end of October, both trend sub-strategies switched their net short U.S. dollar positioning to be net long the U.S. dollar, contributing significantly to November and December performance. Foreign exchange was the most significant positive contributor to performance over this period.

Moving into 2025, the Trend sub-strategies are positioned to benefit from net short commodities, net short CDS, net long equities, net long the U.S. dollar, and net short bonds trends.

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Perspective American Absolute Alpha UCITS Fund 2024 Performance Review

Performance Overview

The net performance of the Sub-Fund (USD Institutional Founder Class Pooled shares) for the year was 7.53% in \$ terms.

Market Commentary

Equity markets experienced a volatile year, with sentiment shifting between optimism over monetary easing and concerns regarding macroeconomic stability. The S&P 500 and Nasdaq delivered mixed performances as Federal Reserve policy adjustments, geopolitical tensions, and corporate earnings influenced market direction. Inflationary pressures persisted in the first half of the year, exacerbated by supply chain constraints and fluctuating commodity prices. However, the latter part of the year saw disinflationary trends in goods and some services, partly driven by easing supply bottlenecks and declining energy costs.

In the credit markets, spreads remained tight, reflecting an investor preference for risk assets despite growing concerns over corporate debt sustainability. Leveraged loan defaults increased modestly but were offset by a robust labour market and corporate earnings resilience. Financial conditions remained accommodative, although the Federal Reserve's tempered approach to interest rate reductions led to some investor caution.

Against this backdrop, the Sub-Fund navigated market fluctuations through disciplined risk management and sector rotation. The long book benefited from strong performances in information technology and select consumer discretionary names, while the short book contributed through exposure to underperforming financial and industrial equities.

Portfolio Positioning and Strategy

The Sub-Fund maintained a diversified portfolio, balancing exposure across multiple sectors while actively adjusting net positioning in response to market conditions. Long positions in high-growth technology firms contributed positively, particularly in the artificial intelligence and semiconductor segments. Meanwhile, defensive allocations in healthcare and consumer staples provided stability amidst broader market fluctuations.

On the short side, the Sub-Fund remained cautious on alternative asset managers and leveraged financial institutions, given the persistent risks associated with tightening credit conditions. This theme was one of the main detractors of the portfolio for 2024. We selectively increased exposure to industrials, driven by expectations of cyclical demand recovery. Factor risk analysis and systematic screening remained integral to our investment process, ensuring that portfolio construction aligned with our objective of generating consistent risk-adjusted returns.

Outlook

Looking ahead, we anticipate a more challenging macroeconomic environment characterised by slower economic growth and elevated market volatility. Corporate earnings growth is expected to moderate, with analysts forecasting an S&P 500 earnings growth rate of approximately 14.8% for the coming year, well above the historical average but with a greater dispersion across sectors. Market valuations remain elevated, particularly in technology, which may lead to heightened sensitivity to earnings revisions.

Monetary policy will continue to be a focal point, with the Federal Reserve expected to adopt a measured approach to rate cuts. While liquidity conditions have stabilised, risks remain from potential fiscal tightening and trade policy adjustments. Rising geopolitical tensions and supply chain disruptions could further challenge global economic stability.

We remain committed to our fundamental and quantitative investment process, focusing on identifying high-quality opportunities while mitigating downside risks. Our strategy continues to emphasise dynamic risk management, sector rotation, and disciplined portfolio construction to deliver attractive risk-adjusted returns for investors in the Sub-Fund.

Conclusion

The Sub-Fund remains well-positioned to navigate an evolving market landscape. We will continue to leverage our comprehensive research framework and systematic investment approach to identify opportunities and manage risk effectively. We thank our investors for their continued trust and support.

Tavira Financial Limited

February 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Perspective American Extended Alpha UCITS Fund 2024 Performance Review

Performance Overview

The net performance of the Sub-Fund (USD Institutional Founder Class Pooled shares) for the year was 27.78% in \$ terms.

Market Commentary

Throughout the year, global equity markets experienced a complex macroeconomic environment, influenced by shifting monetary policies, inflation trends, and geopolitical factors. The S&P 500 ended the year with robust performance, driven by continued strength in technology and consumer discretionary sectors. Meanwhile, corporate earnings growth exceeded expectations, with the "Magnificent 7" leading market gains, while broader participation across industries became more evident in the latter half of the year.

Credit markets remained resilient despite persistent concerns over potential economic deceleration. High-yield spreads tightened to near multi-year lows, while leveraged loan defaults showed signs of increasing, reflecting stress among highly leveraged companies. The Federal Reserve maintained a data-dependent stance, balancing inflation control against economic stability, with rate cuts anticipated in the upcoming quarters.

Sector-specific developments shaped our strategy, particularly within technology, where artificial intelligence ("AI") and semiconductor investments saw continued momentum. Meanwhile, financials and consumer discretionary stocks experienced mixed performance amid evolving consumer spending patterns. The energy sector remained volatile, influenced by fluctuating oil prices and changing supply dynamics.

Portfolio Review

The Sub-Fund delivered positive relative performance over the year, supported by a well-executed long/short equity strategy. Notably, our long book benefitted from strong gains in technology and financial services, where holdings in AppLovin, Mastercard, and MercadoLibre contributed meaningfully. In contrast, our short positions in select alternative asset managers and consumer cyclical names helped mitigate downside risks.

Positioning in semiconductors, software companies and gold miners played a key role in outperformance, with Nvidia, Broadcom, Newmont and Kinross performing well across the year. Adjustments were made to reduce exposure to sectors with heightened valuation risks while adding positions in industrials benefiting from cyclical tailwinds. Our main detractors were in the short book, across mostly leveraged long alternative asset managers.

Outlook

Looking ahead, we remain cautiously optimistic about the investment landscape. Market sentiment continues to reflect expectations of a soft landing, but risks remain, particularly around inflationary pressures and fiscal policy dynamics. While corporate earnings growth is projected to remain robust, elevated valuations could pose headwinds if economic growth moderates.

We anticipate that equity returns will be more selective, favouring companies with strong balance sheets and sustainable earnings growth. AI-driven innovation and digital transformation remain compelling themes, supporting our conviction in key technology holdings. Meanwhile, potential liquidity constraints from changing central bank policies could create episodic volatility, presenting tactical opportunities.

The Federal Reserve's monetary trajectory will be pivotal in shaping market dynamics. Rate cuts, if realised, could bolster equity markets; however, an overly hawkish stance may reintroduce volatility. Additionally, trade policy shifts and geopolitical developments will require close monitoring, as they could significantly impact global capital flows and risk assets.

Given the evolving environment, we are maintaining a disciplined risk management approach, focusing on companies with solid fundamentals and adapting our short positioning to hedge against potential market downturns. Our portfolio remains well-positioned to navigate a range of economic scenarios while capitalising on select growth opportunities.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Perspective American Extended Alpha UCITS Fund 2024 Performance Review (continued)

Conclusion

In summary, the Sub-Fund has demonstrated resilience and adaptability in a dynamic market environment. Our strategic approach, combining rigorous bottom-up analysis with a top-down macroeconomic perspective, has allowed us to capture opportunities while mitigating risks. As we move forward, we will continue to refine our investment strategy, remaining agile and responsive to market shifts. Our commitment to delivering long-term capital appreciation and managing risk effectively remains steadfast. We appreciate the confidence of our investors and look forward to another year of navigating the financial landscape with a disciplined and proactive approach.

February 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

RoboCap UCITS Fund 2024 Performance Review

The USD Institutional Founder share class ended 31 December 2024 with a Net Asset Value of \$316.20, +12.19% in 2024 net of all fees. The performance of the Sub-Fund since inception on 4 January 2016 to the end of 2024 rose to +216.2%. As a thematic fund in robotics, automation and AI stocks, the portfolio is drawn from a universe of over 350 companies across a broad range of sectors, countries, and market caps. Given the strategy and investment universe, we do not believe that any one equity index is a relevant benchmark for the Sub-Fund. Having said that (and for reference purposes only) the performance of the Sub-Fund was 4.10% below that of the MSCI World Index return of 19.19% in 2024. Since inception the Sub-Fund has outperformed this index with an annualised return of +13.7% vs. +9.6% for the MSCI World over the year.

The positive return in calendar year 2024 was powered by two core drivers in our view. The first main aid to performance was the strong economic growth in the US, while inflation continued to fall, supporting the scenario of a “soft landing”. Outside of the US, while the economic data was not as strong, it was better than most had been expecting at the end of 2023, with Europe and China also avoiding recessions.

The second main driver has been the secular demand for AI and in particular AI infrastructure. NVIDIA is the company that invented the GPU (graphics processing unit) chips originally designed for generating graphics on computers, but which are particularly powerful in AI compute applications. With its long-standing position as market leader, it has a significant technology and ecosystem lead which form its powerful moats in this arena.

It saw surging demand for its products following the arrival of LLMs (Large Language Models) in late 2022 and the rush by both Hyperscalers and Enterprise customers alike to build AI-ready datacenters which can power their own LLMs. In 2024, NVIDIA was the largest position in the Sub-Fund and returned around 171% in the period and was the largest contributor to performance. It should be noted however that the AI wave supported positive returns in other sub-themes, including in cyber security and software, which drove strong returns in its peers and related sub-themes in the portfolio in 2024 as well.

Outside of AI, Healthcare robotics was also a strong vertical with both well established and dominant players like Intuitive Surgical and smaller companies that are just getting started like Procept BioRobotics generating very high double-digit returns. In terms of largest negative contributors in the year there was no clear theme across the worst five positions with each of them operating in different industries and end markets to each other.

For 2025, we expect that the build out of AI infrastructure will continue to dominate equity returns globally with unexpected accelerations and decelerations in demand here having material knock on effects on entire equity markets. New technologies around autonomous driving and robotics may also start to see deployments in real world settings which will help to fuel demand in their respective ecosystems. The main potential negative is the potential of the increased usage of tariffs globally, led by the new economic policies of the Trump administration, which would be highly disruptive to industrial and manufacturing sectors in particular. However the use of automation will be key to offset labour force shortages if more production is moved away from Asia.

The fundamentals of the companies in which we invest remain strong, supported by long-term secular trends. Robotics, Automation and Artificial Intelligence are now firmly established as key growth themes for the next couple of decades. We continue to believe that the macro-economic environment for robotics demand remains strong in the medium and long-term. As such, we could use market weakness to enter new positions or increase existing positions at more favorable prices.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Selwood ESG Credit UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (EUR Founder Class shares) for the year 2024 was +0.14%. The Christmas and New Year's Eve period is typically quiet in the markets, characterised by low trading volumes but occasionally marked by sharp price movements. Last year, we observed rallies across stocks, rates, and spreads, whereas this year presented a different dynamic. The Euro Stoxx 50 index posted a solid gain of +1.91%, outperforming its historical December average return of +1.01% since 2000. In fixed income, the 5-year German yield widened by +22 basis points, while the iTraxx IG widened by +1.8 basis points. Meanwhile, the credit cash index declined slightly, losing approximately -0.40% for the month, reflecting the strong performance of the cash spreads component. Interestingly, the iTraxx underperformed relative to stocks and cash spreads, diverging from its typical December movement, which averages a -3.60 basis points tightening since 2011.

For 2025, we would expect more volatility in credit markets. The future president of the United States is already promising us a fireworks display in the markets and has addressed (in bulk) (i) the renaming of the Gulf of Mexico, (ii) the purchase of Greenland and the Panama Canal (using force rather than USD has not been ruled out...), (iii) the return of drilling everywhere, including in Alaska and protected areas. Moreover, the topic of NATO has not been addressed, nor that of Ukraine. We should therefore see higher levels on iTraxx and related instruments, which will allow us to increase our exposure in due time.

The Sub-Fund ended the year just slightly positive. The primary drivers of its underperformance versus short-term investment grade (IG) cash indices were:

(i) Performance of Credit Cash Spreads vs. iTraxx Spreads (Basis): The basis, currently around -18bps (calculated as 1.7 iTraxx spreads minus the benchmark's spreads to Germany), has narrowed significantly compared to -52bps at the end of 2023, considering that the median basis since January 2015 is at -32bps.

(ii) Outperformance of Interest Rate Swaps vs. Government Yields: At the beginning of the year, the asset swap spread stood at 49bps, but it compressed to 0bps by year-end. This historically high level reflects the strong performance of bank credit relative to German government bonds. However, at these levels, any market stress could push the spread back above the 15-year median of 39bps.

Nevertheless, the Sub-Fund currently offers a carry and roll-down of +5.7% (gross – estimate Selwood AM France as of 31 December 2024), which is significantly higher than the ~3.2% provided by 5Y IG credit cash.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

SHARP UCITS Fund 2024 Performance Review

Sub-Fund Performance

The net performance of the Sub-Fund (USD Select Institutional Class shares) for the year was +7.8%.

Market Review

During the first quarter of 2024, U.S. shares registered a robust advance in the quarter. Gains were supported by some well-received corporate earnings as well as ongoing expectations of rate cuts later this year. The pace of monetary policy easing was likely to be slower than had been expected at the end of last year, given resilient U.S. economic data, but this did little to dampen appetite for equities.

The Fed kept interest rates on hold at 5.25-5.5%. U.S. inflation ticked up slightly to 2.5% year-on-year in February, from 2.4% in January (as measured by the personal consumption expenditure metric). Fed chair Jerome Powell said that the central bank will be "careful" about the decision on when to cut rates. The latest "dot plot" that details policymakers' expectations of rate cuts suggests three cuts this year.

Data releases generally demonstrated ongoing economic resilience. Annualised GDP growth for the fourth quarter was revised up in the third estimate to 3.4%. Nonfarm payrolls were robust although the unemployment rate rose in February. The ISM manufacturing PMI signalled expansion after 16 straight months of contraction, rising to 50.3 in March.

During the second quarter of 2024, U.S. shares gained in the second quarter, led higher by the information technology and communication services sectors. Ongoing enthusiasm around AI continued to boost related companies amid some strong earnings and outlook statements. Weaker sectors included materials and industrials.

The likely timing and extent of interest rates cuts remained a key focus for markets in the quarter. There were worries at the start of the quarter that the U.S. economy might be overheating, and strong economic data was greeted negatively by the market. However, hopes of a soft landing for the economy grew as the quarter progressed. The latest "dot plot", showing the rate setting forecasts of Fed policymakers, indicated just one rate cut this year.

The quarter commenced on a disappointing note for global bond markets, spurred by renewed concerns about U.S. inflation causing investors to reassess the timing of interest rate cuts. Later, a more conducive market environment was driven by the emergence of softer labour market conditions and encouraging news on inflation. Political risk drove idiosyncratic weakness across certain emerging markets. Additionally, the announcement of snap parliamentary elections in France instigated localised weakness, whereas the prospect of UK elections was less contentious.

During the second quarter of 2024, U.S. shares advanced over the quarter but sector performances were mixed as some previous winners lagged. Meanwhile, other sectors that had previously been shunned gained renewed favour with investors. All sectors, aside from energy, posted positive returns but top performing sectors included utilities and real estate while information technology posted only a small advance.

Changing expectations for the path of U.S. interest rates shaped the third quarter and contributed to the divergent sector performances. The U.S. Federal Reserve (Fed) had left interest rates on hold at a 23-year high in July. However, this was followed in early August by weaker jobs data. The non-farm payrolls report showed that 114,000 jobs were added in July, well below the consensus expectation of 175,000, while the unemployment rate rose to 4.3%.

This weaker jobs report sparked fears that the Fed may have left it too late to cut interest rates, and risked damaging the economy. Markets began to price in significant monetary policy easing by the end of the year. At the same time, doubts arose over the returns that companies might see from the significant investment being made into technologies such as AI. Both factors contributed to market volatility in early August.

Some resilient corporate earnings over the period helped to settle investor nerves. Fed chair Jerome Powell then used his speech at the Jackson Hole central bank symposium in August to signal an interest rate cut in September. In the event, the Fed announced a 50 basis point (bps) reduction to rates.

Investor attention also turned to the forthcoming U.S. election on 5 November. In July, President Biden announced that he would withdraw from this year's presidential race and endorsed Vice President Kamala Harris as the Democratic candidate instead.

SHARP UCITS Fund 2024 Performance Review (continued)

Market Review (continued)

During the second half of 2024, U.S. shares made gains in the fourth quarter to round out a strong year for the S&P 500 index. Equities were supported by Donald Trump's victory in the presidential election, and the accompanying "Red Sweep" which saw the Republicans take control of Congress. Shares were buoyed by expectations that Trump's policy programme will lift growth, lower taxes and cut regulation.

The Federal Reserve (Fed) lowered interest rates by 25 basis points (bps) in both November and December. However, in December the Fed triggered a stock market sell-off after scaling back the number of interest rates cuts expected in 2025. This was due to persistently sticky inflation. The core PCE price index increased 2.8% year-on-year in November (core PCE – personal consumption expenditure – is the Fed's preferred measure of inflation).

The U.S. economy remained strong with annualised GDP growth of 3.1% in the third quarter. Labour market data released in the quarter saw some distortion due to strike action and hurricanes. Non-farm payrolls rose by just 36k in October but this was followed by a 227k gain in November.

Sub-Fund Objectives and Investment Process

The Sub-Fund is an absolute return multi-asset strategy with the objective of outperforming the traditional 50/50 portfolio while delivering differentiated returns.

The Sub-Fund follows a systematic process built on eco-principles and expressed through advanced quantitative techniques – Risk Budgeting, Trend following, Dynamic Volatility Management.

The Sub-Fund operates on a diversified range of liquid markets – Equities, Rates, Credit, Real Assets.

The Sub-Fund exhibits a typical volatility of 8% with a long bias.

The Sub-Fund is designed to adapt to various market cycles and economic environments within a dynamic risk management framework.

Sub-Fund positioning and allocation changes

Over the year, the Sub-Fund maintained a high level of diversification (at the core of the portfolio construction).

Global allocation remained rather stable over the year enabling the capture of asset class premia throughout the year with a bias toward pro-growth assets (Equity/Credit). Two events should be mentioned: (i) the unwinding of the carry trade on the Japanese Yen, along with the rise in concerns about global growth, leading to an episode of volatility during the summer and a tactical reduction of risk, and (ii) the rise in interest rates during the fourth quarter and the acceleration over the last days of the year leading to a re-correlation in the downside between equities and bonds.

Outlook

Growth: Solid economies. Growth remains positive on both sides of the Atlantic, and unemployment rates historically subdued. Forward-looking business surveys suggest momentum likely continued at the end of last year, albeit with the services sector in better shape than manufacturing. Moreover, on balance, neither monetary nor fiscal policy look restrictive. A major downturn still seems neither necessary nor likely.

Inflation: Above-target inflation may be manageable. Inflation is close to targeted levels (2%) across the developed world. However, we continue to think it will settle in the 2-4% region for the next year or so: economies are still close to full employment and the prospect of even more accommodative fiscal policy suggests cyclical inflation risk remains elevated. Even so, this may not trouble businesses, particularly those with strong pricing power.

Policy: Rates may only fall a little. Inflation trending at above-target levels will not allow central banks – or bond investors – to relax completely. However, there is still room for rates to fall a little in both the U.S. and Europe. Market expectations for those cuts look more realistic than in recent months – at least for the U.S. and UK – and are signaling a short and shallow easing cycle.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

SHARP UCITS Fund 2024 Performance Review (continued)

Outlook (continued)

Geopolitics: Heightened geopolitical risk. Conflict in both Ukraine and the Middle East remains tense, while China's ongoing military drills are a reminder that it has not dropped its claim on Taiwan. In the political sphere, the return of Donald Trump to the White House suggests trade and diplomatic relations are likely to stay tense. On this side of the pond, Germany and France are experiencing their own political turbulence, though a new government in the former might spring positive change. Yet, as we note so often: what troubles us as citizens does not always affect portfolios. The business cycle usually matters most, and for now, it remains constructive.

Valuation: Stock valuations are full, but not excessive. Global stocks recently notched all-time highs and U.S. valuations – while not outlandish – look much more expensive. However, earnings expectations are drifting higher and non-U.S. stocks appear less overvalued. Meanwhile, in fixed income, government bond yields are at what we might consider as fair value, and look more useful as diversifiers. Corporate bonds are still looking expensive, with spreads close to post-global financial crisis lows.

Market Dynamics: Volatility increases modestly. Stock volatility rose though nowhere near as high as in August's sell-off, as the U.S. Federal Reserve revealed a hawkish set of interest rate projections. This proved to be short-lived, and volatility quickly returned to more subdued levels. Ongoing financial risk must still be elevated after the sharp normalisation of interest rates, but big banks' balance sheets look well capitalised, and accidents may be confined to such casualties as regional U.S. banks, commercial real estate, and private markets.

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Tosca Micro Cap UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (GBP Institutional Class shares) for 2024 was -14.9%.

2024 was a year when certainty won over speculation. The market's risk tolerance was further reduced by the uncertainty brought on by the electoral cycle, unknown and largely unquantifiable geopolitical events and higher than hoped for inflation stalling the pace of rate cuts.

Unproven or earlier stage companies inevitably have the side effect of consuming cash. Not all budget for ongoing volatility and as a result further pressure was brought to bear by companies seeking cash calls in the period. The Sub-Fund has traditionally had a bias to smaller cap names and has also sought to maintain a blend of growth and value. The performance between the 2 styles has rarely been so marked. While those classified as value contributed c1% to NAV in the year, the "growth" group hurt the NAV by a disappointing 10%.

Looking at specifics, the largest draw down came from Oxford Biodynamics (-247 bps), which frustratingly broadly mirrored the returns it made for the Sub-Fund in 2023. This niche drug discovery business with a unique test for prostate screening chose the wrong go to market strategy for its highly effective PSE test. Instead of a partnership strategy it chose to go direct and as such lost momentum and struggled to deliver the revenue numbers forecast. We exited in the year.

Two other growth stories which we continue to hold but were equally as challenging were Invinity Energy Systems (IES) (-182 bps) & CREO (-180 bps). The former is a manufacturer of vanadium flow storage batteries. During the year it raised equity to allow it to invest in new manufacturing capacity, support development projects and invest in working capital. Subsequently it changed the CEO too as it became clear that the pace of cost outs and client orders were not meeting expectations. Disappointing as this is, the business is very well funded and has a unique product that unlike Lithium batteries does not degrade over time. Despite the pro oil, anti-renewables stance of the new U.S. President, the reality is that energy storage is part of our future and if IES delivers on revised expectations then the upside will be material.

One of the ongoing features of the UK equity market remains M&A. Indeed, the Sub-Fund's largest gain came from the takeover of Wincanton (+250 bps) by GXO Logistics in a bidding war with CEVA. We believe that consolidation will continue to be a theme in the UK small and mid-cap market. A mix of low valuations, Sterling weakness/USD strength, availability of unique assets and a lack of wider liquidity are all reasons why both local and U.S. private equity and trade buyers will target UK PLC through 2025.

In terms of catalysts, we do believe that the new UK Government missed a trick in its Autumn Budget to stimulate investment in the UK market. That said, there are reasons to be optimistic. It is important to note that the companies in the portfolio have matured in terms of sales and margins in the last 4 years. Average Ebitda margins are up over 6% to c15% on a sales CAGR of 28% (this includes M&A). Average leverage to achieve this is c0.2x vs zero four years ago. This financial strength and improved return provides a higher degree of surety in challenging markets. Secondly, the rates cycle has turned and the market is forecasting 3-4 base rate cuts in the next 12 months. Lower funding costs on the one hand and lower cash returns on the other could stimulate investment in equities and growth. Finally, the valuation of UK small cap equities looks increasingly anomalous vs the U.S. We note that UK small caps are currently trading on just over half their long run average PE & price book and a 40% premium to long run FCF yields. In the U.S. by contrast, stocks are trading on a 10% & 20% premium and 10% lower FCF yield*. At the very least this has not been missed by U.S. corporates and for as long as those discounts exist so we would expect M&A to be a key feature of UK markets.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Trinity Street Global Equity UCITS Fund 2024 Performance Review*

The performance of the Sub-Fund (USD Class A Pooled shares) for 2024 was 0.76%, -14.24% in relative terms when compared to the MSCI ACWI NDR benchmark (BM). For context the Global Strategy on which this Sub-Fund is based and managed has a +0.78% annualised return above BM net of fees over the last 21 years.

The disappointing performance of the Sub-Fund can be analysed in several ways. By sector the largest drag came from IT (approximately one third of the total underperformance) with the Sub-Fund's 13% exposure producing a negative 6% return: this compares to the 32% return for the index's 25% weighting. The heavy exposure to industrials, 29% of the Sub-Fund, produced a return of only 3%, whereas the index's 11% weighting produced a 12% return (this was responsible for a quarter of the total underperformance). Healthcare at 9% of the Sub-Fund generated a particularly poor -24%, whereas the index's 11% weighting managed to eke out a 1% gain; and the final major drag was in consumer discretionary where the Sub-Fund's exposure of 18% produced a return of only 10% compared to the 20% return for the index's 11% exposure.

The sectoral performance of the Sub-Fund did not come with any geographical silver linings: the European exposure of 24% produced a return of -11% in contrast to the index which rose by 1% on a 12% weighting; the relatively low exposure to the U.S. of 38% produced a return of +14%, whereas the index weighting of 64% generated a 25% return; and Japan, at 11% of the Sub-Fund compared to 5% of the index, produced a negative return of 9% compared to +8%.

The S&P 500 Index achieved an impressive 20%+ return in both 2023 and 2024, the first back-to-back gains of such a magnitude since 1997 and 1998, the narrative dominated by NVIDIA, which rose by 171%. Among global equity markets there were some solid performances from the DAX (+18.8% in euros) and the TOPIX (+17.7% in yen), although the former was undermined for dollar-based investors by 6% from a weaker euro and the latter by 10% from a weaker yen. Latin America was the worst performing region, falling by 26%, with Brazil -30% and Mexico -27%; the mini economic miracle in Argentina saw its market rise by 117%. Beyond equities there was pressure on U.S. Treasuries as the 10-year yield increased by 70bps, whilst fiat currency alternatives such as gold were strong (+28%) and Bitcoin stood out with a 120% gain, spurred on by the likelihood of a more favourable U.S. regulatory environment. Increases in cocoa and coffee prices (178% and 70% respectively) were standouts in a world of commodities which rose by just 3%.

The last few years have been a period of particularly intense debate about the relative attraction of global investing compared to a pure S&P 500 approach, with the noise around the 'Magnificent 7' attracting plenty of justifiable attention. The Sub-Fund's exposure to the U.S. ended 2024 at 35% compared to 67% for the benchmark, with the Sub-Fund owning Amazon, Microsoft and Alphabet, but not NVIDIA, Apple, Tesla or Meta, in addition to which it owns, in our view, a great series of international companies. The 63% rise in Tesla shares in 2024 we believe is one example of the distortion and occurred despite a 1% decline in full year vehicle deliveries, and a 7% decline in the fourth quarter; it is perhaps explicable only because of the proximity of Elon Musk to the incoming administration.

The investment process at Trinity Street is based on bottom-up opportunities among companies undergoing under-recognised structural change. The preoccupation of much of the world with the election of Donald Trump and the potential headwinds which this could bring to the rest of the world in 2025 is providing the unusual dislocation in valuations and ignores many changes in non-U.S. markets which have the potential to be positive drivers of return.

The contribution from individual names obviously is key in any bottom-up strategy, and, in 2024 there were some excellent returns, with 8 names (representing 26% of the Sub-Fund by value) producing returns in excess of 30% each (of these 4 names produced returns in excess of 40%); the problem was that there were too many holdings which performed poorly, including 6 (representing 13% of the portfolio by value) which were down by more than 30%, which is very poor in a marketplace where the index rose by 17%. As ever in our uncorrelated world, the top contributors and top detractors were largely from different sectors and regions: the top 5 contributors were Rheinmetall (+102%), Amazon (+44%), TSMC (+92%), Alphabet (+36%) and Smurfit WestRock (+42%); the top detractors were Vestas (-57%), Samsung Electronics (-40%), ST Micro (-39%), Eisai (-44%) and Nucor (-42%). 2024 was a year of significant portfolio activity with 9 new names added and 11 names sold.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Trinity Street Global Equity UCITS Fund 2024 Performance Review* (continued)

Rheinmetall delivered another year of significant outperformance after reporting several major new orders and disclosing updated mid-term financial targets that were above investors' expectations. The company's exposure to short-cycle businesses are proving to be a key beneficiary of rising defence budgets in Europe. TSMC benefited from the increasing demand for high end nodes in AI chips and is emerging as the de facto sole source for high end nodes, which the market is starting to reflect in the valuation multiple. Vestas was primarily a victim to sentiment towards the U.S. election as Trump stated his dislike for offshore wind energy. While U.S. offshore wind is only a small element of Vestas's business, general uncertainty on the next government has also slowed onshore orders. Investor sentiment was also weakened by an unexpected reset to profitability expectations in the company's service division. However, longer term, the need for global wind energy remains robust and the turn-around of Vestas's profitability should continue as it works its way through legacy contracts and is better able to match higher pricing and more manageable inflation. The rollout of Eisai's Alzheimer's disease medicine Leqembi has been slower than originally anticipated, but we are confident that the initial barriers to patient access are being addressed and the product will begin to demonstrate its significant long-term sales potential.

After a totally unsatisfactory year of performance in 2024 we approach 2025 with humility. There has been significant portfolio renewal with the new holdings purchased in 2024 (and before) but these have yet to produce the returns we expected. The U.S. now has a large concentration of its weighting (32%) in a small coterie of names. In aggregate these 'Magnificent' names have lived up to their billing when it comes to earnings delivery, and the outlook for further growth in 2025 has solid foundations. However, as with Cisco in 2000, the leadership changes as technology evolves, and, whilst we continue to have a great deal of confidence in Amazon, Alphabet and Microsoft, we do not share the same enthusiasm for Tesla, NVIDIA, Apple and Meta at current levels. As we hope is clear from the analysis of performance in earlier paragraphs, the drag in the Sub-Fund has been about far more than not owning some U.S. names (these represent -4.3% of the underperformance in 2024), and nor can it be blamed on a boost to the S&P 500 Index from the return of President Trump, but rather there are too many names, including many of the new ones, which have been a drag on performance. We continue to believe that patience is needed for these names, in line with Trinity Street's investment time horizon of 3 years, and we have been in this position before (albeit with not as large a drawdown in performance), but nonetheless it is extremely uncomfortable. One interesting statistic is the earnings multiple of the portfolio, at 17.1x which compares to 19.6x for the MSCI All Country World Index. We are not value managers, but it is difficult not to conclude that there is a great deal of value in the Sub-Fund's positioning at current levels and we are optimistic that this will be recognised.

*The merger of Trinity Street Global Equity UCITS Fund with a new sub-fund of iMGP, a Luxembourg SICAV, following its approval by shareholders, took place on 23 January 2025, and the Sub-Fund has now terminated.

Trinity Street Asset Management, LLP

January 2025

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Virtuoso UCITS Fund 2024 Performance Review

The Sub-Fund (EUR Institutional Class Pooled shares) returned +4.35% this year; we remain confident in the companies we are invested in, irrespective of asset price volatility.

The past year was a turbulent one, characterised by a multifaceted landscape. As we pen our year-end reflections, it's crucial to contextualise our financial results. Geopolitical, economic, and social trends, alongside company-specific events, have significantly impacted markets across regions. Our performance figures are the product of rigorous analysis, considering these factors alongside scenario planning and financial modeling.

In the U.S., market returns were heavily concentrated in a few dominant stocks, while European performance was more sector-driven. This disparity is starkly illustrated by the S&P 500, which gained 25.2%, compared to just 12% for its equally weighed variant.

In Europe, sector performance diverged dramatically. Banks enjoyed a 26% surge, while the Auto & Parts sector plummeted by 12%, an astonishing 38% spread. This stark contrast stems from various factors, including a worrying macroeconomic environment exacerbated by short-sighted European industrial policy, trying at the same time to work towards green transition and energy independence, while preserving productivity.

Looking ahead, new drivers will undoubtedly shape market returns. The recent U.S. presidential election and the corporate-heavy administration, led by prominent figures like Elon Musk, promise a period of significant change. Our adaptable investment approach remains dedicated to identifying and capitalising on these evolving opportunities for the Sub-Fund's investors.

Portfolio Analysis and Strategy

In 2024, our focus market, Europe, represented by the Euro Stoxx 600, managed to achieve a modest 5.97% gain, highlighting the region's persistent underperformance. The U.S. had another strong year. Meanwhile, Japan continued its run, delivering a second consecutive year of over 25% returns. Despite lingering macroeconomic concerns, the Hang Seng China Index in China rebounded significantly, posting a robust 26% gain after a challenging 2023. However, not all Asian markets fared as well. South Korea experienced a difficult year, with the market declining over 10% amidst political instability that culminated in the impeachment of President Yoon Suk Yeol. Against this backdrop of geopolitical uncertainty, exacerbated by the ongoing Russia-Ukraine war and unresolved Middle Eastern crises, our Sub-Fund achieved a positive return of 4.35% for the year, with a 1.01% gain in December.

In the ever-evolving market environment, profit warnings and company-specific events will invariably influence the risk-return profile of our strategy. However, we are constantly learning and adapting in order to implement new methodologies while at the same time focus on key sectors and stock-picking.

Technology, Media, and Telecom

The broader Nasdaq Composite index, encompassing 3,273 technology companies, registered a modest gain. At year-end, the U.S. technology sector traded at a price-to-earnings (P/E) ratio of 36.44, exceeding the 10-year average of 35.45 but still below its historical peak.

NVIDIA, a leading disruptor in the sector, continued its remarkable performance, delivering another year of triple-digit returns (171%) after a stellar 2023, culminating in a market capitalisation of USD 3.5 trillion. Despite recognising the stock's continued upside potential, we exercised discipline by taking some profits in the final weeks of the year while maintaining a substantial allocation.

While current sector valuations may appear stretched, we believe the unprecedented level of innovation and transformative change currently underway justifies these levels. We do not anticipate a significant market correction in the near future.

Industrials

In 2024, the Industrial sector demonstrated robust growth on both sides of the Atlantic. Our portfolio outperformed its peers thanks to the successful implementation of both long and short positions. Notably, our short bets on Sonoco Products (-5.84%), Swiss turbocharger manufacturer Accelleron (-5.47%), and Kone OYJ (-4.19%) contributed significantly to mitigating downside risk.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Virtuoso UCITS Fund 2024 Performance Review (continued)

Industrials (continued)

This disciplined approach, combining long and short ideas, consistently delivered strong risk-adjusted returns throughout the year. In 2025, we aim to leverage this proven expertise in stock selection across both sides of the portfolio, enabling us to navigate effectively through varying economic cycles and market conditions.

Consumer Non-Cyclical

Our defensive sector demonstrated positive performance throughout 2024, including a modest gain in December. Notably, eight of our top ten performing positions originated from our short book. For example, Ashtead, the international equipment rental company, experienced a 23% decline in December, driven by weaker-than-expected earnings and a revised 2025 outlook due to softening demand in local commercial markets.

Entering 2025, we possess a well-diversified consumer non-discretionary portfolio with the aim of replicating the positive results achieved for our investors in 2024.

Consumer Cyclical

Our Consumer Discretionary bucket, traditionally focused on luxury goods, delivered strong returns in 2024, defying concerns over a potential Chinese recession and a domestic real estate crisis. While these stocks were used by some investors to hedge against these market risks, our holdings within this sector emerged as the second-best performing segment of our portfolio.

Among our top performers was Renault, which defied industry headwinds, delivering a 27.48% return despite a 12.16% decline in the European Auto & Parts Index (SXAP). Hermes, a high-conviction holding within our luxury portfolio, outperformed negative sector sentiment, achieving a 21% price appreciation. Ferrari, trading at a premium valuation akin to a luxury goods company, generated exceptional returns, far exceeding the performance of its Formula One racing team with a 35% price increase. We maintain a positive outlook on these high-conviction holdings.

In 2025, we will remain dedicated to identifying new investment opportunities, closely monitoring earnings growth, company news, and guidance. We will also focus on analysing intangible assets, such as intellectual property, management acumen, and unique company characteristics, to further strengthen our investment convictions.

Total assets \$ 43,193,173. Performance shown is that of the UI class shares.

As 2024 drew to a close, global markets delivered remarkable performances across various sectors, with the S&P 500 (SPY) and Nasdaq 100 (QQQ) achieving over 25% year-to-date. Large-cap growth (iShares S&P 500 Growth ETF) led the charge with an exceptional 35.82% gain, while large-cap value (iShares S&P 500 Value ETF) experienced a modest 12.04% rise. Small-cap stocks showed mixed results, as the small-cap value ETF (iShares S&P Small-Cap 600 Value ETF) closed the year up 7.34%. In Asia, China's equity markets rebounded positively amid significant monetary and fiscal stimulus measures. The People's Bank of China (PBoC) reduced policy rates and announced substantial stock market support, boosting investor sentiment despite persistent economic challenges. Emerging markets experienced varied outcomes; while some benefitted from easing monetary policies and strong commodity prices, others faced geopolitical tensions and economic instability. Developed markets outside the U.S. and Europe underperformed, with the Bloomberg Developed Markets ex-U.S. Index gaining only 5.5%, though currency-adjusted returns showed slight improvement.

In the U.S., the Federal Reserve's monetary policy played a pivotal role in shaping market dynamics. Throughout 2024, the Fed adjusted the Federal Funds rate, concluding the year at approximately 4.5%. These actions aimed to balance inflation control with economic growth support. The yield curve's spread between 2-Year and 10-Year Treasury Yields, at 0.41% by mid-January 2025, indicated moderate economic growth expectations and a positive outlook for inflation stability. Historically, a positive yield curve spread is associated with economic confidence, contrasting with the recessionary signals of an inverted yield curve.

The second half of 2024 was marked by intensified market volatility and significant strategic adjustments for the Sub-Fund. Following a relatively stable first half, the Sub-Fund adopted an aggressive stance, emphasising high-beta individual stock options and arbitrage strategies to capture higher returns. By July, individual stock options represented over three-quarters of the Sub-Fund's option value. The emphasis on calendar diagonal spreads and straddles, designed for flat or declining markets, delivered mixed results amid heightened volatility. A 50% delta short position gradually shifted to a slightly positive gamma stance by month-end. Futures played a critical role, contributing over 1% to performance as the Sub-Fund adeptly navigated inflation and interest rate trends.

August presented global turbulence, with investor concerns centering on U.S. economic stability and geopolitical risks. The Sub-Fund's arbitrage strategies aimed at profiting from the Nasdaq's long-term outperformance relative to the S&P 500 and individual stock options faced mixed outcomes. The Nasdaq/S&P 500 spread strategy underperformed, incurring a loss of over 2.5% of NAV, while stock options arbitrage yielded a 0.8% gain. A delta exposure range of -20% to -50% hindered recovery gains, reflecting the Sub-Fund's commitment to risk management despite temporary setbacks.

INVESTMENT MANAGERS' REPORTS (CONTINUED)**Volatility Arbitrage UCITS Fund 2024 Performance Review (continued)**

September marked resilience in U.S. equities as the S&P 500 reached an all-time high, fueled by a Federal Reserve rate cut and optimism about a “soft landing.” Positive contributions came from arbitrage strategies, with Nasdaq/S&P 500 spreads and index futures driving gains. The Nasdaq/S&P 500 spread widened by 0.45%, adding over 1.6% to NAV, while individual stock options arbitrage modestly boosted returns by 0.08%. The Sub-Fund’s net delta exposure maintained favorable positioning, supporting outperformance relative to benchmarks.

October brought heightened volatility, with equities trending downward amid escalating geopolitical uncertainties. Developed market equities fell 2.0%, and credit markets softened. The Sub-Fund continued its arbitrage strategies, with the Nasdaq/S&P 500 spread narrowing by 0.14%, contributing 0.2% to NAV. Individual stock options slightly reduced NAV by 0.05%, while fixed-income strategies weathered elevated Treasury yields. Despite challenges, the Sub-Fund’s slightly negative delta exposure enabled alignment with market movements, mitigating losses.

November saw a post-election equity rally, as the S&P 500 gained 5.9% and the Nasdaq rose 5.3%, driven by resolved political uncertainty and optimism surrounding economic policy. Index futures and Treasuries contributed positively to NAV, while the Nasdaq/S&P 500 spread’s narrowing reduced potential gains. Individual stock options arbitrage slightly detracted from performance, but overall positioning reflected the Sub-Fund’s commitment to strategic agility.

December concluded the year with mixed performance. The S&P 500 fell 2.42%, while the Nasdaq edged up 0.45%. The Sub-Fund’s arbitrage strategies encountered headwinds as the Nasdaq/S&P 500 spread increased by 2.96%, leading to a loss exceeding 3% of NAV due to positive delta exposure. Treasuries added 0.26% to NAV, partially offsetting losses. Despite these challenges, the S&P 500 delivered a full-year return of 25.02%, highlighting robust equity markets supported by favorable monetary policies and election outcomes.

Looking ahead, the Sub-Fund enters the first half of 2025 with a renewed focus on achieving a 20% annual return by leveraging a more volatile, data-driven strategy. Key initiatives include transitioning from a theta-driven approach to prioritising long gamma strategies. This shift enables the Sub-Fund to capitalise on significant market movements amidst anticipated geopolitical risks, including tensions in the Middle East, Iranian oil disruptions, and uncertainties surrounding China-Taiwan and Ukraine conflicts. The integration of advanced dashboards and AI will enhance decision-making precision, fostering disciplined responses to evolving market conditions.

Tactically, the Sub-Fund will remain flexible, leveraging easing U.S. monetary policies and its expertise in inflation and interest rate forecasting. High-beta stock options and futures will remain critical tools for capturing alpha. Additionally, the Sub-Fund plans to refine its arbitrage strategies, focusing on high-conviction trades while maintaining diversification. By embracing bold swings and calculated risks, the Sub-Fund seeks to navigate market uncertainties effectively and achieve superior risk-adjusted returns.

With disciplined risk management, diversification, and advanced analytics, the Sub-Fund is well-positioned to capitalise on emerging opportunities, ensuring its continued success in an evolving market landscape.

INVESTMENT MANAGERS' REPORTS (CONTINUED)

Westbeck Energy Transition UCITS Fund 2024 Performance Review

The net performance of the Sub-Fund (USD Institutional Class Pooled shares) was +1.35% for the year.

The Sub-Fund's performance was impaired in December by the underperformance of the critical material, copper and uranium, equities relative to both their respective commodities and the broader market. The decorrelation was stark in the uranium sector as the commodity drifted 5% lower and the equities, as measured by the URA ETF, fell 17%. Nuclear has grown as a theme within the Sub-Fund as policymakers globally have returned to uranium fuelled reactors as a source of decarbonised baseload electricity. This is also an admission that the intermittency of wind and solar cannot easily be circumvented. The performance in December was disappointing as there was no specific negative news flow over the period and both sectors had been strong contributors over the year.

The Sub-Fund's short positions in the South Korean battery material producers, EcoPro BM, Posco FM and LG Energy Solutions, proved beneficial over the course of the year, as slower growth forecasts cast doubt over the profitability of the large investments these companies had made in the U.S. They also face the daunting prospect of competing in a marketplace where China is the largest and most powerful player with over 80% of the global market. As we have seen in the solar module manufacturing space, not only is the cost of production within China is incredibly hard to replicate, but the technology is also cutting edge.

Overall, 2024 was a year of progress and reckoning for the energy transition.

Progress was evident as renewable energy generated a record share of global electricity, around 30%.

EV sales grew 25% globally to more than 17 million vehicles despite a 3% fall in Europe, where policymakers' targets remain ahead of consumer's desire. We remember that in 2020, Europe's EV sales of 1.4m were just ahead of China by 100,000 vehicles. Scroll forward and we find that last year China sold close to 12m New Energy Vehicles and Europe around 2.4m.

Solar module installations again beat forecasts, growing by around a third to 600GW of installed capacity. Increased efficiency and falling costs greatly enhancing Solar's appeal.

The reckoning arrived in the form of politics, as the shift to the right in global politics brought with it a narrative that renewable energy had to be more cost competitive. The COP 28 summit in Azerbaijan lacked the impact of previous such events and was a signal that electorates were less willing to subsidise clean electricity if the cost was deindustrialisation.

Another reckoning arrived in the shape of AI's power demands. Electricity generators in the U.S. dealt with flat demand for the first twenty years of this century, while in Europe demand had fallen, but the arrival of the power-hungry AI revolution has forced generators to consider the challenge of not only cleaning up their power production methods, but growing output.

Energy security also rose on the agenda as the dangers of relying on unreliable suppliers or having insecure transmission links became evident, and any assessment of the critical issues facing a successful transition must include the state of the global grid, which remains in need of major upgrades.

A fourth year of declines for Clean Energy Indices have understandably left some investors discouraged, but we believe as some of the 'magical thinking' leaves the stage, the opportunities for investors are becoming clearer.

Companies generating reliable, clean and competitive energy remain a focus for the Sub-Fund, and we expect both nuclear and solar (at least you know when it is NOT going to be there) to be preferred relative to wind.

We believe that the investment required for the necessary grid upgrades requires a multi-year commitment that will not be derailed by political shifts. The demands of the Hyperscalers may have taken the attention last year, but the ongoing electrification of everything, particularly transportation, has led to orderbooks and backlogs unrivalled in the capital goods space.

The critical materials endured an ultimately disappointing year, yet our supply and demand models for uranium and copper remain relatively tight over the medium term.

The United States and the Rest of the World will have divergent attitudes towards the energy transition over the coming four years and the UK is in a great position to observe the differences. We believe that the ultimate destination of greater de-carbonisation is not in question, but the pace and cost of change are the major variables.

Independent Auditor's Report to the Shareholders of the Sub-Funds of MontLake UCITS Platform ICAV

Report on the audit of the financial statements

Opinion

We have audited the financial statements of 1OAK Multi Asset 80 UCITS Fund, ABR 75/25 Volatility UCITS Fund, Advent Global Partners UCITS Fund, Alpha Fixed Income UCITS Fund, AlphaQuest UCITS Fund, Chelverton Select Consumer Staples Fund, Chilton Small Cap European UCITS Fund, Collidr Adaptive Global Equity UCITS Fund, Collidr Global Equity UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, Crabel Advanced Trend UCITS Fund, Crabel Gemini UCITS Fund, DART Fund, Descartes Alternative Credit UCITS Fund, DUNN WMA Institutional UCITS Fund, Green Court All China Equity Fund, Invenomic US Equity Long/Short UCITS Fund, Ironshield Credit Fund, Ironshield High Yield Alpha Fund, Kayne Anderson Renewable Infrastructure UCITS Fund, MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund, Mygale Event Driven UCITS Fund, Nutshell Growth Fund, One River Risk Responders UCITS Fund, Perspective American Absolute Alpha UCITS Fund, Perspective American Extended Alpha UCITS Fund, RoboCap UCITS Fund, Selwood ESG Credit UCITS Fund, SHARP UCITS Fund, Tosca Micro Cap UCITS Fund, Trinity Street Global Equity UCITS Fund, Virtuoso UCITS Fund, Volatility Arbitrage UCITS Fund and Westbeck Energy Transition UCITS Fund (collectively "the Sub-Funds") of MontLake UCITS Platform ICAV ("the ICAV") for the year ended 31 December 2024 set out on pages 82 to 347, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows and related notes, including the material accounting policies set out in Note 2.

The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Sub-Funds as at 31 December 2024 and of their changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Acts 2015 to 2021 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the ICAV in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independent Auditor's Report to the Shareholders of the Sub-Funds of MontLake UCITS Platform ICAV

Emphasis of matter - Non going-concern basis of preparation - Chilton Small Cap European UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund, and Trinity Street Global Equity UCITS Fund

We draw attention to the disclosure made in Note 1 to the financial statements which explains that the financial statements of Chilton Small Cap European UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund, and Trinity Street Global Equity UCITS Fund are not prepared on the going concern basis for the reason set out in that note. Our opinion is not modified in respect of this matter.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The Directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the Directors' report, the Directory, the General Information, the Depositary Report to Shareholders, the Investment Managers' Reports, the Sub-Fund Performance Data and the Unaudited Schedules. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work undertaken during the course of the audit, we have not identified material misstatements in the other information.

Opinion on other matter prescribed by the Irish Collective Asset-management Vehicles Acts 2015 to 2021

In our opinion, the information given in the Directors' Report is consistent with the financial statements.

Matters on which we are required to report by exception

The Irish Collective Asset-management Vehicles Acts 2015 to 2021 require us to report to you, if in our opinion, the disclosures of Directors' remuneration specified by law are not made. We have nothing to report in this regard.

Respective responsibilities and restrictions on use

Responsibilities of Directors for the financial statements

As explained more fully in the Directors' responsibilities statement set out on page 16, the Directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Sub-Funds or to cease operations, or have no realistic alternative but to do so.

Independent Auditor's Report to the Shareholders of the Sub-Funds of MontLake UCITS Platform ICAV

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the shareholders of the Sub-Funds, as a body, in accordance with the Section 120 of the Irish Collective Asset-management Vehicles Act 2015. Our audit work has been undertaken so that we might state to the Sub-Funds' shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Sub-Funds and the Sub-Funds' shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

1. BASIS OF PREPARATION

(a) *Statement of compliance*

The Financial Statements of the Sub-Funds of the ICAV (the “Financial Statements”) at 31 December 2024 are prepared in accordance with IFRS and with the requirements of the Irish Collective Asset-management Vehicles Act 2015 to 2021 (the “Acts”) pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Acts 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

The Financial Statements are prepared on a Sub-Fund basis. Assets and Liabilities are segregated between each Sub-Fund and are separately reported in these Financial Statements.

Listed below are the Sub-Funds presented in these Financial Statements:

IOAK Multi Asset 80 UCITS Fund
 ABR 75/25 Volatility UCITS Fund
 Advent Global Partners UCITS Fund
 Alpha Fixed Income UCITS Fund
 AlphaQuest UCITS Fund
 Chelverton Select Consumer Staples Fund
 Chilton Small Cap European UCITS Fund
 Collidr Adaptive Global Equity UCITS Fund
 Collidr Global Equity UCITS Fund
 Cooper Creek Partners North America Long Short Equity UCITS Fund
 Crabel Advanced Trend UCITS Fund
 Crabel Gemini UCITS Fund
 DART Fund
 Descartes Alternative Credit UCITS Fund
 DUNN WMA Institutional UCITS Fund
 Green Court All China Equity Fund
 Invenomic US Equity Long/Short UCITS Fund
 Ironshield Credit Fund
 Ironshield High Yield Alpha Fund
 Kayne Anderson Renewable Infrastructure UCITS Fund
 MontLake Q.Brands Premiere Palm-Tree Alpha Equity UCITS Fund
 Mygale Event Driven UCITS Fund
 Nutshell Growth Fund
 One River Risk Responders UCITS Fund
 Perspective American Absolute Alpha UCITS Fund
 Perspective American Extended Alpha UCITS Fund
 RoboCap UCITS Fund
 Selwood ESG Credit UCITS Fund
 SHARP UCITS Fund
 Tosca Micro Cap UCITS Fund
 Trinity Street Global Equity UCITS Fund
 Virtuoso UCITS Fund
 Volatility Arbitrage UCITS Fund
 Westbeck Energy Transition UCITS Fund

(b) *Basis of Measurement*

The Financial Statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss which have been measured at fair value. Items included in the Financial Statements are measured using the currency of the primary economic environment in which the respective Sub-Funds operate (the “functional currency”). The functional currency, which is either US Dollars (“USD” or “\$”), Pounds sterling (“GBP” or “£”) or Euro (“EUR” or “€”), is shown in the Statement of Financial Position of each Sub-Fund. The ICAV has also adopted these functional currencies as the presentation currency of each of the Sub-Funds.

If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****1. BASIS OF PREPARATION (CONTINUED)****(b) Basis of Measurement (continued)**

The Financial Statements for the Sub-Funds as listed in the table above for the year ended 31 December 2024 have been prepared on a going concern basis, except those for Chilton Small Cap European UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund and Trinity Street Global Equity UCITS Fund. The Financial Statements for these Sub-Funds have been prepared on a basis other than that of going concern.

The comparative Financial Statements relating to Kayne Anderson Renewable Infrastructure UCITS Fund and Trinity Street Global Equity UCITS Fund have been prepared on a going concern basis for the year ended 31 December 2023.

The comparative Financial Statements relating to Collidr Global Equity UCITS Fund and Chilton Small Cap European UCITS Fund have been prepared on a basis other than going concern for the year ended 31 December 2023.

Collidr Global Equity UCITS Fund has remained dormant since 31 January 2023.

The following Sub-Funds terminated during the year, or have terminated since the year end, and separate Termination Financial Statements have been or are being prepared for these Sub-Funds:

Sub-Fund	Termination Date
MontLake Abrax Merger Arbitrage UCITS Fund	19 January 2024
Chelodina UCITS Fund	29 February 2024
Tosca UCITS Fund	29 February 2024
Disciplined Alpha U.S. Long Short UCITS Fund	31 March 2024
Alpstone Global Macro UCITS Fund	3 February 2025
Sixteen02 Global Equities UCITS Fund	3 April 2025

In all other respects, the accounting policies set out in Note 2 in these Financial Statements have been applied consistently to all years presented.

(c) Use of Estimates and Judgements

The preparation of the Financial Statements in conformity with IFRS requires the ICAV to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

Judgements

The judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the Financial Statements are the determination of functional currency disclosed in Note 1 (b) in these Financial Statements and the involvement with unconsolidated structured entities in Note 14 in these Financial Statements. The Sub-Funds' interest in these unconsolidated structured entities is not considered to be a controlling interest given the voting rights in the entities are not dominant rights in deciding who controls them because the rights relate to administrative tasks only; each structured entity's activities are restricted by its prospectus; and the structured entities have narrow and well-defined objectives to provide investment opportunities to investors.

Estimates

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Information about assumptions and estimation uncertainties as at 31 December 2024 that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year is included in Note 10 in these Financial Statements and relates to the determination of fair value of financial instruments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES

(a.) *Financial assets and financial liabilities*(i.) *Recognition and initial measurement*

The ICAV recognises regular way transactions effected for each Sub-Fund in financial assets and financial liabilities on the date it becomes party to the contractual provisions of the instrument. Transactions are recognised using trade date accounting. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Financial assets and liabilities categorised as at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income, whilst on other financial instruments they are measured initially at fair value plus transaction costs directly attributable to the acquisition and sale.

(ii.) *Classification of financial assets and financial liabilities*

On initial recognition, the ICAV classifies the Sub-Funds' financial assets and financial liabilities as measured at amortised cost or FVTPL.

Financial assets at fair value through profit or loss:

The ICAV classifies the Sub-Funds' investments based on both the ICAV's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The ICAV is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The ICAV has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of each Sub-Fund's debt securities excluding structured notes are solely principal and interest. However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the business model's objective. Consequently, all investments are measured at fair value through profit or loss.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the board of the ICAV considers all of the relevant information about how the Sub-Fund is managed including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the ICAV's continuing recognition of the asset.

The ICAV has two business models for each Sub-Fund:

- Held-to-collect business model: this includes Cash and amounts with credit institutions and Amounts due from brokers.
- Other business model: this includes debt securities, equity investments, investments in unlisted open-ended investment funds, unlisted private equities and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, 'Principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular year of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a.) *Financial assets and financial liabilities (continued)*(ii.) *Classification of financial assets and financial liabilities (continued)*

In assessing whether the contractual cash flows are SPPI (“Solely Payments of Principal and Interest”) the ICAV considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the ICAV considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the relevant Sub-Fund’s claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodic reset of interest rates).

Financial liabilities at fair value through profit or loss:

The ICAV takes short positions for certain Sub-Funds synthetically using derivatives in pursuance of the relevant Sub-Fund’s investment policy. Derivative contracts that have a negative fair value are classified as financial liabilities at fair value through profit or loss.

As such, the ICAV classifies all of a Sub-Fund’s investment portfolio as financial assets or liabilities at fair value through profit or loss.

The ICAV’s policy requires the Manager and the Board of Directors to evaluate the information about these financial assets and financial liabilities on a fair value basis together with other related financial information.

Financial assets at amortised cost:

The ICAV measures cash and amounts with credit institutions, collateral and margin cash, balances due from brokers, dividends and other receivables at amortised cost.

Financial liabilities at amortised cost:

The ICAV measures amounts owing to credit institutions, collateral and margin cash, balances due to brokers, redemptions payable and other payables and accrued expenses at amortised cost.

(iii.) *Subsequent measurement*

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in a Sub-Fund’s Statement of Comprehensive Income. Financial assets and financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method, less impairment loss, if any. Financial liabilities arising from the redeemable participating shares issued in a Sub-Fund are carried at the redemption amount, representing the shareholders’ right to a residual interest in that Sub-Fund’s assets.

Financial assets at fair value through profit or loss:

These assets are subsequently measured at fair value. Net gains and losses, including any interest from financial assets held at fair value through profit or loss and foreign exchange gains and losses, are recognised in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Investments in transferable securities-equities, investments in investment funds, investments in transferable securities-debt and investments in financial derivative instruments are included in this category.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a.) *Financial assets and financial liabilities (continued)*(iii.) *Subsequent measurement (continued)**Financial assets at amortised cost:*

These assets are subsequently measured at amortised cost using the effective interest method. Interest income is recognised in interest income calculated using the effective interest method, foreign exchange gains and losses are recognised in Net gain/(loss) on financial assets and liabilities at amortised cost and impairment is recognised in impairment losses on financial instruments in the Statement of Comprehensive Income. Any gain or loss on derecognition is also recognised in Statement of Comprehensive Income. Cash and amounts with credit institutions, cash which is subject to collateral arrangements, margin at broker, amounts due from brokers, dividend receivables and other receivables are included in this category.

Financial liabilities at fair value through profit or loss:

This includes held for trading, securities sold short and derivative financial instruments.

Financial liabilities at amortised cost:

This includes balances due to brokers and redeemable participating shares.

(iv.) *Fair Value Measurement*

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk. The fair value of a financial instrument is based on its quoted market price in an active market for that instrument, on a recognised exchange or sourced from a reputable broker/counterparty, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

After initial measurement, the ICAV measures financial instruments which are classified as at fair value through profit or loss, at their fair value. Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs.

Assets and liabilities traded on a market shall be valued for financial reporting purposes at the last traded price on the relevant market at the most recent close of business on the market as a reasonable approximation of the exit price.

For any investment for which a quoted market price is not available on a recognised stock exchange or from a reputable broker/counterparty or which is not normally traded on a market, the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction and is estimated with care and in good faith by the Directors or by a competent person appointed for such purpose by the Directors and approved by the Depositary.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting year during which the change has occurred.

Derivatives traded on a market shall be measured at the settlement price as determined by the relevant market at the close of business on the market, provided that where it is not the practice of the market to quote a settlement price, or if a settlement price is not available for any reason, a derivative shall be measured at its fair value estimated with care and in good faith by the Directors or a competent person appointed by the Directors and approved for the purpose by the Depositary.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a.) *Financial assets and financial liabilities (continued)*(v.) *Amortised cost measurement*

The amortised cost of a Sub-Fund's financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

(vi.) *Impairment*

The ICAV recognises loss allowances on expected credit loss ("ECLs") on a Sub-Fund's financial assets measured at amortised cost.

The ICAV measures loss allowances at an amount equal to lifetime ECLs, except for financial assets that are determined to have low credit risk at the reporting date and other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the ICAV considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the ICAV's historical experience and informed credit assessment and including forward looking information.

The ICAV assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. The ICAV considers a financial asset to be in default when: the debtor is unlikely to pay its credit obligations in full, without recourse by the ICAV to actions such as realising security (if any is held), or the financial asset is more than 90 days past due.

The ICAV considers a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of investment grade. The ICAV considers this to be a rating of BBB- or higher per Standard & Poor's.

The ICAV measures ECLs for a Sub-Fund at the reporting date on its instruments measured at amortised cost. Any ECL on these instruments is not expected to be material due to the short term nature of these instruments. The ICAV's assessment of ECLs is disclosed in Note 10.

Measurement of ECLs

ECLs are probability weighted estimates of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due in accordance with the contract and the cash flows that the ICAV expects to receive for the account of a Sub-Fund). ECLs are discounted at the effective interest rate ("EIR") of the financial asset.

(vii.) *Derecognition*

The ICAV derecognises financial assets held for a Sub-Fund when the contractual rights to the cash flows from the asset expire, or the ICAV transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on a Sub-Fund's Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred asset or a portion of them. If all or substantially all of the risks and rewards are retained, then the transferred assets are not derecognised. Transfers of assets with retention of all or substantially all of the risks and rewards include sale and repurchase transactions.

The ICAV derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a.) *Financial assets and financial liabilities (continued)*(vii.) *Derecognition (continued)*

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the Statement of Comprehensive Income.

The ICAV derecognises a derivative only when it meets the derecognition criteria for both financial assets and financial liabilities. Where the payment or receipt of variation margin represents settlement of a derivative, the derivative, or the settled portion, is derecognised.

(b.) *Specific Instruments**Forward Currency Contracts*

Forward currency contracts are measured at their fair value by reference to the forward price at which a new forward currency contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward currency contracts is calculated as the difference between the forward rate for the transaction specified in the contract and the forward rate on the valuation date as reported in published sources, multiplied by the notional amount of the forward currency contract. Any resulting unrealised gains are recorded as assets and unrealised losses are recorded as liabilities in a Sub-Fund's Statement of Financial Position.

Realised gains and losses are recognised in a Sub-Fund's Statement of Comprehensive Income at the time the forward currency contract settles.

Certain Sub-Funds and share classes incur foreign currency risk in a currency other than the reporting currency of the Sub-Fund or share class. The exposure of certain Sub-Funds to currency risk is managed through the use of forward currency contracts.

Where gains and losses arise on foreign exchange transactions that are taken to hedge the currency exposure of share classes denominated in a currency other than the base currency of the Sub-Fund involved, such gains and losses are allocated solely to those share classes.

Futures Contracts

While futures contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by marking-to-market on a daily basis (settle to market, reset to zero) to reflect the value of the contracts at the end of each day's trading. Futures contracts are measured at the settlement price established each day by the exchange on which they are traded and a Sub-Fund's investment therein is included in the Statement of Financial Position. The ICAV recognises a Sub-Fund's realised gains or losses and movements in unrealised gains or losses in the Sub-Fund Statement of Comprehensive Income.

Options

Exchange traded options are measured at fair value based on the closing price on the relevant valuation date. Over the counter options are measured based on the closing price as provided by the relevant counterparty or market source.

The premium on purchased put options exercised is subtracted from the proceeds of sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currency purchased.

Premiums received for written options which expire unexercised are treated as realised gains. For unsettled positions, unrealised gains or losses are recognised in a Sub-Fund's Statement of Comprehensive Income.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b.) *Specific Instruments (continued)**Warrants*

Certain Sub-Funds may invest in warrants. Warrants which are fully paid up and have a zero strike price exhibit the identical risk and return characteristics as in the case where the ICAV had acquired the underlying equity directly. Such warrants are measured at the market price for the underlying equity quoted on the stock exchange or principal market on which it is listed or, if the market price is unavailable or unrepresentative, the last available market price on such stock exchange or market.

Swaps

All swaps contracts are measured at fair value through profit or loss. The unrealised gain or loss is reported as an asset or liability and changes in the market value are reflected in a Sub-Fund's Statement of Comprehensive Income in the year in which they occur.

Interest Rate Swaps

The fair value of the interest rate swaps is calculated as the present value of the estimated future cash flows. Estimates of future floating-rate cash flows are based on quoted swap rates, futures prices and interbank borrowing rates. Estimated cash flows are discounted using a yield curve constructed from similar sources and which reflects the relevant benchmark rate used by the market participants for this purpose when pricing similar interest rate swaps. The fair value estimate is subject to a credit risk adjustment that reflects the credit risk of the Sub-Fund and of the counterparty (this is calculated based on credit spreads derived from current credit default swap or bond prices) and the level of collateralisation.

Credit Default Swaps

The fair value of credit default swaps is determined by estimating future default probabilities using market standard models. The principal input into the model is the credit curve. Credit spreads are observed directly from broker data or third party vendors. The significant model inputs are observable in the marketplace or set in the contract.

Contracts for Difference

Certain Sub-Funds may use Contracts for Difference ("CFDs"). All CFDs are measured at fair value through profit or loss. At each valuation point the difference in price between the opening price of the CFD and the market price of the underlying equity is recorded as the value (unrealised gains or unrealised losses) of the CFD. When the CFD is closed the difference between the opening price of the CFD and the closing price is recorded as a realised gain or loss in the relevant Sub-Fund's Statement of Comprehensive Income.

Investment Funds

Investments in investment funds are measured at the latest available unaudited net asset value per share as published by the relevant investment fund or, if listed or traded on a recognised exchange, will be measured at the last traded price on the relevant exchange, or if no last traded price is available, the latest mid-market price.

Structured Notes

Certain Sub-Funds may invest in structured notes for which the coupon payment, principal repayment or repayment schedule varies according to pre-agreed conditions relating to fluctuations in the value of or cash flows associated with another asset such as a currency or a stock index. Structured notes are measured at fair value through profit or loss.

Asset Backed Securities

The ICAV records the principal repayments of Asset Backed Securities ("ABS"), Mortgage Backed Securities ("MBS"), Collateral Mortgage Obligations ("CMOs"), Collateralised Loan Obligations ("CLOs") and Collateralised Debt Obligations ("CDOs") due to a Sub-Fund as they arise and realises gains and losses in net gains/(losses) on financial assets at fair value through profit or loss on the Sub-Fund's Statement of Comprehensive Income in the year in which they occur. ABS, MBS, CMOs, CLOs and CDOs are measured at fair value based on their quoted market price at the Statement of Financial Position date.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b.) *Specific Instruments (continued)**Offsetting Financial Instruments*

Financial assets and liabilities are offset and the net amount reported in a Sub-Fund's Statement of Financial Position when, and only when, the Sub-Fund currently has a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The ICAV generally has ISDA Master Agreements with its counterparties for OTC derivatives entered into on behalf of the Sub-Fund. Under certain conditions, as set out under the agreements, amounts payable by one party to the other in respect of derivative contracts covered by the agreements may be offset against any other amounts payable by the payee to the payer. However, this potential offset is not recognised in a Sub-Fund's Statement of Financial Position which will present such payments on a gross basis.

Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

Cash and Cash equivalents, Amounts with credit institutions, Amounts owing to credit institutions, Margin at broker and Cash which is subject to collateral arrangements

Cash and cash equivalents and amounts with credit institutions at 31 December 2024 are disclosed in Note 9 in these Financial Statements and include all unencumbered cash held. Cash equivalents are short-term (maturities of three months or less) liquid investments that are readily convertible to known amounts of cash, and are subject to an insignificant risk of a change in value and are used in the management of short term commitments, other than collateral and margin in respect of derivatives that is included elsewhere.

Margin at broker represents cash deposits with brokers and counterparties, transferred to the broker or counterparty as collateral against open financial derivative instrument positions.

Cash which is subject to collateral arrangements represents cash held in an account in the name of the relevant Sub-Fund but over which the counterparty has a security interest. Cash collateral provided by the ICAV on behalf of a Sub-Fund is identified in the Sub-Fund's Statement of Financial Position as a collateral asset and is not included as a component of Cash and amounts with credit institutions. Cash collateral received for the account of a Sub-Fund is identified in the Sub-Fund's Statement of Financial Position as collateral liability and is not included as a component of Cash and amounts with credit institutions.

The ICAV may pledge or receive collateral other than cash, such as US Treasury Bills on behalf of a Sub-Fund. If the ICAV has to pledge collateral to the counterparty on behalf of a Sub-Fund, it will deliver the securities on behalf of the Sub-Fund to the counterparty or, in some cases, to a segregated account at the Depositary held for the account of the Sub-Fund over which the ICAV has given a charge to the counterparty. If the ICAV receives collateral other than cash on behalf of the Sub-Fund then the counterparty will deliver the securities to the ICAV through physical deposit with the Depositary. Collateral delivered to the Depositary will be held by the Depositary on behalf of the Sub-Fund. Collateral pledged to a Sub-Fund as at 31 December 2024 is disclosed in the applicable Schedule of Investments.

See Note 9 in these Financial Statements for full details of margin at broker and cash which is subject to collateral arrangements as at 31 December 2024.

Amounts due to/from broker

Amounts due to and owing from broker represent cash and cash equivalents held with a Sub-Fund's clearing brokers and various other brokers, as well as amounts receivable for securities sold and payables for securities purchased or sold that have been contracted for but which have not yet been settled or delivered on the Statement of Financial Position date.

Redeemable Participating Shares

The ICAV classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instrument.

Redeemable participating shares provide investors with the right to require redemption for cash at a value proportionate to the investors' shares of the relevant Sub-Fund's net assets at each redemption date and also in the event of the Sub-Fund's liquidation.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b.) *Specific Instruments (continued)**Redeemable Participating Shares (continued)*

A puttable financial instrument issued in respect of a Sub-Fund that includes a contractual obligation for the ICAV to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all of the following conditions:

- It entitles the holder to a pro rata share of the Sub-Fund's net assets in the event of the Sub-Fund's liquidation;
- It is in the class of instruments that is subordinate to all other classes of instruments;
- All financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- Apart from the contractual obligation for the Sub-Funds to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- The total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value in the recognised and unrecognised net assets of the Sub-Fund over the life of the instrument.

Redeemable participating shares in Selwood ESG Credit UCITS Fund met these conditions in the previous year as there was only one active class of shares in this Sub-Fund as disclosed in Note 12 in these Financial Statements. Chilton Small Cap European UCITS Fund and Kayne Anderson Renewable Infrastructure Fund terminated during the year and there were no shares in issue in these Sub-Funds as at 31 December 2024.

As a consequence of the above, in the comparative Statement of Financial Position for Selwood ESG UCITS Fund, the Net Assets Attributable to Holders of Redeemable Participating Shares represents total equity, while in the comparative Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, the comparative balance at the beginning of the year and the comparative balance at the end of the year represents opening equity and closing equity respectively.

Incremental costs directly attributable to the issue or redemption of redeemable shares are recognised directly in equity as a deduction from the proceeds or part of the acquisition cost.

Redeemable participating shares in the remaining Sub-Funds are redeemable at the holders' option and do not meet the conditions to be classified as equity so are classified as financial liabilities. These shares are carried at the redemption amount that is payable if the investor exercises its right to put the shares back to the Sub-Fund. Any distributions on these participating shares are recognised in the Statement of Comprehensive Income as finance costs.

Equalisation on Redeemable Participating Shares

Equalisation on redeemable participating shares is calculated by reference to income accrued on a given share class through to the date of the subscription or redemption and included in the price of shares purchased and redeemed during the accounting year. Equalisation on redeemable participating shares is recorded only in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares of each Sub-Fund where applicable.

(c.) *Net gain/(loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss*

Net gain/(loss) on financial assets and liabilities at fair value through profit or loss include all realised and unrealised fair value changes, foreign exchange differences and interest from financial assets held at fair value through profit or loss, but excludes interest and dividend income and expenses. The ICAV uses the first-in first-out ("FIFO") method to determine realised gains and losses on derecognition.

(d.) *Foreign Currency Transactions*

Transactions during the year, including purchases and sales of securities, income and expenses, are translated at the rate of exchange prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the presentation currency at the closing spot exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in foreign currencies are also translated at the spot exchange rate at the reporting date. Foreign currency gains and losses on financial instruments at fair value through profit or loss are included in realised and unrealised gain and loss on investments, and all other foreign currency gains and losses in net gain/(loss) on financial assets and liabilities at amortised cost in each Sub-Fund's Statement of Comprehensive Income.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(e.) *Income and Expense*

Dividend income on long positions and dividend expense on short positions are recognised as income and expense respectively, on the date on which the right to receive payment is established, this is usually the ex-dividend date. Other income and expense items are accounted for on an accruals basis.

(f.) *Effective Yield*

Interest income and expense presented in each Sub-Fund's Statement of Comprehensive Income comprises interest on financial assets and financial liabilities measured at amortised cost calculated on an effective yield basis. The 'effective yield' is the interest rate calculated on initial recognition of a financial instrument that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective yield is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective yield to the amortised cost of the financial asset. If the asset is no longer credit impaired, then the calculation of interest income reverts to the gross basis.

Interest income from financial assets at fair value through profit or loss is comprised of coupon interest on an effective interest rate basis on financial instruments which are measured at fair value through profit or loss.

(g.) *Transaction costs*

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of fixed income securities and forward currency contracts are included in the purchase and sale price of the investment. Information on transaction costs for bonds and forward currency contracts cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities are included in Other Expenses in the Statement of Comprehensive Income for each Sub-Fund during the year and are disclosed in Note 6 in these Financial Statements.

(h.) *Distribution to holders of redeemable shares*

Distributions payable to holders of redeemable shares are recognised in the Statement of Comprehensive Income for each Sub-Fund as finance costs on the dates on which the relevant securities are listed as "ex dividend".

(i.) *Taxation*

Capital gains, dividend and interest income received for the account of a Sub-Fund may be subject to withholding tax imposed in the countries of origin. Gains and investment income are recorded gross of such taxes and the corresponding withholding tax is recognised as a tax expense. Tax reclaims are accounted for on a cash receipts basis.

The amount of tax payable or receivable in the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to withholding taxes, if any.

The ICAV has determined that interest and penalties related to income taxes do not meet the definition of an income tax. They are therefore accounted for under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

(j.) *Establishment Expenses*

Under IFRS, the costs of establishment of a Sub-Fund are charged immediately to the Sub-Fund's Statement of Comprehensive Income after the launch of the Sub-Fund.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****2. MATERIAL ACCOUNTING POLICIES (CONTINUED)***(k.) Swap Financing Costs*

These are costs borne by certain Sub-Funds in entering into swap contracts. These costs include dividend, unrealised loss on contract for difference and interest expenses and are recognised on an accruals basis and upon recognition of the related financial instruments.

(l.) Unconsolidated Structured Entities

The ICAV does not consolidate any of the Sub-Funds' investments in other funds. However, the ICAV considers all of the Sub-Funds' investments in other funds ("Underlying Funds") to be investments in structured entities because the Underlying Funds have the following features: restricted activities and narrow and well-defined objective to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the Underlying Funds to investors.

The change in fair value of each Underlying Fund is included in the relevant Sub-Fund's Statement of Comprehensive Income in the line item Net gains/(losses) on financial assets and financial liabilities held at fair value through profit or loss. The ICAV recognises any gains and losses arising from changes in the fair values of the Underlying Funds in the Statement of Comprehensive Income in the year in which it arises. A Sub-Fund's exposure to loss from its interests in unconsolidated structured entities is the credit risk in relation to investments in investment funds.

The carrying amounts of the Sub-Funds' interests in Underlying Funds are the fair values of the investments as shown in the Schedules of Investments and are included in 'Investments in transferable securities-equities, Investments in investment funds, Investments in transferable securities-debt and Investments in financial derivative instruments' under 'Financial assets at fair value through profit or loss' line item in the Statement of Financial Position.

Investments in open-ended investment funds are typically valued utilising the net asset valuations provided by the managers of the underlying funds and/or their administrators. The investment objective is to provide the relevant Sub-Funds with exposure to specific asset classes/investment strategies.

(m.) Other accounting standards

New and amended accounting standards in issue that have been adopted:

There are a number of standards, amendments to standards or interpretations that are effective for annual years beginning on 1 January 2024 have no material effect on the Financial Statements.

Accounting standards in issue that are not yet effective and have not been early adopted:

A number of new accounting standards and amendments to accounting standards were effective for annual periods beginning after 1 January 2024 and earlier application is permitted; however, the ICAV has not early adopted the new or amended accounting standards in preparing these Financial Statements.

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after 1 January 2027. The new standard will be in effect in 2027 and will have a material impact on the Financial Statements. The new standard introduces the following key new requirement:

- Entities are required to classify all income and expenses into five categories in the Statement of Comprehensive Income, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly defined operating profit subtotal. Entities' net profit will not change as a result of applying IFRS 18.

There are no other standards, amendments to standards or interpretations that are effective for annual years beginning on 1 January 2025 that have a material effect in these Financial Statements.

3. TAXATION

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. The ICAV will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a "Relevant Year", being an eight year year beginning with the acquisition of the shares by the Shareholder and each subsequent year of eight years beginning immediately after the preceding Relevant Year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

3. TAXATION (CONTINUED)

A chargeable event does not arise in respect of:

- (i) Transactions by a shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the ICAV; or
- (ii) Transactions by certain exempted Irish resident investors who have provided the ICAV with the necessary signed statutory declaration; or
- (iii) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (iv) An exchange of shares representing one Sub-Fund for another Sub-Fund; or
- (v) An exchange of shares arising on a qualifying amalgamation or reconstruction of the ICAV with another ICAV; or
- (vi) Certain exchanges of shares between spouses and former spouses.

Capital gains, dividends, and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

Uncertainty over income tax treatments

IFRIC 23 - Uncertainty over Income Tax Treatments clarifies how the recognition and measurement requirements of IAS 12 Income taxes are applied where there is uncertainty over income tax treatments. When there is uncertainty over income tax treatments, the Directors will determine whether to disclose the following:

- a. judgements made in determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.
- b. information about the assumptions made and other estimates used in determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

If it is probable that a taxation authority will accept an uncertain tax treatment, the Directors shall determine the taxable amount consistently with the tax treatment used or planned to be used in its tax filings and will determine whether to disclose the potential effect of the uncertainty as a tax-related contingency.

The ICAV shall recognise and measure the Sub-Funds' current or deferred tax assets or liabilities applying the requirements in IAS 12 as noted in Note 2(i) above, based on taxable profits (or tax losses), tax bases, unused tax losses, unused tax credits and tax rates determined applying the principles of IFRIC 23 above.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

4. GAINS AND LOSSES FROM FINANCIAL ASSETS AND LIABILITIES

5. FEES AND EXPENSES

Management/Platform/Investment Management Fee

The Manager has adopted a fee model consisting of a combined management, administration and depositary fee (a "Platform Fee"), out of which it is remunerated and out of which it also pays certain fees of the Administrator and the Depositary, and certain other operating costs, as agreed on a Sub-Fund by Sub-Fund basis, in respect of each Sub-Fund to which the fee model applies. The Platform Fee model applies to most of the Sub-Funds, although a number of Sub-Funds established before the adoption of the Platform Fee model by the Manager continue to pay a management fee (a "Management Fee") alongside, or instead of, a Platform Fee.

The Sub-Funds can be categorised as follows for the purposes of the Management/Platform Fee:

- Sub-Funds subject to a Management Fee, but not a Platform Fee
- Sub-Funds subject to a Management Fee, and a lower Platform Fee
- Sub-Funds subject to a Platform Fee and no Management Fee

Sub-Funds subject to a Management Fee, but not a Platform Fee

Two Sub-Funds are subject to a Management Fee but not a Platform Fee, Collidr Adaptive Global Equity UCITS Fund and 1Oak Multi Asset 80 UCITS Fund. These Sub-Funds are subject to the full amount of the Administrator's and Depositary's fees and in the case of 1Oak Multi Asset 80 UCITS Fund, to a separate investment management fee. The rate of the Management Fee payable by each Sub-Fund, and the total of any minimum fee, is shown in the table below.

Sub-Funds subject to a Management Fee, and a lower Platform Fee

For some Sub-Funds, which are subject to a Management Fee, the Management Fee incorporates both the compensation of the Manager and Investment Manager for the services they provide (i.e. the Manager pays both itself and the Investment Manager out of the Management Fee it receives). These Sub-Funds pay a lower Platform Fee that reflects the fact that it is only intended to represent the combined costs of administration and depositary services, but not the costs of their management.

The Management Fee for Sub-Funds subject to a Management Fee, and a separate but lower Platform Fee, are listed in the table below. In each case, the Management Fee is payable at the annual percentage rate of the net asset value of each share class shown below, while the Platform Fee is payable at the annual percentage rate of the net asset value of the Sub-Fund as a whole, and subject to the annual minimum amount also shown in the table below.

Sub-Funds subject to a Platform Fee and no Management Fee

For those Sub-Funds which are subject to a Platform Fee, and no Management Fee, notwithstanding anything to the contrary in the Prospectus, the Manager is responsible for paying the fees of the Administrator and Depositary and these fees shall be discharged out of the Platform Fee received by the Manager.

Management and Platform Fees

Management and Platform Fees accrue daily and are paid monthly in arrears together, where applicable, with reasonable vouched expenses incurred by the Manager in the performance of its duties. The Management and Platform Fees charged during the year ended 31 December 2024 and 31 December 2023 are included in the Statement of Comprehensive Income and any Management or Platform Fees payable at the end of the year are included in Note 8 in these Financial Statements.

Investment Management Fees

Investment management fee rates are shown in the table below. Investment management fees accrued during the year ended 31 December 2024 and 31 December 2023 are shown in the Statement of Comprehensive Income and any investment management fees payable at the end of the year are shown in Note 8 in these Financial Statements. Investment Management Fee rates are shown in the table below.

Share classes with 0% Management Fee rates and 0% investment management fee rates are not disclosed in the above tables. Share classes can be issued in different currencies.

^Investment Management Fee rates changed from prior year.

*The annual minimum fee is reduced to €140,000, for the first 12 months from the close of the initial offer year, split as follows: €60,000 in the first six months and €80,000 in the next six months.

**Distribution fee of 1.00% on Class B shares.

^^A 0.25% shareholder servicing fee applies.

Cash Management Fees

AlphaQuest UCITS Fund and DUNN WMA UCITS Fund are each subject to a cash management fee of up to 0.20% per annum on the proportion of the Sub-Fund held in cash (31 December 2023: up to 0.20%). The fee is paid to Halyard Asset Management LLC which acts as cash manager for both Sub-Funds.

DART Fund is subject to a cash management fee of up to 0.03% per annum of the Net Asset Value of the Sub-Fund. The fee is paid to Waystone Asset Management (IE) Limited, a sister company of the Manager.

Cash Management Fees accrued during the year ended 31 December 2024 and 31 December 2023 are shown in Note 8 in these Financial Statements.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****5. FEES AND EXPENSES (CONTINUED)****Performance Fees**

A number of the share classes in certain Sub-Funds are subject to performance fees.

The performance fee is paid by the ICAV to the Manager or Investment Manager, depending on the Sub-Fund involved. The calculation of the performance fee is verified by the Depositary.

The performance fee in respect of each of the relevant share classes for all Sub-Funds is calculated annually for the period to 31 December (a "Calculation Period") by reference to the Net Asset Value before deduction for any accrued performance fee. The performance fee is deemed to accrue on a daily basis.

Depending on the share class, the performance fee is calculated using one of two methods. The first method, often referred to as the equalisation method, is calculated on a share-by-share basis so that each share is charged a performance fee, which equates precisely with that share's performance (the "performance fee"). This method of calculation ensures that:

- (i) any performance fee is charged only to those shares which have appreciated in value;
- (ii) all holders of shares of the same class have the same amount of capital per share at risk in the Sub-Funds; and
- (iii) all shares of the same class have the same Net Asset Value per share.

For each Calculation Period, the performance fee in respect of each Class will be equal to the percentage detailed below of the appreciation in the Net Asset Value per share of each Class during that Calculation Period above the Peak Net Asset Value per share of that Class. The Peak Net Asset Value per share ("Peak Net Asset Value per Share") is the greater of (i) the initial offer price or a hurdle rate in the case of certain long-only funds (ii) the highest Net Asset Value per share of the relevant Class in effect immediately after the end of the previous Calculation Period in respect of which a performance fee (other than a performance fee redemption, as defined below) was charged.

With the second method, which is used for pooled class shares issued by some Sub-Funds, the performance fee is based on the performance of the class as a whole without any adjustment for the performance of individual shares.

For some share classes, payment of a performance fee may also be subject to achieving a specified hurdle rate of return.

The performance fee in respect of each Calculation Period is calculated by reference to the Net Asset Value before deduction for any accrued performance fee. The end of the Calculation Period is the last Dealing Day of each year.

For further information on the method of calculation used for each Share Class please refer to the relevant Sub-Fund's Supplement.

The performance fee is normally payable by a Sub-Fund in arrears within 14 calendar days of the end of each Calculation Period. However, in the case of shares redeemed during a Calculation Period, the accrued performance fee in respect of those shares is payable within 14 calendar days after the date of redemption.

In addition, if the Management Agreement is terminated before the end of any Calculation Period, the performance fee in respect of the then current Calculation Period will be calculated and paid as though the date of termination were the end of the relevant period.

A performance fee will only be paid in respect of a share class that has been in issue for a minimum year of 12 months. In a situation where a performance fee has been accrued at year end in respect of a share class which has been in existence for less than 12 months, and which remains accrued but unpaid, a negative performance fee may be charged in the following year should the Sub-Fund or the share class concerned fail to remain in performance and some or all of the accrued performance fee shall be written back. Any outstanding amount of performance fees accrued in respect of such a share class will then become payable at the following 31 December as if the Calculation Period had been extended from the date of launch of the class to that date.

Performance fees incurred during the year are shown in the Statement of Comprehensive Income and performance fees payable at year end are shown in Note 8 in these Financial Statements. Performance Fee rates for each share class are shown in the table below.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****5. FEES AND EXPENSES (CONTINUED)****Administration Fee**

For those Sub-Funds not subject to a Platform Fee during the year, the ICAV will be subject to an administration fee in respect of each Sub-Fund as follows:

- 6 basis points (0.06%) on the first \$100 million on the Net Asset Value of each Sub-Fund
- 5 basis points (0.05%) on the next \$100 million on the Net Asset Value of each Sub-Fund
- 4 basis points (0.04%) on over \$200 million on the Net Asset Value of each Sub-Fund

subject to a minimum annual fee in respect of the Sub-Funds concerned as set out in the following table:

Sub-Fund	Minimum annual fee
IOAK Multi Asset 80 UCITS Fund	\$6,000 per month
Collidr Adaptive Global Equity UCITS Fund	\$4,500 per month

In addition, the ICAV will pay the Administrator transfer agency fees of up to \$100 per annum per investor and fees for each investor transaction at normal commercial rates.

The ICAV will reimburse the Administrator out of the assets of the relevant Sub-Fund for the provision of other services such as the provision of Financial Statements (\$5,000 per annum per Sub-Fund) and tax assistance at normal commercial rates. The ICAV will also reimburse the Administrator out of the assets of the relevant Sub-Fund for reasonable out-of-pocket expenses incurred by the Administrator. The fees and expenses of the Administrator accrue on a daily basis and are payable monthly in arrears. The administration fees accrued during the year ended 31 December 2024 are shown in the Statement of Comprehensive Income and any administration fees payable at the end of the year are shown in Note 8 in these Financial Statements.

For those Sub-Funds subject to a Platform Fee, fees and expenses charged by the Administrator and not included in the Platform Fee are included in Administration fees in the Statement of Comprehensive Income and in Administration fee payable in Note 8 in these Financial Statements as appropriate.

Depository Fees

For those Sub-Funds not subject to a Platform Fee during the year, the ICAV will pay the Depository a depository fee which will not exceed 2.25 basis points (0.0225%) per annum of the Net Asset Value of each Sub-Fund, subject to a minimum annual fee in respect of each Sub-Fund of \$18,000, together with value added tax, if any, applicable to such fees.

The ICAV will also reimburse the Depository out of the assets of each Sub-Fund for reasonable out-of-pocket expenses incurred by the Depository and for fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depository and any transaction charges. The fees and expenses of the Depository accrue on a daily basis and are payable monthly in arrears. The depository fees accrued during the year ended 31 December 2024 are shown in the Statement of Comprehensive Income and any depository fees payable at the end of the year are shown in Note 8 in these Financial Statements.

For those Sub-Funds subject to a Platform Fee, fees and expenses charged by the Depository and not included in the Platform Fee are included in Depository fees in the Statement of Comprehensive Income and in Depository fee payable in Note 8 as appropriate in these Financial Statements.

Operating Expenses

Each Sub-Fund bears its own costs and expenses including, but not limited to, taxes, organisational and offering expenses, administration and depository expenses that are not included in the Platform Fee of certain Sub-Funds, and other expenses associated with its activities. Where such costs are not directly attributable to the Sub-Funds, the Sub-Funds will bear such costs and expenses in proportion to their Net Asset Values.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****5. FEES AND EXPENSES (CONTINUED)****Directors' Fees and Expenses**

The Directors holding office as at 31 December 2024 are listed on page 2 in these Financial Statements. The Directors are entitled to a fee in remuneration for their services at a rate to be determined from time to time by the Directors, but so that the aggregate amount of Directors' remuneration in any one year shall not exceed €360,000 plus VAT, if any, unless otherwise notified to Shareholders or the increase is due to the addition of new Sub-Funds and the cost to each Sub-Fund is reduced. For a number of Sub-Funds subject to a Platform Fee, the Directors' fees will be paid by the Manager out of the Platform Fee. The Directors' fees paid at 31 December 2024 were €397,938 (31 December 2023: €374,688). The Directors' fees payable at 31 December 2024 and 31 December 2023 are shown in Note 8 in these Financial Statements.

Based on the current number of active Sub-Funds the annual cost of the Directors' fees for the ICAV and for each Sub-Fund not subject to a Platform Fee are as follows:

Number of Sub-Funds	Annualised Directors' Remuneration	Average Annualised Directors' remuneration per Sub-Fund
	€	€
31	340,000	10,968
32	350,000	10,938
33	360,000	10,909
34	370,000	10,882
35	380,000	10,857
36	390,000	10,833
37	395,000	10,676
38	400,000	10,526
39	405,000	10,385
40	410,000	10,250

The number of active Sub-Funds as at 31 December 2024 is 31 (31 December 2023: 33).

The Directors shall also be paid all travelling, hotel and other reasonable expenses properly incurred by them in attending and returning from meetings of the Directors or Shareholders or any other meetings with regulatory authorities or professional advisers or otherwise in connection with the business of the ICAV. Directors' expenses for the year ended 31 December 2024 amounted to \$Nil (31 December 2023: \$Nil), of which \$Nil (31 December 2023: \$Nil) was payable at 31 December 2024.

Audit Fees

The remuneration (excluding any VAT) for all work carried out by the statutory audit firm for the year ended 31 December 2024 and 31 December 2023 was:

	Total for the year ended 31 December 2024	Total for the year ended 31 December 2023
	€	€
Statutory audit	349,150	417,555
Tax advisory services	380,212	341,108
Other assurance services	6,500	-
Total	735,862	758,663

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

10. FINANCIAL INSTRUMENTS AND RELATED RISKS

Risk Disclosures

Investment in the ICAV carries with it a degree of risk including, but not limited to, the risks referred to below. The investment risks described below are not purported to be exhaustive and potential investors should consult with their professional advisors before purchasing shares. A more detailed discussion of some of the main risk factors affecting the ICAV is set out in the Prospectus and relevant Sub-Fund Supplements. There can be no assurance that any Sub-Fund will achieve its investment objective. The Net Asset Value of a Sub-Fund, and the income therefrom, may go down as well as up and investors may not get back the amount invested or any return on their investment.

Limitations of Sensitivity Analysis

The sensitivity analysis of the risk factors in the notes below represents sensitivity analysis of the effect of movements in various risk variables on the relevant Sub-Fund's performance.

Some limitations of sensitivity analysis are:

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

Global Exposure

The Investment Manager monitors the exposure of each Sub-Fund to derivatives, if any, on a daily basis. The exposure can be calculated in two ways, using either;

- the Commitment Approach which is based on calculating the exposure generated by the derivatives held in the Sub-Fund to the assets underlying each derivative, taking into account hedging and netting arrangements; or
- Value at Risk ("VaR"). The VaR measure estimates the potential loss of the portfolio over a predefined period of time given a specified confidence level. The VaR methodology is a statistical measurement that produces a single aggregated result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets represented in the Sub-Fund's portfolio as well as their correlations, allowing for offsetting across different assets and markets.

The VaR method used by the Manager typically uses market data from the previous year and observed relationships between different markets and prices, and attempts to predict a model using a range of plausible future scenarios for market price movements. The VaR produced from the historical factor model is then validated, or adjusted as appropriate through a Monte-Carlo simulation.

Although VaR is an important tool for measuring market risk, the assumptions which are used to calculate it give rise to some limitations. Some of these assumptions, and resulting limitations, are:

- A 20 day holding period assumes that assets will be held for that period.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR of an unchanged position reduces if market price volatility declines.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Global Exposure (continued)

VaR measures during the year for those Sub-Funds that use VaR and that were active at the end of the year were:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)****Global Exposure (continued)**

The following Sub-Funds use the commitment approach:

1OAK Multi Asset 80 UCITS Fund
 ABR 75/25 Volatility UCITS Fund
 Chelverton Select Consumer Staples Fund
 Chilton Small Cap European UCITS Fund
 DART Fund
 Descartes Alternative Credit UCITS Fund
 Green Court All China Equity Fund
 Kayne Anderson Renewable Infrastructure UCITS Fund
 Nutshell Growth Fund
 RoboCap UCITS Fund
 Tosca Micro Cap UCITS Fund
 Trinity Street Global Equity UCITS Fund

The Board, together with the Manager, will monitor the assets of each Sub-Fund to ensure that any derivatives exposure and leverage will, at all time, remain within the limits set by the Central Bank.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices of positions held by the Sub-Funds.

In accordance with the ICAV's policy, the Manager monitors the Sub-Funds' positions on a daily basis and reports regularly to the Directors, who review the information on the Sub-Funds' overall market exposures provided by the Manager at its periodic meetings.

In addition, the Investment Managers manage the exposure of the portfolio to the risk of adverse changes in the general level of market prices through adhering to their respective formal risk management processes, which includes the use of systems and technology to monitor the overall market and their respective positions risk on a daily basis. The maximum risk arising from an investment is determined by the fair value of the financial instruments except for short derivatives positions, where the potential for loss may be much greater. In the case of short derivatives positions where the Sub-Fund undertakes to purchase an underlying asset or pay the counterparty some or all of the amount of any fall in its value, the maximum exposure may be the notional value of the asset. In this respect, the notional exposures for open derivatives contracts at year end have been disclosed in the Schedule of Investments for each Sub-Fund. In the case of other short derivatives positions, the exposure may potentially be unlimited.

The overall market exposures and concentration of risk can be seen on the Schedule of Investments and Statement of Financial Position of the Sub-Fund, with the classification of Investments reflecting the strategy of the Sub-Fund, or in the case of derivatives, by type of derivative.

Each Sub-Fund's market price risk is affected by three components: changes in market prices, interest rates and currency exchange rates.

Price Sensitivity Analysis

If the price of each equity security (excluding options and warrants) held by each of the Sub-Funds that mainly invest in equities and investment funds or that have direct exposure to equity securities had increased by 1% at 31 December 2024 and 31 December 2023 respectively, with all other variables remaining constant, this would have increased the net assets of that Sub-Fund as disclosed in the table below. Conversely, if the price of each equity security (excluding options and warrants) held by each of these Sub-Funds had decreased by 1% at 31 December 2024 and 31 December 2023, this would have an equal but opposite effect on the net assets of that Sub-Fund.

Interest Rate Risk

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Sub-Funds' interest-bearing financial assets and liabilities expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial positions and cash flows. Depending on its investment objective and policy, a Sub-Fund may be invested in fixed income investments, while for other Sub-Funds, some investments may pay interest or have an associated interest cost. As a result, Sub-Funds which do not have investment in fixed income as part of their primary investment strategy may be subject to some interest rate risk due to fluctuations in the prevailing levels of market interest rates on these investments. However those Sub-Funds which hold cash and treasury bills which are short term in nature (as shown in the Schedule of Investments) are not exposed to material interest rate risk changes, as such interest rate risk is considered immaterial.

For those Sub-Funds which use VaR, any exposure to interest rate risk is best considered in the context of the overall risk exposure of the Sub-Fund and is captured in the VaR model discussed on page 198.

Of the remaining Sub-Funds, only Descartes Alternative Credit UCITS Fund invests predominantly in fixed income securities. This Sub-Fund is exposed to changes in interest rates, such that any changes in interest rates may affect the valuation of the Sub-Fund's assets. However, as the majority of the Sub-Fund's investments are floating rate instruments (with coupons being reset every quarter), the sensitivity of those valuations to interest rate changes is negligible.

Currency Risk

The Sub-Funds invest in financial instruments and enter into transactions denominated in currencies other than their functional currency. Consequently, the Sub-Funds are directly exposed to currency risks arising out of their investment strategies. Other receivables and payables of the Sub-Funds may also be denominated in currencies other than the Sub-Funds' own currency and therefore the exchange rate of this currency relative to other currencies may change in a manner which may have a favourable or unfavourable effect on the value of that receivable or payable balance. The Sub-Funds may buy and sell foreign currency options and foreign currency futures and may engage in foreign currency transactions either on a spot or forward basis, subject to the limits and restrictions set down by the Central Bank from time to time as notified by the ICAV to the Investment Manager, to reduce the risks of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure to foreign currency fluctuations from one country to another.

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Currency Risk (continued)

If the exchange rate between the functional currency and other currencies to which each Sub-Fund had exposure to at 31 December 2024 and 31 December 2024 had increased such that the value of the assets denominated in other currencies when measured in the functional currency decreased by the percentage shown overleaf, with all other variables held constant, this would have decreased net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund by the approximate amount shown overleaf. Conversely, if the exchange rate between the functional currency and other currencies to which each Sub-Fund had exposure to had decreased such that the value of the assets denominated in the other currencies when measured in the functional currency increased by the percentage shown overleaf, with all other variables held constant, this would have increased net assets attributable to holders of redeemable participating shares of the relevant Sub-Fund by the approximate amount shown overleaf. It should be noted that this analysis ignores the extent to which any other currencies held that represent the value of share class FX hedges are attributable to individual share classes, rather than to the Sub-Fund as a whole.

Liquidity Risk

The Sub-Funds' investments are exposed to liquidity risk to the extent that the Sub-Funds may not be able to quickly liquidate their investments at an amount close to their fair value in order to meet their liquidity requirements. A decrease in the value of investments may also require a Sub-Fund to post additional collateral or otherwise sell assets at a time when it may not be in the Sub-Fund's best interest to do so. The failure of a Sub-Fund to continue to post the required collateral could result in a disposal of the Sub-Fund's assets at times and prices which could be disadvantageous to the Sub-Fund and could result in substantial loss.

The Sub-Funds manage liquidity risk in the following manner. The majority of the Sub-Funds' assets consist of investments that are traded in an active market, and can be readily disposed of, and deposits with credit institutions. Derivative contracts entered into by the Sub-Funds are generally either traded on an exchange, where there is a high degree of liquidity, or if OTC, include terms which include a commitment from the counterparty to agree to terminate a contract at short notice at the request of the Sub-Fund. However, market conditions may sometimes mean that it is difficult to sell assets quickly or to close out an open derivatives position without accepting a significant discount on what the Investment Manager believes is a fair price for the asset or derivative.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Liquidity Risk (continued)

The tables that follow show the liabilities of each Sub-Fund analysed according to the period over which each liability falls due. As the Sub-Funds allow for redemption of shares daily, the value of the shares of a Sub-Fund, which equals the net asset value of each Sub-Fund, is assumed to represent a liability which the Sub-Fund may be required to meet in less than one month. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant.

The contractual maturities of financial liabilities as at 31 December 2024 are detailed as follows:

10AK Multi Asset 80 UCITS Fund	Total	Less than 1 month	1 month - 1 year	More than 1 year

Credit Risk

Credit risk is the risk that a counterparty or the issuer of a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Sub-Fund, resulting in a financial loss to the Sub-Fund. It arises principally from debt securities held, and also from derivative financial assets, Cash and amounts with credit institutions and balances due from brokers.

The Depositary is responsible for the safekeeping of assets. The Depositary has appointed The Northern Trust Company (“TNTC”) as its global sub-custodian. Both the Depositary and TNTC are wholly owned subsidiaries of Northern Trust Corporation (“NTC”). As at 31 December 2024, NTC had a long term credit rating from Standard & Poor’s of AA- (31 December 2023: AA-).

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Sub-Funds, clearly identifiable as belonging to the Sub-Funds, and distinct and separately from the proprietary assets of TNTC, the Depositary and NTC. Other assets, typically derivatives contracts, will generally remain in the name of the relevant Sub-Fund.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Credit Risk (continued)

In addition TNTC, as banker, holds cash of the Sub-Funds on deposit, with the exception of amounts in Jordanian Dinar or Saudi Riyal and cash held in Chinese onshore accounts, which are held in the name of the Sub-Funds with the relevant local sub-custodian/financial institution in the market. Such cash is held on the balance sheet of TNTC or the relevant local bank concerned. In the event of insolvency of TNTC, in accordance with standard banking practice, the Sub-Funds will rank as an unsecured creditor of TNTC or the other bank in respect of any cash deposits.

Insolvency of the Depositary may cause the Sub-Funds' rights with respect to their assets to be delayed or may result in the Sub-Funds not receiving the full value of its assets.

Cash and deposits, cash subject to collateral arrangements, margin at broker and margin due to broker were also held with Bank of America, Barclays, BNP Paribas, Deutsche Bank, Goldman Sachs, Interactive Brokers, Jefferies GmbH, JP Morgan, Macquarie Bank, Marex Group, Morgan Stanley, Nomura, Saxo Bank, Skandinaviska Enskilda Banken, Société Générale International Limited, StoneX Financial, The Northern Trust Company and UBS AG. Cash and amounts with and owing to credit institutions and other counterparties and brokers are disclosed in Note 9 in these Financial Statements.

The Sub-Funds also enter into over-the-counter ("OTC") derivatives. OTC derivatives expose the Sub-Funds to the risk that the counterparties to the derivative financial instruments might default on their obligations to the Sub-Funds. The Sub-Funds' maximum credit risk exposure on OTC derivatives at the reporting date is represented by the respective notional amount of the relevant contract outlined in the Schedule of Investments of each Sub-Fund, less any collateral held with that counterparty.

Bankruptcy or insolvency of any counterparty used by the Sub-Funds may cause their rights with respect to cash deposits and derivative contracts to be unenforceable.

At 31 December 2024, receivables and cash and short-term deposits are held with counterparties with credit ratings ranging from BBB+ to A+ or can be settled within 1 week. There are also counterparties which are not rated. The Directors consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly immaterial to the Sub-Funds.

In accordance with the ICAV's policy, the Manager monitors the Sub-Funds' credit exposures and reports regularly to the Board of Directors.

At 31 December 2024, the Sub-Funds' exposure to credit risk analysed by credit rating, were as follows:

The collateral amounts may exceed the related net amounts of financial assets and liabilities presented in the statement of assets and liabilities. Where this is the case, the total amount reported is limited to the net amounts of financial assets and liabilities with that counterparty.

Fair Value Hierarchy

Investments measured and reported at fair value are classified and disclosed in one of the following fair value hierarchy levels based on the significance of the inputs used in measuring its fair value:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Fair Value Hierarchy (Continued)

Level 2 inputs are inputs other than quoted prices in active markets included within Level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies utilising such inputs. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the ICAV's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the ICAV and might include the ICAV's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgement and is specific to the investment.

There were significant transfers between levels 1 and 2 during the year ended 31 December 2024 on the following Sub-Funds: 1OAK Multi Asset 80 UCITS Fund, Alpha Fixed Income UCITS Fund, Chelverton Select Consumer Staples Fund, Collidr Adaptive Global Equity UCITS Fund, DART Fund, Descartes Alternative Credit UCITS Fund, DUNN WMA Institutional UCITS Fund, Invenomic US Equity Long/Short UCITS Fund, Mygale Event Driven UCITS Fund, Nutshell Growth Fund, One River Risk Responders UCITS Fund, Perspective American Absolute Alpha UCITS Fund, Perspective American Extended Alpha UCITS Fund, Selwood ESG Credit UCITS Fund, SHARP UCITS Fund, Tosca Micro Cap UCITS Fund, Virtuoso UCITS Fund, Volatility Arbitrage UCITS Fund and Westbeck Energy Transition UCITS Fund (31 December 2023: ABR 75/25 Volatility UCITS Fund, Chelverton Select Consumer Staples Fund, Chilton Small Cap European UCITS Fund, Collidr Adaptive Global Equity UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, DUNN WMA Institutional UCITS Fund, Mygale Event Driven UCITS Fund, Tosca Micro Cap UCITS Fund and Volatility Arbitrage UCITS Fund).

There were investments categorised as level 3 as at 31 December 2024 and as at 31 December 2023.

As at 31 December 2024

The following table shows an analysis of equities, debt and financial derivative instruments measured at fair value as at 31 December 2024, between those the fair value of which is based on quoted market prices and those involving valuation techniques where all the model inputs are observable in the market.

The carrying amounts of all financial assets and financial liabilities, not measured at fair value, approximate their fair values at the reporting date.

As at 31 December 2023

The following table shows an analysis of equities, debt and financial derivative instruments measured at fair value as at 31 December 2023, between those the fair value of which is based on quoted marked prices and those involving valuation techniques where all the model inputs are observable in the market.

The carrying amounts of all financial assets and financial liabilities, not measured at fair value, approximate their fair values at the reporting date.

Investments classified as Level 3

Within the Sub-Fund noted in the table below, there are a number of asset backed securities which have been classified as Level 3 assets. Due to the use of discounted cash flow techniques and the nature of the underlying assets, directly comparable data is not readily available, and the fair value of these instruments has been measured using significant unobservable inputs and are therefore deemed to be classified as Level 3.

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments.

The following table represents the movement in Level 3 investments for the financial year ended 31 December 2024 and financial year ended 31 December 2023. Transfers between levels are recognised as at year end 31 December 2024 and year end 31 December 2023.

	Descartes Alternative Credit UCITS Fund Level 3	Descartes Alternative Credit UCITS Fund Level 3
	31 December 2024	31 December 2023
	€	€
Opening Value	3,050,400	3,684,150
Transfer from Level 2	–	–
Purchases	3,804,863	–
Sales	(1,305,610)	(474,020)
Realised gain/(loss)	69,017	(311,180)
Unrealised (loss)/gain	117,943	151,450
Closing Value	5,736,612	3,050,400

Unobservable Inputs

Unobservable inputs are developed based on the best information available in the circumstances. The valuation method being used for the valuation of the securities classified as level 3 in Descartes Alternative Credit UCITS Fund is the use of discounted cash flow (“DCF”) techniques. A third party pricing vendor uses DCF techniques to value the securities using unobservable inputs including the constant annual default rate (“CADR”) applied to the underlying portfolio, the recovery rate on the defaulted loans and the yield. The table below shows the price sensitivity to changes in the yield which is considered the most significant unobservable input which impacts the price and related fair value of these instruments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024**

10. FINANCIAL INSTRUMENTS AND RELATED RISKS (CONTINUED)

Investments classified as Level 3 (Continued)**Sensitivity of fair value measurement to changes in unobservable inputs**

The use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, in changing one or more of the assumptions used to reasonably possible alternative significant unobservable inputs by decreasing or increasing by 1% with all other variables held constant, the impact on valuation is shown in the table below:

Fund	Fair value as at 31 December 2024	Valuation technique	Significant unobservable input	Range of yield (%)	Sensitivity	Change in valuation
Descartes Alternative Credit UCITS Fund	€5,736,612	Discounted cash flow	Yield	25	Yield +1%/Yield -1%	(€40,239)/€42,733
Fund	Fair value as at 31 December 2023	Valuation technique	Significant unobservable input	Range of yield (%)	Sensitivity	Change in valuation
Descartes Alternative Credit UCITS Fund	€3,050,400	Discounted cash flow	Yield	25	Yield +1%/Yield -1%	(€72,367)/€75,814

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

11. FINANCIAL DERIVATIVE INSTRUMENTS AND EFFICIENT PORTFOLIO MANAGEMENT

Subject to the conditions and within the limits from time to time laid down by the Central Bank, and except as otherwise stated in the investment objective and policies of a Sub-Fund, the Investment Managers may employ, for certain Sub-Funds, investment techniques and instruments for efficient portfolio management and derivatives, such as futures, options, forward currency contracts and swaps for investment purposes. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Sub-Fund in the future, and a Sub-Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank.

During the year, contracts for difference, futures, forward currency transactions, swaps and options were entered into to hedge currency and market exposure or for investment purposes. The notional amounts are detailed in the Schedule of Investments.

Depending on the Sub-Fund, currency hedging may take place at a share class level, to hedge against changes in the exchange rate between the currency of the share class and the currency in which the Sub-Fund is valued, the base currency, or at the portfolio level, to reduce exchange rate risk in relation to investments in currencies other than the base currency of the Sub-Fund. Hedging is typically carried out using forward currency contracts, but currency swaps and exchange rate options may also be used.

Derivatives used for investment purposes may include using derivatives for such purposes as to take positions in securities, interest rates, currencies, credit spreads or indices representing price levels in these markets, at an overall market level or in relation to specific sectors of the market involved. The rationale for using derivatives may be to take exposure more cheaply, more quickly or more efficiently than can be taken using direct investment, to take short or leveraged exposure or to take exposure to specific risk or value factors of a particular market or security without having to take exposure to all of the factors associated with that form of investment.

Details of collateral are disclosed in Note 9 in these Financial Statements.

12. SHARE CAPITAL

The authorised share capital of the ICAV is 500,000,000,002 shares of no par value divided into 2 subscriber shares of no par value and 500,000,000,000 unclassified shares of no par value.

Subscriber shares entitle the holders to attend and vote at general meetings of the ICAV but do not entitle the holders to participate in the profits or assets of the ICAV except for a return of capital on a winding-up. They are disclosed in the financial statements by way of this note only.

Except as outlined below, shares (other than subscriber shares) entitle the holders to attend and vote at general meetings of the ICAV and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of the ICAV on the terms and conditions set out in the Relevant Supplement.

The ICAV endeavours to manage the investment of redeemable participating shares in investments that meet the investment objectives of the Sub-Funds while maintaining sufficient liquidity to meet shareholders' redemptions. The ICAV's management of liquidity risk arising from redeemable shares is disclosed in Note 10 in these Financial Statements.

Capital Risk Management

In order to maintain the capital structure, the ICAV's policy is to perform the following:

- Monitor the level of subscriptions and redemptions in the Sub-Funds relative to the assets it expects to be able to liquidate within 7 days.
- Redeem and issue new shares in accordance with the Prospectus, which include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

There are no externally imposed capital restrictions on the ICAV.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2024

12. SHARE CAPITAL (CONTINUED)

The movement in the number of participating redeemable shares during the year is as follows:

13. RELATED PARTY TRANSACTIONS

Parties are considered related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The ICAV has appointed Waystone Management Company (IE) Limited as the Manager. The Investment Manager of each Sub-Fund is listed on pages 2 to 7. Waystone Investment Management (IE) Limited acts as global distributor of the Sub-Funds.

For the year ended 31 December 2024, the Manager earned fees of \$13,066,295 (31 December 2023: \$15,126,148). Depending on the Sub-Fund concerned, these fees may be shared by the Manager with the Investment Manager appointed in respect of the Sub-Fund. As at 31 December 2024, the Management Fees payable amounted to \$1,640,472 (31 December 2023: \$1,406,885).

The fees earned by the Manager above include Platform Fees for all Sub-Funds of the ICAV, with the exception of IOAK Multi Asset 80 UCITS Fund and Collidr Adaptive Global Equity UCITS Fund which are not subject to a Platform Fee.

The Manager and other members of the Waystone group also received payment during the year for the provision of number of ancillary services to the ICAV, such as the provision of company secretary services, production of key investor information documents, monitoring of the UCITS governance requirements, risk monitoring and other services and local representative agency services. For certain Sub-Funds these fees are captured in the Platform Fee. The amounts received by the Manager and its other group companies for these services during the year amounted to €648,692 (31 December 2023: €606,029) for the year to 31 December 2024.

The Investment Managers of certain Sub-Funds have voluntarily agreed to reimburse Sub-Fund expenses to limit the total annual operating expenses (excluding the performance fees and all taxes, interest, portfolio transaction expenses, acquired fund fees and expenses, proxy expenses and extraordinary expenses) of specified share classes of the Sub-Funds concerned. The Expense Cap may be raised or eliminated at the discretion of the relevant Investment Manager on notice to Shareholders. Details of Expense Cap reimbursement amounts are included in Note 6.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****13. RELATED PARTY TRANSACTIONS (CONTINUED)**

The Manager has also received a total of €33,000 in closure fees in respect of the termination of Chilton Small Cap European UCITS Fund, Collidr Global Equity UCITS Fund and Kayne Anderson Renewable Infrastructure UCITS Fund. These are included in the liquidation costs for each Sub-Fund in Note 6 in these Financial Statements.

For the year ended 31 December 2024, the ICAV also paid investment management fees to the Manager in respect of certain Sub-Funds, as indicated in Note 5, of \$31,293,770 (31 December 2023: \$22,755,000), out of which the Manager pays the fees of the Investment Managers concerned. As at 31 December 2024, investment management fees payable amounted to \$5,042,590 (31 December 2023: \$2,260,583).

A number of the share classes in certain Sub-Funds are subject to performance fees. The performance fee is paid by the ICAV to the Manager or Investment Manager, depending on the Sub-Fund involved. For more details on performance fees, see Note 5.

David Hammond, a Director, is indirectly a shareholder of the Manager.

Cyril Delamare, a Director, is indirectly a shareholder of the Manager.

Cyril Delamare was the beneficial holder of the below shares in the Sub-Funds at 31 December 2024:

- 1,739 (31 December 2023: 1,739) shares in the EUR Institutional Class Shares of DUNN WMA Institutional UCITS Fund and 300 (31 December 2023: 300) GBP Institutional Class A Shares and 500 (31 December 2023: 500) Euro Institutional Class A Shares of Crabel Gemini UCITS Fund.

The Investment Manager for ABR 75/25 Volatility UCITS Fund held the following shares in the Sub-Fund at 31 December 2024 and 31 December 2023:

31 December 2024

Share Class	Units	Share Class	Units
GBP C Class Pooled	7	USD I Class Pooled	10

AlphaQuest UCITS Fund held 2 (31 December 2023: 2) structured notes with Société Générale (31 December 2023: Société Générale), the return on which is linked to the performance of AlphaQuest Offshore Fund SP, another fund managed by the Investment Manager of the Sub-Fund.

Crabel Advanced Trend UCITS Fund held 2 (31 December 2023: 3) structured notes with Société Générale (31 December 2023: Société Générale), the return on which is linked to the performance of Crabel Advanced Trend Offshore Fund SP, another fund managed by the Investment Manager of the Sub-Fund.

Crabel Gemini UCITS Fund held 2 (31 December 2023: 2) structured notes with Société Générale (31 December 2023: Société Générale), the return on which is linked to the performance of Crabel Gemini Offshore Fund SP, another fund managed by the Investment Manager of the Sub-Fund.

DUNN WMA Institutional UCITS Fund held 2 (31 December 2023: 2) structured notes with Société Générale (31 December 2023: Société Générale), the return on which is linked to the performance of DUNN WMA Institutional Offshore Fund SP, another fund managed by the Investment Manager of the Sub-Fund.

One River Risk Responders UCITS Fund held 1 structured note with Société Générale, the return on which is linked to the performance of One River Risk Responders Offshore Fund SP, another fund managed by the Investment Manager of the Sub-Fund.

For more details on the structured notes, please see Note 14.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****14. INVOLVEMENT WITH UNCONSOLIDATED STRUCTURED ENTITIES**

Certain Sub-Funds invest in notes and other instruments issued by structured entities. Structured entities are entities in which the voting rights are not the dominant rights in deciding who controls them, as they relate to administrative tasks only; each entity's activities are restricted by its prospectus or other placing document; and the entities have narrow and well-defined objectives to provide investment opportunities to investors.

The structured entities in which the relevant Sub-Funds invest include the issuers of asset-backed securities ("ABS"), structured notes and investment funds.

An asset-backed security is a security that is primarily serviced by the cash flows of a discrete pool of receivables or other financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period plus any rights or other assets designed to ensure the servicing or timely distribution of proceeds to the security holders.

Specific types of asset-backed security include Collateralised Mortgage Obligations ("CMOs") and other mortgage-backed securities ("MBS") which represent the purchase of an interest in pools of mortgage loans. The investment characteristics of asset or mortgage-backed securities are such that principal payments are made more frequently than traditional debt securities (usually monthly). The principal may be repaid at any time because the underlying mortgage loans or other assets generally may be repaid at any time.

The tables below describe the investments in structured entities held by the Sub-Funds for the year ended 31 December 2024 and 31 December 2023, the results of which are not consolidated in these financial statements. All of the investments held in structured notes and asset backed securities listed below are included in investments in transferable securities-debt in the Statement of Financial Position.

The Sub-Funds' maximum exposure to losses on these structured notes, asset backed securities and investment funds is the fair value of the securities held on the Statement of Financial Position for each Sub-Fund as at 31 December 2024 and 31 December 2023. During the year ended 31 December 2024 and 31 December 2023, the Sub-Funds did not provide financial support to any unconsolidated structured entities, nor is there any intention of providing financial or other support. None of the investments held involve any risk of recourse to the Sub-Funds for the liabilities of the issuer concerned.

Depending on the nature of the investment, the Sub-Funds can generally realise an investment in a structured entity by redeeming it from the issuer (in the case of the structured notes), holding it to maturity or realising it on the market (in the case of the asset backed securities), by sale (in the case of ETFs) and by redemption (in the case of other investment funds). The Sub-Funds can redeem units in the investment funds.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**For the year ended 31 December 2024****16. SIGNIFICANT EVENTS DURING THE YEAR (CONTINUED)**

David Tease resigned as a Director on 31 December 2024.

There have been no other significant events during the year, which, in the opinion of the Directors of the ICAV, may have had a material impact on the Financial Statements for the year ended 31 December 2024.

17. SUBSEQUENT EVENTS

Quilter Cheviot International Balanced, Quilter Cheviot International Equity and Quilter Cheviot Growth Funds were authorised by the Central Bank on 10 January 2025 and launched on 28 March 2025.

The name of the Tosca Market Thinking Fund changed to DART Fund on 17 January 2025. A new Supplement was issued in connection with the name change and a number of non-material changes to the Sub-Fund's investment strategy.

Trinity Street Global Equity UCITS Fund terminated on 23 January 2025.

The Sub-Funds listed below have also terminated since the year end. Separate audited termination Financial Statements will be prepared for these Sub-Funds.

Sub-Fund	Termination Date	Investment Manager
Alpstone Global Macro UCITS	3 February 2025	Alpstone Capital Suisse SA
Sixteen02 Global Equities UCITS Fund	3 April 2025	Eighteen48 Partners Limited

There have been no other events subsequent to the year end, which, in the opinion of the Directors of the ICAV, may have had a material impact on the Financial Statements for the year ended 31 December 2024.

18. APPROVAL OF FINANCIAL STATEMENTS

The Financial Statements were approved by the board of the ICAV on 30 April 2025.

SOFT COMMISSIONS (UNAUDITED)

A number of the Investment Managers will effect transactions through brokers with which they have arrangements whereby each broker agrees to use a proportion of the commission earned on such transactions to discharge the broker's own costs or the costs of third parties providing certain services to the relevant Investment Manager. The services which are paid for under such arrangements are those permitted under regulatory rules applicable to the relevant Investment Manager, generally those that relate to the provision of investment research to the relevant Investment Manager.

When provided to the Sub-Funds, such services are permitted to take the form of research, analysis and advisory services, including (depending on the precise nature of the services) market price services, electronic trade confirmation systems or third-party electronic dealing or quotation systems. The Investment Manager concerned must ensure that such arrangements assist in the provision of investment services to the relevant Sub-Fund and that the brokers to the arrangements have agreed to provide best execution.

Other Investment Managers, generally those subject to the requirements of the EU Markets in Financial Instruments Directive, collect research costs directly from the Sub-Funds concerned. The payments collected from each Sub-Fund are credited to a research payment account operated by the Investment Manager and used to pay for research obtained by the Investment Manager for the benefit of the Sub-Fund.

The following Sub-Funds have soft commission arrangements in place as at 31 December 2024: Advent Global Partners UCITS Fund, Alpha Fixed Income UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, Green Court All China Equity Fund and Trinity Street Global Equity UCITS Fund (31 December 2023: Advent Global Partners UCITS Fund, Cooper Creek Partners North America Long Short Equity UCITS Fund, Kayne Anderson Renewable Infrastructure UCITS Fund and Trinity Street Global Equity UCITS Fund).

TOTAL EXPENSE RATIOS (UNAUDITED)

The total expense ratio (TER) was calculated based on the “Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes” of the Asset Management Association of Switzerland (AMAS).

The TER is calculated according to the following formula: (total expenses / Annualised Figures) * 100 and has been calculated for the 12 months preceding the close of the annual reporting year, using annualised figures for those Sub-Funds and share classes launched during the year.

Outlined below are total expense ratios of the Sub-Funds for the year ended 31 December 2024 and 31 December 2023:

UCITS REMUNERATION DISCLOSURE (UNAUDITED)

The Manager has designed and implemented a remuneration policy (the “Policy”) in line with the provisions of the European Union (Alternative Investment Fund Managers) Regulations 2013 (the “AIFM Regulations”), the 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”) and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the “ESMA Guidelines”). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The Manager’s remuneration policy applies to its identified staff whose professional activities might have a material impact on the ICAV’s risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the ICAV. The Manager’s policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the Manager to operate a fully flexible policy, with the possibility of not paying any variable component. When the Manager pays a variable component as performance related pay certain criteria, as set out in the Manager’s remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice.

These disclosures are made in respect of the remuneration policies of the Manager. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the Manager fully or partly involved in the activities of the ICAV that have a material impact on the ICAV’s risk profile during the financial year to 31 December 2024:

Fixed remuneration	EUR
Senior Management	€3,377,918
Other identified staff	-
Variable remuneration	
Senior Management	€732,962
Other identified staff	-
Total remuneration paid	€4,110,880

Number of identified staff – 20

Neither the Manager nor the ICAV pays any fixed or variable remuneration to identified staff of the Investment Manager.

There have been no material changes made to the Remuneration Policy or the Manager’s remuneration practices and procedures during the financial year.

SECURITIES FINANCING TRANSACTIONS REGULATION (UNAUDITED)

The Securities Financing Transactions Regulation (SFTR) requires information to be provided as to the use of securities financing transactions (“SFTs”) and Total Return Swaps.

A Securities Financing Transaction is defined in Article 3(11) of the SFTR as:

- A repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2024, the ICAV held the following types of SFTs: Total Return Swaps.

The amount of securities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) was 0% as at 31 December 2024.

GLOBAL DATA:

Type of Asset	Absolute Amount*	Proportion of AUM (%)
Total Return Swap		
Advent Global Partners UCITS Fund	\$2,487,359	2.79%
Ironshield Credit Fund	€2,268,707	0.61%
Ironshield High Yield Alpha Fund	€133,280	0.37%

*The Absolute Amount is the absolute value of the total return swaps’ market values.

CONCENTRATION DATA:

The largest collateral issuers across all SFTs and total return swaps are as follows:

	Counterparty	Gross volume of outstanding trades
Total Return Swap		
Advent Global Partners UCITS Fund	Société Générale International Limited	\$500,000
Ironshield Credit Fund	Goldman Sachs, Morgan Stanley, Société Générale International Limited	€20,392,227
Ironshield High Yield Alpha Fund	Goldman Sachs, Morgan Stanley, Société Générale International Limited	€3,115,071

AGGREGATE TRANSACTION DATA:

	Type/Quality of collateral	Currency	Maturity tenor (collateral)	Maturity tenor (SFTs/ Total Return Swaps)	Settlement and Clearing
Total Return Swap					
Goldman Sachs	Cash	USD	<1 day	<1 year	N/A
Morgan Stanley	Cash	USD	<1 day	>1 year	N/A
Société Générale International Limited	Cash	USD	<1 day	<1 year	N/A

The share of collateral that is reused is 0%.

SECURITIES FINANCING TRANSACTIONS REGULATION (UNAUDITED) (CONTINUED)

SAFEKEEPING:

Custodian	Collateral assets safe-kept
Goldman Sachs	Cash Collateral
Morgan Stanley	Cash Collateral
Société Générale International Limited	Cash Collateral

The proportion of collateral held in aggregate accounts, in pooled accounts or any other accounts is 100%.

RETURNS/COSTS:

The following data relates to the returns and cost from each type of SFT as applies to the relevant Sub-Fund in absolute terms and as a percentage of overall returns generated from the SFT.

	Absolute Returns		Overall returns
	Return	Cost	%
Total Return Swap			
Advent Global Partners UCITS Fund	\$7,173,498	(\$45,353)	100
Ironshield Credit Fund	€9,200,199	(€812,902)	100
Ironshield High Yield Alpha Fund	€462,886	(€206,514)	100

SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

The majority of the Sub-Funds (the Sub-Funds indicated as Article 6 funds in the table below) do not take into account the EU criteria for environmentally sustainable economic activities. They do not have as their objective sustainable investment, nor do they promote environmental or social characteristics within the meaning of the EU Sustainable Finance Disclosure Regulation (Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment) (the “SFDR”).

A number of the Sub-Funds (the Sub-Funds listed Article 8 funds in the table below) do promote environmental and/or social characteristics. Please see the additional SFDR disclosures in respect of these Sub-Funds in the Annex.

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name: Advent Global Partners UCITS Fund

Legal entity identifier: 635400FRJGPMRLHXJ26

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or Social Characteristics

Did this financial product have a sustainable investment objective?	
☐ Yes	☒ No
☐ It made sustainable investments with an environmental objective:_%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made sustainable investments with a social objective:_____%	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

As part of the investment process, the Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Sub-Fund. These environmental and social characteristics are considered using a proprietary ESG scoring system (the "ESG Scoring System"). The ESG Scoring System is used by the Investment Manager for broad ESG scoring purposes but customized for the environmental and social characteristics required by the SFDR using specific environmental and social indicators.

The Investment Manager evaluated each Sub-Fund portfolio holding on a quarterly basis using the ESG Scoring System’s process, which involves percentile scores against a regional average using scores from a number of commercially-available ESG rating systems (an issuer’s percentile scores are compared against a regional universe to correct for observed regional biases in the global ESG ratings). Issuers which scored poorly on such metrics, involving environmental-specific and social-specific ratings (“E and S”) or upon which the Investment Manager noted negative ESG developments in the course of its day-to-day research, may be contacted as the Investment Manager seeks to engage to clarify or to promote improvement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

	Weighted Average	Coverage (%)
	Dec-24	Dec-24
<u>Environmental and Social Characteristics</u>		
% of investments in issuers with a combined E and S score above the minimum threshold set for this Sub-Fund as applied by the Investment Manager through its ESG scoring system	88.32%	90.93%
Investments in issuers involved in activities excluded by the Sub-Fund (%)	0%	0%
Share of investments in companies in compliance with the UN Global Compact Principles (%)	100%	100%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

● **...And compared to previous periods?**

The percentage of issuers with a combined E and S score above the minimum threshold averaged 88.32% during the year compared to 91.41% in 2023. Coverage, the percentage of the investments with both an E and S score from more than one underlying provider, averaged 90.93% compared to 80.31% in 2023. Investments in issuers involved in activities excluded by the Sub-Fund was 0% for the entire period. The share of investment in companies in compliance with the U.N. Global Compact Principles was 100% for the entire period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund does not have as a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sub-Fund does not have as a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details**

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider principal adverse impacts on sustainability factors as defined in Article 4(1), point (b) of the SFDR.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

January 1, 2024 to December 31, 2024

<u>Largest Investments</u>	<u>Sector</u>	<u>% Assets</u>	<u>Country</u>

Asset allocation describes the share of investments in specific assets.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Figures are an average of five quarter-end calculations between December 31, 2023 and December 31, 2024.

#2 Other include investments with no environmental or social characteristics such as cash, special purpose acquisition companies, and the market value of index hedges and foreign currency forward contracts.

* In which economic sectors were the investments made?

Using GICS methodology, average allocations during 2024 were:

Information Technology	29.29%
Consumer Discretionary	20.33%
Health Care	12.45%
Industrials	9.83%
Financials	8.04%
Communication Services	7.37%
Real Estate	5.31%
Utilities	2.02%
Materials	1.26%
Energy	1.17%
Consumer Staples	1.03%

Using the GICS subsector methodology, average allocations during 2024 were:

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today. **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.
capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not invest in environmentally sustainable activities defined as such by the EU Taxonomy Regulation

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

^ This graph represents 100% of the total investments where 100% relates to the proportion of investments excluding sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR, including transition and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This included cash, cash equivalents, hedges, or special purpose acquisition company holdings.

The “Other” investments of the Sub-Fund are held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover. There are no minimum environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager applies its ESG Scoring System to the Sub-Fund to identify individual holdings that may have problematic ESG elements and to evaluate such issues more carefully on an ESG-specific basis, to tabulate the extent to which the aggregate portfolio reflects ESG ideals via scoring averages, and specifically for the Sub-Fund to use modified scoring elements to evaluate the extent to which the portfolio promotes environment and/or social characteristics.

The Investment Manager evaluated the portfolio on separate quarter-ends during the period and found the average percent of assets with E & S ratings below the 10th percentile to be 7.01%. This figure, adding the percent of assets from investment without E & S ratings may include cash, cash equivalents, hedges, or special purpose acquisition company holdings, comprises the Other category of the Asset Allocation illustration above.

In addition, the Investment Manager engaged 32 issuers in the portfolio during the period on a number of ESG-related topics, which included carbon reduction goals and disclosures, executive compensation, stock compensation expense, supervoting share structures, board independence and diversity, managing business conflicts.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No specific index is designated as a reference benchmark to determine whether the product is aligned with environmental and social characteristics promoted.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Chelverton Select Consumer Staples Fund

Legal entity identifier: 635400VZ2DWA9OYRPV23

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted the environmental and social characteristics set out in its investment strategy by ensuring that at least 75% of its investments were compliant with an Article 8 rating, as measured by Integrum. The Integrum rating scale is a proprietary system which measures companies' adherence to the principles of the United Nations Global Compact ("UNGC"). To achieve an "Article 8" status on the Integrum rating scale, investee companies are mapped to at least 10 principal adverse impact ("PAI") markers in their relevant sector fields and should receive no greater than 4 yellow or red flags for non-compliance. Companies with more than 4 red or yellow flags are deemed incompatible with an Article 8 rating as measured by Integrum.

The Investment Manager used ESG data from Integrum to assess and monitor portfolio companies' alignment with these characteristics. Additionally, an exclusionary screening process was applied to avoid investment in companies that fell within any of the following categories:

- a) Companies active in the fossil fuel sector (PAI 4);
- b) Companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (PAI 14); and
- c) Companies that derive their revenue directly or indirectly from adult entertainment and gambling.

The Investment Manager also engaged directly with company management, where necessary, to address sustainability concerns, improve disclosures, and encourage best practice. A particular focus was placed on the following characteristics:

Environmental characteristics:

- Greenhouse gas (“GHG”) emissions and carbon footprint
- Water usage and pollution; and
- Waste management practices

Social characteristics:

- Human rights;
- Modern slavery and forced labour;
- Breaches of employee rights and labour rights; and
- Diversity – gender representation and aligned compensation

For investments categorised under “other” (i.e., those not yet compliant with an Article 8 (or above) rating, as measured by Integrum), the Investment Manager closely monitored their ESG progress and engaged with companies to address shortcomings, where necessary. This approach meant that the Sub-Fund only held such companies where there was confidence in their ESG trajectory.

● ***How did the sustainability indicators perform?***

The Investment Manager ensured that at least 75% of the Sub-Fund’s assets are compliant with an Article 8 rating, as measured by Integrum.

As of Q4 2024, 91% of the Sub-Fund’s assets are compliant with an Article 8 or above rating, as measured by Integrum.

● ***...and compared to previous periods?***

The Sub-Fund attained Article 8 status for the first time in 2024.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

This question is not applicable as the Sub-Fund does not intend to make sustainable investments as they are defined in the Sustainable Finance Disclosure Regulation (the “SFDR”).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable as the Sub-Fund does not intend to make sustainable investments as they are defined in the SFDR.

How were the indicators for adverse impacts on sustainability factors taken into account? This question is not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: This question is not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager ensured that at least 75% of the Sub-Fund's assets are compliant with an Article 8 rating, as measured by Integrum.

An important aspect of the Sub-Fund's approach was its exclusionary screening process. This involved excluding companies active in the fossil fuel sector (PAI 4), those involved in controversial weapons (PAI 14), and firms deriving revenue from adult entertainment and gambling. These exclusions helped mitigate exposure to activities with significant adverse impacts.

The Investment Manager also engaged directly with investee company management on sustainability issues, allowing for a more nuanced understanding and assessment of potential adverse impacts. Furthermore, the Sub-Fund paid particular attention to water usage and progress towards net zero emissions in investee companies, recognising the importance of these factors in overall sustainability performance.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Reckitt Benckiser Group	Consumer Goods	6.9%	United Kingdom
Beiersdorf	Consumer Goods	6.9%	Germany
Unilever	Consumer Goods	6.3%	Un
Heineken Holding	Food & Beverage	4.9%	Netherlands
Kosé Corp	Consumer Goods	4.8%	Japan
Fevertree Drinks	Food & Beverage	4.7%	United Kingdom
Procter & Gamble Co	Consumer Goods	4.2%	United States
Lindt & Sprungli	Food & Beverage	4.2%	Switzerland
Nestle	Food & Beverage	4.2%	Switzerland
L'Occitane International	Consumer Goods	4.0%	Hong Kong

What was the proportion of sustainability-related investments?

The Sub-Fund held 91% of its investments in companies that are aligned with the environmental or social characteristics promoted by the Sub-Fund, being compliant with an Article 8 or above rating, as measured by Integrum.

What was the asset allocation?

The Sub-Fund held 91% of its investments in companies that are aligned with the environmental or social characteristics promoted by the Sub-Fund, being assets rated Article 8 or above by Integrum (as detailed above).

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Q4 2024

Asset allocation describes the share of investments in specific assets.

Investments

Minimum 75%
#1 Aligned with E/S characteristics

Maximum 25%
#2 Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

Personal Care 44.87%
Beverages 19.03%
Household Goods 18.56%
Food 14.75%
Cash 2.79

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund invests a minimum of 0% in economic activities that qualify as environmentally sustainable under the Taxonomy Regulation. Notwithstanding this intention, certain investments may qualify as environmentally sustainable under the Taxonomy Regulation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund did not make EU Taxonomy aligned investments. Nevertheless, 98% of the Sub-Fund's investments were Taxonomy-aligned, according to Integrum data.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund invests a minimum of 0% in economic activities that qualify as environmentally sustainable under the Taxonomy Regulation, including transitional activities and enabling activities

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable as the Sub-Fund does not intend to make sustainable investments as they are defined in the SFDR.

What was the share of socially sustainable investments?

This question is not applicable as the Sub-Fund does not intend to make sustainable investments as they are defined in the SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in assets aligned with the investment objective of the Sub-Fund. As a minimum environmental and social safeguard, the Sub-Fund adhered to its exclusionary screening process, detailed above.

The remaining investments in “other” are consumer staples equities which do not currently rank as Article 8 (or above) compliant as recognised by Integrum. Whilst there were no specific minimum environmental or social safeguards applied, the Investment Manager has only owned such companies where there is confidence in the company’s ESG trajectory, with active monitoring and ongoing dialogue forming a core part of the investment approach.

Where issues were identified, the Investment Manager has taken a proactive approach, engaging with the company to address any concerns, improve disclosures or adopt best practices. For example, within this category, Bellring Brands Inc and Mandom Corporation are two companies which do not yet meet Article 8 (or above) criteria due to insufficient disclosure, rather than adverse ESG concerns. Over the past year, the Investment Manager has actively engaged with both companies to encourage improvements in transparency and sustainability reporting. As a result, Bellring has recently published its first sustainability report, and further progress is expected. Similarly, Mandom reports extensive sustainability data, but not in a format that currently satisfies Integrum’s rating requirements. The Investment Manager anticipates that ongoing engagement will support these companies in achieving Article 8 (or above) compliance as disclosure practices improve.

As of Q4 2024, 91% of the Sub-Fund’s asset are compliant with an Article 8 or above rating, as measured by Integrum, with 9% of the Sub-Fund’s assets in the “other” category.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund actively promoted its environmental and social characteristics during the reference period. A key component of this approach was ensuring that a minimum of 75% of the portfolio remained compliant with an Article 8 (or above) rating, as measured by Integrum. To further align with these environmental; and social characteristics, the Investment Manager applied an exclusionary screening process, avoiding investments in companies involved in fossil fuels, controversial weapons, adult entertainment, and gambling. Beyond screening, active engagement was a fundamental tool in assessing and improving ESG performance among investee companies. The Investment Manager engaged directly with company management, where necessary, to address sustainability concerns, improve disclosures, and encourage best practice. A particular focus was placed on the following characteristics:

Environmental characteristics:

- Greenhouse gas (“GHG”) emissions and carbon footprint
- Water usage and pollution; and
- Waste management practices

Social characteristics:

- Human rights;
- Modern slavery and forced labour;

- Breaches of employee rights and labour rights; and
- Diversity – gender representation and aligned compensation

For investments categorised under “other” (i.e., those not yet compliant with an Article 8 (or above) rating, as measured by Integrum), the Investment Manager closely monitored their ESG progress and engaged with companies to address shortcomings, where necessary. This approach meant that the Sub-Fund only held such companies where there was confidence in their ESG trajectory.

How did this financial product perform compared to the reference benchmark?

No ESG reference benchmark has been designated to determine whether the Sub-Fund is aligned with the environmental or social characteristics that it promotes. The Sub-Fund does not have a designated reference benchmark for the purposes of the SFDR in respect of the promotion of environmental and social characteristics.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Kayne Anderson Renewable Infrastructure UCITS Fund (the “Sub-Fund”)

Legal entity identifier: 635400NKBOJACEDFIO47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
Yes	No
It made sustainable investments with an environmental objective: ____% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective: ____%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund, which was liquidated in November 2024, invested in companies leading the “energy transition,” a term used to describe the energy sector’s shift to a more sustainable mix of lower carbon and renewable energy sources. The primary goal of this energy transition – which is being pursued on a global basis – is to reduce carbon emissions and limit the impact of climate change.

While the companies in the Sub-Fund’s investible universe aligned with many of the 17 UN Sustainable Development Goals (“SDGs”) (all holdings of the Sub-Fund are committed to at least one UN SDG), the Sub-Fund’s holdings most commonly promoted goals are SDG 7 – Affordable & Clean Energy and SDG 13 – Climate Action. Based on the portfolio as of 31 November 2024, 70% of the Sub-Fund’s holdings were committed to SDG 7 – Affordable and Clean Energy and 70% to SDG 13 – Climate Action.

In addition, by requiring companies to evidence, through the means set out in the Supplement, certain criteria to qualify as an eligible investment for the Sub-Fund, the Sub-Fund promoted the following factors:

- a decarbonized energy mix
- renewable energy infrastructure development;
- the phasing out of any coal and not to pursue any further coal developments.

This is highlighted by the fact that, on a weighted average basis, 100% of the Sub-Fund had a net zero target (2050 or earlier) and >50% of the portfolio had a net zero target between 2030-2040.

● *How did the sustainability indicators perform?*

In order to track the attainment of the environmental characteristics promoted by the Sub-Fund, the Investment Manager tracked the following:

- carbon avoided from existing operating assets;
Based on information provided in company reports and the U.S. Environmental Protection Agency emissions calculator, the Investment Manager estimates that the Sub-Fund’s holdings contribute to annual avoidance of approximately 528 million tons of CO₂.
- estimated avoided emissions from new project development over the near-term (3-5 years); and
Utilizing the same methodology, the Investment Manager estimates that near-term development opportunities within the Sub-Fund’s holdings have the potential of contributing an additional 283 million tons of CO₂ avoidance on an annual basis.
- installed renewable power capacity;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager periodically published (via sustainability reports or other periodic reporting to investors) portfolio-wide metrics to evidence attainment of the environmental characteristics promoted by the Sub-Fund.

● ***...and compared to previous periods?***

In 2023, the Investment Manager calculated the following estimates for the Sub-Fund:

- 470 million tons of carbon avoided from existing operating assets
- 148 million tons of avoided emissions from new project development over the near-term; and

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund did not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Sub-Fund did not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors as defined in Article 4(1), point (b) of the SFDR.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: [01 January 2024 to 31 December 2024](#)

Top 15 Holdings

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Based on the monthly average for the period January 2024 to October 2024, the Sub-Fund's strategy invested at least 95.4% of its net asset value in renewable infrastructure companies. On average, 7.6% of the Sub-Fund's net asset value was held in cash or cash equivalents for the purpose of liquidity or risk management. All of the Sub-Fund's invested portfolio was subject to the criteria set out in the investment strategy on a binding and continuous basis.

Therefore, at least 80% of the Sub-Fund's investment portfolio was aligned with E/S characteristics, primarily the development of renewable energy sources and the energy transition as discussed herein. However, the Sub-Fund did not have a minimum commitment to investing in sustainable assets or in assets which are aligned with the EU Taxonomy Regulation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were primarily made in the following sub-sectors: Green Utilities (55%), Renewable Power Companies (22%), Wind & Solar YieldCos (5%) and Renewable Energy Developers (2%).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures. Graph # 2 represents 100% of the total investment.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR, including transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Sub-Fund did not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund did not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund was permitted to hold up to 20% of assets in cash and cash equivalents for the purposes of liquidity or risk management purposes (including currency hedging) – these were not part of the invested portfolio.

As they are held only for the purpose of liquidity and risk management and whilst no minimum environmental or social safeguards were applied, there was no impact on the Sub-Fund’s promotion of E/S characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund’s investment objective was to seek total return through a combination of current income and capital appreciation by investing in Renewable Infrastructure Companies.

As noted above, in order to be eligible for investment, companies must:

- Derive the majority (at least 50%) of their revenues from renewable infrastructure assets (as determined by the Investment Manager); and/or

- Invest the majority (at least 50%) of their growth capital into renewable infrastructure assets with the intention of renewable infrastructure becoming a significant part of their business.

In addition to the foregoing, to qualify for investment, companies must demonstrate, through public disclosure (e.g. press releases), evidence of the following to drive the advancement of renewable infrastructure: (i) a clear business strategy that commits to a decarbonized energy mix and promotes renewable energy infrastructure development; (ii) an explicit commitment to phase out any existing coal assets and not to pursue any further coal developments.

Companies that meet the requirements outlined above will be selected by the Investment Manager to be part of the investment universe for the Sub-Fund in order to create a diversified portfolio with compelling risk-adjusted returns.

Furthermore, the Investment Manager operates an ESG policy which consists of a multistage approach to integrating ESG factors and Sustainability Risks in investment decisions which includes:

Assessment: The Investment Manager, using a proprietary ESG scorecard, performs industry and company-specific due diligence to identify potential material risks, including Sustainability Risks. This may include the evaluation of financial, tax, accounting, corporate governance, environmental, human resource and legal issues among others.

The Investment Manager's proprietary scores reflect the Investment Manager's view of the quality of company policies, management performance, corporate governance, commitments and progress on the management of material risks across ESG factors. These scores influence portfolio holdings and weightings. A poor score may result in the exclusion of the company as an eligible portfolio company as determined at the discretion of the Investment Manager.

Monitor: As part of the Investment Manager's research process, changes in a company's ESG risk factors or attributes are considered by the investment team and developments that negatively impact ESG scorecards may lead the Investment Manager to reduce the weight or exit a portfolio position entirely.

Engage: The Investment Manager engages on ESG topics throughout the lifecycle of an investment. Engagements may arise where a portfolio company scores poorly with respect to a specific material risk, an ESG controversy or negative media becomes known to the public, or in connection with a proxy voting proposal. Where such engagements result in a portfolio company scoring poorly without any mitigating factors or pre-emptive steps having been taken to address shortcomings, the Investment Manager may reduce the weight of a portfolio position or to exit the position entirely.

Good Governance Practices

The Investment Manager has developed proxy voting guidelines to address issues which the Investment Manager believes best position investee companies to generate sustained value for shareholders over the long-term. The guidelines express the Investment Manager's views on a number of corporate governance "best practices" including board

composition and independence, shareholder rights, executive compensation, and oversight of ESG considerations.

Throughout the course of the calendar year, the Investment Manager regularly engaged with investee companies on a wide range of issues including improvements with respect to ESG disclosures, corporate governance arrangements, management compensation, and climate impacts/targets. Some engagements are incident related, while other are driven by the Investment Manager's proprietary ESG scorecard.

The Investment Manager has constituted an internal committee with responsibility for oversight of stewardship practices including proxy voting and company engagement. The Investment Manager had a total of 96 engagements in 2023.

How did this financial product perform compared to the reference benchmark?

Since there is no benchmark reference, there was no performance comparison during the period.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable to the Sub-Fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable to the Sub-Fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable to the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***
Not applicable to the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nutshell Growth Fund

Legal entity identifier: 635400IWQJPXWBMNPQ88

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ____%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

- Carbon emissions (CO2 tonnes per million dollars of revenue)
- Water pollution
- Harm to biodiversity
- Poor waste management practices

Social characteristics:

- Human rights
- Human trafficking
- Modern slavery / forced labour
- Breaches of employee rights / labour rights
- Child labour
- Discrimination
- Restrictions on or abuse of the rights of consumers

Post September 5, 2024, the environmental and social characteristics promoted by the Sub-Fund consisted of investing in companies that may exhibit positive statistics in areas such as :

Environmental characteristics:

- Energy Management
- Waste Management
- Sustainable Finance

Social characteristics:

- Data Security and Customer Privacy
- Operational Risk Management
- Labour and Employment Practices
- Ethics and Compliance

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The table below shows data for the sustainability indicators, and reflects the change in measurement that flows from the Sub-Fund supplement changes in September 2024. To date the companies invested in have not made available data relating to emissions to water, and investments in companies in or near to bio-diversity-sensitive areas. the Sub-Fund has therefore not made investments during the reference period which promoted positive statistics in “Water pollution” or “Harm to biodiversity”.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
The Sub-Fund does not have a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Fund does not have a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable to the Sub-Fund

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable to the Sub-Fund

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider principal adverse impacts on sustainability factors as defined in Article 4(1), point (b) of the SFDR.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: January 1, 2024 to December 31, 2024

Largest Investments	Sector	Country	% Assets
AutoZone Inc	Consumer Discretionary	United States	7.5%

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Sub-Fund invested an average of 90.65% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, all of the 90.65% of the Sub-Fund's assets were classified within the #1B (Other E/S characteristics) allocation.

9.35% of the investments were not aligned with these characteristics (#2 Other). This allocation includes stocks which were not aligned with E/S characteristics, along with cash and foreign exchange positions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The Sub-Fund's average investment by sector/industry group during the reference period was as follows:

Sector	Industry Group	% Assets
Cash & Other	Cash & Other	1.7%
Communication Services	Media & Entertainment	10.0%
Consumer Discretionary	Consumer Discretionary Distr & Retail	11.8%
Consumer Discretionary	Consumer Durables & Apparel	8.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable to the Sub-Fund. The analysis and disclosure requirements introduced by the Taxonomy Regulation are very detailed and compliance with them requires the availability of numerous data in respect of each investment which the Sub-Fund makes. The proportion of the Sub-Fund's investments that aligned with environmentally sustainable economic activities for the purposes of the Taxonomy Regulation will be 0%. This should not be taken as meaning that the Sub-Fund will not be investing in such investments at any given time. In other words, it cannot be excluded that some of the Sub-Fund's holdings qualify as Taxonomy-aligned investments. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Sub-Fund does not have as a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR including transition and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What was the share of socially sustainable investments?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This may include cash, futures, Forward FX and equity holdings.

The “Other” section in the Sub-Fund is held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover. There were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager aims to vote all eligible proxies each year and will vote against management recommendations on issues including those relating to environmental and/or social characteristic where it deems appropriate. The Investment Manager has continually included an element of environmental and social scoring/adjustment in its investment process throughout the year.

During the reference period the Investment Manager was eligible to vote at 38 company meetings and actually voted at 34 (89%). The Investment Manager voted in 512 out of 580 proxy proposals (88%). The Investment Manager voted for 473 out of 532 management proposals (89%), and for 9 out of 48 shareholder proposals (19%).

How did this financial product perform compared to the reference benchmark?

No specific index is designated as a reference benchmark to determine whether the product is aligned with environmental and social characteristics promoted.

How does the reference benchmark differ from a broad market index?

Not applicable for the Sub-Fund.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable for the Sub-Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable for the Sub-Fund
 - ***How did this financial product perform compared with the broad market index?***
Not applicable for the Sub-Fund
-

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
Yes	No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

By integrating environmental and social characteristics into the investment process and applying exclusions to actively promote these characteristics, the Investment Manager has demonstrated its commitment to responsible investing while pursuing financial returns.

Regarding environmental factors, the Investment Manager considers various metrics such as carbon dioxide and other greenhouse gas emissions, toxic waste productions.

For social factors related to a company, the Investment Manager takes into account aspects such as labour and community relations, health and safety risks, government regulatory aspects, and disclosures on employee compensation.

The Investment Manager's strategy is based on the belief that responsibility is a hallmark of quality, and it invests in companies with a sustainable competitive advantage derived from environmental and social factors. The Investment Manager strives to generate a positive social and environmental impact alongside a financial return. As part of the construction of the portfolio and ongoing monitoring process of the Sub-Fund, exclusions are also applied to actively promote environmental and social characteristics. Qualitative analysis is also part of our company's overall appraisal process.

In conclusion, within the Investment Manager's overall ESG assessment, the Investment Manager recognises that environmental and social factors are critical for creating sustainable business practices. However, the Investment Manager also believes that effective governance is essential to ensure that companies operate within legal and ethical boundaries. Strong governance practices enable companies to make informed decisions that are in the best interest of all stakeholders, including employees, shareholders, and the wider community.

How did the sustainability indicators perform?

	Weighted Average				Coverage			
Environmental Characteristics	1Q23	2Q23	3Q23	4Q23	1Q23	2Q23	3Q23	4Q23
CO2 tonnes of emissions per million dollars of revenue	785	514	702	607	100%	100%	98%	100%
Tonnes of hazardous waste generated per million dollars of revenue	1	0.17	0.21	0.19	33%	33%	23%	33%
Social Characteristics								
Board Gender Diversity	32.36%	32.54%	32.38%	32.56%	97%	98%	97%	97%
Total recordable incident rate	0.49%	0.58%	0.59%	0.57%	45%	42%	32%	45%
Gender Pay Gap	8.68%	9.45%	9.38%	0.42%	6%	6%	6%	6%

To date, companies have largely failed to report on the Environmental and Social characteristics. Until regulators force companies to report, the Investment Manager is considering how it can better measure these characteristics going forward based on metrics that are available.

...and compared to previous periods?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The below allocation was achieved by considering whether underlying investments adhered to a number of environmental and social characteristics, being:

Environmental:

- Engagement with policy makers on possible responses to climate change, including taxation, regulation and carbon trading
- Implementation of initiatives to reduce air polluting emissions
- Strategies in place to improve energy efficiency

Social:

- Board Diversity - % board identifying as underrepresented group
- Employee turnover
- Community engagement – initiatives or engagement strategies within local communities

Investments were considered to be aligned with E/S characteristics if they were in the top 30% of their peer group in the above fields, and if at least one of each of the above environmental and social characteristics were promoted at a board level.

● ***In which economic sectors were the investments made?***

The Sub-Fund held investments in the following sectors during the reference period: Information Technology, Health Care, Industrials, Financials, Materials, Consumer Discretionary, Energy, Communication Services, Utilities, Real Estate and Consumer Staples.

March		June		September		December	
Financials	26.42%	Information Technology	22.80%	Information Technology	23.69%	Financials	27.63%
Information Technology	19.81%	Financials	18.02%	Financials	17.94%	Information Technology	23.50%
Materials	11.35%	Materials	11.93%	Consumer Discretionary	13.45%	Consumer Discretionary	12.10%
Industrials	9.99%	Consumer Discretionary	9.82%	Materials	10.29%	Materials	7.77%
Communication Services	8.22%	Industrials	9.19%	Industrials	8.32%	Industrials	7.67%
Consumer Discretionary	8.21%	Communication Services	8.89%	Health Care	8.27%	Health Care	7.49%
Health Care	7.41%	Health Care	8.23%	Communication Services	7.02%	Communication Services	6.91%
Energy	5.34%	Energy	5.23%	Energy	4.65%	Energy	3.52%

Utilities	2.03%	Consumer Staples	3.33%	Consumer Staples	4.12%	Consumer Staples	1.49%
Real Estate	0.73%	Utilities	1.43%	Utilities	1.64%	Utilities	1.04%
Consumer Staples	0.49%	Real Estate	1.13%	Real Estate	0.60%	Real Estate	0.88%

Revenue derived from fossil fuels:

March		June		September		December	
Energy	14.73%	Energy	13.16%	Energy	9.45%	Energy	11.80%
Utilities	6.03%	Industrials	1.22%	Consumer Discretionary	1.25%	Consumer Discretionary	1.37%
Materials	1.78%			Industrials	1.00%	Industrials	0.64%
Industrials	1.41%						

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The “Other” Investments of in the Sub-Fund are held for a number of reasons that the Investment Manager feels will be beneficial to the Sub-Fund, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

The Sub-Fund may hold up to of 100% its net asset value in depositary receipts, cash, cash equivalents such as Money Market Instruments, short-term government bonds, treasury bills and commercial papers held as ancillary liquidity (#2).

No minimum social and environmental safeguards are applied to these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was managed in line with its investment objective and policy for the reporting period. The Investment Manager has continually included an element of environmental and social screening in its investment process throughout the year. Specific screening has also been applied to adhere to the excluded investment list.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Perspective American Extended Alpha UCITS Fund

Legal entity identifier: 635400JTEFZLVVRC61

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
Yes	No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

By integrating environmental and social characteristics into the investment process and applying exclusions to actively promote these characteristics, the Investment Manager has demonstrated its commitment to responsible investing while pursuing financial returns.

Regarding environmental factors, the Investment Manager considers various metrics such as carbon dioxide and other greenhouse gas emissions, toxic waste productions. Due to the lack of available information provided by companies it has not been possible to prove that these characteristics were met in the period.

For social factors related to a company, the Investment Manager takes into account aspects such as labour and community relations, health and safety risks, government regulatory aspects, and disclosures on employee compensation.

The Investment Manager's strategy is based on the belief that responsibility is a hallmark of quality, and it invests in companies with a sustainable competitive advantage derived from environmental and social factors. The Investment Manager strives to generate a positive social and environmental impact alongside a financial return. As part of the construction of the portfolio and ongoing monitoring process of the Sub-Fund, exclusions are also applied to actively promote environmental and social characteristics. Qualitative analysis is also part of our company's overall appraisal process.

In conclusion, within the Investment Manager's overall ESG assessment, the Investment Manager recognizes that environmental and social factors are critical for creating sustainable business practices. However, the Investment Manager also believes that effective governance is essential to ensure that companies operate within legal and ethical boundaries. Strong governance practices enable companies to make informed decisions that are in the best interest of all stakeholders, including employees, shareholders, and the wider community.

How did the sustainability indicators perform?

	Weighted Average				Coverage			
	1Q24	2Q24	3Q24	4Q24	1Q24	2Q24	3Q24	4Q24
Environmental Characteristics								
CO2 tonnes of emissions per million dollars of revenue	608	439	576	471	100%	100%	100%	98%
Tonnes of hazardous waste generated per million dollars of revenue	1	0.15	0.17	0.16	27%	32%	32%	27%
Social Characteristics								
Board Gender Diversity	34.07%	34.31%	34.17%	34.13%	96%	97%	97%	96%
Total recordable incident rate	0.88%	1.01%	0.98%	1.18%	34%	37%	35%	29%
Gender Pay Gap	6.15%	7.36%	8.92%	0.79%	3%	3%	4%	5%

To date, companies have largely failed to report on the Environmental and Social characteristics. Until regulators force companies to report the Investment Manager is considering how it can better measure these characteristics going forward based on metrics that are available.

...and compared to previous periods?

	Weighted Average	Coverage

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental Characteristics	1Q23	2Q23	3Q23	4Q23	1Q23	2Q23	3Q23	4Q23
CO2 tonnes of emissions per million dollars of revenue			537.97	495.24			92%	89%
Tonnes of emissions to water per million dollars of revenue							0%	0%
Share of investments in companies located in or near to biodiversity-sensitive areas where activities negatively affect those areas							0%	0%
Tonnes of hazardous waste generated per million dollars of revenue			1.41	0.97			6%	2%
Social Characteristics								
Board Gender Diversity			35%	35%			55%	56%
Total recordable incident rate			0%	1%			17%	12%
Gender Pay Gap			14%	14%			1%	1%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider principal adverse impacts on sustainability factors as defined in Article 7(2) of the SFDR.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 January 2024 – 31 December 2024

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	6.56%	US

Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: RoboCap UCITS Fund

Legal entity identifier: 6354007SDEPHWQ3WNA95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

To what extent were the environmental and/or social characteristics promoted by this financial product met?

100% of the stocks in the Sub-Fund's investment portfolio should have significant co-benefits and alignments with UN SDGs. As most of the stocks the Sub-Fund invests in are high-tech companies, the Investment Manager believes that they naturally contribute to SDG 9. Industry, Innovation and Infrastructure. 100% of the stocks in the portfolio are aligned with at least one SDG.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- (1) SDG alignment of stocks in the portfolio.
- (2) 100% of the stocks in the portfolio are aligned with at least 1 SDG. That was the same in the previous period.
- (3) SDG 9 Industry, Innovation and Infrastructure is the key focus, as the Sub-Fund is a tech fund and 100% of the stocks in the portfolio are aligned with this SDG.
- (4) As a reference, 82% of stocks in the portfolio are among top-3 players in their industries, and 76% of them have a R&D/ Sales ratio of >10%.
- (5) The average R&D/ Sales ratio of the portfolio was 18.6%, +0.2% over the previous period. The Investment Manager believes the continuous high input in R&D by the companies in the portfolio will bring us more technological breakthroughs and faster technological advancement, which should contribute positively to the overall development of society.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

...and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund promotes environmental or social characteristics but does not have as its objective sustainable investment as defined under Article 2 (17) of the SFDR.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund promotes environmental or social characteristics but does not have as its objective sustainable investment as defined under Article 2 (17) of the SFDR.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable. The Sub-Fund promotes environmental or social characteristics but does not have as its objective sustainable investment as defined under Article 2 (17) of the SFDR.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period

What was the proportion of sustainability-related investments?

Not applicable as the Sub-Fund does not actively promote sustainability factors.

100% of the stocks in the Sub-Fund's investment portfolio have significant co-benefits and alignments with UN SDGs. 100% of the stocks in the portfolio are aligned with at least one SDG.

Asset allocation describes the share of investments in

● What was the asset allocation?

In which economic sectors were the investments made?

- (1) Consumer Discretionary - 3.28%
 - a. Autonomous Vehicles - 3.28%
- (2) Health Care – 9.34%
 - a. Health Care Robotics – 9.34%
- (3) Industrials – 9.12%
 - a. General Automation – 5.83%
 - b. Logistics Automation – 1.58%
 - c. Space Robotics – 1.71%
- (4) Information Technology – 70.43%
 - a. AI – 30.28%
 - b. Key Components – 3.20%
 - c. Semiconductor Automation – 16.15%
 - d. Software – 20.79%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1. Not applicable as the Sub-Fund does not actively promote sustainability factors.
2. The Investment Manager focuses on the alignment of the stocks in the portfolio with SDG 9 Industry, Innovation and Infrastructure
3. 69% of the stocks in the portfolio either already have greenhouse gas (“GHG”) emission reduction targets, or have already implemented measures to reduce emissions.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Investment Manager employs an exclusion screening at the beginning of its investment process, to exclude fossil fuel and nuclear energy.

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

1. Not applicable as the Sub-Fund does not actively promote sustainability factors.
2. The Sub-Fund focuses more on the alignment of the stocks in the portfolio with SDG 9 Industry, Innovation and Infrastructure.
3. 69% of stocks in the portfolio either already have GHG emission reduction targets, or have already implemented measures to reduce emission. That was roughly the same in the previous period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What was the share of socially sustainable investments?

1. Not applicable as the Sub-Fund does not actively promote sustainability factors.
2. The Sub-Fund focuses more on the alignment of the stocks in the portfolio with SDG 9 Industry, Innovation and Infrastructure.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and FX forwards, to hedge out FX risk only.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- (1) The Investment Manager has participated in every proxy vote to exercise the Sub-Fund’s influence on the companies’ ESG-related decisions.
- (2) The Investment Manager will also meet up with company management periodically to share its thoughts on their ESG approaches and also disclosures.

How did this financial product perform compared to the reference benchmark?

Not applicable. The Sub-Fund does not have a designated reference benchmark to determine its alignment with the environmental and social characteristics promoted.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable for the Sub-Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable for the Sub-Fund.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable for the Sub-Fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable for the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Selwood ESG Credit UCITS Fund

Legal entity identifier: 635400LDTEV5IEPTEF69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ ☐ ☒ No ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 83% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics which align with the sustainable goals listed below. The investment strategy is the following:

Cash is invested in Green Bonds issued by governmental and supranational agencies representing at least 50% of the AUM of the Sub-Fund and an average of approximately 83% during 2024.

The Sub-Fund promoted environmental characteristics through investments in Green Bonds, issued by governments and supra-nationals ("SSAs").

The International Capital Market Association Green Bond Principles (the "Green Bond Principles") explicitly recognise several broad categories of eligibility for green projects

("Green Projects"), which contribute to environmental objectives such as climate change mitigation/adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control and the protection and restoration of biodiversity and ecosystems.

Largest Holdings as of 31/12/2024 – Green Bonds:

Main holdings					
Type (and SSA's)	Issuer	Exposure (in % NAV)	Country	Avoided Emissions* (tCO2 / million \$ invested)	Sustainable Development Goals ¹
Green Bonds	European Union	23.4%	Belgium	N/A	
Green Bonds	KFW	23.7%	Germany	N/A	
Green Bonds	EIB	20.4%	Luxembourg	-5.6	
Green Bonds	Republic of Germany	15.2%	Germany	N/A	

*Note that Avoided Annual Emissions indicators are available in general one year post issuance of the Green Bond via the Impact report provided by the auditor or a third-party validation agent. SP Global Trucost will collect the data, and this information will be available as soon as reported. Please contact Selwood AM France for more details.

Breakdown of SDGs Linked to the Use of Proceeds from Green Bonds as of 31.12.24 (Estimate Investment Manager) :

Source : Investment Manager / SP Global Trucost - Estimates

1. Additional exposure is taken to the ESG Investment Grade index via the **iTraxx MSCI ESG Screened Europe Index or by replicating the index.**

The Sub-Fund **indirectly promoted certain social characteristics**, such as corporate behaviour, human capital and social opportunities through seeking long exposures to iTraxx MSCI ESG Screened Europe Index. This index follows a three-step screening methodology based on MSCI ESG research as follows: (1) a value based screen, (2) a controversy based screen; and (3) an ESG rating based screen.

2. Value based screen: Value based screening results in the exclusion of entities breaching specific revenue thresholds (please refer to www.markit.com for details of those thresholds in the index construction), as specified in the iTraxx ESG Screened rules, due to their involvement in the following activities

Adult Entertainment	Controversial Weapons	Genetic Engineering	Tobacco

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Alcohol	Conventional Weapons	Nuclear Power	Thermal Coal
Civilian Firearms	Gambling	Nuclear Weapons	Unconventional Oil and Gas

3. Controversy based screen: Controversy-based screening is applied to identify companies based on how well they adhere to international norms and principles such as the UN Global Compact and International Labour Organization's (ILO) Core Conventions. The MSCI ESG controversy scores are provided on a scale of 0-10, with 0 being the entities involved in the most severe controversies. The iTraxx ESG Screened excludes entities with an MSCI ESG controversy scores of 0. A "fail" from a corporate entity on the OECD/ UN Global Compact principles will de facto score the entity at 0 and therefore the relevant corporate entity will be removed by MSCI from the iTraxx ESG Screened.
4. ESG Rating based screen: MSCI ESG ratings aim to measure the key ESG risks and opportunities faced by a company and how well those risks are managed with respect to its industry peers. The iTraxx ESG Screened excludes entities with an MSCI ESG rating of BBB or lower. The iTraxx ESG Screened is reviewed every six months by Markit and MSCI to remove any entities which no longer qualify as investment grade and /or no longer meet the ESG criteria, as defined by MSCI.

The list of excluded names is revisited every 6 months by Markit / MSCI and issued in a new series. Around 25% of the universe (universe of 125 Investment Grade European Names) is screened out. Please find below the iTraxx Main excluded names for the Series 42 (S42), issued in September 2024, as well as reasons given by MSCI following the exclusion (see index rules available on <https://www.markit.com>).

● **How did the sustainability indicators perform?**

As part of the investment process, the Investment Manager monitors and considers sustainability indicators to measure the environmental and social characteristics promoted by the Sub-Fund. In respect of the environmental characteristics promoted by the Sub-Fund, the following sustainability indicators were used during the year for corporates, governments and SSAs:

1. For Governments and SSAs through Green Bonds – Source SP Global / Investment Manager FR
 - Avoided annual emissions and Avoided annual emissions per million € invested are monitored :

HEADLINE RESULTS

Portfolio name	Selwood ESG Credit Fund
Number of bonds covered	4/4
Portfolio value covered (mEUR)	18
Portfolio value covered (%)	100%
Share of proceeds classified as Green (mEUR)	17
Share of proceeds classified as Green (%)	92%
Total annualized avoided emissions (tCO ₂ e)	-1,347
Avoided annual emissions per million invested (tCO ₂ e/mEUR)	-74
Overall Governance Score	92

Source S&P Global Trucost as of 31.12.2024

- Investee countries subject to social violations are excluded : zero exposure since inception of the Sub-Fund (Aug 23) and since December 2023.
- Use of Proceeds (UOP) by Climate Bonds Initiative¹ (CBI) category (% of total invested nominal) – picture as of 31.12.2024

¹ The Climate Bonds Initiative is an international organisation working to mobilise global capital for climate action. CBI achieves this through the development of the Climate Bonds Standard and Certification Scheme, Policy Engagement and Market Intelligence work.

2. For corporates, through the iTraxx MSCI ESG Screened Europe Index.

- CO2 Scope 1 & 2 emissions (tCO2eq)- evolution over time

- Carbon Footprint (tCO2e per mEUR) – evolution over time

- The Investment Manager monitors the following: specific # PAI for each iTraxx MSCI ESG Screened Index (these change every 6 months at each roll) [data as of 31.12.2024]

# PAI [SFDR Adverse Impact Indicators]	#	%	% covered**
(#10) UNGC / OECD Guidelines Violation ¹⁴	9	9%	100%
(#12) Unadjusted gender pay gap ¹⁵	14%	n/a	100%
(#13) Board gender diversity ¹⁶	43%	n/a	100%
Companies without carbon emission reduction initiatives ¹⁷	58	61%	100%

Source : Investment Manager and S&P Trucost as of 31.12.2024 – Serie S42 of the iTraxx ESG Index

(#10) UNGC / OECD Guidelines Violation: Provides flags for the involvement of a company in a UNGC - Principle related media controversy. This indicator will be Yes(1) or No(0)

(#12) Unadjusted gender pay gap: provides the gap in the average hourly earnings between women and men, presented as men to women pay ratio (See S&P Global Corporate Sustainability Assessment (CSA) methodology)

(#13) Board Gender Diversity: Provides number of female directors as a percentage of the total number of directors. Calculated in and aggregate for all companies in the portfolio

Companies without carbon emission reduction initiatives: Based on actual or industry based estimate, provides a Yes(0) or No (1) if a company is aligned with the below 2 degree temperature increase target set as part of the Paris Agreement

Source: SP Global

Please note that the Sub-Fund's exposure to European Investment Grade corporates is indirect, i.e. through derivatives such as iTraxx MSCI ESG Screened Europe Index. S&P Trucost does not cover derivative exposures, so it is an internal analysis done by the Investment Manager.

● ***...and compared to previous periods?***

*The 2023 average data has been annualised as the Sub-Fund was launched in August 2023, meaning data was only available for the last quarter.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As the Sub-Fund is classified as an Article 8 fund for the purposes of the SFDR, the Sub-Fund does not have a sustainable investment objective. However, the Sub-Fund holds 83% sustainable investments (as of 31.12.2024) where the following SDGs are promoted:

- SDG #1: No Poverty
- SDG #2: Zero Hunger
- SDG #6: Clean water and sanitation
- SDG #7: Affordable and clean energy
- SDG #8: Decent work and economic growth
- SDG #9: Industry, innovation and infrastructure
- SDG #11: Sustainable cities and communities
- SDG #12: Responsible consumption and production

- SDG #13: Climate action
- SDG #14: Life under water
- SDG #15: Life on land
- SDG #16: Peace, Justice and Strong Institutions
- SDG #17: Partnerships for the Goals

The Sub-Fund promotes environmental characteristics by investing in Green Bonds. The way that the Green Bonds contribute to these objectives is by financing and refinancing green projects, which deliver environmental benefits. Eligible green projects include, but are not limited to, renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, clean transportation, climate change adaptation, green buildings etc.

The Investment Manager also employs a number of factors to ensure that the sustainable investments that the Sub-Fund makes do not cause significant harm to any environmental or social sustainable objective. This includes (i) ensuring the "Do No Significant Harm" principle is incorporated in the issuing process of the Green Bonds on environment and social issues, (ii) that the issuers of the Green Bonds are countries that are signatories to the UN Guiding Principles on Business and Human Rights; and (iii) that the Green Bonds in which the Sub-Fund will invest adhere to the Green Bond Principles.

While the sustainable investments may have an environmental objective, the Sub-Fund does not have a commitment to align its investments with the EU Taxonomy Regulation.

As of 31.12.2024, 83% of the Sub-Fund's NAV is invested in Green Bonds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The "Do No Significant Harm" (DNSH) principle is incorporated in the issuing process of the Green Bonds on environment and social issues. The Sub-Fund invests in Green Bonds which adhere to the Green Bond Principles and the issuers of those bonds are countries that are signatories to the UN Guiding Principles on Business and Human Rights. The Green Bonds Guidelines recommend issuers to determine whether their use of Green Bonds violate domestic environmental laws as well as non-environmental policies, in particular human rights policies, based on the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and the International Labour Organization Declaration on Fundamental Principles and Rights at Work.

The combination of all of these factors is used to ensure that, while the Sub-Fund does not have a sustainable investment objective, the sustainable investments that the Sub-Fund makes do not cause significant harm to any environmental or social sustainable objective.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

These indicators are not applied to the Green Bonds issued by governments and SSAs entities (since they are not “companies” / “corporates” or “enterprises”).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

These principles are not applied to the Green Bonds issued by governments and SSAs (since they are not “companies” / “corporates” or “enterprises”). Instead for Green Bonds issued by governments and SSAs, the Investment Manager shall monitor the social violations indicator which is considered to be an equivalent to the Government of OECD Guidelines for Multinational Enterprises. This factor is PAI #16 which is monitored by the Investment Manager from the data provided by S&P Global.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Mandatory Indicators Sovereign & Real Estate

INDICATORS APPLICABLE TO INVESTMENTS IN SOVEREIGNS AND SUPRANATIONALS

Source: S&P Global Truscost SFDR report and Impact Report as of 31.12.2024

How did this financial product consider principal adverse impacts on sustainability factors?

The SFDR requires an in-scope firm to make a “comply or explain” decision whether to consider the principal adverse impacts (“PAIs”) of its investment decisions on sustainability factors, in accordance with a specific regime outlined in SFDR. The Investment Manager has opted not to comply with that regime (both at entity level and in relation to the funds managed by it).

The Investment Manager has carefully evaluated the requirements of the PAI regime in Article 4 SFDR, and in the Regulatory Technical Standards (the “PAI regime”). The Investment Manager is supportive of the policy aims of the PAI regime, to improve transparency to clients, investors and the market, as to how financial market participants integrate consideration of the adverse impacts of investment decisions on sustainability factors. However, taking account of the Investment Manager’s size, the nature and scale of the Investment Manager’s

activities and the types of products the Investment Manager makes available, the Investment Manager considers that it would be disproportionate to comply with the PAI regime.

Accordingly, the Investment Manager does not consider the principal adverse impacts of its investment decisions on sustainability factors.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What were the top investments of this financial product?

Main holdings			
Type (and SSA's)	Issuer	Exposure (in % NAV)	Country
Green Bonds	European Union	23.4%	Belgium
Green Bonds	KFW	23.7%	Germany
Green Bonds	EIB	20.4%	Luxembourg
Green Bonds	Republic of Germany	15.2%	Germany

Source: SP Global and the Investment Manager as of 31.12.2024

Please note that the Sub-Fund also has derivative exposure via iTraxx MSCI ESG Screened Index.

What was the proportion of sustainability-related investments ?

- What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Please find below the average monthly allocation of the Sub-Fund during the reference period:

The proportion invested in Green Bonds issued by Governments and SSAs is 83% of NAV on average since December 2023.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 Jaunary 2024 to 31 December 2024

Allocation as of 31.12.2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

The chart below shows the share of proceeds allocated to different project types, using the categories defined according to the Climate Bonds Initiative (CBI) taxonomy. For more information on the CBI taxonomy please refer to www.climatebonds.net

Source: S&PGlobal – 29.12.2023

The iTraxx MSCI ESG Screened contains exposure to multiple corporations spanning various sectors.

Please find below the sector breakdown for the S42 as of 31.12.2024:

Source : investment Manager -12.2024

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the purposes of the Taxonomy Regulation, the Sub-Fund does not intend to be invested in investments that take into account the EU criteria for environmentally sustainable economic activities.

Therefore, the Sub-Fund has a minimum of 0% in investments that are intended to be invested in economic activities that qualify as environmentally sustainable under the Taxonomy Regulation. Notwithstanding this intention, certain investments may qualify as environmentally sustainable under the Taxonomy Regulation.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy²

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Sub-Fund does not have a commitment to make sustainable investments as defined in the SFDR, including transition and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The average exposure of the Sub-Fund to Green Bonds is 83% since December 2023.

What was the share of socially sustainable investments?

The Sub-Fund does not have as a commitment to make socially sustainable investments as defined in the SFDR.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Under “#2 Other Investments” the Sub-Fund includes certain market hedges.

(I) futures, including without limitation, bond futures and interest rate swaps for the purposes of hedging the the interest rate risk associated with the Green Bonds.

(II) swaps, including without limitation credit default swaps (buyer of protection), to hedge the long position on iTraxx MSCI ESG Screened.

There are no minimum environmental or social safeguards for “Other Investments”.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager receives both financial and non-financial data on a weekly basis through a Weekly Report. Additionally, a specialised monthly report monitors the Environmental/Social aspects of the Sub-Fund. Annual reports from Green Bonds issuers detail funded projects from the previous year and the Use of Proceeds, which are also accessible online. If any invested bonds fail to meet environmental and/or social criteria, they are promptly replaced by the Investment Manager. If any invested bond issuers fail to report data, the Investment Manager will consider reviewing the allocation.

The Investment Manager does not actively engage with green bond issuers or corporations due to the nature of the traded instruments and the Sub-Fund's size. The Investment Manager does not have an engagement policy in place.

How did this financial product perform compared to the reference benchmark?

No index is designated as a reference benchmark for this Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Virtuoso UCITS Fund

Legal entity identifier: 6354005R2MLNDVE1UO93

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: ____%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

By integrating environmental and social characteristics into the investment process and applying exclusions to actively promote these characteristics, the Investment Manager has demonstrated its commitment to responsible investing while pursuing financial returns.

Regarding environmental factors, the Investment Manager considers various metrics such as carbon dioxide and other greenhouse gas emissions, toxic waste productions.

For social factors related to a company, the Investment Manager takes into account aspects such as labour and community relations, health and safety risks, government regulatory aspects, and disclosures on employee compensation.

The Investment Manager's strategy is based on the belief that responsibility is a hallmark of quality, and it invests in companies with a sustainable competitive advantage derived from environmental and social factors. The Investment Manager strives to generate a positive social and environmental impact alongside a financial return. As part of the construction of the portfolio and ongoing monitoring process of the Sub-Fund, exclusions are also applied to actively promote environmental and social characteristics. Qualitative analysis is also part of our company's overall appraisal process.

In conclusion, within the Investment Manager's overall ESG assessment, the Investment Manager recognises that environmental and social factors are critical for creating sustainable business practices. However, the Investment Manager also believes that effective governance is essential to ensure that companies operate within legal and ethical boundaries. Strong governance practices enable companies to make informed decisions that are in the best interest of all stakeholders, including employees, shareholders, and the wider community.

How did the sustainability indicators perform?

	Weighted Average				Coverage			
Environmental Characteristics	1Q24	2Q24	3Q24	4Q24	1Q24	2Q24	3Q24	4Q24
CO2 tonnes of emissions per million dollars of revenue	683	863	575	789	100%	100%	100%	98%
Tonnes of hazardous waste generated per million dollars of revenue	1	0.81	0.68	0.88	50%	56%	61%	54%
Social Characteristics								
Board Gender Diversity	36.04 %	36.11 %	36.46 %	35.40 %	97%	97%	98%	99%
Total recordable incident rate	1.12%	0.79%	0.84%	1.08%	44%	48%	48%	43%
Gender Pay Gap	2.17%	2.53%	4.08%	3.34%	13%	15%	13%	11%

To date, companies have failed to report information related to biodiversity-sensitive areas where activities negatively affect those areas. Until regulators force companies to report, the Investment Manager is considering how it can better measure these characteristics going forward based on metrics that are available.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...and compared to previous periods?

Environmental Characteristics	Weighted Average				Coverage			
	1Q23	2Q23	3Q23	4Q23	1Q23	2Q23	3Q23	4Q23

Total recordable incident rate	0.94%	0.90%	0.74%	1.14%	28%	22%	24%	25%
Gender Pay Gap	9%	9%	9%	6%	7%	5%	8%	8%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider principal adverse impacts on sustainability factors as defined in Article 7(2) of the SFDR.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 January 2024 to 31 December 2024

Largest Investments	Sector	% Assets	Country
AMAZON.COM INC	Consumer Discretionary	4.61%	US
MICROSOFT CORP	Information Technology	4.43%	US
NVIDIA CORP	Information Technology	4.23%	US
ALPHABET INC-CL C	Communication Services	4.00%	US
APPLE INC	Information Technology	3.95%	US
DELL TECHNOLOGIES -C	Information Technology	3.63%	US
SHELL PLC	Energy	3.28%	GB
TOTALENERGIES SE	Energy	2.91%	FR
MONCLER SPA	Consumer Discretionary	2.77%	IT
RENAULT SA	Consumer Discretionary	2.56%	FR
HERMES INTERNATIONAL	Consumer Discretionary	2.53%	FR
APA CORP	Energy	2.43%	US

FERRARI NV	Consumer Discretionary	2.24%	IT
SAIPEM SPA	Energy	2.19%	IT
VINCI SA	Industrials	2.17%	FR
APA CORP	Energy	2.43%	US

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

The below allocation was achieved by considering whether underlying investments adhered to a number of environmental and social characteristics, being:

Environmental:

- Engagement with policy makers on possible responses to climate change, including taxation, regulation and carbon trading
- Implementation of initiatives to reduce air polluting emissions
- Strategies in place to improve energy efficiency

Social:

- Board Diversity - % board identifying as underrepresented group
- Employee turnover
- Community engagement – initiatives or engagement strategies within local communities

Investments were considered to be aligned with E/S characteristics if they were in the top 30% of their peer group in the above fields, and if at least one of each of the above environmental and social characteristics were promoted at a board level.

● *In which economic sectors were the investments made?*

The Sub-Fund held investments in the following sectors during the reference period: Consumer Discretionary, Information Technology, Communication Services, Industrials, Health Care, Energy, Utilities, Consumer Staples, Financials, Materials and Real Estate.

March		June		September		December	
Consumer Discretionary	30.09%	Information Technology	31.08%	Consumer Discretionary	28.94%	Consumer Discretionary	34.05%
Information Technology	18.94%	Consumer Discretionary	22.83%	Information Technology	25.86%	Information Technology	21.85%
Communication Services	16.38%	Energy	15.36%	Communication Services	10.36%	Energy	13.58%
Industrials	9.47%	Communication Services	11.35%	Energy	9.35%	Communication Services	12.87%
Energy	9.08%	Health Care	5.77%	Health Care	8.13%	Industrials	9.69%
Consumer Staples	6.22%	Industrials	5.22%	Utilities	6.32%	Health Care	2.32%
Health Care	5.32%	Consumer Staples	3.91%	Industrials	5.49%	Consumer Staples	2.19%

Materials	1.68%	Utilities	2.68%	Consumer Staples	2.69%	Utilities	1.85%
Utilities	1.60%	Real Estate	1.08%	Financials	1.73%	Financials	1.59%
		Materials	0.71%	Real Estate	1.12%		

Revenue derived from fossil fuels:

March		June		September		December	
Energy	14.64%	Energy	21.77%	Energy	12.99%	Energy	18.26%
Consumer Discretionary	3.25%	Utilities	2.31%	Utilities	8.14%	Consumer Discretionary	2.32%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not invest in environmentally sustainable activities, transitional activities or enabling activities defined as such by the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

The Sub-Fund does not have a commitment to make sustainable investments as defined in Article 2(17) of the SFDR

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The "Other" investments within the Sub-Fund comprises investments that do not conform to either environmental or social criteria nor qualify as sustainable investments. These investments have been included in the Sub-Fund for various reasons that the Investment Manager deems advantageous, including but not limited to managing risk, maintaining liquidity, and securing hedging and collateral. It should be noted that no specific environmental or social standards were required for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was managed in line with the investment objective and the following actions were taken:

The investment Manager integrates its ESG screening process on the basis of the following three key steps:

1. Value based exclusion of specific sectors and in particular Conventional Weapons Producer (0%), Conventional Weapons Support and Services (0%), Thermal Coal (0%), Tobacco Producers (0%), Tobacco distribution (0%), Gambling (0%) and Adult Entertainment (0).
2. Norm based exclusion of companies involved in the production of controversial weapons, the purpose of which is to be aware and in line with international norms and standards such as the Anti-Personnel Mine Ban Convention (Ottawa Treaty 1997).

3. Industry Materiality and Focus on Governance. The Investment Manager assesses industry materiality in relation to environmental, social and governance topics that matter most to the industries, firms, their shareholders and stakeholders. The Investment Manager is particularly focused on governance assessment. The Investment Manager performs dedicated screens to define its investible universe, excluding companies involved in very severe controversies if the corporate response to allegations did not provide sufficient explanation and/or reassurance that the controversy has been resolved.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Westbeck Energy Transition UCITS Fund
Legal entity identifier: 35400G6PMWVKAROZN67

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes ☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ ☐ ☒ No ☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and social characteristics within the scope of Article 8 of SFDR aiming at identifying those companies and/or issuers with the best practices and standards in terms of ESG characteristics for inclusion in the Sub-Fund’s portfolio.

As climate concern and air pollution challenges are at the heart of the energy transition, the Investment Manager applies a rigorous internal ESG process on all investments and ESG criteria are at the core of its investment process. Such characteristics cover a variety of environmental, social and governance factors including (but not limited to) the following:

Environmental Characteristics	Social Characteristics
Emissions	Respect of human rights
Energy management - focussing on companies with a minimum of 25% of their revenue derived from the energy transition within the next 5 years	Data security and privacy
Waste production and ecological impact	Labour practices
Biodiversity - focussing on companies which employ best practice to avoid damage to water systems in operating and development projects	Employee health and safety
Waste/tailings - focussing on companies making sure that they dispose of waste/tailings in a sustainable manner.	Diversity and inclusion
	Community

● ***How did the sustainability indicators perform?***

The sustainability indicators performed as indicated in the Sub-Fund's prospectus supplement and SFDR Annex. The Investment Manager analysed third party ratings, as well as conducting meetings with the companies invested in, feeding into the internal scorecard to internally rate the companies concerned.

100% of the Sub-Fund's long positions, with the exception of the future held for hedging purposes, all rated above 28 on the internal scorecard, while 37% of the short book had a score of 28 and above, giving a weighted average of 30.6.

● ***...and compared to previous periods?***

Compared to the previous year the average weighted score has dropped from 33.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund does not have as a commitment to partially make sustainable investments as defined in Article 2(17) of the SFDR.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund does not consider principal adverse impacts on sustainability factors, as defined in Article 7 of the SFDR.

What were the top investments of this financial product?

As at 31 December 2024 the largest postions were

Description	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Based on month end averages, the proportion of the Sub-Fund's investments that were aligned with the environmental, social and governance factors promoted by the Sub-Fund was 75%.

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

SECTOR	LONG	SHORT
Critical Materials	9.3%	0.0%
Batteries	0.0%	0.0%
Renewables & Infrastructure inc Nuclear	34.3%	-2.5%
End Markets	0.0%	-4.1%
Material Processing	0.7%	-3.9%
Hedging	0.4%	-32.0%
<u>TOTAL</u>	<u>44.7%</u>	<u>-42.5%</u>

The exposure to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council was 0% during the period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum commitment to investing in assets which are aligned with the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund does not have as a commitment to make sustainable investments as defined in Article 2(17) of the SFDR, including in transitional and enabling activities

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Sub-Fund does not have a minimum commitment to investing in assets which are aligned with the EU Taxonomy Regulation.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum commitment to investing in assets which are aligned with the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

The Sub-Fund does not have a minimum commitment to investing in assets which have a socially sustainable objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” investments included short equity swap positions and hedging via equity indices. Single name short positions included companies that failed the internal scorecard. No minimum environmental or social safeguards applied to such investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Investment Manager has developed its own ESG scorecard and ranks potential investments for ESG purposes according to factors that are most applicable to the industries within which the companies in the Sub-Fund's investment universe operate in. Where available, the Investment Manager reviews ratings (sourced from company reports, S&P Global ESG Rankings, Sustainalytics Rankings and Bloomberg ESG Disclosures) which may include greenhouse gas (“GHG”) emissions, carbon footprint, GHG intensity, hazardous waste, sites in sensitive areas, gender pay gap and board diversity, biodiversity policy and human rights policy to rank actual and potential investments.

The Investment Manager participated in numerous company meeting votes in 2024. Over the course of this period, voting agendas did not include any votes around ESG. The main topic of votes were for election of board members.

During preparation for company meetings, the Investment Manager refers to its ESG scoring records and if there are areas of concern, they form part of the Investment Manager’s discussion with the company.

The Investment Manager believes that shareholder engagement is an important part of being an Article 8 fund.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund does not use a benchmark for the purpose of attaining the environmental and/or social characteristics that it promotes.
