Notes to the Financial Statements

1. General

The Company is an open-ended investment company and was incorporated in Luxembourg as a SICAV on 15 June 1990. The Company is a SICAV under part I of the Luxembourg Law of 17 December 2010, as amended, relating to undertakings for collective investment, which implements Directive 2014/91/EU ("UCITS V Directive") and Directive 2024/927/EU ("UCITS VI Directive") effective from 16 April 2026.

FIMLUX is the Management Company of the Company, with the day-to-day responsibility for the administration, investment management and marketing/distribution functions of the Company.

As at 30 April 2026, the Company consisted of 122 active sub-funds. The Directors may from time to time close sub-funds as well as launch further sub-funds with different investment objectives, subject to the approval of the CSSF.

The following sub-funds were launched during the year:

Sub-fund name	Date of launch
Global Founders Fund	16/04/2026
Global Smaller Companies Fund	23/04/2026

The following classes of Shares were launched during the year:

Sub-fund name	Class of Shares	Date of launch

Investments in Indian securities within India Focus Fund were previously made partly via a wholly-owned Mauritian subsidiary, FIL Investments (Mauritius) Limited (the "Subsidiary"), formerly known as Fid Funds (Mauritius) Limited. The sole purpose of the Subsidiary was to carry out investment activities on behalf of the Company. FIL Investment Management (Singapore) Limited ("FIMSL") provided investment advisory and management services to the Subsidiary. FIMSL had obtained approval from the Securities and Exchange Board of India and the Reserve Bank of India to invest in India on its own behalf and on behalf of approved client accounts as a Foreign Portfolio Investor under Indian law. The Subsidiary was registered as a Foreign Portfolio Investor sub-account under FIMSL's licence and had been granted approval to invest in Indian securities. During the year, the Subsidiary disposed of all of its Indian securities and commenced a winding-up process. As at the reporting date, the Subsidiary no longer holds any investments in Indian securities. Any remaining assets and liabilities of the Subsidiary are consolidated in the Statement of Net Assets.

On 19 May 2025, Japan Value Fund - A-JPY share class merged into Japan Value Fund - A2-JPY share class. For more details please refer to the announcement released on 17 April 2025 and available on https://www.fidelity.lu/funds/fund-updates.

On 3 November 2025, Multi Asset Income ESG Fund was renamed to Global Multiple Opportunities Fund and changed its base currency from USD to EUR. Following this change of base currency, the below classes of Shares were renamed:

- A-QINCOME (G) Shares (EUR) was renamed to A Shares (EUR);

- E-ACC Shares (EUR) (EUR/USD hedged) was renamed to E-ACC Shares (EUR);

- REST I-ACC Shares (EUR) (EUR/USD hedged) was renamed to REST I-ACC Shares (EUR);

- A-ACC Shares (EUR) (EUR/USD hedged) was renamed to A-ACC Shares (EUR).

On 13 April 2026, the following sub-funds were renamed:

- Sustainable US Equity Fund to Global Value Fund;

- Global Equity Income Fund to Global Defensive Equity Fund;

- American Growth Fund to US Equity Fund;

- Future Connectivity Fund to Technology Opportunities Fund.

2. Significant Accounting Policies

The financial statements are prepared in accordance with generally accepted accounting principles in Luxembourg relating to undertakings for collective investment.

Calculation of the Net Asset Value. The Net Asset Value per share of each class of shares, is calculated by determining first the proportion of the net assets of the relevant sub-fund attributable to each class of shares. Each such amount will be divided by the number of shares of the relevant class outstanding as at close of business. The Net Asset Value of each class is determined in the principal dealing currency of the respective class.

Security Valuation. Investments in financial instruments traded on any stock exchange are valued at the last available price at the time when the valuation is carried out on the principal stock exchange on which such security is traded. Financial instruments dealt on any Over-the-Counter ("OTC") market, short-dated debt transferable securities and money market instruments not traded on a regulated exchange or market are valued at the last available price at the time when the valuation is carried out. For Cash Funds, Money Market Instruments are valued at Mark-to-Market or Mark-to-Model where the use of mark-to-market is not possible or the market data is not of sufficient quality. All other assets are valued with prudence and in good faith by the Directors of the Company on the basis of their reasonably foreseeable sales price. All holdings owned by the Company are quoted on a regulated market, except where otherwise distinguished in a sub-fund's Schedule of Investments.

Notes to the Financial Statements - continued

Swing Pricing Policy. A swing pricing policy has been adopted and implemented to protect the interests of the Company's shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Company will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Board may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. As at 30 April 2026, price adjustments were made on the following sub-funds:

Sub-fund name	Class of Shares	Unswung NAV per Share	Swung NAV per Share
Absolute Return Global Equity Fund	A-ACC Shares (USD)	11.69	11.72

Fair Value Adjustments Policy. Fair value adjustments may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly if a sub-fund invests in markets that are closed for business at the time the sub-fund is valued, the Directors may, by derogation from the provisions above under security valuation, allow for the financial instruments included in a particular portfolio to be adjusted to reflect more accurately the fair value of the sub-fund's investments at the point of valuation.

Bank Deposits and Cash at Banks and Brokers. All bank deposits and cash at bank and brokers amounts are carried at face value.

Investment Security Transactions. Investment security transactions are accounted for on the date securities are purchased or sold. The computation of the cost of sales of securities is made on the basis of average cost.

Futures. Futures are accounted for on the date of opening or closing of the contract. Subsequent payments are made or received by the sub-fund each day, dependent on the daily fluctuations in the value of the underlying index or security which are recorded for financial reporting purposes as unrealised gains or losses by the sub-fund. The unrealised gains or losses resulting from futures are included in the Statement of Net Assets and in the Schedule of Investments. The realised gains and losses are based on the First In – First Out method. All gains and losses on futures are disclosed in the Statement of Operations and Changes in Net Assets.

Forward Foreign Exchange Contracts. Forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from forward foreign exchange contracts are included in the Statement of Net Assets and in the Schedule of Investments. All forwards, including those used for the hedging of share classes, are included in the Schedule of Investments. All realised gains and losses on forwards are disclosed in the Statement of Operations and Changes in Net Assets.

Option Contracts. Options purchased are recorded as investments at their realisable market value; options written or sold are recorded as liabilities based on the cost to close the position. Purchased and written options are included in the Statement of Net Assets and in the Schedule of Investments. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased. All gains and losses on options are disclosed in the Statement of Operations and Changes in Net Assets.

Interest Rate , Inflation & Overnight Index. Interest receivable and payable on interest rate, inflation, overnight index and total return swap contracts is accrued on a daily basis, and future commitments under the swap are valued at market rates. Interest rate, inflation contracts are disclosed in the Statement of Net Assets and in the Schedule of Investments. All gains and losses in the value of interest rate, inflation, overnight index and total return swaps are disclosed in the Statement of Operations and Changes in Net Assets. Income receivable/payable on interest rate, inflation swaps is included in income or expenses on an accruals basis and is reflected in the Statement of Operations and Changes in Net Assets as Interest

received/paid on swaps.

Credit Default Swaps. Premiums paid and received on credit default swap contracts to buy or sell protection against a credit event are accrued on a daily basis and reflected as net income. Future commitments under the swap are valued at market rates. Credit default swap contracts are disclosed in the Statement of Net Assets and the Schedule of Investments. All gains and losses in the value of credit default swaps are disclosed in the Statement of Operations and Changes in Net Assets.

Contracts for Difference. Contracts for difference are contracts entered into between a broker and the Company under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place. Dividends received or paid on contracts for difference are disclosed net in the Statement of Operations and Changes in Net Assets under the caption Derivative Income or Derivative Expenses. When a contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The valuation of contracts for difference is based on the underlying security and they are disclosed in the Statement of Net Assets and the Schedule of Investments. The finance costs paid to the broker for holding the underlying security are included under the caption Finance costs on contracts for difference in the Statement of Operations and Changes in Net Assets. All gains and losses on contracts for difference are disclosed in the Statement of Operations and Changes in Net Assets.

Equity Linked Notes. Equity Linked Notes are valued daily based on the price of the underlying security and are disclosed in the Statement of Net Assets and the Schedule of Investments at market value. The intermediate coupon(s) and final payment at maturity are determined by the change in value of the underlying security. The interest income or "out performance" earned and any gains or losses are disclosed in Statement of Operations and Changes in Net Assets.

Foreign Exchange. The Directors determine the designated currency of each sub-fund. Assets and liabilities as at 30 April 2026 have been translated at the prevailing exchange rates on that date. All transactions denominated in foreign currencies during the year are translated into the subfund's designated currency at the exchange rate prevailing on the day of transaction.

Bonds in Escrow. Bonds included in the Schedule of Investments can be used as collateral against open derivative exposures. Where this is the case, bonds will be escrowed to prevent them from being traded. The following table discloses the bond's quantities in escrow per sub-fund:

Sub-fund name	Security description	Denominated quantity in escrow
Absolute Return Global Fixed Income Fund	US Treasury Bill 3.603% 04/06/2026	386,000
Euro Bond Fund	Germany 2.50% 15/02/2035	18,725,300

Strategic Bond Fund	US Treasury 2.375% 15/11/2049	4,987,000
US Dollar Bond Fund	US Treasury 4.00% 31/07/2029	1,299,000

Fund share Transactions. The issue and redemption price per share of each sub-fund is the Net Asset Value per share on the date of trade, subject to the price adjustment policy.

Formation Costs. All formation costs related to the launch of the Company have been amortised. Costs incurred in launching new sub-funds will be charged to current operating expenses.

Income. Dividends on equities are recognised when the security is quoted ex-dividend. Interest is accounted for on an accruals basis.

Zero Coupon Disclosure. Zero coupon bonds and zero coupon money market instruments are disclosed in the Schedule of Investments at a rate reflecting the actual return.

Combined Accounts. The combined financial statements have been presented in USD which is the Company's designated currency and represent the total financial statements of the different sub-funds. Sub-funds stated in currencies other than USD have been converted at exchange rates ruling at the year-end.

3. Co-Management of Assets

For the purpose of effective management, where the investment policies of the sub-funds so permit, the Board of Directors may choose to co-manage assets of certain sub-funds within the Fidelity Funds range. In such cases, assets of different sub-funds will be managed in common. Fractions may result from the co-management technique. The value of these fractions is based on the market value of the underlying financial instruments in the portfolio of the co-managed sub-funds at the end of the year and is included in the total market value of the portfolio. Considering the insignificance of these amounts, they have been included as "Fractions" in the Schedule of Investments.

Notes to the Financial Statements - continued

4. Investment Management Fees and Other Transactions with the Investment Manager or its Affiliates

Pursuant to the Investment Management Agreement amended and restated on 9 July 2020, FFML is entitled to a monthly investment management fee and asset allocation fee, accrued daily and based on the average Total Net Assets of each sub-fund, at annual rates disclosed in the table below:

During the year ended 30 April 2026, the sub-funds invested in the following fund shares: Fidelity ILF - The Sterling Fund - A-ACC-GBP, Fidelity ILF - The US Dollar Fund - A-ACC-USD and Fidelity ILF - The Euro Fund - A-ACC-EUR, all of which have their management fees capped at 0.25% per annum.

Performance Fees

The Investment Manager is entitled to receive an annual performance fee, which is calculated in relation to the net assets of classes of Shares of funds that have cash indices as Market Indices, and which is subject to a high water mark adjusted for the return of the relevant Market Index. The use of a High Water Mark is appropriate in a performance fee methodology for a class of Shares of a fund that seeks to achieve an absolute return annually. The use of a High Water Mark seeks to ensure that investors will not be charged a performance fee until any previous losses are recovered. There is no mechanism to lower the High Water Mark.

The basis for calculation of performance fees is fully explained in the Prospectus that all investors should read before investing. The relevant performance fee rates, hurdle rates and comparative indices for each sub-fund are as follows:

Sub-fund name	Performance fee	Hurdle rate	Comparative Index
Absolute Return Global Equity Fund	15%	N/A	Secured Overnight Financing Rate
Absolute Return Multi Strategy Fund	10%	N/A	Secured Overnight Financing Rate

During the year ended 30 April 2026, USD 137,586 performance fees were paid by the sub-fund Absolute Return Global Equity Fund.

The following table discloses the performances fees for each share class for the year:

Sub-fund name	Class of Shares	Class Currency	Performance Fees	% of AUM
Absolute Return Global Equity Fund	A-PF-ACC Shares (USD)	USD	11,587	0.02
Absolute Return Global Equity Fund	A-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	43	0.00
Absolute Return Global Equity Fund	I-PF-ACC Shares (USD)	USD	10	0.00
Absolute Return Global Equity Fund	I-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	16,673	0.01
Absolute Return Global Equity Fund	W-PF-ACC Shares (GBP) (GBP/USD hedged)	GBP	1,583	0.01
Absolute Return Global Equity Fund	Y-PF-ACC Shares (USD)	USD	43,651	0.1
Absolute Return Global Equity Fund	Y-PF-ACC Shares (CHF) (CHF/USD hedged)	CHF	41	0.00
Absolute Return Global Equity Fund	Y-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	51,606	0.03

The aforementioned percentages of Assets Under Management ("AUM") are determined based on the share class AUM as of the end of the year.

Performance fees presented include the impact of mechanisms such as subscription mitigation and crystallisation on redemption as described in the prospectus. These mechanisms may lead to inconsistencies in the performance fee effect observed across individual share classes.

During the year ended 30 April 2026, none of the Class of Shares of Absolute Return Multi Strategy Fund paid performance fees.

Others

Classes B and C Shares are subject to an annual distribution fee of up to 1.00% of the Net Asset Value of the relevant class. Class D shares are subject to an annual distribution fee of up to 0.50% of the Net Asset Value of the relevant class. Class E shares are subject to an annual distribution fee of up to 0.75% of the Net Asset Value of the relevant class. These fees are accrued daily and payable quarterly to FIL Distributors ("FID"). The Reserved Funds' classes of shares may only be acquired by investors who are either Undertakings for Collective Investment or investors whose assets are held in accounts managed by FIL or its affiliates. Expenses and charges, excluding investment management fees, administration expenses, government taxes and custodian fees for such classes of shares, will be charged to, and paid directly by, FIL and its affiliates. The investment management fees, administration expenses, government taxes and custodian fees for such classes of shares are charged to the sub-funds but are reimbursed in full by FIL and its affiliates.

FIL and its affiliates may waive any or all of their fees and limit the maximum level of expenses (with certain exceptions) that the sub-funds would be paying. These waivers are voluntary, may be revised at any time and are disclosed under the caption Fees waived in the Statement of Operations and Changes in Net Assets. In addition, FFML may from time to time bear certain expenses of the subfunds, on a discretionary basis, these reimbursements are disclosed under the caption Expense reimbursement in the Statement of Operations and Changes in Net Assets. Certain officers and directors of the Company are also directors, officers or employees of FIL or its affiliates.

FID is a wholly-owned subsidiary of FIL. In performing its activities as General Distributor of the Company, FID is entitled to receive a sales commission on sales of shares in the Company. For the year ended 30 April 2026, FID retained a total of USD 151,954 in sales commissions, the remainder is paid to intermediaries involved in distributing shares.

Notes to the Financial Statements - continued

5. Directors' Fees

Each Director is entitled to an annual fee of EUR 50,000. The Chair is entitled to an annual fee of EUR 100,000. There is an additional attendance fee of EUR 5,000 for each meeting attended. Directors who are employed by FIL or any of its subsidiaries have waived their fees for the year ended 30 April 2026. The total fees earned by the Directors in respect of services rendered for the year ended 30 April 2026 was USD 559,937.

6. Securities Lending

As at 30 April 2026, the Company lent securities having a value of USD 730,494,652 and received collateral with a market value of USD 765,156,011. During the year ended 30 April 2026, the Company paid USD 1,676,055 to the securities lending agents in relation to the securities lent. With respect to securities lending transactions, the Company will generally require the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 102% of the total value of the securities lent. The following table discloses the breakdown of the total value of securities on loan, by sub-fund, as at 30 April 2026:

Sub-fund name	Currency	Maturity Tenor	Securities Values	% of Lendable Assets	% of AUM

Income from securities lending of USD 14,164,133 is included in the net dividend and interest income balance within the Statement of Operations and Changes in Net Assets.

Brown Brothers Harriman (BBH) has stopped their agent lender services on 31 August 2025, and Fidelity Agency Lending (FAL) has become the agent lender effective from 01 September 2025 for equity lending. FAL and Citibank act as agent lenders for the Company for equity and fixed income lending, respectively. The allocation of income from the equity and fixed income lending as at 30 April 2026 is as follows:

Equity securities lending programme

The relevant sub-funds retain 90% of income and FAL retains 10%.

Fixed income securities lending programme

The relevant sub-funds retain 87.5% of income and Citibank retains 12.5%.

The analysis of income on securities lending for the year was as follows:

Sub-fund name	Currency	Gross Income	Operational Cost	Net Income

Notes to the Financial Statements - continued

7. Taxation

The Company is not liable to any Luxembourg taxes on income or on realised or unrealised capital gains, nor to any Luxembourg withholding tax. The sub-funds are subject to an annual subscription tax of 0.05% on Equity, Equity Income, Asset Allocation, Multi Asset, Bond, Fidelity Lifestyle Funds and Institutional Reserved Funds Class Y Shares, 0.01% on Cash, Reserved, Class P, R, X and I Shares, and 0.00% on Index tracker Funds, calculated and payable quarterly on the Net Assets of the sub-fund on the last day of each calendar quarter.

Foreign capital gains, dividends and interest may be subject to capital gain and withholding taxes or other taxes imposed by the country of origin concerned and such taxes may not be recoverable by the Company or its Shareholders. Where there is a reasonable likelihood that a liability will crystallise, the tax payable on the unrealised gain is provided for in the NAV.

8. Transaction Fees

Transaction fees are fees paid to brokers when buying and selling equities, CFD's, futures, options and exchange traded funds. Transaction fees are generally included in the costs of investments that are part of the realised and unrealised gain/(loss) in the Statement of Operations and Changes in Net Assets. A portion of the transaction fees are included in the custody fees in the Statement of Operations and Changes in Net Assets. Transactions fees on Bonds and Swaps are not disclosed as they are included in the spread.

For the year ended 30 April 2026, these transaction fees amount to:

9. Equalisation

Income equalisation arrangements are applied to all share classes (accumulating and distributing), across all sub-funds. For distributing shares, these arrangements are intended to ensure that the income per share which is distributed in respect of a distribution period is not affected by changes in the number of shares in issue during that period. The calculation of equalisation is based on net investment income. All equalisation amounts are disclosed in the Statement of Operations and Changes in Net Assets.

10. Dividend Payments

The following dividend payments were made during the year ended 30 April 2026:

Sub-fund name	Div per Share	Ex-div date

18. Claims for Discriminatory Withholding Taxes within the European Union

Investment funds are generally subject to local withholding taxes on receipt of cross-border payments of dividends throughout Europe. However, European Court of Justice and European Free Trade Association Court decisions support a tax discrimination claim where EU or European Economic Area ("EEA") countries impose such withholding taxes on cross-border payments at rates higher than the withholding tax imposed on dividends paid in similar situations to resident investors.

The Board of the Company has therefore authorised the filing of protective claims, based on the EU principle of the freedom of movement of capital within the EU & EEA, against countries where it is believed that withholding taxes may have been unlawfully imposed by individual EU or EEA States on dividend payments to the Company. The Board's decision has been taken exclusively to protect the position of investors in the Company.

The nature of these claims is complex and subject to each jurisdiction's local statute of limitations and procedural requirements. Consequently, these claims may be subject to lengthy litigation, and at the current time there is no certainty whether all the protective claims will ultimately be successful and whether or how much withholding tax will ultimately be recovered in each of the jurisdictions. The Withholding tax reclaims receivable are included in the Dividend and interest receivable in the Statements of Net Assets.

19. Statement of Changes in Investments

A list for each sub-fund, specifying for each investment the total purchases and sales which occurred during the year under review, may be obtained free of charge from the Registered Office of the Company or from any of the companies registered as Distributors of the Company. It is possible to receive information about the full holdings of the sub-funds in which you invest, at any point in time during the year. This is available upon request, by contacting your usual Fidelity Representative.

20. Rates of Exchange

The USD exchange rates as at 30 April 2026 are noted below. For the Chinese Renminbi currency, please note that the offshore rate is applied. RMB is a colloquial reference to the Chinese Renminbi, which is also know internationally as the Chinese Yuan ('CNY'). Whilst the CNY is traded both onshore in China and offshore (primarily in Hong Kong), it is the same currency although currently traded at different rates. The offshore rate for trading CNY is generally referred to as 'CNH'. The CNH rate will be used when determining the value of the Shares of a fund as well as for hedging purposes and should be read as the base currency of China RMB Bond Fund in the whole report.

Currency	Exchange rate	Currency	Exchange rate
Australian dollar (AUD)	1.391885	Brazilian real (BRL)	4.9799

Notes to the Financial Statements - continued

US Dollar Bond Fund	I-ACC Shares (EUR)	04/06/2026

Notes to the Financial Statements - continued

On 11 May 2026, the sub-fund European Larger Companies Fund has been renamed to European Value Fund.

On 18 May 2026, the sub-fund Flexible Bond Fund has been renamed to Euro Ultra Short Duration Bond Fund and its base currency changes from GBP to EUR.
Following this change, the below classes of Shares were renamed:

- A Shares (GBP) to A Shares (GBP) (GBP/EUR hedged);
- A-ACC Shares (GBP) to A-ACC Shares (GBP) (GBP/EUR hedged);
- Y-ACC Shares (GBP) to Y-ACC Shares (GBP) (GBP/EUR hedged);
- Y Shares (GBP) to Y Shares (GBP) (GBP/EUR hedged);
- A Shares (EUR) (EUR/GBP hedged) to A Shares (EUR);
- Y Shares (EUR) (EUR/GBP hedged) to Y Shares (EUR);
- Y Shares (USD) (USD/GBP hedged) to Y Shares (USD) (USD/EUR hedged);
- E-ACC Shares (EUR) (EUR/GBP hedged) to E-ACC Shares (EUR);
- E-MDIST Shares (EUR) (EUR/GBP hedged) to E-MDIST Shares (EUR).

On 20 May 2026, the below share class mergers occurred in the sub-fund Euro Ultra Short Duration Bond Fund:

- A-ACC Shares (EUR) (EUR/GBP hedged) merged into A-ACC Shares (EUR);
- Y-ACC Shares (EUR) (EUR/GBP hedged) merged into Y-ACC Shares (EUR).

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the financial statements of Fidelity Funds (the "Company") and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at 30 April 2026 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at 30 April 2026, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial statements" section of our report. We are also independent of the Company in accordance with the Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the réviseur d'entreprises agréé thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the réviseur d'entreprises agréé that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of the Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the réviseur d'entreprises agréé to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the réviseur d'entreprises agréé. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, Cabinet de révision agréé

Laurent Fedrigo, Réviseur d'entreprises agréé
Partner

Luxembourg, 30 July 2026

Unaudited Supplementary Information

Global Market Risk Exposure

The Board of Directors of the Company has decided to adopt the commitment approach to determine the global market risk exposure for the Company, except for the below mentioned sub-funds:

The global market risk exposure information for the year ended 30 April 2026 is as follows:

Sub-Fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit	Lowest utilisation of VaR limit	Highest utilisation of VaR limit	Average utilisation of VaR limit	Average level of leverage reached during the year
Global Multi Asset Defensive Fund	Absolute VaR	Monte Carlo Simulation	N/A	8%	20.58%	56.89%	28.87%	233.20%
Multi Asset Dynamic Inflation Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	16.84%	58.39%	33.03%	589.30%
Emerging Market Total Return Debt Fund	Relative VaR	Monte Carlo Simulation	50% JP Morgan GBI-EM Global Diversified Composite 25% JP Morgan CEMBI Broad Diversified 25% JP Morgan EMBI Global	150%	61.15%	100.79%	86.50%	190.70%
Flexible Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	10.13%	35.64%	22.91%	443.70%
Strategic Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	8.74%	34.02%	20.51%	342.50%
Absolute Return Global Equity Fund	Absolute VaR	Monte Carlo Simulation	N/A	9.5%	31.16%	42.91%	35.98%	191.40%
Absolute Return Global Fixed Income Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	5.61%	24.85%	10.99%	427.00%
Absolute Return Multi Strategy Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	6.65%	45.08%	16.23%	430.9%

For the above mentioned sub-funds, the global exposure is calculated and monitored daily by using the Value at Risk (VaR) calculation methodology. Monte Carlo Simulation: 5000 Simulations, 99% Confidence, 20 days holding period.

EU Securities Financing Transactions Regulation

The Securities Financing Transaction Regulations (SFTR), which came into effect on the 13 January 2017, requires further transparency regarding the use of securities financing transactions.

The Company may use total return swaps or other financial derivative instruments with similar characteristics to meet the investment objective of the Company.

The Company used contracts for difference (CFD), total return swap (TRS) and securities lending for the year ended 30 April 2026.

The top 10 counterparties are disclosed in note 6 for the securities lending and in note 17 for CFD.

As at 30 April 2026, there are only collateral received from collateral issuers (governments and international institutions) for securities lending as shown in note 6.

Assets engaged in securities financing transactions as at 30 April 2026

The assets engaged, expressed in absolute value and as a proportion of the net assets, by category of securities financing transactions as at 30 April 2026 amounted to:

The assets engaged in securities lending are disclosed in note 6.

Shareholders Rights Directive II

On 20 August 2019, the Grand Ducal Law of 1 August 2019 amended the Law of 24 May 2011 on the exercise of certain shareholder rights. This law transposes, for Luxembourg, the Directive (EU) 2017/828 (the Shareholders' Rights Directive II). It entered into force on 24 August 2019.

The information on the Portfolio turnover ratio (PTR) and the Portfolio turnover cost (PTC) are disclosed in the fund factsheet except for the sub-fund below. SRDII does not define a methodology for these values; ours is as follows: PTR = (purchases of securities + sales of securities) minus (subscriptions of units + redemptions of units), divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. PTC = PTR (capped at 100%) x transaction cost, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.

Unaudited Supplementary Information - continued

The risks factors are available in the section Risk Descriptions of the prospectus.

Sub-fund name	Status period	PTR %	PTC %
Greater China Fund II	01/05/25 - 30/04/26	77.71	0.13

For French residents only

For the year under review, the following sub-funds have invested in securities eligible to PEA (*Plan d'Épargne en Actions*), a French tax wrapping in accordance with article L 221-31 of the French monetary and financial code.

Sub-fund name	% of Net Assets
Germany Fund	97.39
Iberia Fund	97.31
Sustainable Eurozone Equity Fund	95.61
Italy Fund	93.56
Nordic Fund	92.10

For Hong Kong residents only

The Manager and/or the Investment Manager may enter into trades for the account of a Sub-Fund with: (i) the accounts of other clients managed by the Manager, the Investment Manager or its affiliates; or (ii) their house accounts (i.e., accounts owned by the Manager, the Investment Manager or any of its connected persons over which it can exercise control and influence) ("cross-trades"). Such cross-trades will only be undertaken in accordance with the relevant requirements promulgated by the relevant authorities. During the year ended 30 April 2026, the Company did not enter into any cross trade.

For UK residents only

The affairs of the Company have been conducted to ensure as far as possible that United Kingdom Reporting Fund Status will be granted for the period of these accounts with respect to the sub-funds and Share classes that are registered in the United Kingdom. With respect to UK registered sub-funds and Share classes in existence prior to the introduction of the new regime the Company has applied to the UK Inland Revenue to transition into the new regime and the UK authorities have given notice that they accept this entry. Moreover, the Company has submitted an application for the reporting funds regime for UK registered sub-funds launched during the accounting year ending 30 April 2026. It also submitted or will submit an application for new Share classes in existing or new UK registered sub-funds launched during the accounting period. Reportable income figures are generally available six months after the year end date. The distributing sub-funds and Share classes of the Company that were registered in the UK at the time have also been certified as "distributing funds" by the UK Inland Revenue authorities under the predecessor regime for all accounting periods up to 30 April 2010.

Taxonomy

Where a sub-fund is not identified as subject to the disclosure requirements of article 8 or article 9 of the EU Sustainable Finance Disclosure Regulation, the sub-fund is subject to Article 7 of the EU Taxonomy Regulation (EU) 2020/852 and the investments underlying such sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Remuneration

Remuneration Disclosure

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL. The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Company, the Articles of Association or Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at https://www.fidelityinternational.com.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in December 2025 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Unaudited Supplementary Information - continued

Total Remuneration paid to staff of the Management Company and to its delegates for the past financial year	EUR 10,418,422
Of which, fixed remuneration	EUR 8,665,238
Of which, variable remuneration	EUR 1,753,184
Total number of employees of the Management Company and its delegates (as at 31/12/2025)	100
Portion of remuneration that is attributable to the Fund (as at 31/12/2025)	76.07%

Sustainable Finance Disclosure Regulation (Unaudited)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - ALL CHINA EQUITY ESG FUND

Legal entity identifier: 254900EMLMON5USOI521

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund was closed during the reference period covered by this report. During the closing process, the sustainability-related commitments, as set out in the Fund's pre-contractual documentation, might not have been fully met.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the

How did the sustainability indicators perform?

environmental or social characteristics promoted by the financial product are attained.

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 0.0 vs. 6.29

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 0.00%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 0.00%

v) the percentage of the Fund invested in sustainable investments with a social objective: 0.00%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings	6.76 vs.6.53
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	38.65%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	29.16%
% invested in sustainable investments with a social objective	9.49%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The

investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

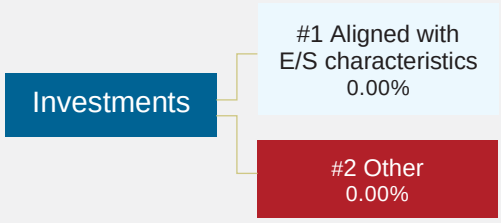
What were the top investments of this financial product?

As the fund was closed on 18 August 2025, no underlying holdings exist as at the reference date.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2025-08-18

What was the proportion of sustainability-related investments?

The Fund invested 0.00% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 0.00%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating . This included 0.00% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 0.00% have an environmental objective (which is not aligned with the EU Taxonomy) and 0.00% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

As the fund was closed on 18 August 2025, no underlying holdings exist as at the reference date.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

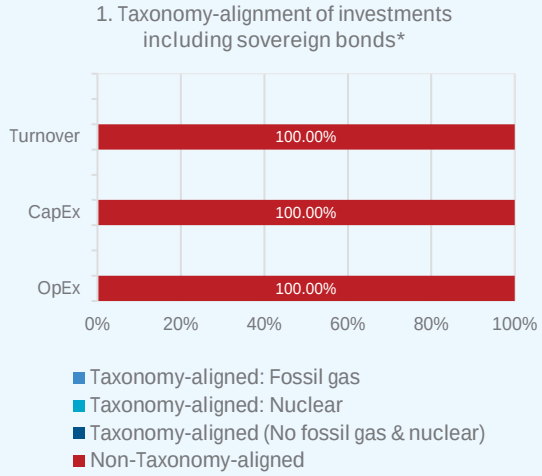
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

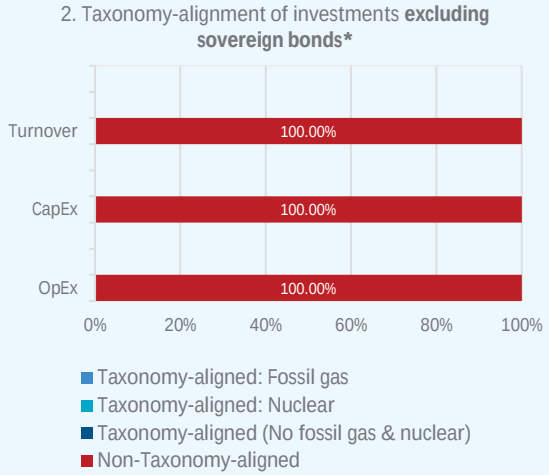
low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.05% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0.00%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0.00%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark, after excluding 20% of assets with the lowest ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - AMERICA FUND

Legal entity identifier: 549300V54PMROCISWF43

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.65% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.17 vs. 6.82

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 51.65%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.03%

v) the percentage of the Fund invested in sustainable investments with a social objective: 18.55%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.12 vs.6.73
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	47.97%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	25.42%
% invested in sustainable investments with a social objective	22.49%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.65% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

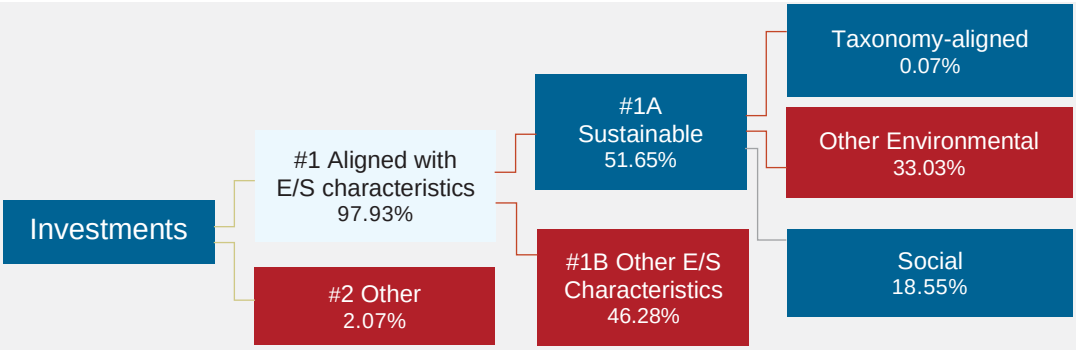
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 51.65% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.93%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 51.65% in sustainable investments of which 0.07% have an environmental objective (which is aligned with the EU Taxonomy) and 33.03% have an environmental objective (which is not aligned with the EU Taxonomy) and 18.55% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.07%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

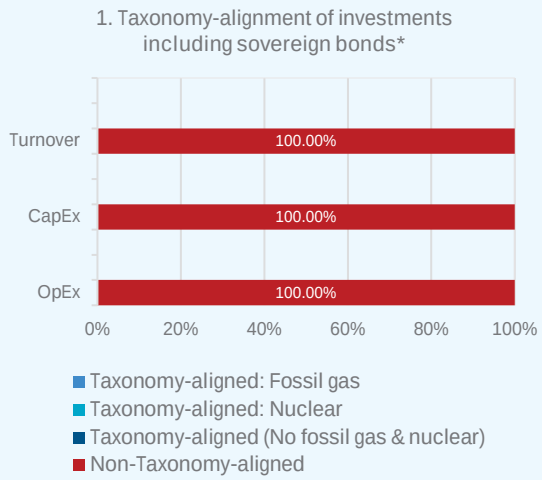
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

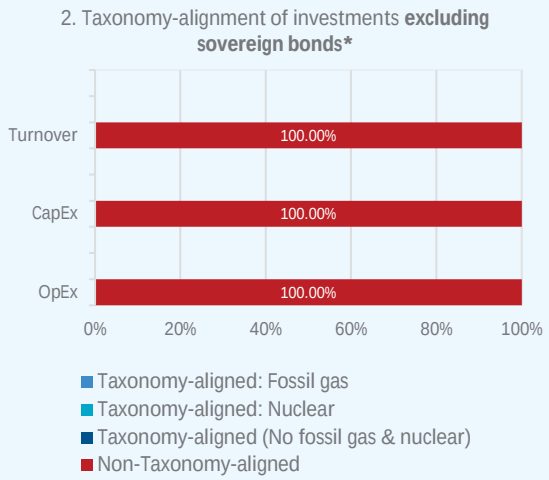
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.38 vs. 7.2

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 24.80%

iv) the percentage of the Fund invested in sustainable investments with a social objective: 16.43%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.09 vs.6.7
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	29.96%
% invested in sustainable investments with a social objective	25.57%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 24.80% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and

education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

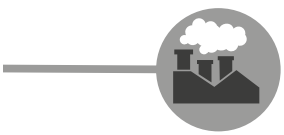
Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water

management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
DBS GROUP HOLDINGS	FINANCIALS	10.06 %	SINGAPORE
SEA ADR	CONSUMER DISCRETIONARY	7.43 %	SINGAPORE

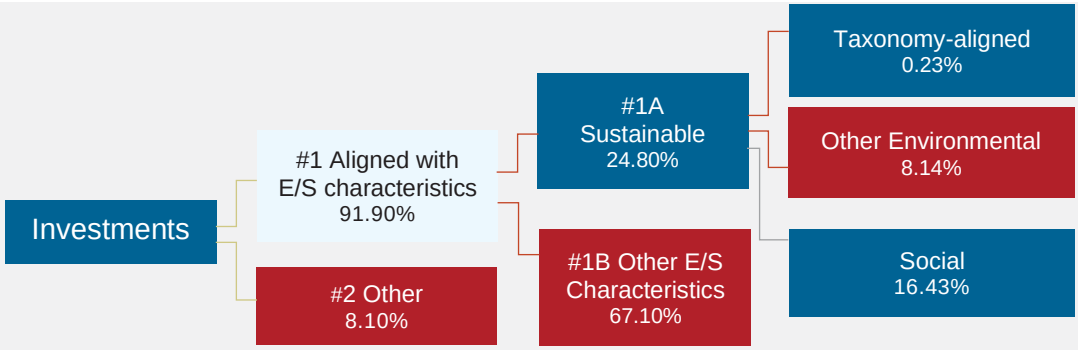
INTERNATIONAL CONTAINER TERMINL SRV	INDUSTRIALS	2.25 %	PHILIPPINES

Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 24.80% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 91.90%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 24.80% in sustainable investments of which 0.23% have an environmental objective (which is aligned with the EU Taxonomy) and 8.14% have an environmental objective (which is not aligned with the EU Taxonomy) and 16.43% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.23%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

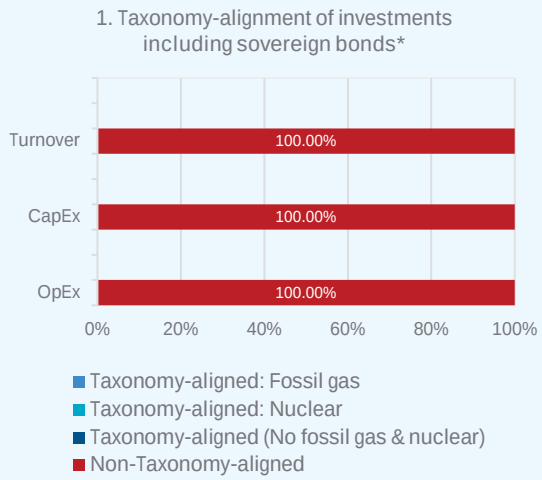
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

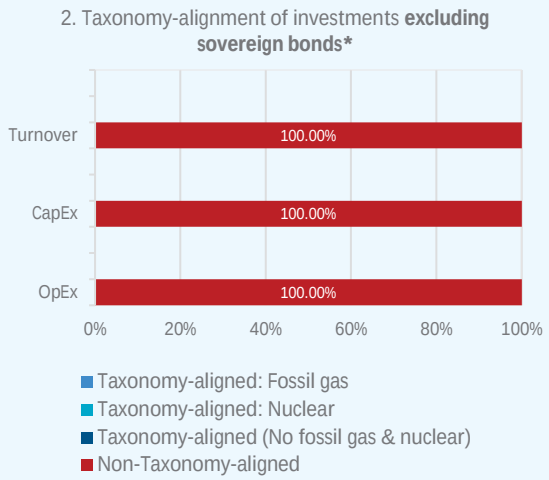
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

This graph represents 99.66% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.04%	0.04%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8.14%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 16.43%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - ASIA EQUITY ESG FUND

Legal entity identifier: 549300XNOLBE172DCX03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.08% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure, assessed the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe was reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 93.88%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 57.08%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 34.54%

v) the percentage of the Fund invested in sustainable investments with a social objective: 22.54%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund invested in securities of issuers with high ESG rating	91.53%
% of Fund invested in securities with exposure to Exclusions	0.00%
% of Fund invested in sustainable investments	57.80%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	27.55%
% invested in sustainable investments with a social objective	30.25%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 57.08% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

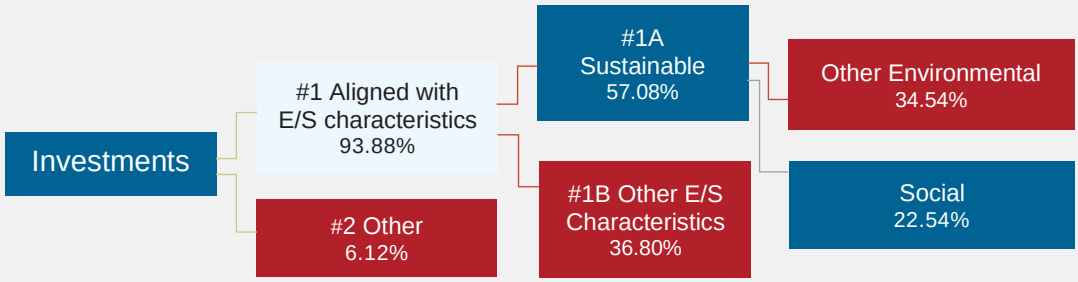
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 57.08% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.88%, which corresponds to the proportion of Fund invested in securities with high ESG ratings. This included 57.08% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy),34.54% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.54% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

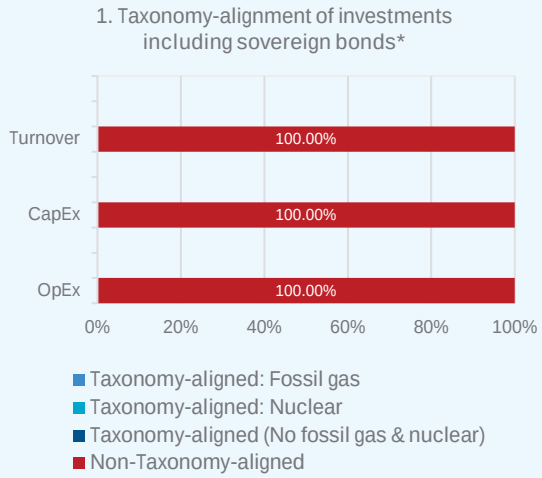
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

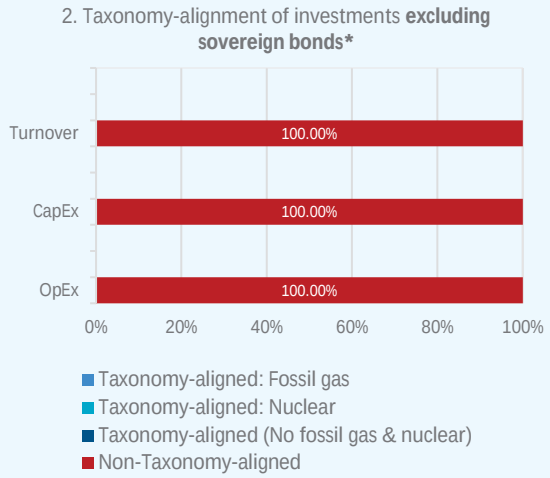
☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*

☒ *No*



Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.54%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 22.54%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - ASIA EQUITY II ESG FUND

Legal entity identifier: 5493000YTYJ3T5Q1KB02

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.53% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 94.19%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 56.53%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 34.33%

v) the percentage of the Fund invested in sustainable investments with a social objective: 22.20%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund invested in securities of issuers with high ESG rating	91.57%
% of Fund invested in securities with exposure to Exclusions	0.00%
% of Fund invested in sustainable investments	57.70%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	27.50%
% invested in sustainable investments with a social objective	30.20%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.53% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and

education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

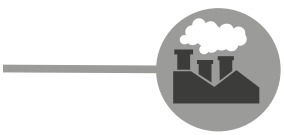
Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water

management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

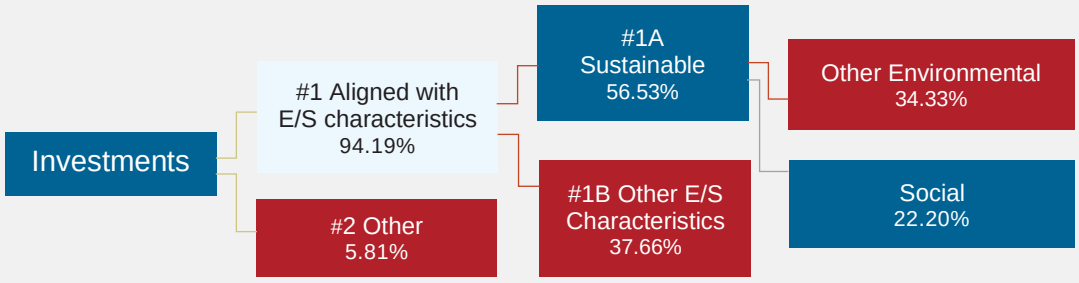
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 56.53% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 94.19%, which corresponds to the proportion of Fund invested in securities with high ESG ratings. This included 56.53% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy),34.33% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.20% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

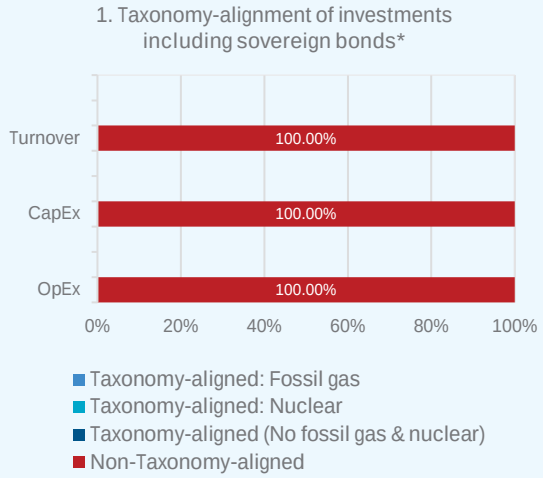
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

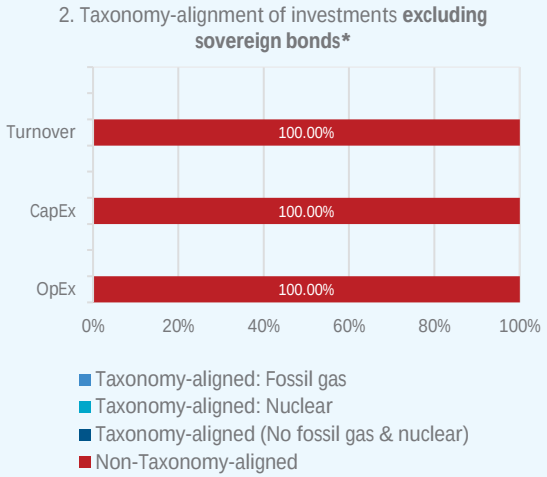
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

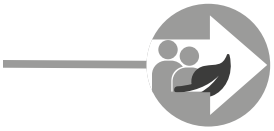
Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.33%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.



What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 22.20%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - ASIAN SMALLER COMPANIES FUND

Legal entity identifier: 549300WPIOCV90YN3U76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 35.70% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.43 vs. 5.22

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 35.70%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 16.18%

v) the percentage of the Fund invested in sustainable investments with a social objective: 19.52%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.14 vs.5.17
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	31.92%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	10.56%
% invested in sustainable investments with a social objective	21.36%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 35.70% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

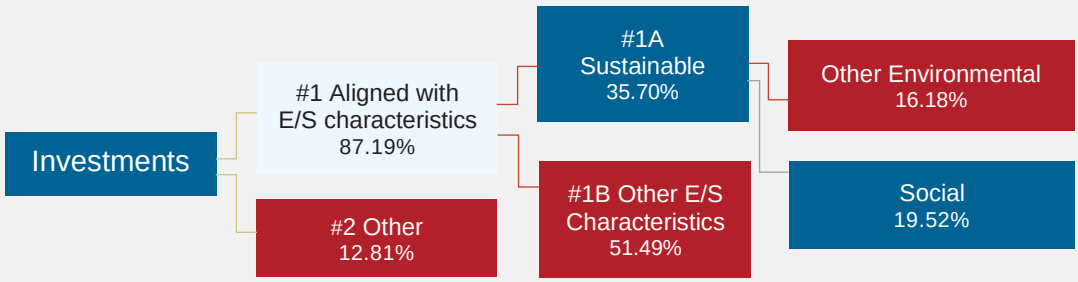
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 35.70% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 87.19%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 35.70% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 16.18% have an environmental objective (which is not aligned with the EU Taxonomy) and 19.52% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

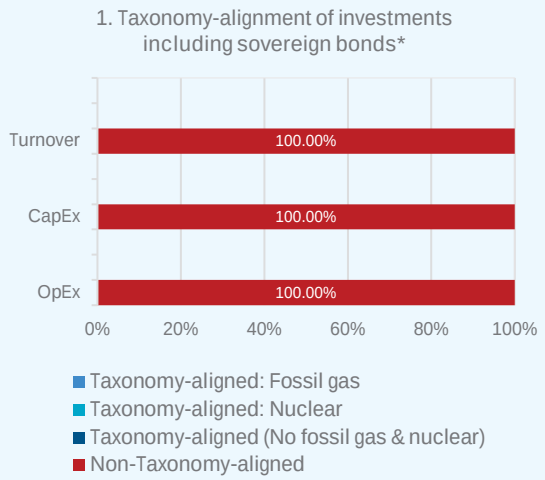
to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

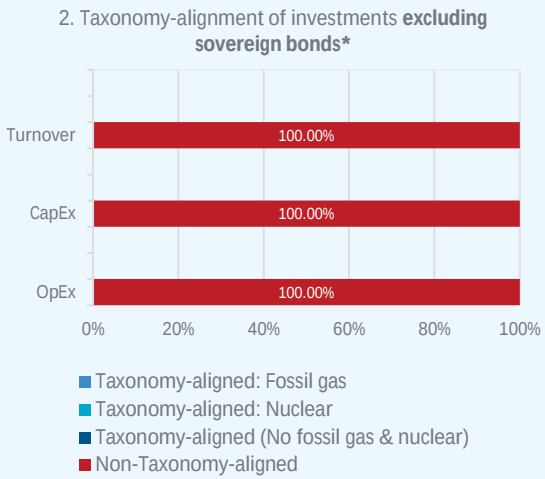
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16.18%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 19.52%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Legal entity identifier: 5493001KQKB7F558TV86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.63% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.64 vs. 7.03

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 54.63%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 36.90%

v) the percentage of the Fund invested in sustainable investments with a social objective: 17.73%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.5 vs.6.72
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	57.86%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	29.81%
% invested in sustainable investments with a social objective	28.05%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 54.63% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

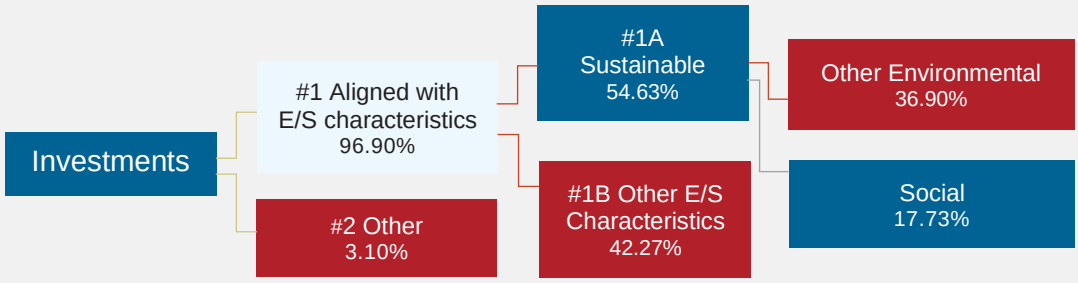
The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 54.63% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.90%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 54.63% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 36.90% have an environmental objective (which is not aligned with the EU Taxonomy) and 17.73% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

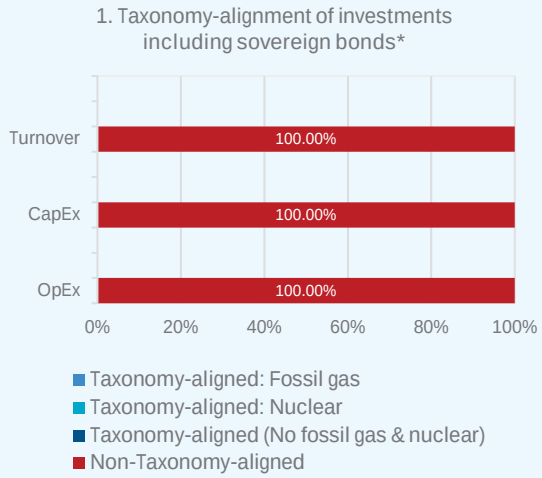
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

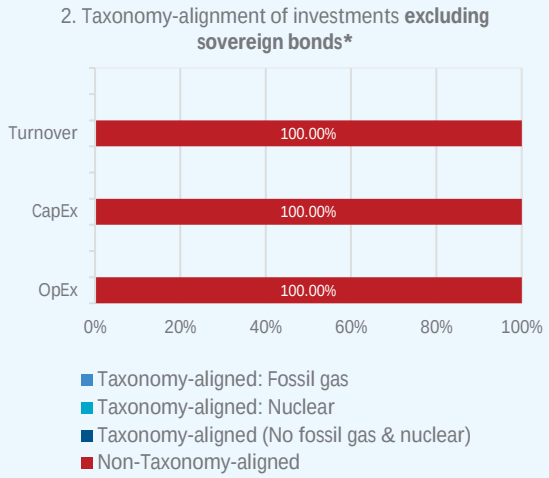
☐ *In fossil gas* ☐ *In nuclear energy*

☒ *No*

Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies,



The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

e.g. for a transition to a green economy.

-operational expenditure (OpEx) reflecting green operational activities of investee companies.

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.90%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 17.73%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - CHINA A SHARES FUND

Legal entity identifier: 254900CHVS0V7YXD7E55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.75% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund was closed during the reference period covered by this report. During the closing process, the sustainability-related commitments, as set out in the Fund's pre-contractual documentation, might not have been fully met.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the

How did the sustainability indicators perform?

environmental or social characteristics promoted by the financial product are attained.

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 6.21 vs. 5.68

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 34.75%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 22.27%

v) the percentage of the Fund invested in sustainable investments with a social objective: 12.48%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings	6.57 vs.5.59
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	33.80%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	21.58%
% invested in sustainable investments with a social objective	12.22%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 34.75% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The

investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

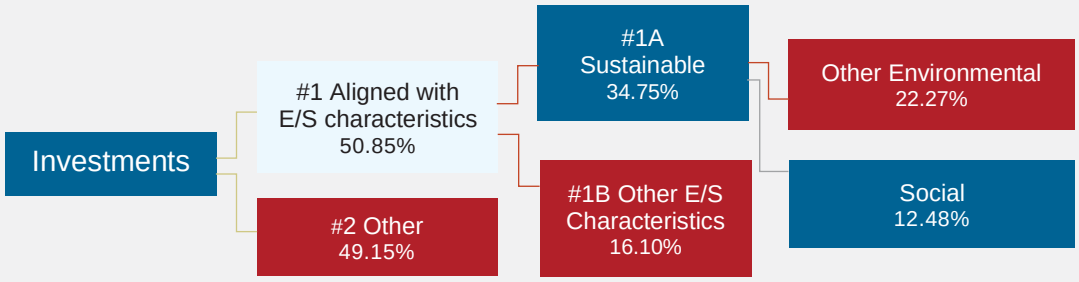
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 34.75% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 50.85%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating . This included 34.75% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 22.27% have an environmental objective (which is not aligned with the EU Taxonomy) and 12.48% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

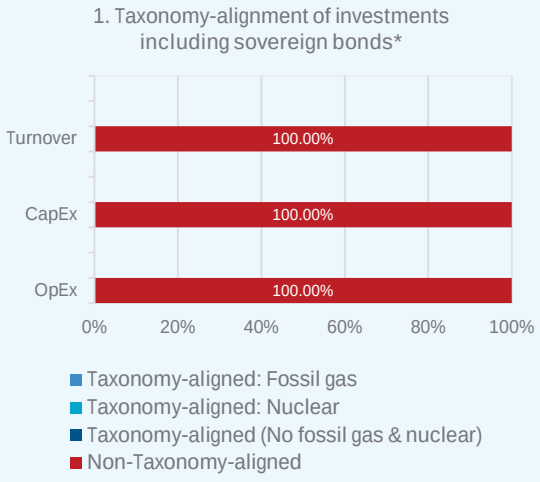
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

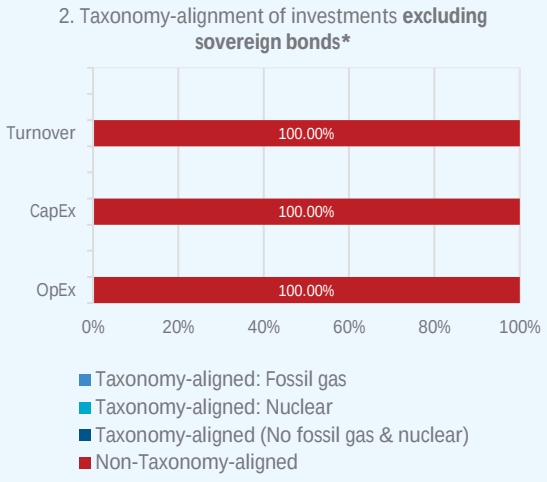
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.27%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 12.48%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark, after excluding 20% of assets with the lowest ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - CHINA CONSUMER FUND

Legal entity identifier: 5493007PTUTOK6CJU119

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.45% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.21 vs. 4.82

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 43.45%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 32.30%

v) the percentage of the Fund invested in sustainable investments with a social objective: 11.12%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.85 vs.4.37
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	42.60%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	27.63%
% invested in sustainable investments with a social objective	14.97%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 43.45% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
TENCENT HOLDINGS	INFORMATION TECHNOLOGY	9.68 %	CHINA

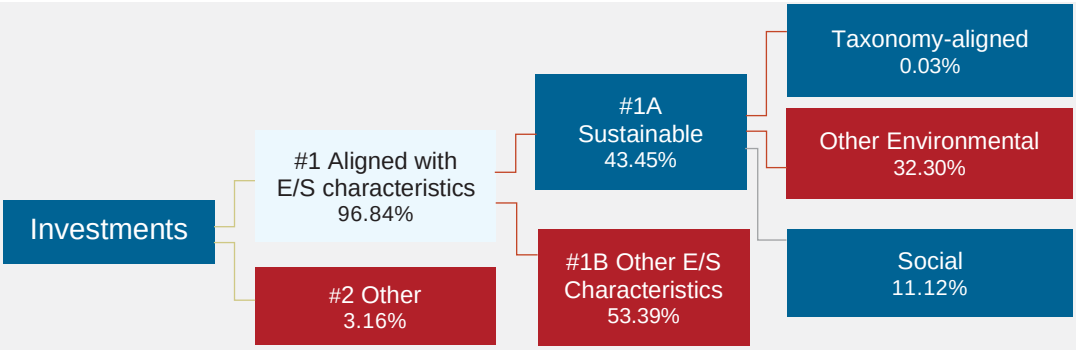
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 43.45% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.84%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 43.45% in sustainable investments of which 0.03% have an environmental objective (which is aligned with the EU Taxonomy) and 32.30% have an environmental objective (which is not aligned with the EU Taxonomy) and 11.12% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The quarterly average share of sustainable investments with a social objective was 11.12%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - CHINA INNOVATION FUND

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.56% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.15 vs. 6.04

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 56.56%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.50%

v) the percentage of the Fund invested in sustainable investments with a social objective: 15.03%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.67 vs.5.66
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	41.24%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	30.10%
% invested in sustainable investments with a social objective	11.14%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.56% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

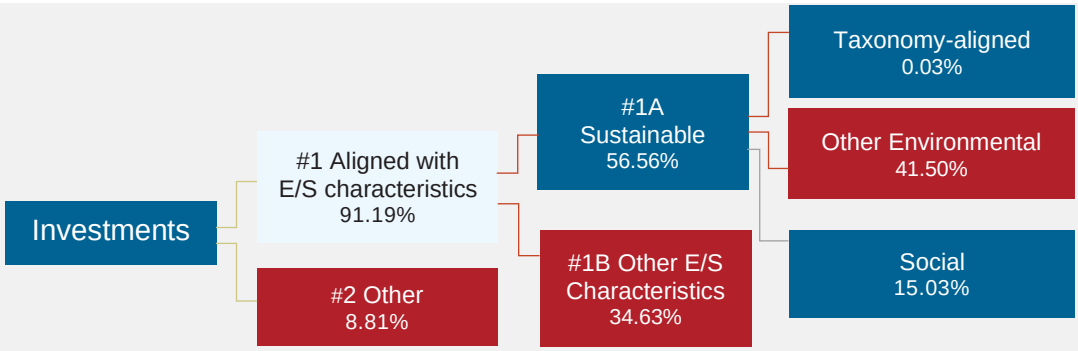
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 56.56% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 91.19%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 56.56% in sustainable investments of which 0.03% have an environmental objective (which is aligned with the EU Taxonomy) and 41.50% have an environmental objective (which is not aligned with the EU Taxonomy) and 15.03% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.03%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

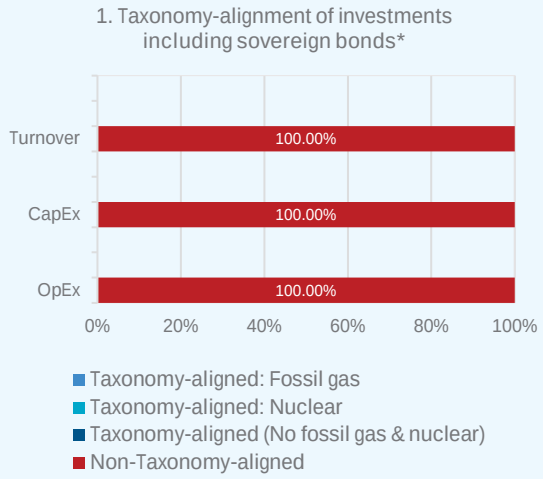
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

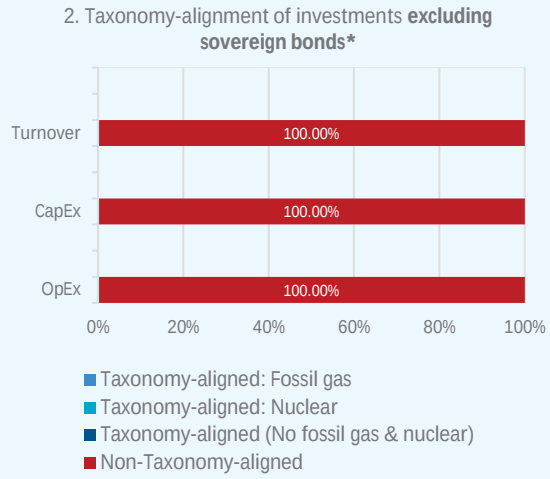
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.98% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.50%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 15.03%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - CLIMATE SOLUTIONS FUND

Legal entity identifier: 254900B74W1FPUZXHK46

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 80.52%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 17.47%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The Fund aimed to achieve capital growth over the long term by investing in sustainable investments. The Fund determined sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals . Environmental focused SDGs include clean water and sanitation;

affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure and, in attaining its sustainable investment objective, the Fund selected companies whose economic activity contributes to an environmental or social objective.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the sustainable objectives of the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Fund:

i) the percentage of the Fund invested in sustainable investments: 97.99%

ii) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 6.55%

iii) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 73.97%

iv) the percentage of the fund invested in sustainable investments with a social objective: 17.47%

v) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0.00%.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
% of Fund invested in sustainable investments	95.49%
% invested in sustainable investments with environmental objective qualifying under EU Taxonomy	4.44%
% of Fund invested in sustainable investments with environmental objective that do not qualify under the EU Taxonomy	72.01%
% invested in sustainable investments with a social objective	19.04%
% of Fund invested in securities with exposure to Exclusions	0.00%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using

rights, anti-corruption and anti-bribery matters.

controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

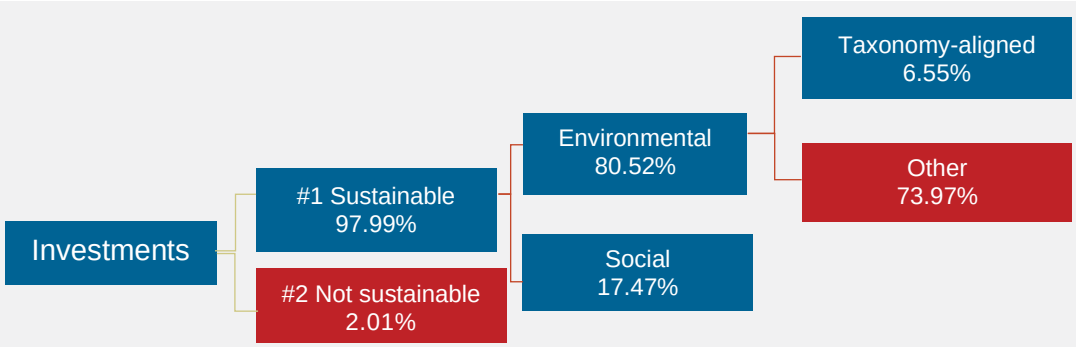
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 97.99% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 97.99%, which corresponds to the proportion of Fund invested in sustainable investments. This included 6.55% have an environmental objective (which is aligned with the EU Taxonomy) and 73.97% have an environmental objective (which is not aligned with the EU Taxonomy) and 17.47% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under "#2 Not Sustainable", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable Covers sustainable investments with environmental or social objectives.

#2 Not sustainable Includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 6.55%. This contributed to the following environmental objectives:

1) climate change mitigation: 3.41%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

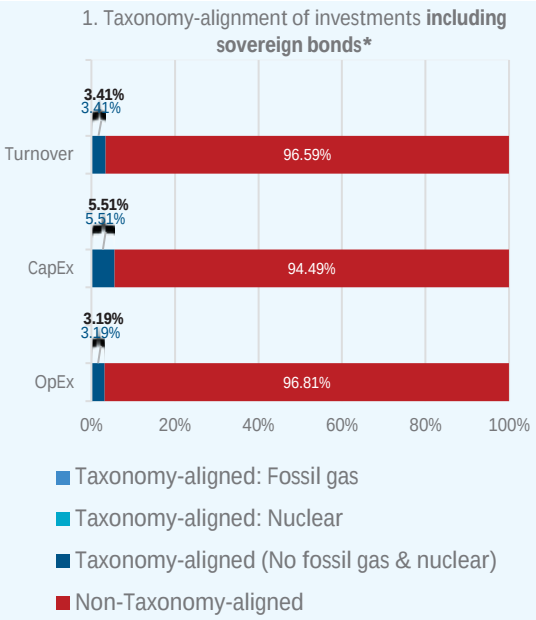
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

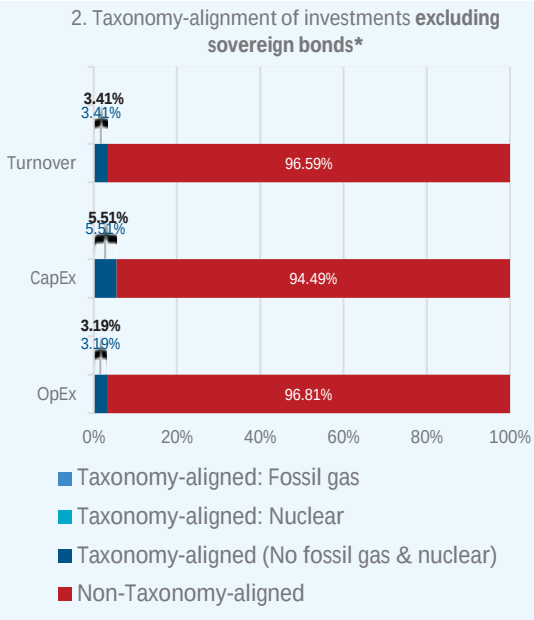
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	3.41%	5.51%	3.19%
Non taxonomy-aligned	96.59%	94.49%	96.81%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	3.41%	5.51%	3.19%
Non taxonomy-aligned	96.59%	94.49%	96.81%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 2.82% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	3.72%	3.72%

Taxonomy aligned investments capex	4.70%	4.70%
Taxonomy aligned investments opex	2.98%	2.98%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 73.97%.
Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 17.47%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "#2 not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the sustainable objective during the reference period?

The Fund took the following actions to meet the sustainable investment objective:

- The Fund made sustainable investments.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative ESG characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social objectives that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with sustainable investment objective?

Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable
- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EMERGING ASIA FUND

Legal entity identifier: 549300DFTX1HYCKWAS72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.27% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.36 vs. 6.96

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 46.27%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 31.94%

v) the percentage of the Fund invested in sustainable investments with a social objective: 14.21%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.13 vs.6.64
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	48.44%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	26.23%
% invested in sustainable investments with a social objective	22.13%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 46.27% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

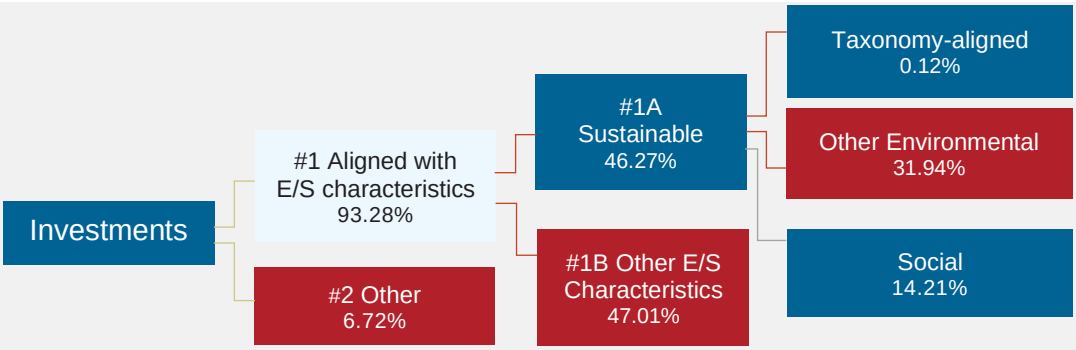
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 46.27% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.28%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 46.27% in sustainable investments of which 0.12% have an environmental objective (which is aligned with the EU Taxonomy) and 31.94% have an environmental objective (which is not aligned with the EU Taxonomy) and 14.21% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.12%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in

substantial contribution to an environmental objective.

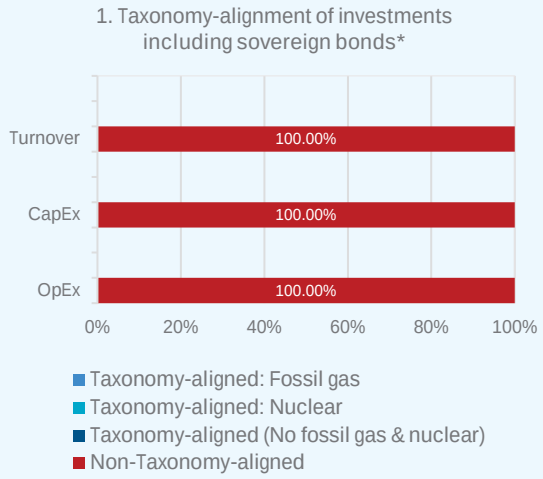
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

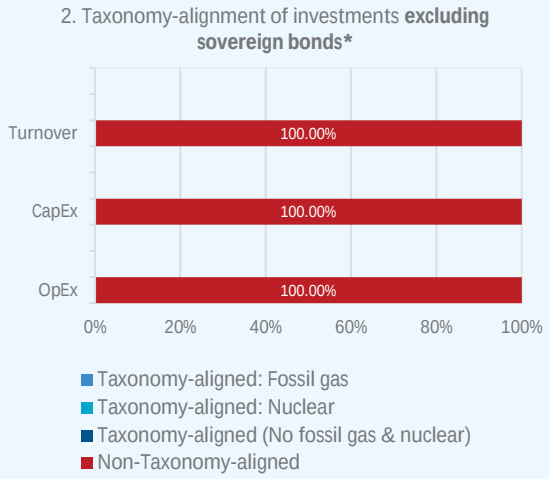
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.88% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.03%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31.94%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 14.21%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EMERGING MARKETS EQUITY ESG FUND

Legal entity identifier: 222100CGA9DFT3O9JH40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.32% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social

How did the sustainability indicators perform?

characteristics promoted by the financial product are attained.

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 7.65 vs. 7.55

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 61.32%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 38.61%

v) the percentage of the Fund invested in sustainable investments with a social objective: 22.71%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings	7.49 vs.7.22
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	59.54%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	28.80%
% invested in sustainable investments with a social objective	30.74%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 61.32% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The

investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCT MANUFACTURING	INFORMATION TECHNOLOGY	9.76 %	TAIWAN

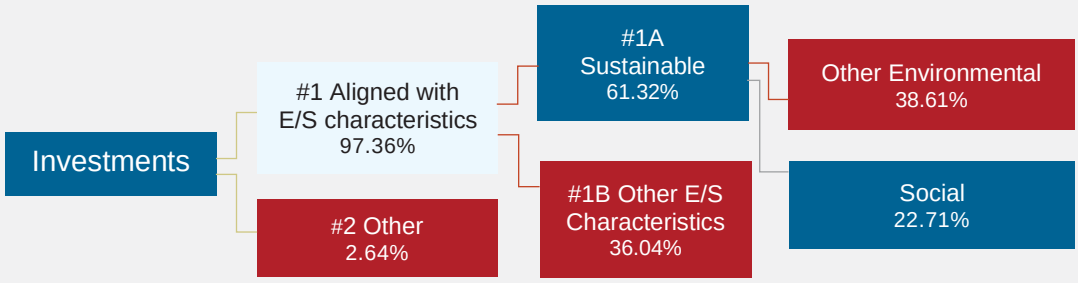
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 61.32% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.36%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating . This included 61.32% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 38.61% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.71% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

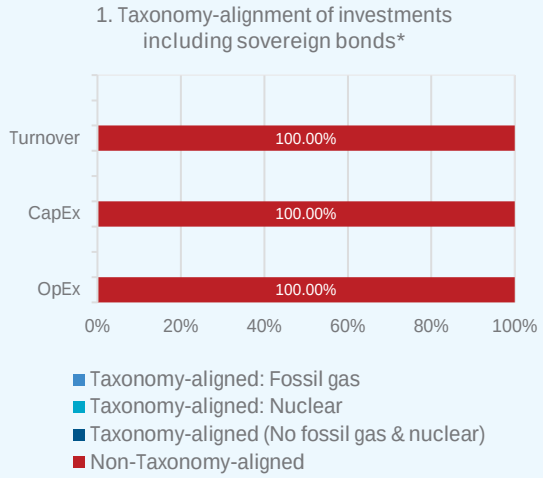
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

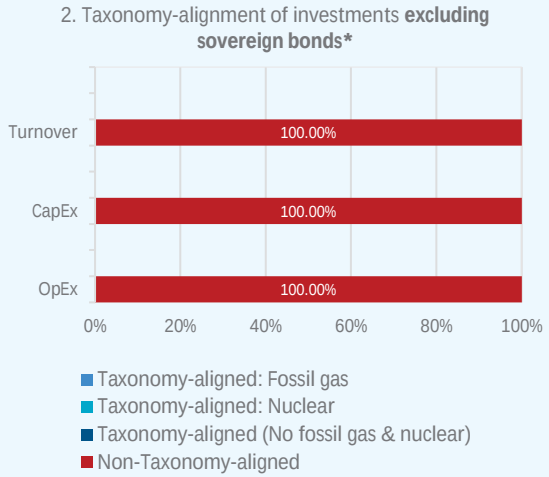
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.17% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.86 vs. 6.79

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 42.17%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 29.90%

v) the percentage of the Fund invested in sustainable investments with a social objective: 12.27%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.03 vs.6.48
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	50.43%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	18.67%
% invested in sustainable investments with a social objective	31.76%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 42.17% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

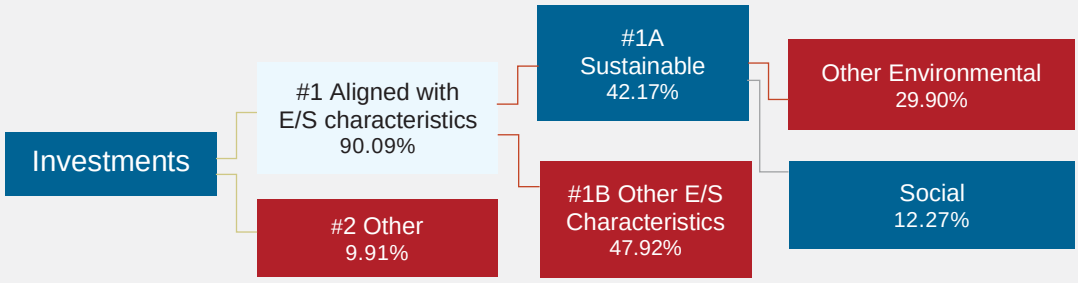
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 42.17% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 90.09%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 42.17% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 29.90% have an environmental objective (which is not aligned with the EU Taxonomy) and 12.27% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

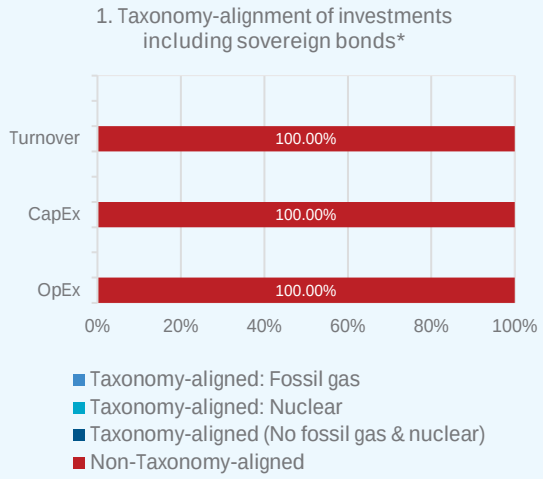
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

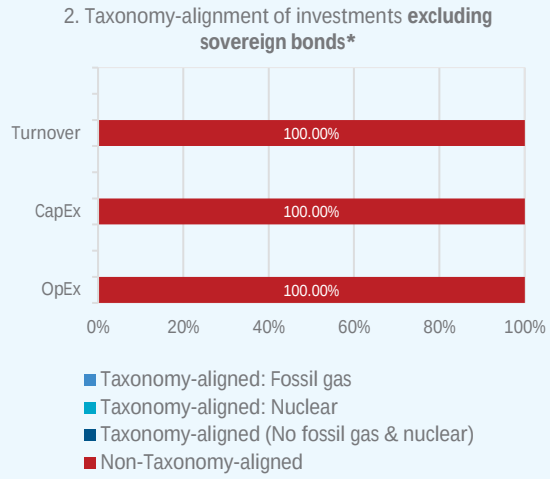
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.90%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 12.27%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

Not Applicable

How did this financial product perform compared with the broad market index?

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EMERGING MARKETS FUND

Legal entity identifier: 5493002DANCVJDN6B565

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.29% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.92 vs. 6.72

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 48.29%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 34.91%

v) the percentage of the Fund invested in sustainable investments with a social objective: 13.38%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.04 vs.6.39
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	56.62%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	28.77%
% invested in sustainable investments with a social objective	27.85%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.29% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

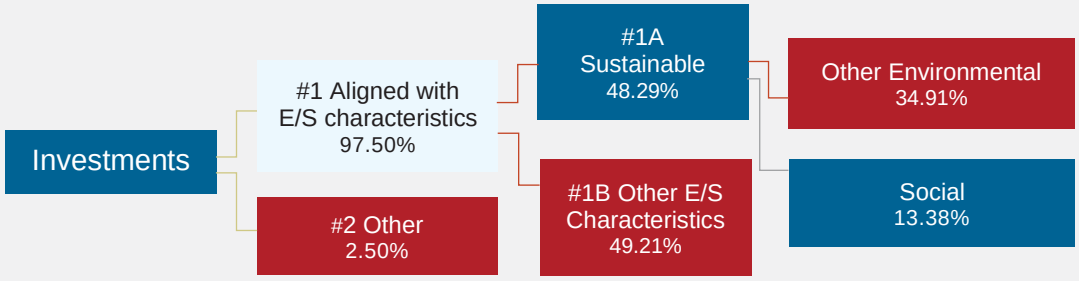
STANDARD BANK GROUP	FINANCIALS	1.61 %	SOUTH AFRICA

Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 48.29% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.50%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 48.29% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 34.91% have an environmental objective (which is not aligned with the EU Taxonomy) and 13.38% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

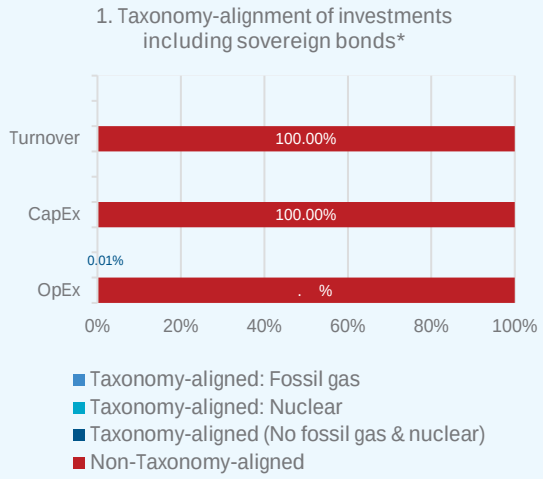
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

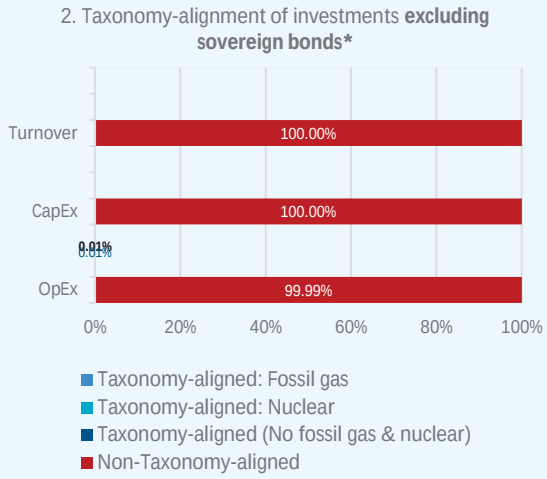
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.58% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.01%
Non taxonomy-aligned	100.00%	100.00%	99.99%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.01%
Non taxonomy-aligned	100.00%	100.00%	99.99%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.01%	0.01%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.91%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 13.38%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

Not Applicable

How did this financial product perform compared with the broad market index?

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPE EQUITY ESG FUND

Legal entity identifier: 549300NM9ZITQTY7GU39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 84.19% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 90.10%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 84.19%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy): 2.89%

v) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 45.70%

vi) the percentage of the Fund invested in sustainable investments with a social objective: 35.60%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund invested in securities of issuers with high ESG rating	96.44%
% of Fund invested in securities with exposure to Exclusions	0.00%
% of Fund invested in sustainable investments	87.60%
% invested in sustainable investments with environmental objective (economic activities qualifying as environmentally sustainable under EU Taxonomy)	2.17%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	43.94%
% invested in sustainable investments with a social objective	41.49%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 84.19% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.89%. This contributed to the following environmental objectives:

1) climate change mitigation: 1.08%

2) climate change adaptation: 0.50%

3) protection of water and marine resources: 0.00%

energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

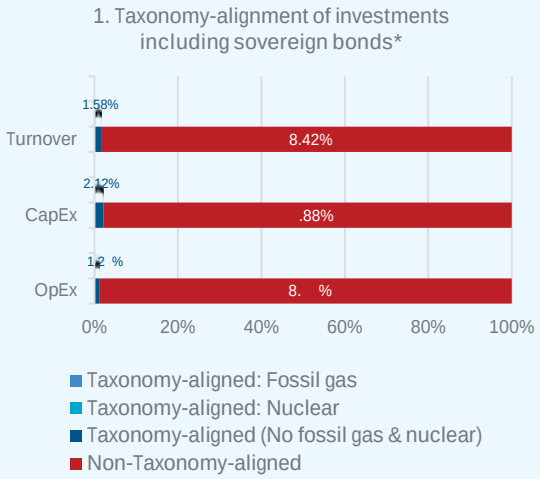
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

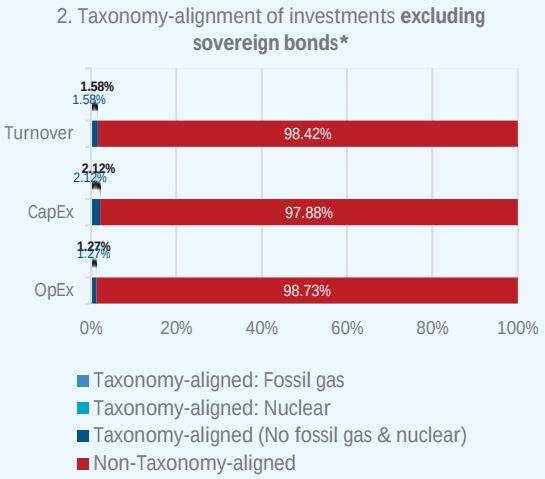
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.86% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 1.07% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	1.21%	1.21%
Taxonomy aligned investments capex	2.15%	2.15%
Taxonomy aligned investments opex	1.89%	1.89%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 45.70%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 35.60%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPEAN DYNAMIC GROWTH FUND

Legal entity identifier: 549300YTXDJLTI9R5058

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.92% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.74 vs. 7.24

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 76.92%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 36.24%

v) the percentage of the Fund invested in sustainable investments with a social objective: 39.07%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.88 vs.7.19
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	84.97%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	33.30%
% invested in sustainable investments with a social objective	50.96%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 76.92% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
ASML HOLDING	INFORMATION TECHNOLOGY	4.36 %	NETHERLANDS

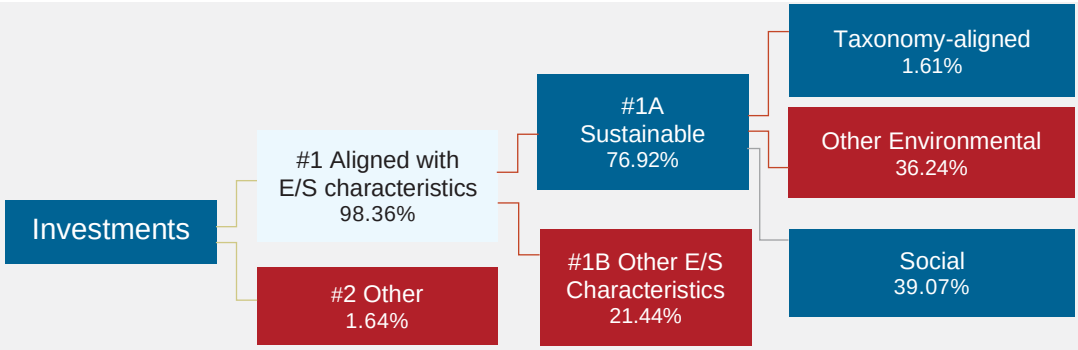
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 76.92% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.36%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 76.92% in sustainable investments of which 1.61% have an environmental objective (which is aligned with the EU Taxonomy) and 36.24% have an environmental objective (which is not aligned with the EU Taxonomy) and 39.07% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.61%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.25%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

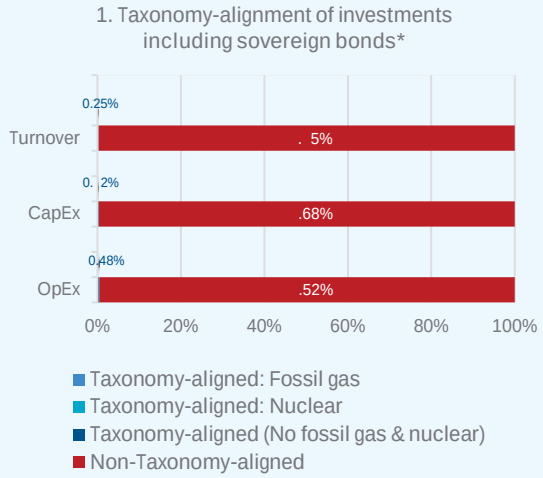
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

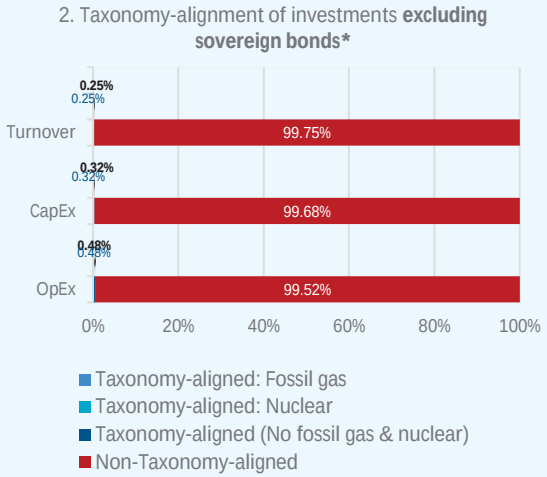
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 98.98% of the total investments.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%

Non taxonomy-aligned	99.75%	99.68%	99.52%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.25% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.28%	0.28%
Taxonomy aligned investments capex	0.50%	0.50%
Taxonomy aligned investments opex	0.35%	0.35%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.24%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 39.07%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPEAN GROWTH FUND

Legal entity identifier: 549300G4OINSKM9K3661

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.04% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.99 vs. 7.38

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 85.04%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 44.02%

v) the percentage of the Fund invested in sustainable investments with a social objective: 38.76%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.81 vs.7.42
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	85.41%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	43.53%
% invested in sustainable investments with a social objective	39.56%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 85.04% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
TOTALENERGIES SE	ENERGY	3.86 %	FRANCE

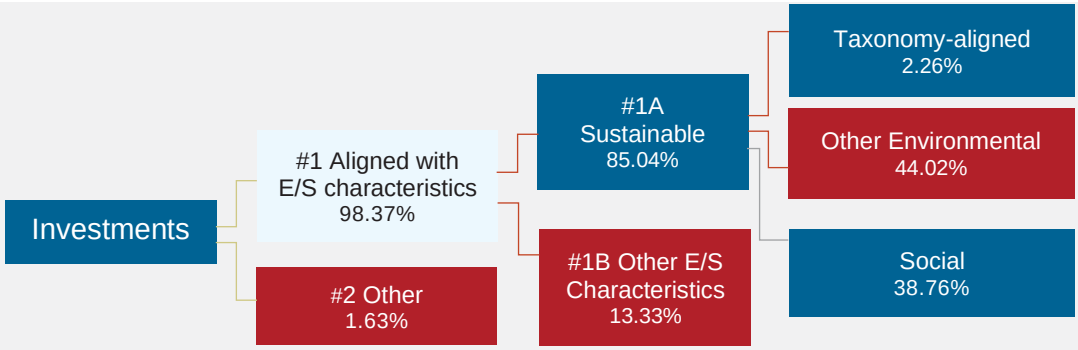
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 85.04% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.37%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 85.04% in sustainable investments of which 2.26% have an environmental objective (which is aligned with the EU Taxonomy) and 44.02% have an environmental objective (which is not aligned with the EU Taxonomy) and 38.76% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.26%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.15%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

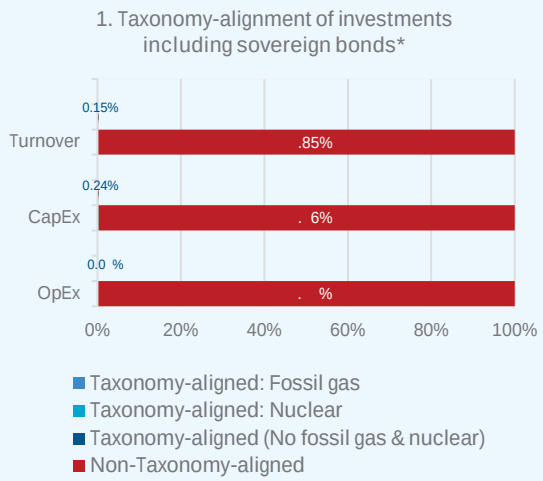
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

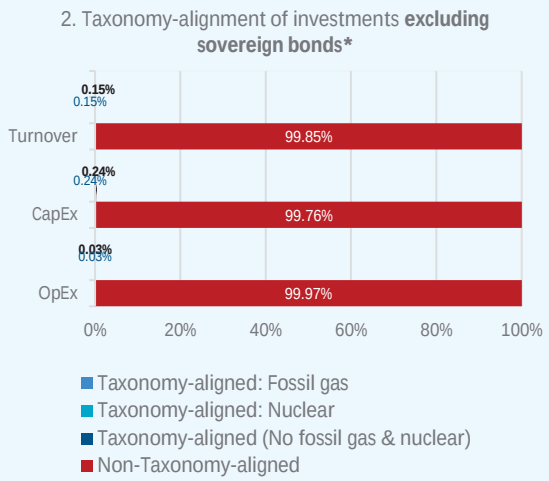
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.84% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.15%	0.24%	0.03%
Non taxonomy-aligned	99.85%	99.76%	99.97%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.15%	0.24%	0.03%
Non taxonomy-aligned	99.85%	99.76%	99.97%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.14% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	1.32%	1.32%
Taxonomy aligned investments capex	1.77%	1.77%
Taxonomy aligned investments opex	1.15%	1.15%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 44.02%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 38.76%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPEAN LARGER COMPANIES FUND

Legal entity identifier: 5493001IG3HUGK4JRN48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.15% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.99 vs. 7.38

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 85.15%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 44.06%

v) the percentage of the Fund invested in sustainable investments with a social objective: 38.82%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.81 vs.7.42
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	84.95%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	43.80%
% invested in sustainable investments with a social objective	38.82%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 85.15% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

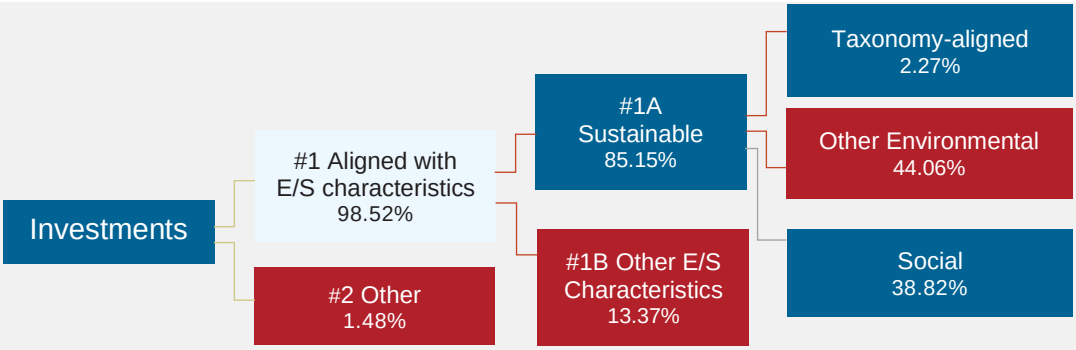
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 85.15% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.52%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 85.15% in sustainable investments of which 2.27% have an environmental objective (which is aligned with the EU Taxonomy) and 44.06% have an environmental objective (which is not aligned with the EU Taxonomy) and 38.82% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.27%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.15%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

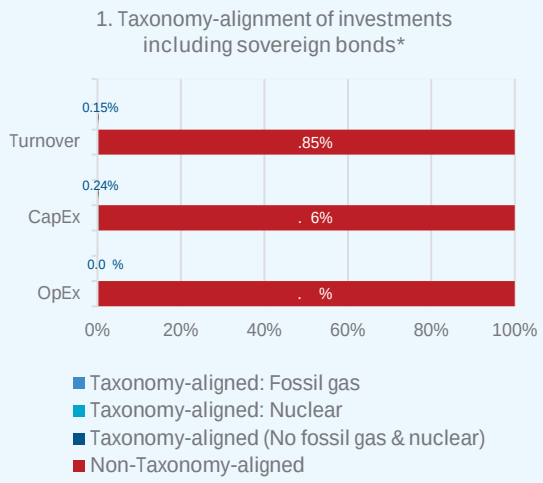
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

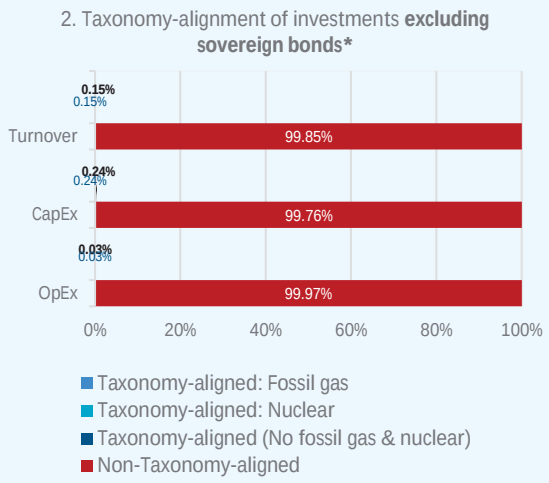
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.74% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.15%	0.24%	0.03%
Non taxonomy-aligned	99.85%	99.76%	99.97%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.15%	0.24%	0.03%
Non taxonomy-aligned	99.85%	99.76%	99.97%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.14% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	1.33%	1.33%
Taxonomy aligned investments capex	1.80%	1.80%
Taxonomy aligned investments opex	1.17%	1.17%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 44.06%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 38.82%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPEAN SMALLER COMPANIES FUND

Legal entity identifier: 549300CW8WK3MAJLQZ86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.97% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Certain sustainability-related data is only available from 27 October 2025 following the Fund's reclassification to Article 8, and therefore some indicators are based on a partial reporting period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.07 vs. 6.96

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 53.97%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 35.85%

v) the percentage of the Fund invested in sustainable investments with a social objective: 16.51%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Sustainability indicators based on sustainable investment classification reflect data available following the Fund's reclassification to Article 8 and therefore relate to a partial reporting period.

...and compared to previous periods?

Not applicable as this is the first reporting period for the Fund as an Article 8 product following its reclassification on 27 October 2025.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 53.97% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI

indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

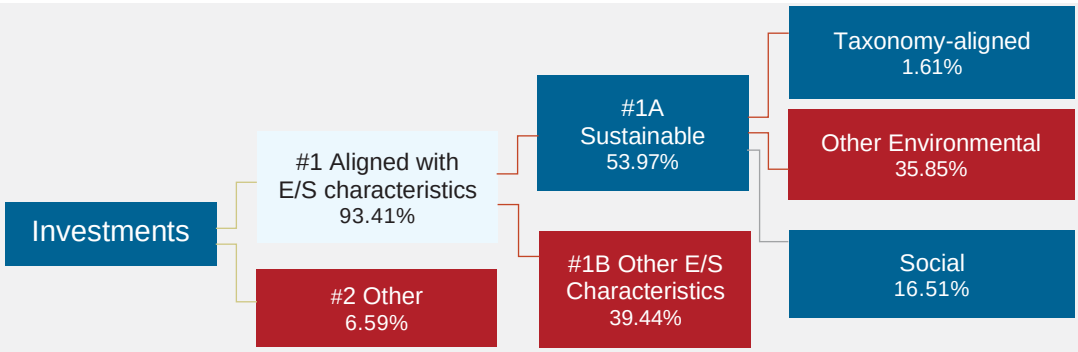
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 53.97% in sustainable investments.

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.41%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 53.97% in sustainable investments of which 1.61% have an environmental objective (which is aligned with the EU Taxonomy) and 35.85% have an environmental objective (which is not aligned with the EU Taxonomy) and 16.51% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

The proportion of sustainable investments reflects data available following the Fund's reclassification to Article 8 and therefore relates to a partial reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.61%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.55%

2) climate change adaptation: 0.37%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

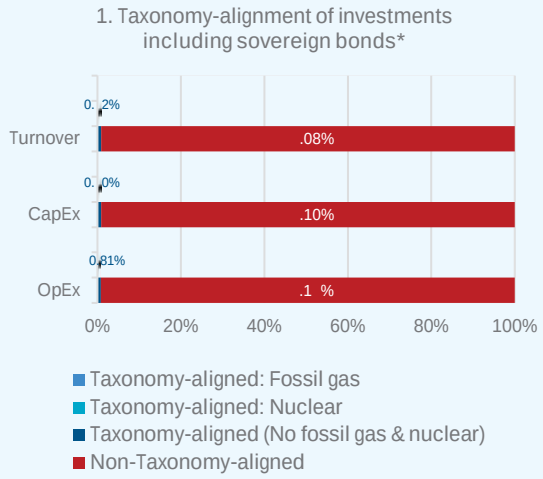
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

EU Taxonomy alignment metrics reflect data available following the Fund's reclassification to Article 8 and therefore relate to a partial reporting period.

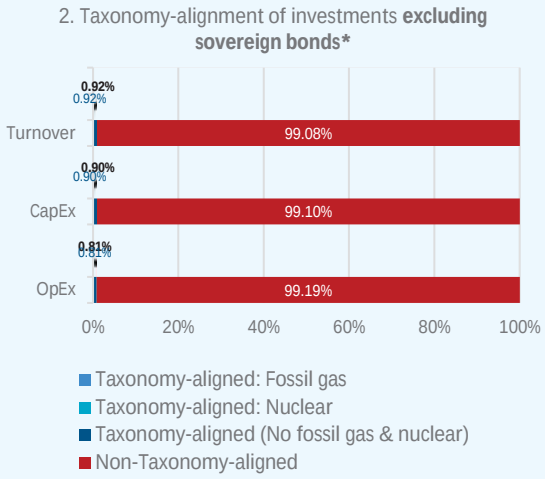
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
-**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-**operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - EUROPEAN SMALLER COMPANIES ESG FUND

Legal entity identifier: 54930019YO0DBESUKT66

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund was closed during the reference period covered by this report. During the closing process, the sustainability-related commitments, as set out in the Fund's pre-contractual documentation, might not have been fully met.

The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure. The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 82.55%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 56.00%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 36.21%

v) the percentage of the Fund invested in sustainable investments with a social objective: 17.58%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund invested in securities of issuers with high ESG rating	80.66%
% of Fund invested in securities with exposure to Exclusions	0.00%
% of Fund invested in sustainable investments	51.79%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	32.04%
% invested in sustainable investments with a social objective	17.84%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.00% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and

education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

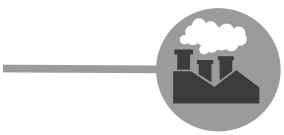
Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water

management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2025-11-19

Largest Investments	Sector	% Assets	Country

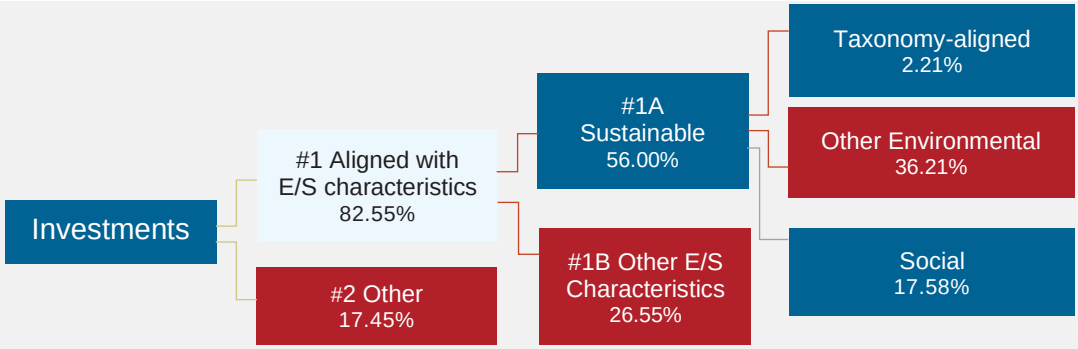
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 56.00% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 82.55%, which corresponds to the proportion of Fund invested in securities with high ESG ratings. This included 56.00% in sustainable investments of which 2.21% have an environmental objective (which is aligned with the EU Taxonomy),36.21% have an environmental objective (which is not aligned with the EU Taxonomy) and 17.58% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.21%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.88%

2) climate change adaptation: 0.64%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

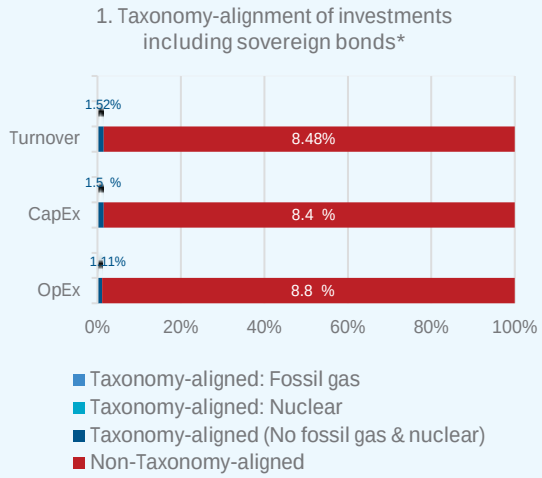
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

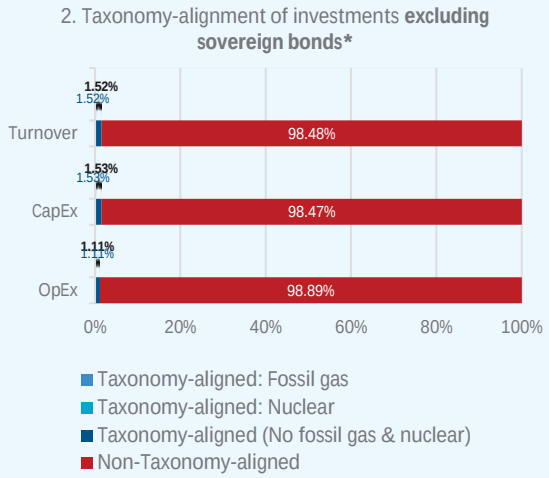
☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*

☒ *No*



Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

-**operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This graph represents 99.52% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	1.52%	1.53%	1.11%
Non taxonomy-aligned	98.48%	98.47%	98.89%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	1.52%	1.53%	1.11%
Non taxonomy-aligned	98.48%	98.47%	98.89%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.02% for transitional activities and 0.86% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	1.67%	1.67%
Taxonomy aligned investments capex	1.12%	1.12%
Taxonomy aligned investments opex	0.91%	0.91%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.21%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 17.58%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - FIRST ALL COUNTRY WORLD FUND

Legal entity identifier: 549300AT2RPDETJ66407

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.83% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.65 vs. 7.04

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 63.83%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.15%

v) the percentage of the Fund invested in sustainable investments with a social objective: 21.93%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.61 vs.7.0
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	62.53%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	33.76%
% invested in sustainable investments with a social objective	28.22%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.83% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

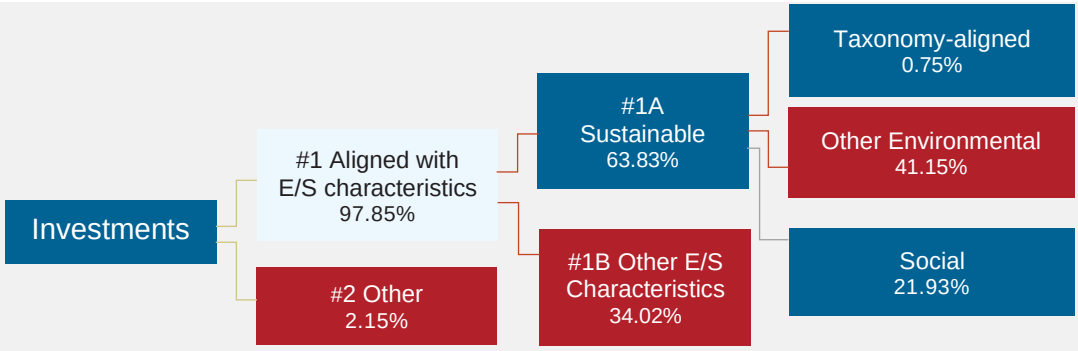
The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 63.83% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.85%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 63.83% in sustainable investments of which 0.75% have an environmental objective (which is aligned with the EU Taxonomy) and 41.15% have an environmental objective (which is not aligned with the EU Taxonomy) and 21.93% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.75%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.23%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

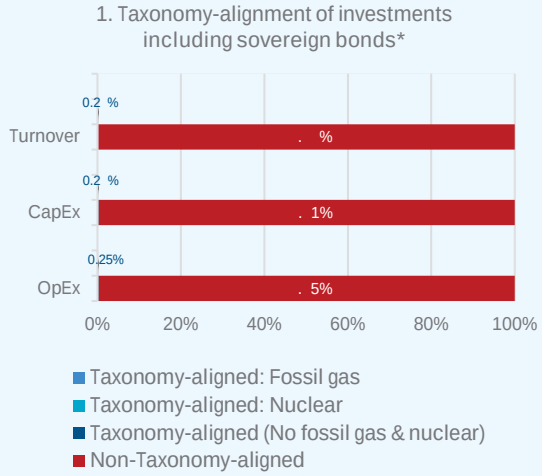
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

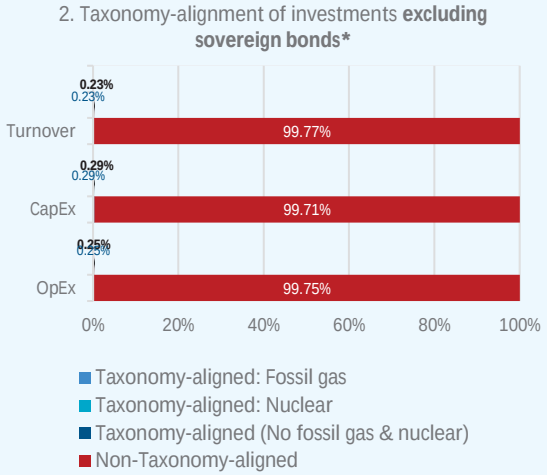
low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.31% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.23%	0.29%	0.25%
Non taxonomy-aligned	99.77%	99.71%	99.75%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.23%	0.29%	0.25%
Non taxonomy-aligned	99.77%	99.71%	99.75%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.23% for enabling activities, measured by Turnover.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.29%	0.29%
Taxonomy aligned investments capex	0.29%	0.29%
Taxonomy aligned investments opex	0.25%	0.25%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

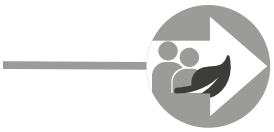
 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.15%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?



The quarterly average share of sustainable investments with a social objective was 21.93%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GERMANY FUND

Legal entity identifier: 54930064HCI3BC84WQ28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.98% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.29 vs. 6.74

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 69.98%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 37.11%

v) the percentage of the Fund invested in sustainable investments with a social objective: 30.76%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.44 vs.6.7
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	75.86%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	41.12%
% invested in sustainable investments with a social objective	32.37%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.98% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

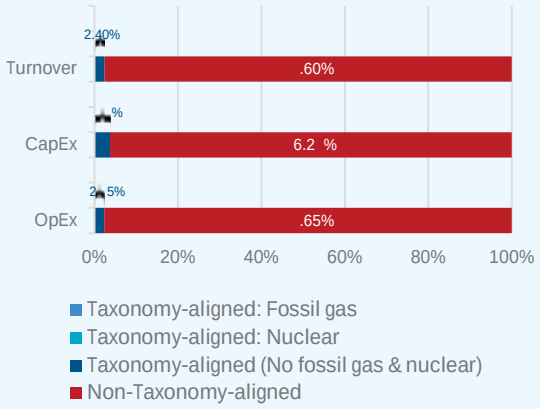
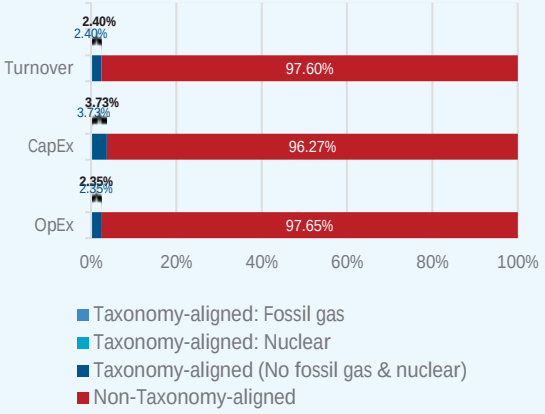
☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 99.85% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	2.40%	3.73%	2.35%
Non taxonomy-aligned	97.60%	96.27%	97.65%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	2.40%	3.73%	2.35%
Non taxonomy-aligned	97.60%	96.27%	97.65%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.01% for transitional activities and 1.12% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	1.81%	1.81%
Taxonomy aligned investments capex	3.18%	3.18%
Taxonomy aligned investments opex	2.09%	2.09%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37.11%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 30.76%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.

- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL CONSUMER BRANDS FUND

Legal entity identifier: 549300213EH7YILB9X45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.90% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.47 vs. 7.04

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 65.90%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 0.00%

v) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 50.09%

vi) the percentage of the Fund invested in sustainable investments with a social objective: 15.81%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.63 vs.7.0
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	68.16%
% invested in sustainable investments with environmental objective (economic activities qualifying as environmentally sustainable under EU Taxonomy)	0.00%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	47.88%
% invested in sustainable investments with a social objective	20.28%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 65.90% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
AMAZON.COM	CONSUMER DISCRETIONARY	7.14 %	UNITED STATES

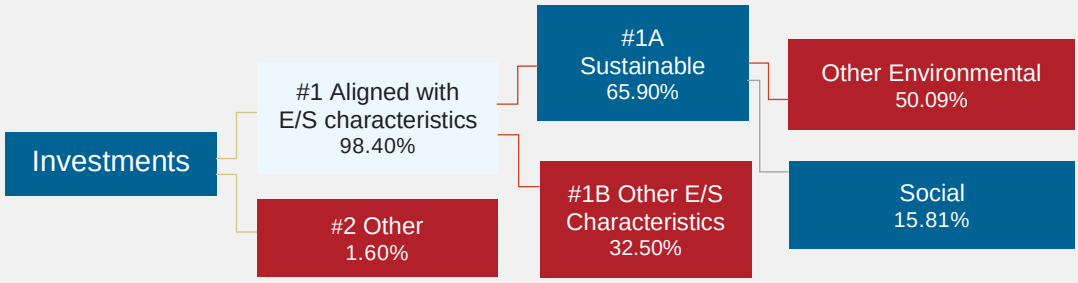
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 65.90% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.40%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 65.90% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 50.09% have an environmental objective (which is not aligned with the EU Taxonomy) and 15.81% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in

substantial contribution to an environmental objective.

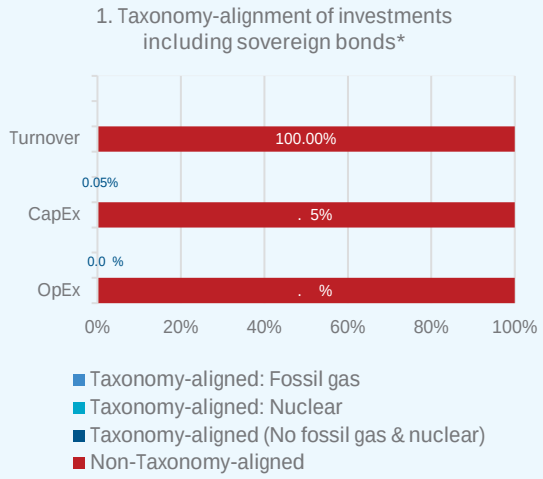
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

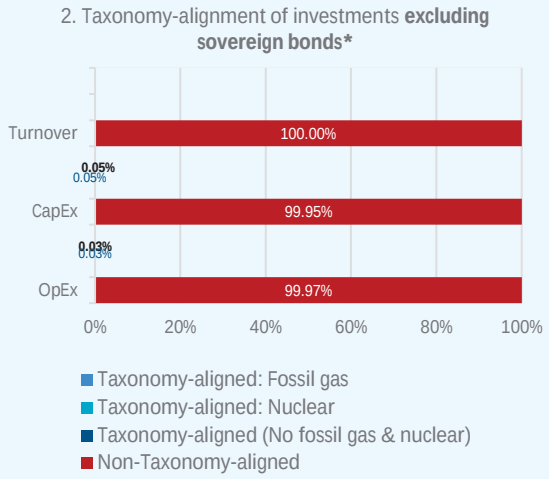
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.39% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the period 1 May 2025 - 27 October 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Fund:

by the financial product are attained.

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 91.99 %

For the period 28 October 2025 - 30 April 2026, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.84 vs. 7.05

For the whole period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 77.39%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 45.58%

v) the percentage of the Fund invested in sustainable investments with a social objective: 31.51%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	-
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	83.15%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	38.96%
% invested in sustainable investments with a social objective	43.97%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 77.39% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
MICROSOFT	INFORMATION TECHNOLOGY	7.32 %	UNITED STATES

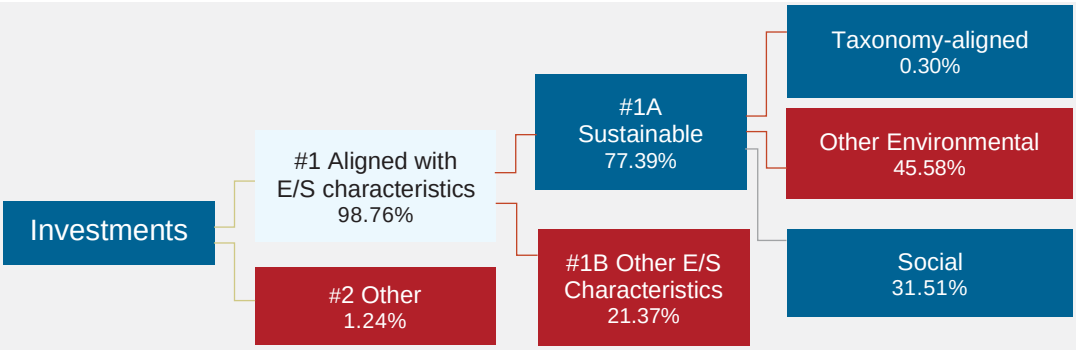
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 77.39% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.76%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 77.39% in sustainable investments of which 0.30% have an environmental objective (which is aligned with the EU Taxonomy) and 45.58% have an environmental objective (which is not aligned with the EU Taxonomy) and 31.51% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.30%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.03%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

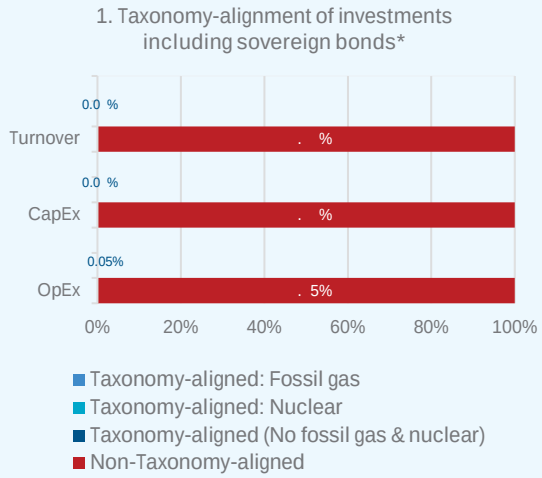
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

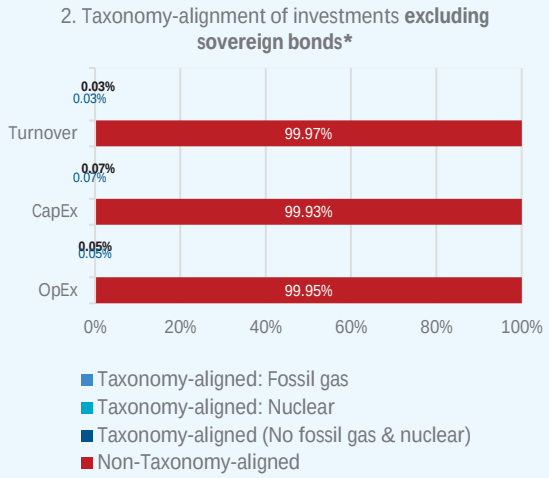
☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*

☒ *No*



Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.03%	0.07%	0.05%
Non taxonomy-aligned	99.97%	99.93%	99.95%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.03%	0.07%	0.05%
Non taxonomy-aligned	99.97%	99.93%	99.95%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.03% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.11%	0.11%
Taxonomy aligned investments capex	0.20%	0.20%
Taxonomy aligned investments opex	0.02%	0.02%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 45.58%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 31.51%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL FINANCIAL SERVICES FUND

Legal entity identifier: 549300HO6N0F2KYZFZ92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 30.66% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.08 vs. 6.94

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 30.66%

iv) the percentage of the Fund invested in sustainable investments with a social objective: 24.56%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.23 vs.7.04
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	35.96%
% invested in sustainable investments with a social objective	28.46%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.66% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and

education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

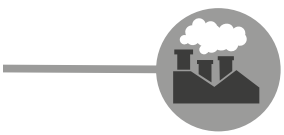
Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water

management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

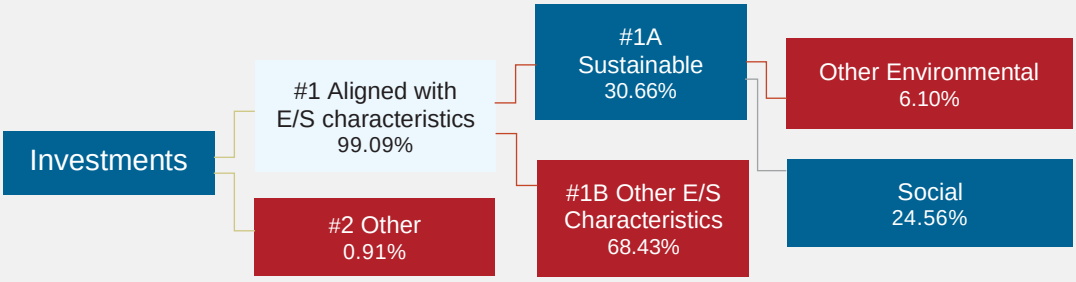
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 30.66% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.09%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 30.66% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 6.10% have an environmental objective (which is not aligned with the EU Taxonomy) and 24.56% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Subsector	% Assets
FINANCIALS	COMMERCIAL BANKS	41.18 %
FINANCIALS	DIVERSIFIED FINANCIAL SERVICES	39.94 %
FINANCIALS	INSURANCE	16.72 %
OPEN ENDED FUND	CLOSED ENDED CASH FUND	0.83 %
FINANCIALS	CAPITAL MARKETS	0.81 %
INDUSTRIALS	PROFESSIONAL SERVICES	0.21 %
FINANCIALS	CONSUMER FINANCE	0.20 %
COMMUNICATION SERVICES	WIRELESS TELECOMMUNICATION SERVICES	0.12 %
INFORMATION TECHNOLOGY	SOFTWARE	0.04 %

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

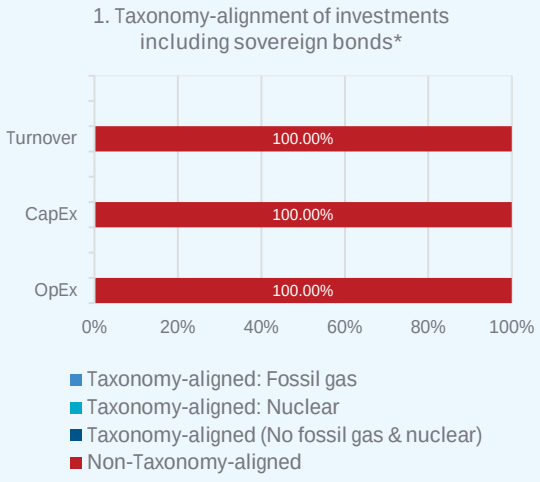
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

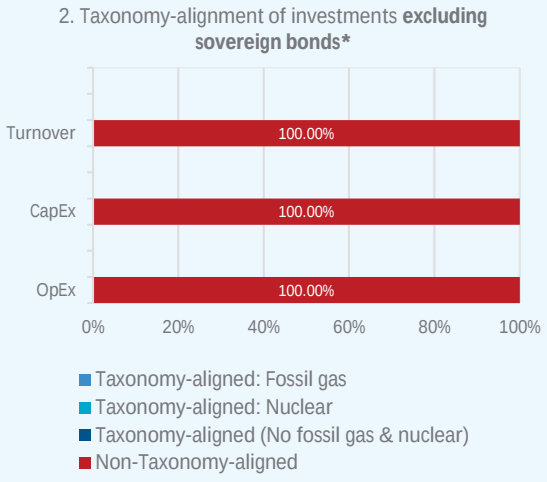
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX

Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

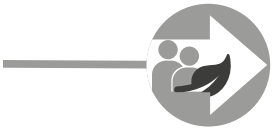
Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 6.10%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.



What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 24.56%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL FOCUS FUND

Legal entity identifier: 549300F4JJCOV7BCT788

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.31% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.5 vs. 7.04

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 66.31%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 38.60%

v) the percentage of the Fund invested in sustainable investments with a social objective: 27.61%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.48 vs.7.0
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	69.49%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	41.08%
% invested in sustainable investments with a social objective	28.26%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 66.31% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

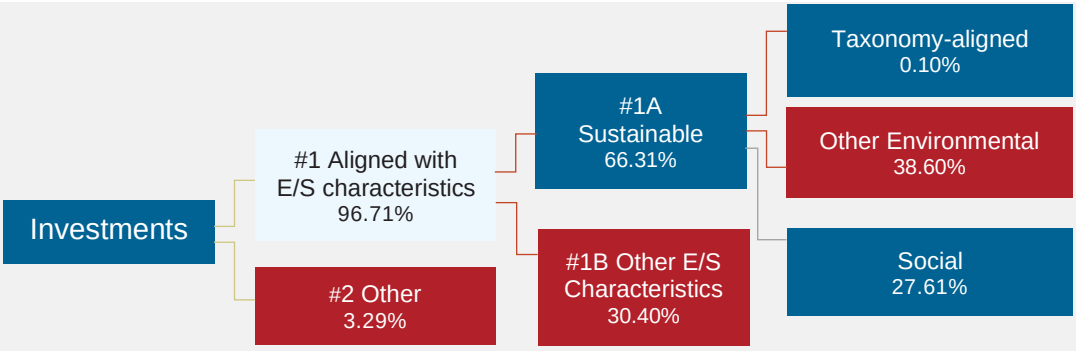
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 66.31% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.71%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 66.31% in sustainable investments of which 0.10% have an environmental objective (which is aligned with the EU Taxonomy) and 38.60% have an environmental objective (which is not aligned with the EU Taxonomy) and 27.61% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.10%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

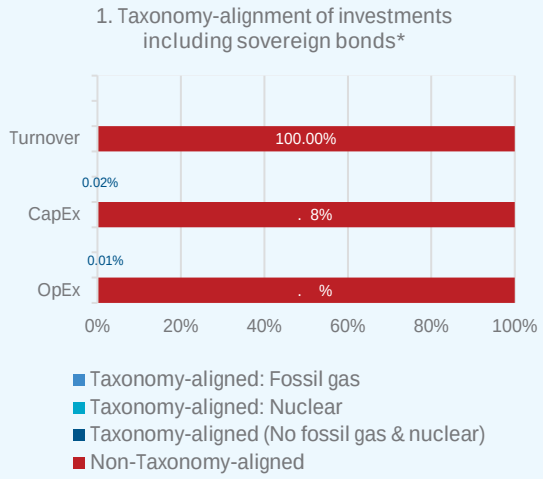
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

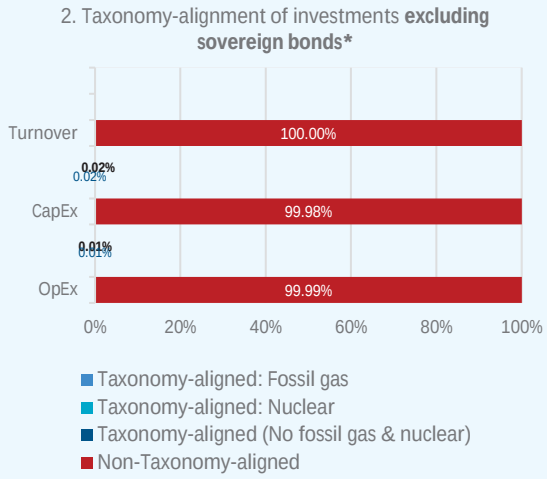
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.09%	0.09%
Taxonomy aligned investments capex	0.15%	0.15%
Taxonomy aligned investments opex	0.10%	0.10%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.60%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 27.61%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the broad market index?

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL FOUNDERS FUND

Legal entity identifier: 254900B4R5J7N0865R59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund was launched on 16 April 2026, fourteen days prior to its fiscal year end. As a result, the capital may not have been fully deployed in investments aligned with the Fund's investment strategy.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio better than the ESG score of the Fund's investment universe. The investment universe comprised of equities of companies from anywhere in the world, including emerging markets, in which a founder, their family or foundation exerts significant influence by virtue of management or board representation or has an economic interest in the share capital, or where the subsequent management are considered by the Investment Manager to demonstrate the same managerial qualities.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The ESG score of the Fund's portfolio was measured against the ESG score of the Fund's investment universe using an either a weighted average or equal weighted method of calculation. The Investment Manager undertook monitoring of the Fund's ESG score on a periodic basis and the Fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking

to achieve a better ESG score of the investment universe, the Investment Manager invested in securities of issuers with better ESG characteristics.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on data as of the Fund's fiscal year end.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund was launched on 16 April 2026, fourteen days prior to its fiscal year end. As a result, the capital may not have been fully deployed in investments aligned with the Fund's investment strategy.

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe 2.81 vs 2.84; (lower scores indicate better ESG performance) and

(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%

...and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this Fund.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG research - The Investment Manager references ESG research which incorporates consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - The Investment Manager uses engagement as a tool to better understand principal adverse impacts.

(iv) Quarterly reviews - review of principal adverse impacts on a quarterly basis.

The Investment Manager took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2026-04-16 - 2026-04-30

Largest Investments	Sector	% Assets	Country

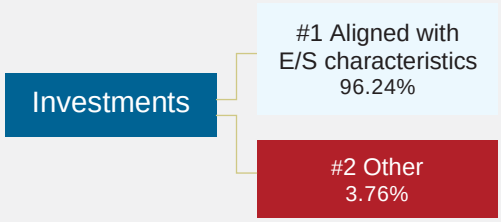
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the fiscal year end. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this Fund.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.24%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its investment universe.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data as of the Fund's fiscal year end. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund was launched on 16 April 2026, fourteen days before the Fund's fiscal year end. Therefore, the following data has been compiled based on data as of the Fund's fiscal year end.

The fiscal year end share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.06%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

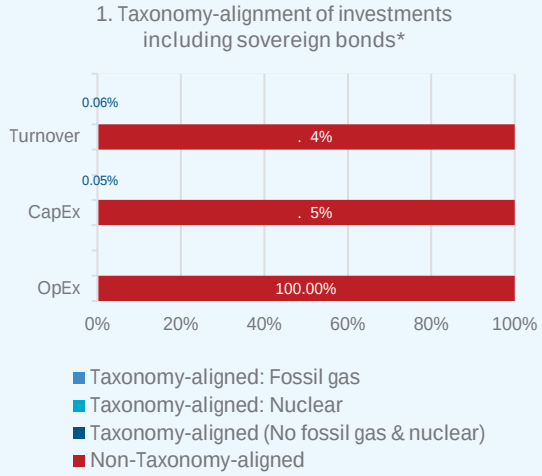
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

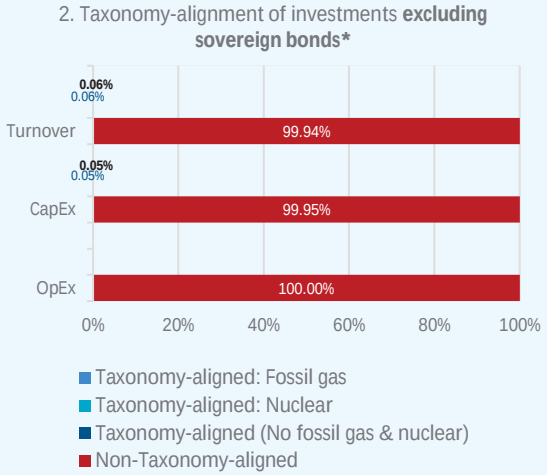
greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.06%	0.05%	0.00%
Non taxonomy-aligned	99.94%	99.95%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.06%	0.05%	0.00%
Non taxonomy-aligned	99.94%	99.95%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, as at 30 April 2026.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on as of the Fund's fiscal year end. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.05% for enabling activities, measured by Turnover.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

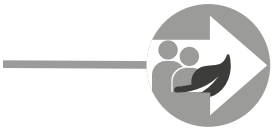
- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable as this is the first reporting period for the fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective not aligned with the EU Taxonomy. Even though the Fund did not have such commitment, it may have invested into this type of investments.



What was the share of socially sustainable investments?

The Fund did not commit itself to having a minimum proportion of socially sustainable investments. Even though the Fund did not have such commitment, it may have invested into this type of investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the Fund's investment universe.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

Not Applicable

How did this financial product perform compared with the broad market index?

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL HEALTHCARE FUND

Legal entity identifier: 549300Z8HWYC400OQA29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.99% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by investing in equities of companies that are involved in the design, manufacture, or sale of products and services used in connection with health care, medicine or biotechnology. The fund partially intended to make sustainable investments

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the fund used to meet the environmental or social characteristics promoted by the Fund: 97.30%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 94.99%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 0.00%

v) the percentage of the Fund invested in sustainable investments with a social objective: 94.99%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund used to meet the environmental or social characteristics promoted by the Fund	97.51%
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	96.91%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	0.29%
% invested in sustainable investments with a social objective	96.62%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 94.99% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

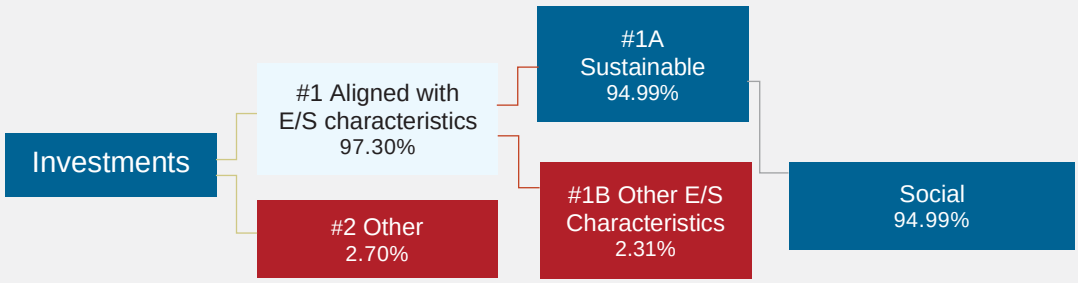
The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 94.99% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.30%. This included 94.99% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 0.00% have an environmental objective (which is not aligned with the EU Taxonomy) and 94.99% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

OPEN ENDED FUND	CLOSED ENDED CASH FUND	2.01 %
HEALTHCARE	HEALTH CARE TECHNOLOGY	0.96 %

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

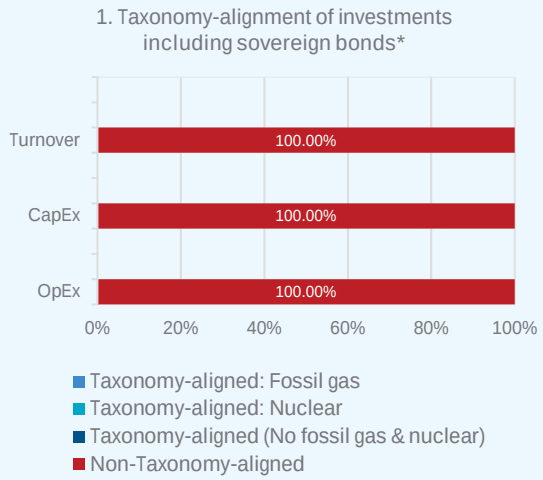
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

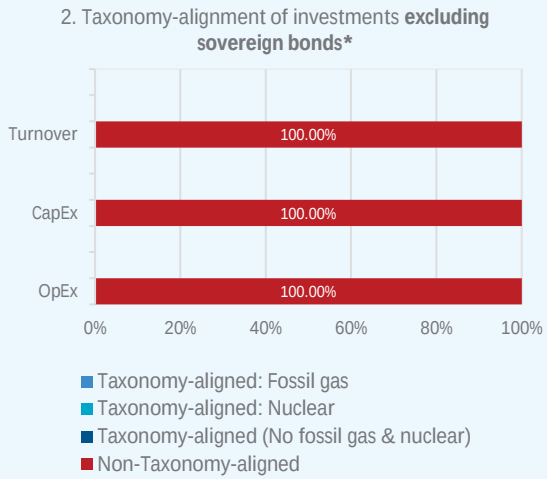
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.81% of the total investments.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.02%	0.02%
Taxonomy aligned investments opex	0.00%	0.00%

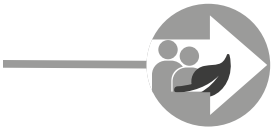
Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0.00%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.



What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 94.99%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aligning to the fund's sustainability theme
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL TECHNOLOGY FUND

Legal entity identifier: 549300TVS03JI4WXGJ44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.22% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.64 vs. 6.09

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 74.22%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 60.35%

v) the percentage of the Fund invested in sustainable investments with a social objective: 13.78%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.47 vs.6.04
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	71.25%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	58.08%
% invested in sustainable investments with a social objective	12.93%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 74.22% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCT MANUFACTURING	INFORMATION TECHNOLOGY	8.90 %	TAIWAN

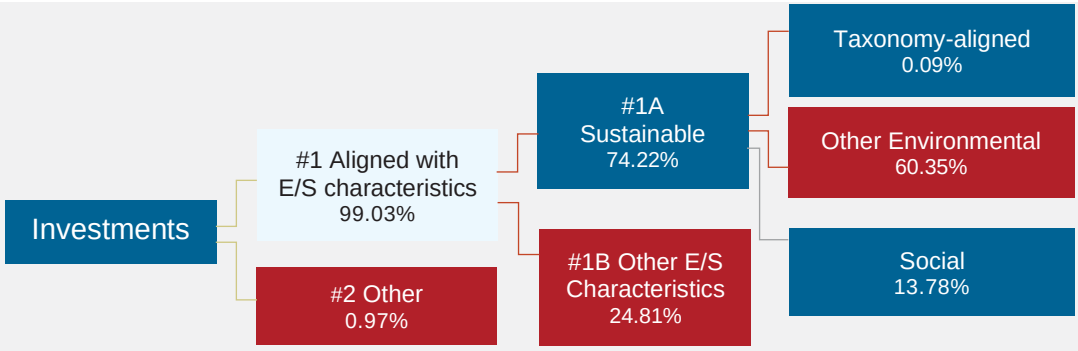
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 74.22% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.03%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 74.22% in sustainable investments of which 0.09% have an environmental objective (which is aligned with the EU Taxonomy) and 60.35% have an environmental objective (which is not aligned with the EU Taxonomy) and 13.78% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.09%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.15%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

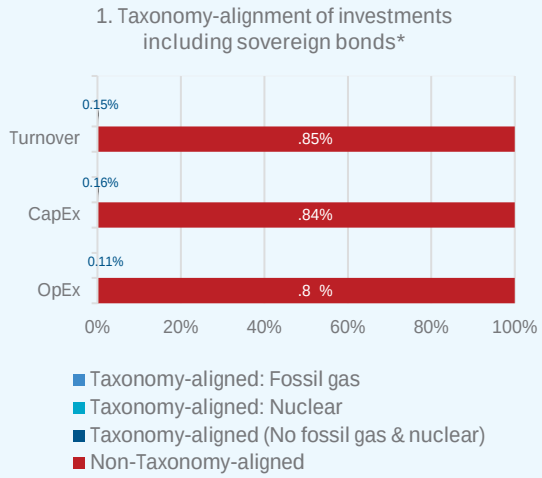
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

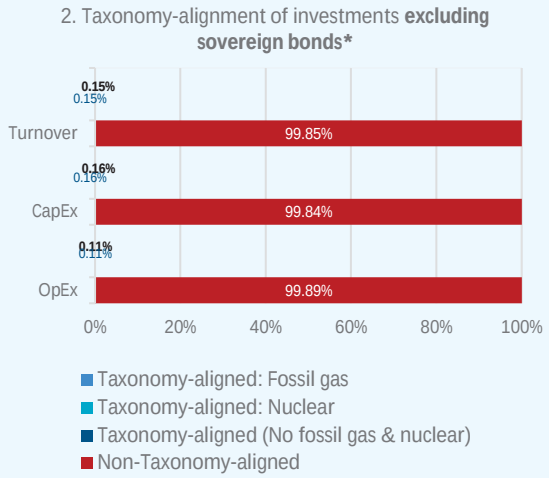
☐ *In fossil gas* ☐ *In nuclear energy*

☒ *No*

Taxonomy-aligned activities are expressed as a share of:



- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies,



The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

e.g. for a transition to a green economy.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.80% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria which integrated minimum ESG ratings requirements. Environmental and social characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. When investing in UCITS or UCIs managed by third parties, the Fund relied on ESG methodology and exclusion policies used by third-party asset managers and index providers as well as their engagement and voting policies and practices.

The Fidelity multi asset ESG criteria required that a minimum of 70% of the Fund's assets complied with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);

• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above;

• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above;

• Government debt securities that were subject to negative screening based on the Investment Manager's internal sovereign exclusion framework which concentrates on three principles relating to governance, respect for human rights and foreign policy. Sovereigns failing to meet the standards of the framework are identified based on a proprietary assessment. To support this assessment the Investment Manager makes reference to international recognised indicators such as the World Bank's Worldwide Governance Indicators and UN Security Council sanctions.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the investments of the Fund which complies with the Fidelity multi asset ESG criteria: 98.85%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 69.80%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 46.34%

v) the percentage of the Fund invested in sustainable investments with a social objective:22.00%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the investments of the Fund which complies with the Fidelity multi asset ESG criteria	99.36%
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	68.50%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	41.26%
% invested in sustainable investments with a social objective	25.86%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.80% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and

anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The Fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

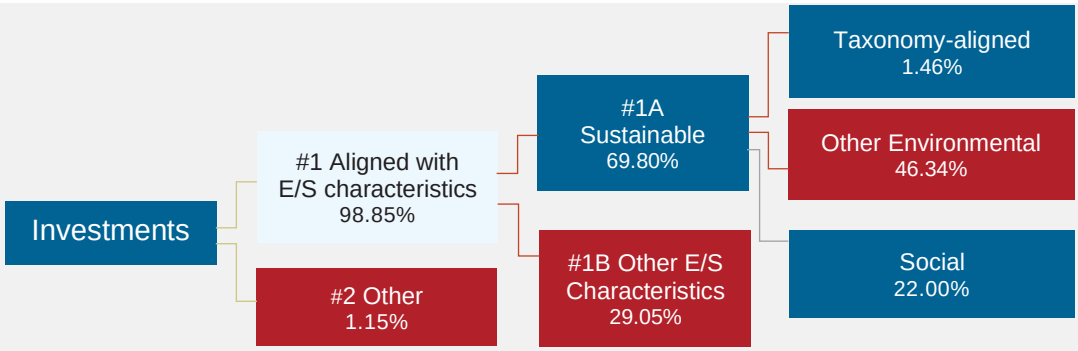
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 69.80% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.85%, which corresponds to the proportion of Fund complying with the Fidelity multi asset ESG criteria. This included 69.80% in sustainable investments of which 1.46% have an environmental objective (which is aligned with the EU Taxonomy) and 46.34% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.00% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.46%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.74%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

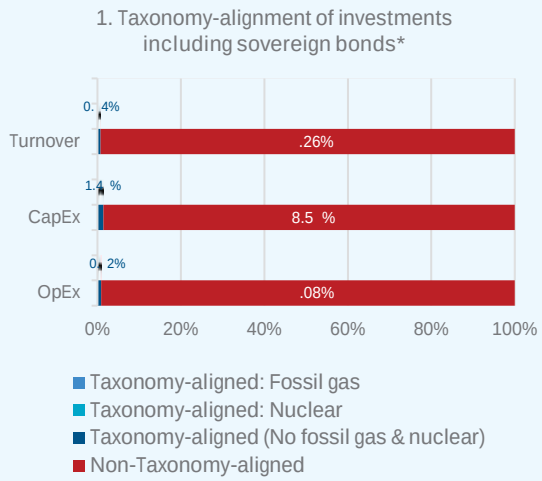
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

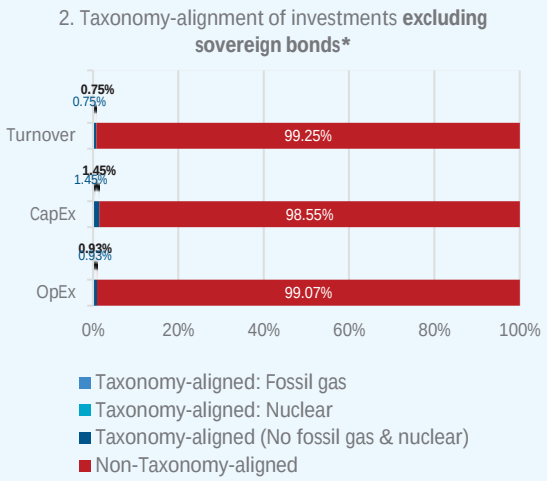
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

Yes:

In fossil gas *In nuclear energy*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 98.76% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.74%	1.43%	0.92%
Non taxonomy-aligned	99.26%	98.57%	99.08%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.75%	1.45%	0.93%
Non taxonomy-aligned	99.25%	98.55%	99.07%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.66% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.94%	0.97%
Taxonomy aligned investments capex	1.28%	1.34%
Taxonomy aligned investments opex	0.66%	0.68%

Fidelity INTERNATIONAL

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 46.34%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 22.00%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria which integrated minimum ESG ratings requirements.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

How did this financial product perform compared with the broad market index?

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GLOBAL VALUE FUND

Legal entity identifier: 549300J1XTC50ZY0Z742

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.18% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the period 1 May 2025 - 12 April 2026, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Fund:

by the financial product are attained.

i) the percentage of the Fund invested in sustainable investments: 98.90 %

ii) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 1.26%

iii) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 48.87%

iv) the percentage of the Fund invested in sustainable investments with a social objective: 48.77 %

For the period 13 April 2026 - 30 April 2026, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.39 vs. 6.94

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 49.18%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 22.48%

v) the percentage of the Fund invested in sustainable investments with a social objective: 25.16%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

Not applicable due to the change in the Fund's classification from Article 9 to Article 8 during the reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.18% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and

working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and

incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

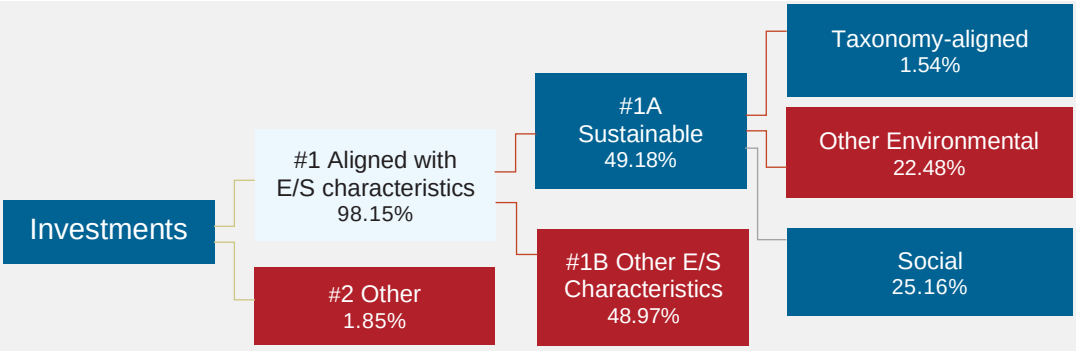
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 49.18% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.15%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 49.18% in sustainable investments of which 1.54% have an environmental objective (which is aligned with the EU Taxonomy) and 22.48% have an environmental objective (which is not aligned with the EU Taxonomy) and 25.16% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.54%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.28%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

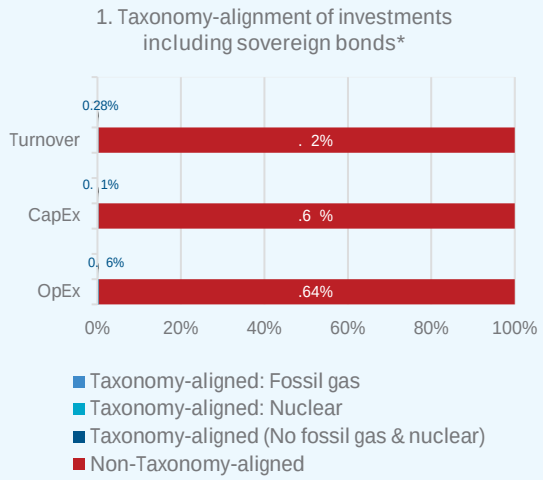
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

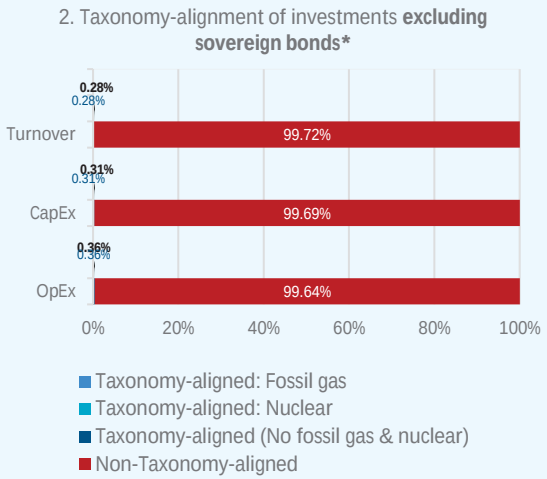
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.28%	0.31%	0.36%
Non taxonomy-aligned	99.72%	99.69%	99.64%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.28%	0.31%	0.36%
Non taxonomy-aligned	99.72%	99.69%	99.64%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.28% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable due to the change in the Fund's classification from Article 9 to Article 8 during the reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.48%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 25.16%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GREATER CHINA FUND

Legal entity identifier: 5493005EHFIWJMR7DT21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.52% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.34 vs. 5.31

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 49.52%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 37.54%

v) the percentage of the Fund invested in sustainable investments with a social objective: 11.47%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.2 vs.4.7
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	48.11%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	40.69%
% invested in sustainable investments with a social objective	7.42%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.52% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

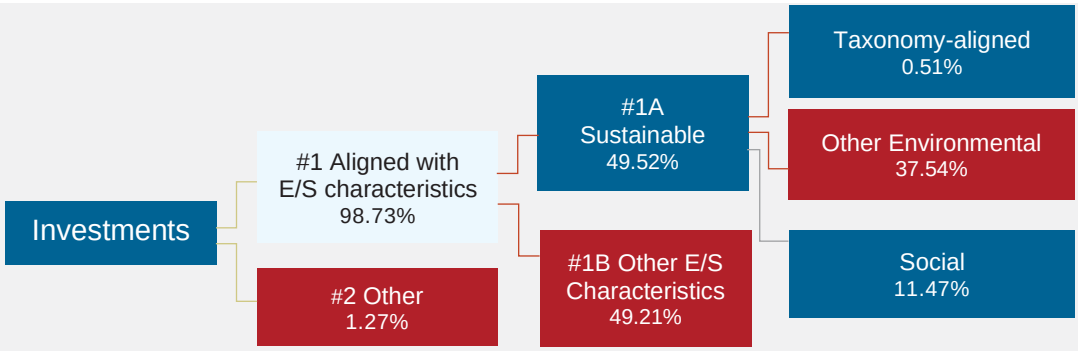
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 49.52% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.73%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 49.52% in sustainable investments of which 0.51% have an environmental objective (which is aligned with the EU Taxonomy) and 37.54% have an environmental objective (which is not aligned with the EU Taxonomy) and 11.47% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.51%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

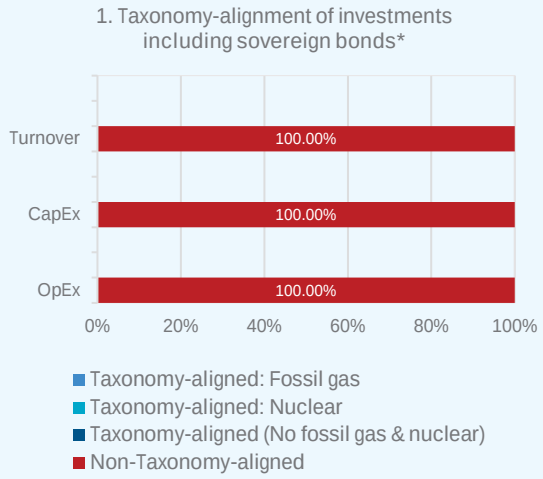
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

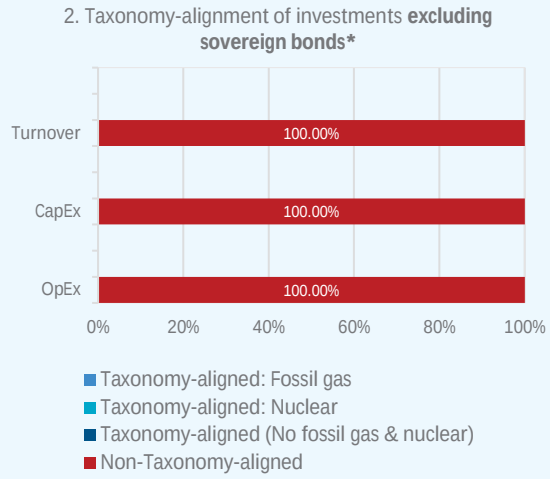
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
-**capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-**operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37.54%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 11.47%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - GREATER CHINA FUND II

Legal entity identifier: 549300ZKE6NT4EWYQU42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.92% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.35 vs. 6.53

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 48.92%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 37.26%

v) the percentage of the Fund invested in sustainable investments with a social objective: 11.16%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.2 vs.4.7
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	47.79%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	40.52%
% invested in sustainable investments with a social objective	7.27%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.92% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

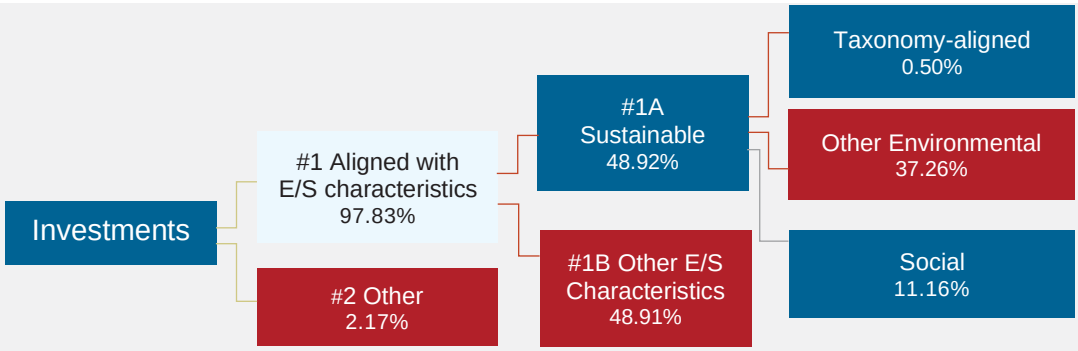
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 48.92% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.83%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 48.92% in sustainable investments of which 0.50% have an environmental objective (which is aligned with the EU Taxonomy) and 37.26% have an environmental objective (which is not aligned with the EU Taxonomy) and 11.16% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.50%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

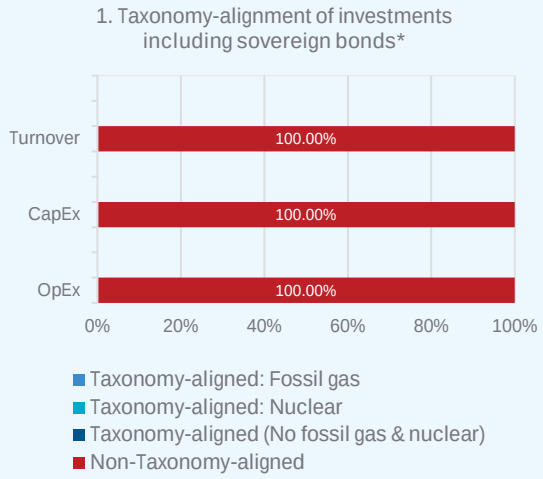
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

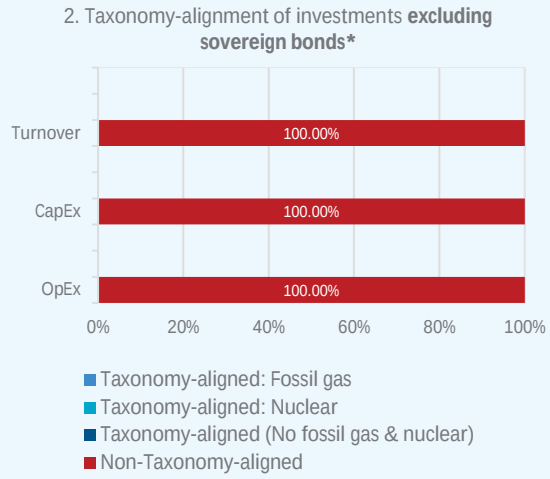
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.81 vs. 6.73

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 65.54%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.07%

v) the percentage of the Fund invested in sustainable investments with a social objective: 13.24%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.84 vs.6.73
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	58.46%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	41.43%
% invested in sustainable investments with a social objective	7.49%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 65.54% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
BANCO SANTANDER (ES)	FINANCIALS	9.20 %	SPAIN
IBERDROLA	UTILITIES	7.03 %	SPAIN
BANCO BILBAO VIZ ARGENTARIA	FINANCIALS	6.72 %	SPAIN

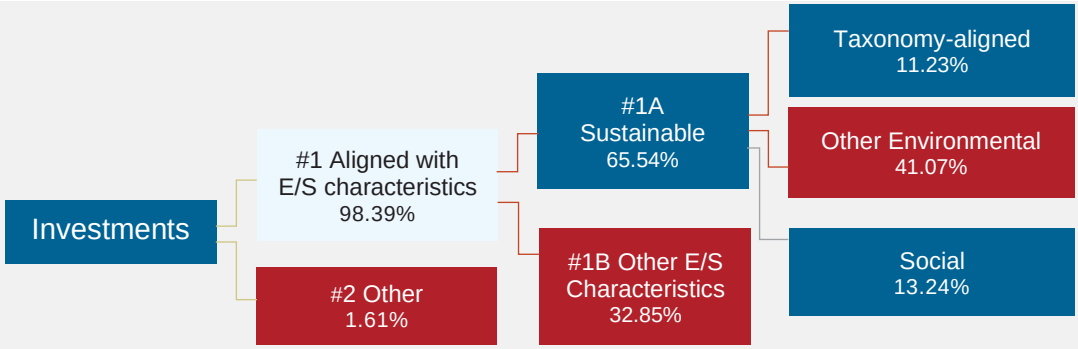
LABORATORIOS FARMA ROVI	HEALTHCARE	3.20 %	SPAIN
ENERGIAS DE PORTUGAL	UTILITIES	3.14 %	PORTUGAL
CELLNEX TELECOM SAU	COMMUNICATION SERVICES	3.06 %	SPAIN
AENA SME	INDUSTRIALS	3.05 %	SPAIN

Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 65.54% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.39%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 65.54% in sustainable investments of which 11.23% have an environmental objective (which is aligned with the EU Taxonomy) and 41.07% have an environmental objective (which is not aligned with the EU Taxonomy) and 13.24% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 11.23%. This contributed to the following environmental objectives:

1) climate change mitigation: 3.74%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

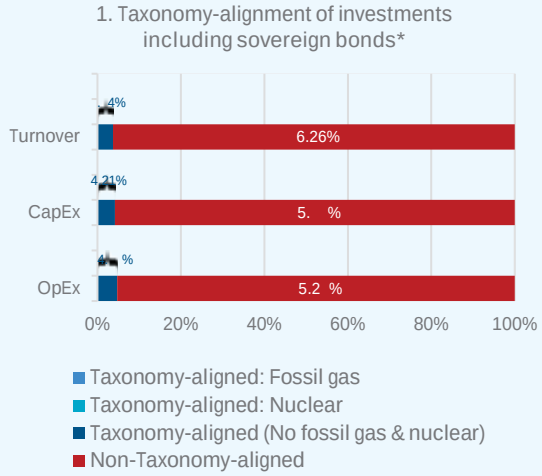
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

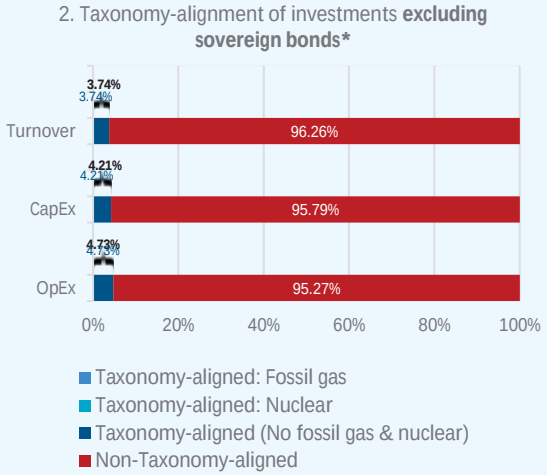
low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.61% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	3.74%	4.21%	4.73%
Non taxonomy-aligned	96.26%	95.79%	95.27%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	3.74%	4.21%	4.73%
Non taxonomy-aligned	96.26%	95.79%	95.27%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.03% for transitional activities and 1.63% for enabling activities, measured by Turnover.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	7.15%	7.15%
Taxonomy aligned investments capex	10.11%	10.10%
Taxonomy aligned investments opex	8.93%	8.93%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.07%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 13.24%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - INDIA FOCUS FUND

Legal entity identifier: 549300H5IORI7FHCNE34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.64% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.16 vs. 6.02

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 48.64%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 8.78%

v) the percentage of the Fund invested in sustainable investments with a social objective: 39.86%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.05 vs.6.06
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	49.88%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	13.38%
% invested in sustainable investments with a social objective	36.50%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.64% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

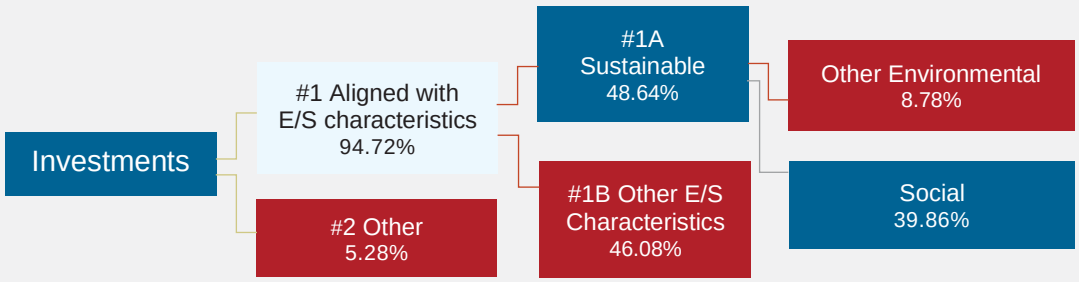
The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 48.64% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 94.72%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 48.64% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 8.78% have an environmental objective (which is not aligned with the EU Taxonomy) and 39.86% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

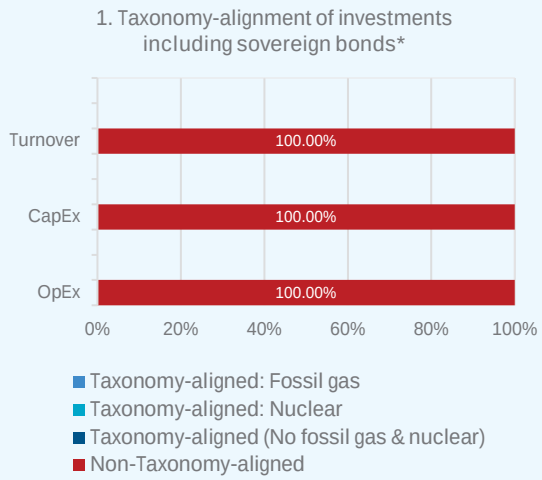
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

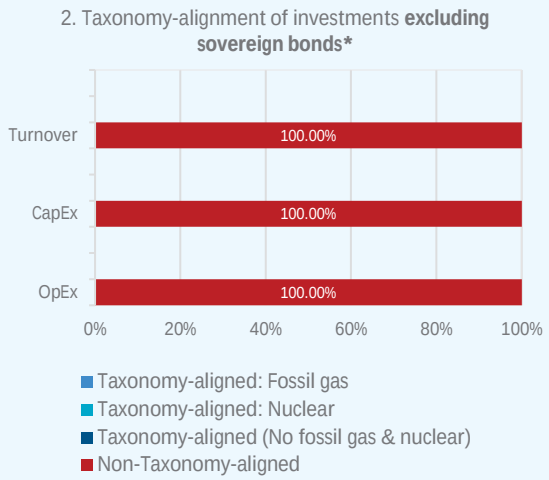
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

This graph represents 100.00% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8.78%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 39.86%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - ITALY FUND

Legal entity identifier: 549300KCMWWQDPOVF030

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 37.51% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.73 vs. 6.33

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 37.51%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 3.56%

v) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 25.76%

vi) the percentage of the Fund invested in sustainable investments with a social objective: 8.19%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.32 vs.6.08
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	30.04%
% invested in sustainable investments with environmental objective (economic activities qualifying as environmentally sustainable under EU Taxonomy)	3.52%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	13.40%
% invested in sustainable investments with a social objective	13.12%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 37.51% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

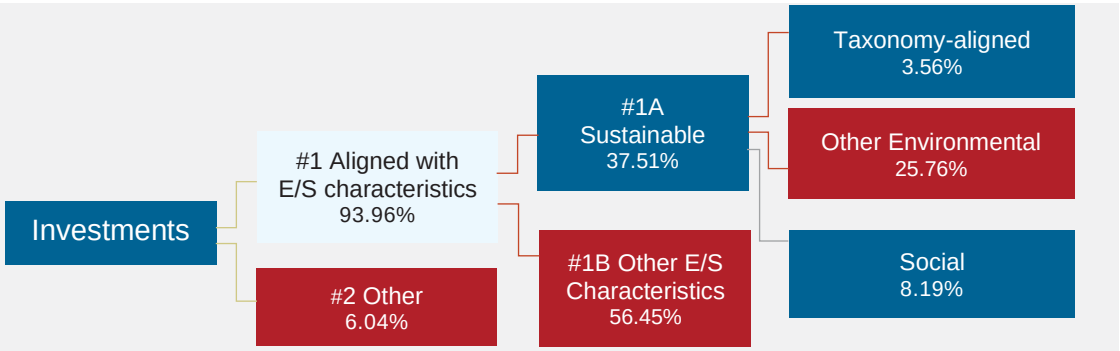
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 37.51% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.96%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 37.51% in sustainable investments of which 3.56% have an environmental objective (which is aligned with the EU Taxonomy) and 25.76% have an environmental objective (which is not aligned with the EU Taxonomy) and 8.19% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	2.85%	2.85%
Taxonomy aligned investments capex	6.12%	6.12%
Taxonomy aligned investments opex	5.77%	5.77%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.76%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 8.19%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

  Not Applicable

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - JAPAN EQUITY ESG FUND

Legal entity identifier: 549300CGT4V2XYYG0Y90

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.67% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure, assessed the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe was reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

i) the percentage of the Fund invested in securities of issuers with high ESG ratings: 99.01%

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 63.67%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 48.71%

v) the percentage of the Fund invested in sustainable investments with a social objective: 14.96%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The percentage of the Fund invested in securities of issuers with high ESG rating	98.10%
% of Fund invested in securities with exposure to Exclusions	0.00%
% of Fund invested in sustainable investments	54.38%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	38.24%
% invested in sustainable investments with a social objective	16.14%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.67% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

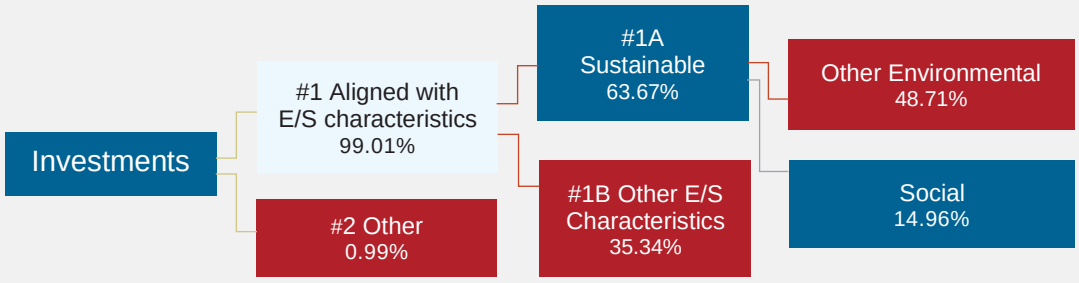
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 63.67% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.01%, which corresponds to the proportion of Fund invested in securities with high ESG ratings. This included 63.67% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy),48.71% have an environmental objective (which is not aligned with the EU Taxonomy) and 14.96% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

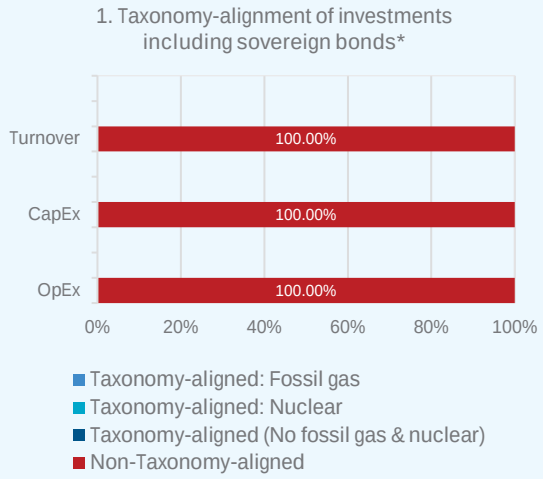
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

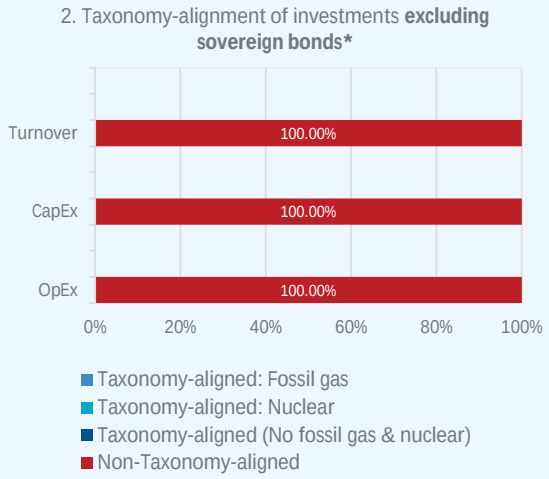
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.54% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fidelity INTERNATIONAL

	Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
	Non taxonomy-aligned	100.00%	100.00%	100.00%

	Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
	Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 48.71%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 14.96%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - JAPAN GROWTH FUND

Legal entity identifier: 549300HZWG6GBKD16L77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.33% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.91 vs. 6.01

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 40.33%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.30%

v) the percentage of the Fund invested in sustainable investments with a social objective: 10.03%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.0 vs.5.86
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	33.55%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	21.92%
% invested in sustainable investments with a social objective	11.63%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.33% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country

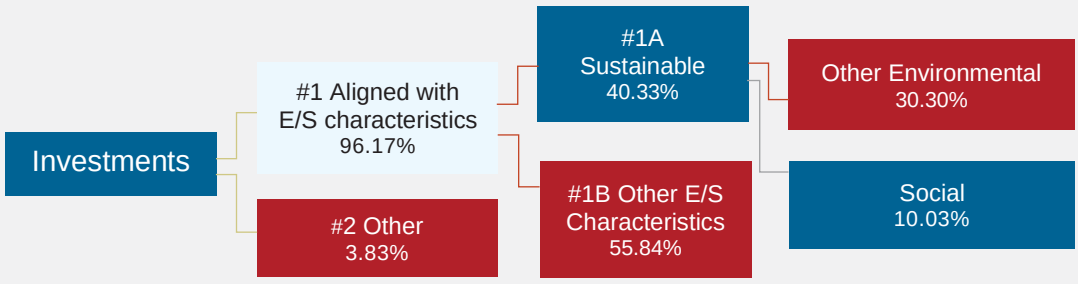
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 40.33% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.17%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 40.33% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 30.30% have an environmental objective (which is not aligned with the EU Taxonomy) and 10.03% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

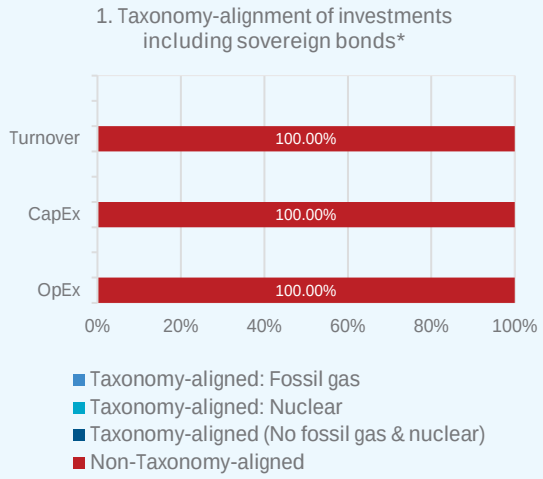
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

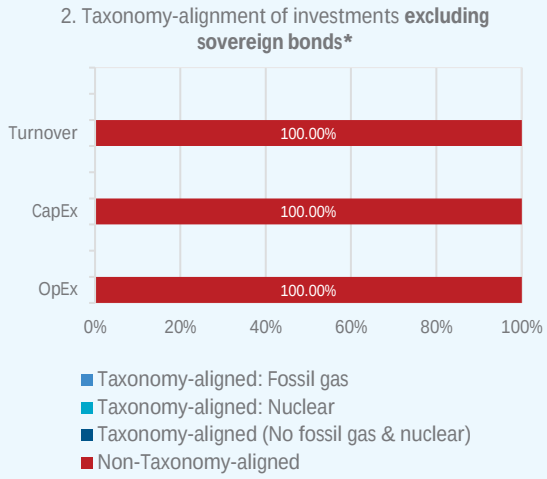
Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*

☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.80% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30.30%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 10.03%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not Applicable

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - JAPAN VALUE FUND

Legal entity identifier: 549300BQU6C0TTJ53P05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.70% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using a weighted average calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.57 vs. 7.36

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 49.70%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 42.22%

v) the percentage of the Fund invested in sustainable investments with a social objective: 7.48%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.3 vs.7.17
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	41.66%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	31.66%
% invested in sustainable investments with a social objective	10.00%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.70% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

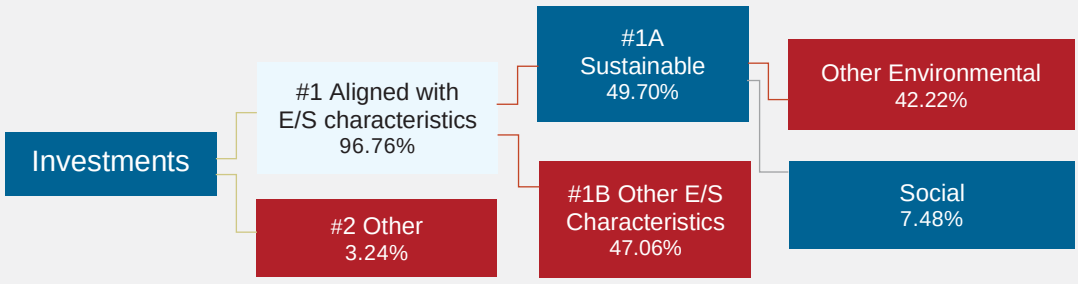
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 49.70% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 96.76%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 49.70% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 42.22% have an environmental objective (which is not aligned with the EU Taxonomy) and 7.48% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

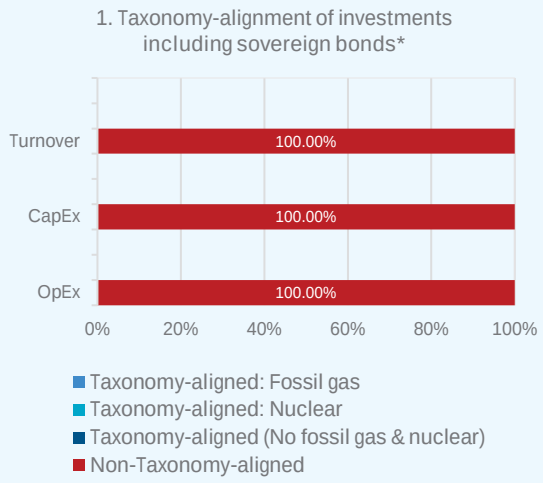
6) protection and restoration of biodiversity and ecosystems: 0.00%

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

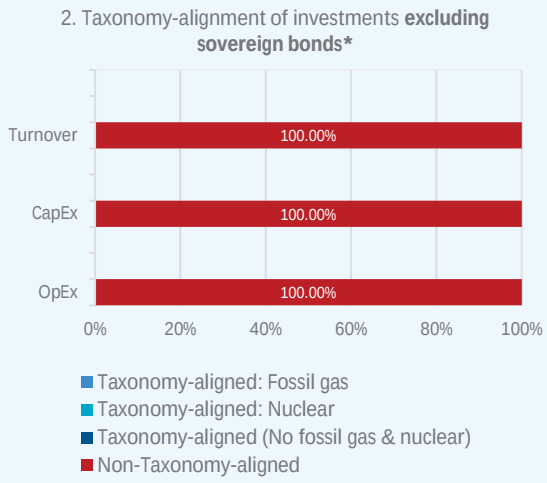
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.54% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

	Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
	Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
	Non taxonomy-aligned	100.00%	100.00%	100.00%

	Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
	Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
	Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 42.22%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 7.48%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - NORDIC FUND

Legal entity identifier: 549300WNSLR4RK6UO898

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective**: ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 7.26 vs. 6.91

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 47.50%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.17%

v) the percentage of the Fund invested in sustainable investments with a social objective: 13.29%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	7.29 vs.6.91
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	49.52%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	36.56%
% invested in sustainable investments with a social objective	12.37%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.50% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
VESTAS WIND SYSTEMS	INDUSTRIALS	4.86 %	DENMARK

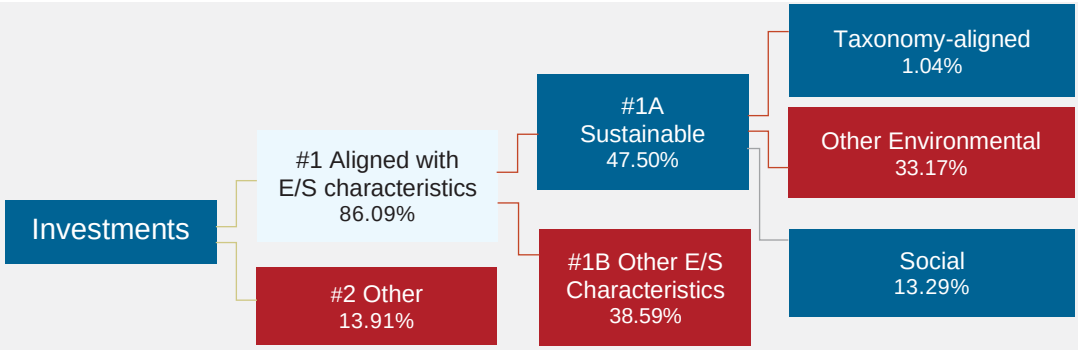
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 47.50% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 86.09%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 47.50% in sustainable investments of which 1.04% have an environmental objective (which is aligned with the EU Taxonomy) and 33.17% have an environmental objective (which is not aligned with the EU Taxonomy) and 13.29% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.04%. This contributed to the following environmental objectives:

1) climate change mitigation: 3.21%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

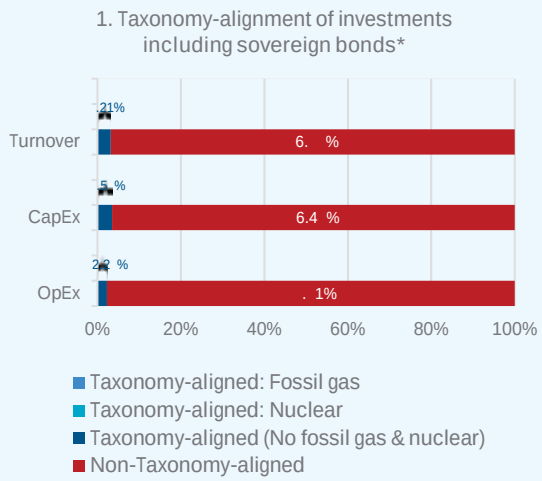
5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

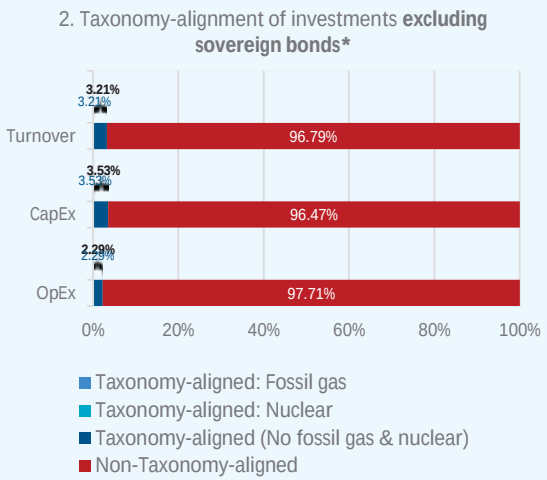
The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.



Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?



- ☐ *Yes:*
  - ☐ *In fossil gas*
  - ☐ *In nuclear energy*
- ☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the reference period.

The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

The ESG score was determined by reference to ESG ratings. These ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the Fund's portfolio was measured against the ESG score of the Fund's benchmark using an equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund:

by the financial product are attained.

i) the ESG score of the Fund's portfolio measured against the ESG score of its benchmark: 6.72 vs. 5.77

ii) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the Fund invested in sustainable investments: 28.43%

iv) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 20.63%

v) the percentage of the Fund invested in sustainable investments with a social objective: 7.80%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
The ESG score of the Fund's portfolio measured against the ESG score of its benchmark	6.52 vs.5.42
% of Fund invested in securities with exposure to Exclusions	0.00%
% invested in sustainable investments	20.27%
% invested in sustainable investments with environmental objective (economic activities not qualifying as environmentally sustainable under EU Taxonomy)	10.29%
% invested in sustainable investments with a social objective	9.89%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 28.43% of sustainable investments. The sustainable investments had an environmental and social objective.

The Fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

(i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) Quarterly reviews - discussion and review of principal adverse impacts through the Fund's quarterly review process.

(v) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2025-05-01 - 2026-04-30

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCT MANUFACTURING	INFORMATION TECHNOLOGY	7.14 %	TAIWAN

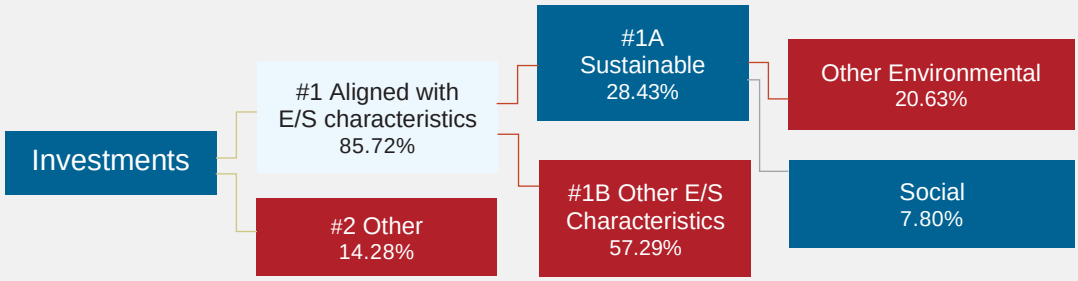
Source of data: Fidelity International

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Fund invested 28.43% in sustainable investments.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of the investments of the Fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 85.72%, which corresponds to the proportion of Fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 28.43% in sustainable investments of which 0.00% have an environmental objective (which is aligned with the EU Taxonomy) and 20.63% have an environmental objective (which is not aligned with the EU Taxonomy) and 7.80% have a social objective.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The Subcategory **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.00%. This contributed to the following environmental objectives:

1) climate change mitigation: 0.00%

2) climate change adaptation: 0.00%

3) protection of water and marine resources: 0.00%

4) transition to a circular economy: 0.00%

5) pollution prevention and control : 0.00%

6) protection and restoration of biodiversity and ecosystems: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

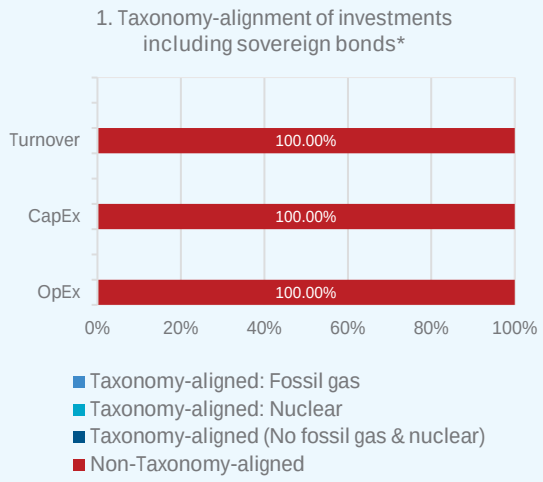
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

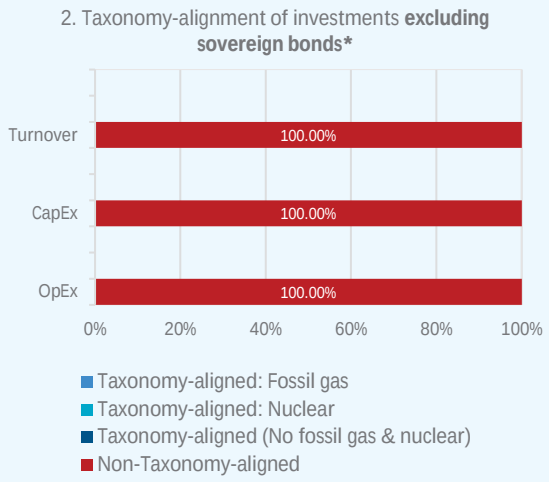
The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the Fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities that complying with the EU Taxonomy[1]?

☐ *Yes:*



☐ *In fossil gas* ☐ *In nuclear energy*



☒ *No*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 99.82% of the total investments.

1. Taxonomy-alignment of investments **including sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***	TURNOVER	CAPEX	OPEX
Taxonomy-aligned : fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned : nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned (no fossil gas & nuclear)	0.00%	0.00%	0.00%
Non taxonomy-aligned	100.00%	100.00%	100.00%

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Source of data: Moody's, quarterly average over the reference period.
The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.00% for transitional activities and 0.00% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Period ending 2025-04-30	
	Including sovereign bonds	Excluding sovereign bonds
Taxonomy aligned investments turnover	0.00%	0.00%
Taxonomy aligned investments capex	0.00%	0.00%
Taxonomy aligned investments opex	0.00%	0.00%

Due to a significant change in methodology in prior periods, EU Taxonomy alignment data is only comparable from July 2024 onwards.

The compliance of the investments of the Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.63%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 7.80%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund were invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund took the following actions to meet the environmental or social characteristics:

- The Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

- Quarterly Sustainability Review to discuss and review the Fund's qualitative and quantitative environmental and social characteristics.
- The Fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the Fund attains the environmental or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

  Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

- *How did this financial product perform compared with the broad market index?*

  Not Applicable

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: FIDELITY FUNDS - SUSTAINABLE ASIAN FOCUS FUND

Legal entity identifier: 254900ZH0Z8VWSBW0D79

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 34.88%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 63.96%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund was closed during the reference period covered by this report. During the closing process, the sustainability-related commitments, as set out in the Fund's pre-contractual documentation, might not have been fully met. The Fund aimed to achieve capital growth over the long term by investing in sustainable investments. The Fund determined sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to

preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure, assessed the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe was reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The following data has been compiled based on the quarterly average of data at the end of each quarter, aligned to the applicable reporting cycle of the Fund.

Sustainability indicators measure how the sustainable objectives of the financial product are attained.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Fund:

i) the percentage of the Fund invested in sustainable investments: 98.84%

ii) the percentage of the Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 34.88%

iii) the percentage of the fund invested in sustainable investments with a social objective: 63.96%

iv) the percentage of the Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0.00%.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

	Period ending 2025-04-30
% of Fund invested in sustainable investments	98.83%
% of Fund invested in sustainable investments with environmental objective that do not qualify under the EU Taxonomy	34.51%
% invested in sustainable investments with a social objective	64.32%
% of Fund invested in securities with exposure to Exclusions	0.00%

Due to a significant change in methodology in prior periods, sustainability indicators are only comparable from July 2024 onwards.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using

rights, anti-corruption and anti-bribery matters.

controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's Fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens applied: Issuers identified as failing to behave in a way which meets their Fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not be considered sustainable investments.
