The Fund may invest, directly or indirectly through the use of financial derivative instruments ("FDIs"), up to 10% of the Net Asset Value of the Fund in transferable securities outlined under the headings outlined above or money market instruments which are not listed, traded or dealt in on a recognised Market.

Background to the Company (Continued)**Investment Objective and Policy (Continued)*****Albemarle Longevity Fund (Continued)***

A maximum of 10% of the Fund's Net Asset Value may be invested in: (i) UCITS and Acceptable Alternative Investment Funds ("AIFs"), which may include open-ended exchange traded funds ("ETFs"), in accordance with the Regulation 68(1)(e) of the UCITS Regulations and the Central Bank's requirements including guidance related to investment in Acceptable AIFs; and (ii) exchange traded closed-ended funds (which comply with the eligibility classification under the UCITS Regulations and Central Bank UCITS Regulations as transferable securities) in order to gain exposure to equities and equity-related securities.

ETFs will be domiciled primarily in the EU and may be authorised as UCITS or non-UCITS Funds. Where the ETF is authorised as a non-UCITS Fund, it will be subject to supervision by a supervisory authority set up by law to ensure the protection of the investor and provide an equivalent level of protection to investors as that provided by UCITS funds in accordance with the Central Bank's requirements.

Investment Policy Relating to Financial Derivative Instruments which Applies to all Funds

The Funds may use financial derivative instruments ("FDIs"), such as, but not limited to, contracts for difference, futures, foreign exchange contracts (including spot and forward currency contracts) and options for efficient portfolio management or investment purposes. A list of the FDI markets is set out in Appendix II of the Prospectus.

Futures (including financial future contracts) may be used to hedge against market risk, to change the Fund's interest rate sensitivity or to gain exposure to an underlying equity market. Forward currency contracts may be used to hedge or to gain exposure to an increase in the value of an asset, currency or deposit. Foreign exchange contracts may be used to reduce the risk of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure to foreign currency fluctuations from one country to another. Options may be used to hedge or achieve exposure to a particular market instead of using a physical security.

A risk management process prepared in accordance with the UCITS Regulations which enables the Funds to accurately measure, monitor and manage the various risks associated with FDIs, has been submitted to the Central Bank. The Funds may only utilise FDIs listed in the risk management process once cleared by the Central Bank.

The assets of the Funds will be invested in accordance with the UCITS Regulations and the investment restrictions described under "Investment Restrictions" in the Prospectus.

The Funds may also employ investment techniques and instruments, including FDI and repurchase and security lending agreements, subject to the conditions and limits set out in the Central Bank UCITS Regulations for efficient portfolio management of its assets for hedging against market movements, currency exchange, interest rate risks or otherwise as detailed under the heading "Efficient Portfolio Management" in the Prospectus. Repurchase and Securities Lending Agreements may only be used for the purposes of efficient portfolio management.

Investment Management

Albemarle Asset Management Limited serves as Investment Manager pursuant to an investment management agreement dated 11 November 2015 and an amendment agreement to the investment management agreement dated 4 April 2022.

Background to the Company (Continued)**Management**

The Company has appointed Waystone Management Company (IE) Limited (“WMC”) (the “Manager”) as its management company pursuant to the agreement signed on 4 April 2022 between the Company and the Manager.

Net Asset Value

The Net Asset Value of each Fund is calculated as the value of the assets of such Fund, less its liabilities at each valuation point.

The Net Asset Value per share of each Fund calculated as of the valuation point in respect of each dealing day is determined by dividing the Net Asset Value of the assets of the Fund attributable to the shares of the relevant Fund on that day by the number of shares of the relevant Fund outstanding. Where more than one class of shares is in issue in respect of a Fund, the Net Asset Value of the relevant Fund calculated as provided for above, is allocated between each class in accordance with the respective values in the base currency of the Fund represented by subscriptions and redemptions of shares of each class of the Fund received or made from time to time.

Where different entitlements, fees, charges, costs or liabilities apply in respect of different classes, these are excluded from the initial calculation of the Net Asset Value of each Fund and applied separately to the Net Asset Value allocated to the relevant class. The portion of the Net Asset Value of each Fund attributable to each class is then converted into the relevant currency of denomination of the class at prevailing exchange rates applied by the Administrator and then divided by the number of shares of the relevant class outstanding in order to calculate the Net Asset Value per share of the relevant class.

Issue and Repurchase of Shares

Subscriptions and redemptions can only take place on a dealing day. Dealing day means every business day or such other day or days as may be determined by the Directors and notified in advance to Shareholders provided that there shall be at least two dealing days in each month.

Published Information

Details of the most recent price of Shares in the Funds can be obtained from the Administrator.

The above details are in summary form only and must be read in conjunction with the detailed information contained in the Prospectus and relevant supplements of the Funds.

Notes to the Financial Statements**For the Six Months Ended 31 October 2025****1. Significant Accounting Policies****a) Basis of Preparation**

This Condensed Interim Report and Unaudited Financial Statements has been prepared in accordance with the Financial Reporting Standard 104 “Interim Financial Reporting” (“FRS 104”). The Condensed Interim Report and Unaudited Financial Statements should be read in conjunction with the Annual Financial Statements for the year ended 30 April 2025, which have been prepared in accordance with Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (“FRS 102”). The accounting policies and methods of computation followed in the most recent Annual Financial Statements have been used in the preparation of these Interim Financial Statements.

The format and certain wordings of the Financial Statements have been adapted from those contained in the Companies Act 2014 and FRS 104 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company’s business as an investment fund.

b) Cashflow

The Company meets all the conditions set out in FRS 102, section 7, and consequently has availed of the exemption available for the Funds not to prepare a Statement of Cash Flows.

c) Functional Currency and Foreign Exchange

At 31 October 2025, the functional and presentation currency of all Funds and the Company is Euro. The functional/presentation currency of the Company is Euro because the Directors have determined that this reflects the Company’s primary economic environment, as all of the Company’s Net Assets Attributable to Holders of Redeemable Participating Shares are denominated in Euro.

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in fair value. Net currency gains/(losses) are net foreign exchange gains and losses on monetary financial assets and liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies have been translated at the rate of exchange ruling at period end. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the period.

4. Fair Value Measurement

FRS 102 requires the Company to classify financial instruments measured at fair value into the following hierarchy:

1) Instruments fair valued using a quoted price for an identical asset or liability in an active market. Quoted in an active market in this context means quoted prices are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis.

2) Instruments for which a quoted price is unavailable and which have been fair valued using the price of a recent transaction for an identical asset or liability provided there has not been a significant change in economic circumstances or a significant lapse of time since the transaction took place.

3) Instruments for which fair value has been estimated using a valuation technique.

The following tables summarise the inputs used to value the Funds' investments measured at fair value as at 31 October 2025.
