Directors' Report

I Introduction

Fidelity Funds (the "Company") is an open-ended investment company established in Luxembourg as a *société d'investissement à capital variable* ("SICAV"). It has an umbrella structure and its assets are held in a number of different funds ("sub-funds"). Each sub-fund is a separate portfolio of securities and other assets managed in accordance with specific investment objectives. Separate classes of shares in the Company (the "Shares") are issued in relation to the sub-funds. Each sub-fund provides an investment opportunity in professionally managed pools of securities in different geographical areas and currencies, with the investment objective of capital growth, income or a balance between capital growth and income.

Shares are authorised for sale in a number of jurisdictions and may be listed on the Luxembourg Stock Exchange's Euro MTF market. However, shares in the Institutional Reserved Funds are not presently listed. Further information on the stock exchange listings can be found on https://www.bourse.lu/official list or may be obtained from the Management Company upon request.

II Financial Statements

The Board of Directors of the Company (the "Board") submits its report and the audited financial statements for the year ended 30 April 2026.
The audited financial statements are set out on pages 148 to 740 of this Annual Report, with results for the year appearing in the Statement of Operations and Changes in Net Assets on pages 616 to 639. Dividend information for the sub-funds is detailed on pages 689 to 729.

A copy of the Annual Report can be found on the Fidelity website. A hard copy of the Annual Report may be obtained upon request from either the offices of the companies registered as distributors or from the Registered Office of the Company.

Comparative figures for the previous year can be found in the Annual Report of the Company for the year ended 30 April 2025.

III Activities during the year

During the year, the Company followed the normal activities of an open-ended investment company. The Investment Manager's Report that follows gives an overview of performance. As at 30 April 2026, the number of registered Shareholders worldwide totalled 10,901. However, the total number of investors in the Company is significantly greater than the number of registered Shareholders due to certain registered Shareholders representing the holdings of many underlying clients. Assets under management as at 30 April 2026 exceeded USD 179 billion.

The Directors may from time to time close sub-funds as well as launch further sub-funds with different investment objectives, subject to the approval of the *Commission de Surveillance du Secteur Financier* ("CSSF").

At year end, the Company consisted of 122 active sub-funds.

Details of changes to the range of sub-funds during the year are provided in the Notes to the Financial Statements on pages 674 to 740.

IV Board of Directors

The Directors of the Company as at 30 April 2026 are listed on page 5. Six of the nine Directors serving as at 30 April 2026 are considered non-executive Directors, three of whom are considered by the Board to be independent of the Investment Manager and free from any other relationship which could materially interfere with the exercise of their independent judgement.

V Management of the Company

FIL Investment Management (Luxembourg) S.à r.l. ("FIMLUX") as the Management Company is responsible for the investment management, administration and distribution functions of the Company. FIMLUX may delegate part or all of such functions to third parties, subject to overall control and supervision. With the consent of the Company, FIMLUX has delegated the investment management function to FIL Fund Management Limited ("FFML") and the distribution function to FIL Distributors ("FID").

FIMLUX provides services to the Company in connection with keeping the Company's accounts, determination of the Net Asset Value of shares in each sub-fund on each Valuation Date and dispatch of dividend payments.

FIMLUX is responsible for the production of the Annual Report and Accounts of the Company for each financial year, which are required under general principles to give a true and fair view of the state of affairs of the Company. In accordance with those same principles, FIMLUX is responsible for:

- selecting suitable accounting policies and applying them consistently;
- preparing the Annual Report and Accounts on a going concern basis;
- maintaining proper accounting records which disclose at any time the financial position of the Company; and
- complying with both the Luxembourg Law of 10 August 1915 on commercial companies, as amended, and the Luxembourg Law of 17 December 2010, as amended, on undertakings for collective investment.

The Managers of the Management Company as at 30 April 2026 are also listed on page 5.

There have been the following changes to the Managers of the Management Company during the year ended to 30 April 2026.

- Ms Carla Sload has been appointed as Manager of the Management Company, effective 02 March 2026.
- Ms Karin Winklbauer has been appointed as Manager of the Management Company, effective 02 March 2026.

Conducting Officers

As at 30 April 2026 the Conducting Officers ("COs") appointed by FIMLUX were as listed on page 5.

There have been the following changes to the COs of FIMLUX during the year ended 30 April 2026:

- Ms Florence Alexandre has tendered her resignation from her role as Conducting Officer ("CO") of FIMLUX, effective as of 31 July 2025.
- Mr Christopher Skelton has been appointed as CO of FIMLUX, effective from 02 March 2026.
- Mr Harjeet Singh has been appointed as CO of FIMLUX, effective from 02 March 2026.
- Mr Husain Rangwala has been appointed as CO of FIMLUX, effective from 02 March 2026.
- Mr Martyn Edwards has been appointed as CO of FIMLUX, effective from 02 March 2026.
- Mr Stefan Rauen has been appointed as CO of FIMLUX, effective from 02 March 2026.
- Ms Sylviane Kerzerho has tendered her resignation from her role as CO of FIMLUX, effective as of 02 March 2026.

Conducting Officers' Responsibilities

The COs have a duty to ensure that the tasks delegated to FFML and to FID as well as the administrative functions carried out by the Management Company are performed in compliance with Luxembourg Law, the Company's Articles of Incorporation and the current Prospectus. Amongst other things, the COs ensure compliance with the investment restrictions of the Company and oversee the implementation of the investment policy of each sub-fund by the appointed Investment Manager.

The Management Company and/or the COs report to the Board on a quarterly basis and the COs inform the Management Company and the Board without delay of any materially adverse matters resulting from the actions of the Investment Manager, the General Distributor or of the Management Company in relation to the administrative functions.

VI Role of Investment Manager and Central Administrative Agent

FFML provides day-to-day investment management to the Company, under the supervision and subject to the control of the Board and FIMLUX. FFML is authorised to act on behalf of the Company and to select agents, brokers and dealers through whom to execute transactions and is required to provide the Board and FIMLUX with any reports it may require.

FFML may receive investment advice from, and act upon the advice of, any company within the holding company FIL Limited ("FIL"), including affiliate companies of FFML, and may execute, transact and otherwise carry out its functions, duties and obligations with or through any of these Fidelity companies. FFML remains responsible for the proper performance by such companies of those responsibilities.

The duties of the Investment Manager include the design, implementation and maintenance of controls and procedures to administer the assets of the Company and to manage its affairs properly. The process extends to operational and compliance controls and risk management. In addition, the Company and FIMLUX have appointed FIL to provide services in relation to the investments of the sub-funds including valuation, statistical, technical, reporting and other assistance.

VII Corporate Governance

The Board applies a clear and transparent corporate governance framework for the management of the Company's affairs.

1. The Board has adopted the principles of good governance as set out in the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct updated and reissued in 2022 and considers that the Company has been in compliance with it in all material respects throughout the financial year ended 30 April 2026.
2. There are contractual arrangements in place governing the relationships with FIMLUX, FFML, FID and FIL as well as other third party suppliers to the Company.
3. The Directors take decisions in the interests of the Company and its Shareholders and refrain from taking part in any deliberation or decision which creates conflict between their personal interests and those of the Company and its Shareholders.
4. The Board meets at least four times a year. The Board requests and receives reports from the COs, FIMLUX, FFML, and FID on the various activities including compliance controls and risk management undertaken by the relevant FIL companies. Senior representatives of FIMLUX, FFML and FID attend meetings by invitation, thus enabling the Board of Directors to question the reports presented to it.
5. As part of the control framework within FIL, all FIL group employees are subject to the FIL Code of Conduct and its associated policies, which, amongst other things, set out procedures for personal account dealing in securities. The Board receives regular reports from the FIL Ethics Office on Employee Personal Trading to ensure that any conflicts of interest between personal accounts dealing by FIL group staff and the interests of the Company are properly managed.
6. The nomination of new Directors is considered by the Board and is subject to the approval of the CSSF and ultimately the approval of Shareholders at the Annual General Meeting. The level of Directors' fees is put to Shareholders for approval, in accordance with the Articles of Incorporation. Directors who are employed by FIL or its subsidiaries, its holding company FIL, or its subsidiaries have waived their fees for the year ended 30 April 2026. For those Directors that have not waived their fees, the remuneration earned for the year ended 30 April 2026 was in aggregate USD 559,937 subject to Shareholder approval, as set out on page 685 of this Annual Report. For comparison purposes the EUR equivalent was EUR 488,000.
7. The Directors are committed to ensuring that Shareholders are kept informed of matters relevant to their investment and that all Shareholders are treated fairly. The maintenance and integrity of information concerning the Company on the Fidelity website is the responsibility of FIL. FIMLUX is responsible for the accuracy of translations of documents which may be available to investors in languages other than English. The Directors consider and, if thought fit, approve the English form of the financial statements presented to them at the relevant Board meetings.

VIII Other Information

Proxy Voting

FFML has a policy of voting on equity securities where it is possible to do so, unless the loss of liquidity as a result of attendant share blocking is deemed to outweigh the expected benefits to be gained. Such voting is undertaken in accordance with written proxy voting guidelines employed by the FIL group, of which FFML is a part, and takes account of prevailing local market best practices. The Board of the Management Company reviews and adopts the proxy voting policy, activity and guidelines annually. FIL's Principles of Ownership, which summarises how FIL engages with companies in which the Company's sub-funds have invested, can be accessed from the Corporate Governance section of FIL's website (https://www.fidelityinternational.com).

Commissions and Internal crossing

FFML uses supplemental research in the course of its work for the Company and other clients provided by brokers through whom the Investment Manager executes transactions for the Company and other clients. All dealing commission paid by the Company and other clients on trades with brokers account only for the costs of executing the trade. All supplemental research used by the Investment Manager is valued and paid for separately from execution and other relationships with brokers in accordance with inducement regulations.

The Company participates in the Investment Manager's interfunding programme whereby FIL's traders, on occasion, identify situations where an account or sub-fund managed by FIL is buying the same security that another account or sub-fund is selling. If a trader can confirm that it would be in the interests of both accounts to execute a transaction between them rather than in the market then an interfund transaction is executed. These transactions amounted to USD 55,567,112 during the year under review.

Swiss investors

Swiss investors are advised that with the exception of Asia Equity II ESG Fund, Asia Pacific Multi Asset Growth & Income Fund, Global Founders Fund, Global Smaller Companies Fund, Greater China Fund II, the Institutional Target Funds, the present sub-funds of the Company have been authorised by the Swiss Financial Market Supervisory Authority for distribution in Switzerland.

IX Business of the Annual General Meeting

The Board of Directors is proposing the following resolutions be put to the Shareholders at the Annual General Meeting of the Company to be held on 01 October 2026 at noon:

- the presentation of the Report of the Board of Directors;
- the presentation of the Audit Report;
- the approval of the Statement of Net Assets and Statement of Operations and Changes in Net Assets for the year ended 30 April 2026;
- the discharge of the Board of Directors;
- the election/re-election of Directors;
- the approval of the payment of Directors' fees;
- the re-election of the external Auditor;
- the approval of the payment of dividends; and
- consideration of such other business that may properly come before the Annual General Meeting under the Articles of Incorporation.

BOARD OF DIRECTORS

FIDELITY FUNDS

28 July 2026

This Annual Report of the Company does not constitute an offer of shares. Shares are offered on the basis of the information contained in the current Prospectus (and the documents referred to within it) supplemented by the last available Annual Report of the Company and any subsequently published Semi-Annual Report. Copies of the current Prospectus, latest Annual and Semi-Annual Reports and Portfolio Changes for the Company are available free of charge from the registered office of the Company or from any of the companies registered as distributors of the Company, or, for investors in Switzerland, from the Representative of the Company in Switzerland.

This Annual Report has been approved for circulation in the United Kingdom by FIL Investments International, UK distributor of the Company, authorised and regulated in the UK by the Financial Conduct Authority.

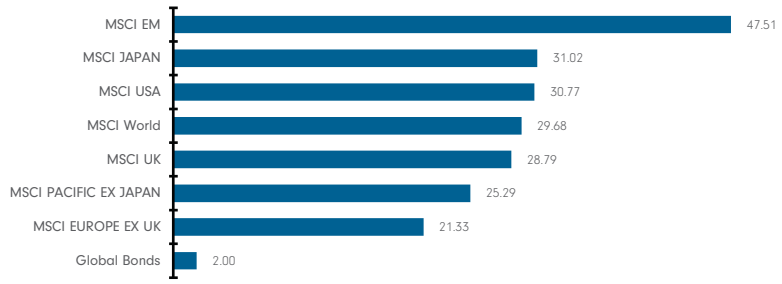
Investment Manager's Report*



Investment Manager's Report

Equity Markets

Global equities advanced in the 12-month period, despite intermittent volatility due to geopolitical tensions. Artificial intelligence (AI)-driven demand, upbeat corporate earnings, and steady macro indicators led market performance, although concerns over AI valuations and the Middle East conflict posed significant headwinds. As the US agreed upon a milder tariff framework with key trade partners at the beginning of the period, equities gained over signs of reduced trade uncertainty. The US Federal Reserve's (Fed) reduction in policy rate by a cumulative 75 basis points (bps) from September to December 2025 provided additional momentum. Rate reductions by the European Central Bank (ECB) and the Bank of England (BoE) amid decelerating inflation also aided sentiment. Nevertheless, early 2026 was marked by geopolitical tensions as the US doubled down on its combative stance regarding Venezuela, Greenland, and Iran. Markets experienced a sharp downturn in March as tensions rose between US-Israel and Iran, which compounded risks for global growth and inflation. In April, markets strongly rebounded as the Middle East tensions de-escalated and a temporary ceasefire was announced, alongside a market rotation back into AI stocks.

Source: Refinitiv DataStream, Total Returns in USD rebased to 100, MSCI World index and BofA ML Global Broad Market index, 30.04.2025 - 30.04.2026

Source: Refinitiv DataStream, Total Returns (%), USD, 30.04.2025 - 30.04.2026

Against this backdrop, key regional markets ended higher, with equities in Emerging Markets, Japan, and US leading the gains. Within Emerging Markets, AI-linked technology stocks in Taiwan and Korea led the rally, besides favourable macro indicators and supportive policy in China. In Japan, policy optimism and pro-growth fiscal measures aided sentiment. From a sector perspective, energy and information technology strongly advanced, amid growing expectations of higher-for-longer inflation driven by oil prices and sustained investment in AI infrastructure. In currency terms, returns in US dollar were supported by its depreciation against the euro, yen and sterling.

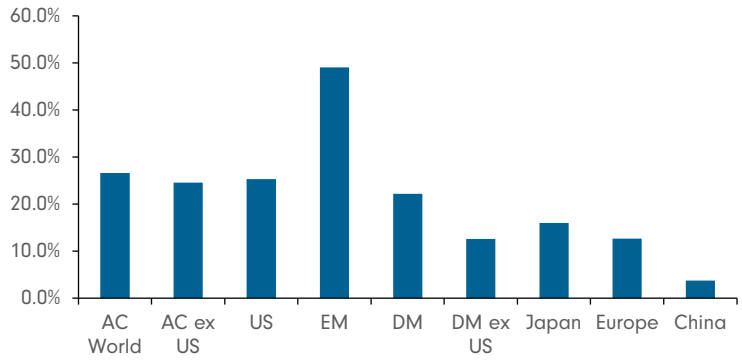
European equities delivered positive returns over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter of 2026 as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader risk-on rebound and an encouraging start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks. Against this backdrop, the ECB reduced key interest rates to 2.0% in 2025 and subsequently left policy unchanged, reiterating that future policy decisions would remain data dependent and assessed on a meeting-by-meeting basis.

UK equities delivered strong returns over the 12-month period. Performance was notably bifurcated across market caps, with large-cap stocks significantly outperforming their smaller counterparts. The UK market benefited from attractive valuations, which supported international inflows, mergers and acquisitions, and substantial share buyback activity. However, despite strong equity market performance, economic conditions remained fragile, with persistent inflation, subdued growth and fiscal uncertainty weighing on investor sentiment. Surprise US tariff announcements led to some volatility at the start of the review period, but markets eventually stabilised as most measures were suspended and trade negotiations progressed, with the UK securing the first bilateral agreement. As trade tensions eased, momentum improved through May and into the middle of the year, supported by resilient corporate earnings and a gradually more supportive monetary backdrop. Speculation around geopolitical developments, including a potential ceasefire in Ukraine, drove periodic swings in sentiment, while an accommodative shift by the Fed reinforced the global risk environment. Domestically, inflation remained above target but showed signs of easing as labour market conditions softened and wage growth slowed. The BoE cut interest rates by 100 bps over 2025, reflecting a balance between persistent price pressures and weakening demand. Fiscal uncertainty resurfaced ahead of the November Budget, weighing on smaller domestically-focused companies, but the announcement helped steady markets by avoiding major near-term tax or spending shocks and providing clearer guidance on borrowing and government bonds (gilt) issuance. In 2026, gains in January and February were largely offset by a sharp correction in March, as the Middle East conflict raised energy prices and renewed concerns around the outlook for inflation and economic growth. The resulting energy shock led to a repricing of inflation expectations, higher bond yields and tighter financial conditions.

US equity markets posted strong gains in the 12-month period, driven by resilient corporate earnings and continued enthusiasm around AI investment despite episodes of geopolitical and macroeconomic volatility. For much of the period, market leadership remained concentrated in large-cap technology and semiconductor stocks, with AI beneficiaries continuing to dominate index returns. This cohort accounted for a disproportionate share of performance, reflecting strong earnings delivery and sustained investor demand in this structural growth theme. Towards the end of 2025, there were signs of modest broadening in market participation as advances in AI led to growing fears of AI disruption risk for capital light, knowledge intensive businesses, even as investors closely scrutinised returns on rising AI-linked capital expenditure. This resulted in a pronounced rotation into "hard asset" sectors such as energy, materials, and industrials, which are considered less vulnerable to AI disruption. The conflict in the Middle East reinforced the appeal of asset-backed companies having durable pricing power amid renewed inflationary pressures. However, this rotation was short-lived, and by

*The information stated in this report is historical and not necessarily indicative of future performance.

Investment Manager's Report*



April leadership had re concentrated in mega-cap growth stocks, particularly within technology and AI-linked names. Geopolitical developments, such as the conflict in the Middle East, intermittently contributed to market volatility, impacting energy prices and risk sentiment. While these episodes led to short-term drawdowns and sector rotation, notably into energy and defensive assets, their overall impact on US equity market direction over period was limited. On the monetary policy front, the Fed transitioned from a peak rate environment into an easing phase in the second half of 2025, delivering a series of rate cuts as inflation moderated. Nevertheless, policy remained relatively restrictive overall, with the Fed maintaining a cautious, data-dependent stance, and slowing the pace of easing into early 2026 given renewed inflationary pressures.

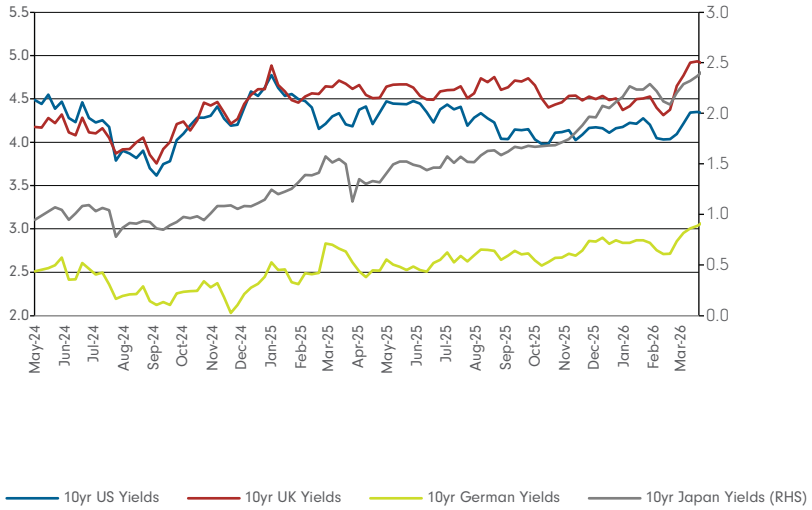
The Japanese equity market rose strongly during the period, with both the Nikkei 225 and TOPIX reaching record closing highs. Concerns over US tariffs and their impact on the global economy weighed on investor sentiment earlier in 2025, but a pause in trade tariffs, gains in technology stocks and strong corporate earnings supported equities later. In July 2025, US President Donald Trump announced a trade deal with Japan, which will set tariffs on imports from the country at 15%, much lower than the initially announced rate. A positive market response to the formation of Prime Minister Sanae Takaichi's new administration also supported equities. The Bank of Japan's (BoJ) key short-term interest rate stood at 0.75% at the end of the review period, while the yen weakened to around ¥157 against the US dollar. Fundamentals remained supportive. Japan's October to December 2025 earnings season was robust, with aggregate profits rising in the mid-single digits and a high share of companies upgrading full-year guidance. All sectors recorded positive returns during the year, with energy, information technology and materials topping the table.

Asia ex Japan equities advanced over the period. Although there was uncertainty around tariffs, investor sentiment recovered after the US began negotiations with key trade partners. Technology-focused markets including Taiwan and South Korea registered strong gains amid growing enthusiasm for AI-related stocks. Both these markets attracted high foreign investment inflows in the region, supported by their respective leading semiconductor businesses and upward earnings revisions. However, towards the tail end of the period, an escalation in tensions between US-Israel and Iran pushed oil prices higher adding to inflationary concerns, which also raised expectations of tighter monetary policy. Countries more reliant on imported energy were impacted the most. Nevertheless, markets largely looked through the macro uncertainty, with ceasefire hopes, earnings resilience and AI-linked demand being the dominant anchors. Chinese equities ended the period with muted returns. Despite stronger economic activity data early in 2026 and a quality-focused growth target in the 15th Five-Year Plan supporting sentiment, equities remained under pressure. Indian equities declined as rising oil prices added to inflationary concerns, exacerbated by the country's reliance on energy imports. Persistent foreign institutional investor selling continued to weigh on sentiment, alongside tariff-related uncertainties that dampened investor confidence. In ASEAN, Indonesian equities came under pressure after MSCI flagged concerns over market transparency and trading constraints, which weighed on investor confidence and intensified selling pressure. At a sector level, the information technology (IT) sector led the gains.

Emerging markets (EMs) advanced over the year and outperformed developed markets. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and strong support from AI, alongside movements in commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, further aided by a constructive backdrop for industrial metals. Geopolitical tensions in the Middle East prompted intermittent risk aversion. Later in the period, EM equities were supported by US Fed rate cuts, continued US dollar weakness and firmer commodity prices, with momentum extending into early 2026 on the back of AI-driven demand and strength in industrial and precious metals. Sentiment weakened towards end-February as tensions in Iran escalated, pushing oil prices higher and triggering a market pullback, before stocks rebounded on the back of a temporary ceasefire and strength in large-cap Asian technology names.

Earnings outlook remains positive despite geopolitical concerns

Source: IBES, LSEG DataStream, 30.04.2026. Data for MSCI Indices



The consensus one-year-forward global earnings growth expectations remained broadly robust as of April 2026, although estimates had begun to soften modestly amid geopolitical uncertainty, trade tensions and persistent inflation pressures. The earnings expansion is broad-based, with consumer discretionary, industrials, materials, and utilities, as well as communication services, IT and energy, all expected to deliver solid profit growth. However, a risk to the earnings trajectory is the duration of the US-Iran conflict. Markets are, for now, looking through it, implicitly assuming a relatively short duration, supported by continued engagement towards de-escalation. There is also acknowledgment over the global economy being less energy-intensive than in prior decades. This view is reasonable but conditional—the longer the conflict persists, the greater the risk and scale of second-and third-order effects, and demand destruction.

Investment Manager's Report*

Bond markets

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. The period began with concerns around global trade policy, as repeated tariff announcements and policy shifts increased volatility and supported demand for safe-haven assets, particularly US Treasuries. German government bond (Bund) yields also remained volatile, reflecting rising fiscal pressures, including expectations of higher defence spending and increased sovereign issuance, while UK government bonds (Gilts) came under pressure from stronger inflation and a more cautious BoE stance. Market conditions became more unsettled as the period progressed. Thereby, long-end sovereign yields rose globally, driven by higher term premia, fiscal uncertainty and concerns around inflation persistence. Yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. In the US, weaker labour market indicators later reinforced expectations of policy easing, with the US Fed beginning a gradual rate cutting cycle. In contrast, the ECB maintained a more cautious stance, as inflation remained sensitive to energy price dynamics, limiting the scope for a clear easing path.

Global sovereign yields move higher

Source: Bloomberg 30.04.2026

Entering 2026, the backdrop shifted more decisively as escalating tensions in the Middle East and the Iran conflict led to a sharp rise in oil prices, reviving concerns around a stagflationary shock. Inflation expectations edged higher, prompting markets to reassess the pace and extent of future policy easing. By April 2026, rate cut expectations were scaled back and pushed further away, with central banks adopting a more cautious tone. Sovereign bond yields moved higher across regions, with curves steepening moderately as longer-dated yields came under pressure. US Treasury yields rose modestly over the month, while moves were more pronounced in Europe and the UK, where Bund and Gilt yields reached multi-year highs. In Japan, government bonds also sold off as yields rose materially (10-year JGB yield moved to c.2.5% by end-April 2026), as markets priced in persistent inflation, gradual BoJ normalisation and reduced official demand for government bonds. Credit markets posted positive returns and remained relatively resilient. Spreads stayed tight despite elevated macro and geopolitical risks, supported by strong technical demand and improved risk sentiment, although bouts of volatility led to temporary widening in credit spreads.

Footnotes

1. These sub-funds have not been authorised by the Swiss Financial Market Supervisory Authority (FINMA) and have therefore not been approved for distribution in Switzerland.

2. These sub-funds with substantial Chinese exposure were closed from 30 April to 3 May 2024 due to China national holidays. During this period, these sub-funds were closed for dealing and any published non-official Net Asset Value were based on the final issued Net Asset Value prior to the closure. The Net Asset Values as at 30 April 2024 disclosed in the financial statements have been fair valued.

3. These sub-funds have not been notified for marketing in Germany and the shares of these sub-funds may not be marketed to investors in Germany.

4. These sub-funds are not authorised by the Securities & Futures Commission in Hong Kong and may not be promoted or offered to the public in Hong Kong.

5. These sub-funds have not been authorised by the "Finanzmarktaufsicht" (Austrian Financial Market Authority) and have therefore not been approved for distribution in Austria.

6. These sub-funds are authorised by the Securities and Futures Commission in Hong Kong under the Securities and Futures Commission Code on Unit Trusts and Mutual Funds and not under the Securities and Futures Commission Code on Real Estate Investment Trusts. Such authorisation does not imply official recommendation.

7. This sub-fund can invest in Indian equity securities through a wholly-owned Mauritian subsidiary, FIL Investments (Mauritius) Limited. As at year end the Mauritian subsidiary only held cash.

8. These sub-funds are defined as Article 8 sub-funds as per Sustainable Finance Disclosure Regulation ("SFDR"). SFDR refers to the regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector. Article 8 sub-funds seek to achieve their investment objectives while promoting, among other characteristics, environmental or social characteristics, or a combination of those characteristics. Information on the environmental/social characteristics for the sub-funds disclosing under Article 8 of SFDR, is made available in the annex to the unaudited section of the Annual Report.

9. These sub-funds are defined as Article 9 sub-funds as per SFDR. Article 9 sub-funds have sustainable investment as their objective. Information on sustainable investments for the sub-funds disclosing under Article 9 of SFDR is made available in the annex to the unaudited section of the Annual Report.

Within the meaning of SFDR, the others sub-funds are defined as Article 6 and do not promote environmental and/or social characteristics nor have a sustainable investment as their objective as at year end.

Please note that not all countries of distribution have been disclosed in the above footnotes. For a complete list please refer to the prospectus.

Performance notes on Fund Reviews

Cumulative Returns are calculated from published Net Asset Value price to published Net Asset Value price with gross income reinvested on ex-dividend dates. For sub-funds where the swing pricing policy has been applied as per note 2 on page 678, the Cumulative Returns are calculated to or from the adjusted Net Asset Value price.

This calculation does not include any initial charge, and represents the true investment performance of the sub-fund.
The performance figures reported under the column "Since Launch" in the tables are calculated from the commencement of operations until 30 April 2026.

Annualised performance is an alternative way of expressing a sub-fund's total return. It assumes a steady compound rate of growth during the period in question and is not the sub-fund's year by year performance, which fluctuated over the periods shown.
Please note that the Manager's Overviews are based on the first Share class disclosed for each sub-fund. Performance data is expressed in the Share class currency of denomination, indicated by the ISO code shown.

Manager's Overview

US equity markets posted strong gains in the 12-month period, driven by resilient corporate earnings and continued enthusiasm around AI investment despite episodes of geopolitical and macroeconomic volatility. For much of the period, market leadership remained concentrated in large-cap technology and semiconductor stocks, with AI beneficiaries continuing to dominate index returns. This cohort accounted for a disproportionate share of performance, reflecting strong earnings delivery and sustained investor demand in this structural growth theme. Towards the end of 2025, there were signs of modest broadening in market participation as advances in AI led to growing fears of AI disruption risk for capital light, knowledge intensive businesses, even as investors closely scrutinised returns on rising AI-linked capital expenditure. This resulted in a pronounced rotation into "hard asset" sectors such as energy, materials, and industrials, which are considered less vulnerable to AI disruption. The conflict in the Middle East reinforced the appeal of asset-backed companies having durable pricing power amid renewed inflationary pressures. However, this rotation was short-lived, and by April leadership had re-concentrated in mega-cap growth stocks, particularly within technology and AI-linked names. Geopolitical developments, such as the conflict in the Middle East, intermittently contributed to market volatility, impacting energy prices and risk sentiment. While these episodes led to short-term drawdowns and sector rotation, notably into energy and defensive assets, their overall impact on US equity market direction over period was limited. On the monetary policy front, the Fed transitioned from a peak rate environment into an easing phase in the second half of 2025, delivering a series of rate cuts as inflation moderated. Nevertheless, policy remained relatively restrictive overall, with the Fed maintaining a cautious, data-dependent stance, and slowing the pace of easing into early 2026 given renewed inflationary pressures.

The fund delivered strong positive returns but underperformed the comparative index over the period. The fund's underweight exposure to US mega-cap technology companies and associated AI beneficiaries, alongside allocations to selected companies perceived at risk from AI disruption, was a key driver of underperformance over the period. Among the 'Magnificent Seven' companies, performance was mixed. Not owning Nvidia and Broadcom weighed on relative returns. Despite occasional pullbacks, both companies' share prices rose amid strong earnings and ongoing enthusiasm around AI/cloud infrastructure. By contrast, not owning Microsoft and Meta contributed to relative returns as investors scrutinised AI capital expenditure (capex) plans, with some concerns over AI disruption risk. The strategy's core-value bias, coupled with the portfolio managers' valuation discipline has kept them away from investing in these richly valued names. Elsewhere in the AI supply chain, the position in Intel advanced amid robust datacentre and AI-related demand. Sentiment was further supported by ongoing strategic engagement with partners (including Nvidia), private equity and continued support from US government, which strengthened the balance sheet and enhanced the credibility of Intel's foundry ambitions. Similarly, the position in Caterpillar added value, as the company benefited from AI-linked datacentre backup power demand. Performance was also supported by stronger infrastructure spending, manufacturing reshoring and mining capex. As AI development advanced, the overweight exposures to Salesforce and Adobe pared gains as innovation in generative AI tools intensified perceived disruption risk across software, data-driven and knowledge-based businesses. Outside the AI theme, the position in agribusiness Bunge Global was supported by the recent Viterra merger, which is expected to deliver significant synergies and provide the company greater pricing power in key markets.

The managers focus on investing in good quality companies that are mispriced, either because they are out of favour or their intrinsic asset value is misunderstood, or their journey to sustainability is underappreciated. Stock picking is at the core of their approach, and is the main driver of risks and returns, alongside their value-biased investment style. Portfolio holdings are differentiated from the index which is reflected in high active share. The managers bought positions in global e-commerce and cloud computing platform Amazon, and engineering and industrial gases company Linde, while the positions in Goldman Sachs and Lapcorp were sold.

Fidelity Funds

ASEAN Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 724 MILLION

Manager's Overview

Regional equities rose over the period. Uncertainties around US trade and tariff policies initially unsettled markets, however, investor confidence rebounded as the political noise subsided. Later in the period, escalating US-Israel-Iran tensions lifted oil prices, fuelling inflation concerns. Performance across markets diverged significantly. Thailand was the strongest market, supported by improving political stability, fiscal stimulus measures and renewed foreign investor interest. Singapore delivered steady gains, benefiting from its status as ASEAN's defensive safe-haven. Strong institutional credibility, currency stability and resilient financials supported inflows into Singapore. Malaysia posted modest returns amid stable macroeconomic conditions and resilient commodity exports. In contrast, the Philippines underperformed due to slowing growth momentum, rising energy prices, and currency weakness. Indonesia was the region's weakest market following MSCI's warning over market transparency, which triggered significant foreign outflows.

The fund underperformed the comparative index over the period. Selected holdings in Thailand held back gains, while security selections in China and Singapore contributed strongly to returns. At a stock level, not holding Delta Electronics, Singapore Exchange and Yangzijiang Shipbuilding weighed on relative returns. Exposures to Bank Central Asia and Telekom Indonesia also detracted from performance. Conversely, positions in Zijin Mining, Frencken Group and Perseus Mining contributed notably to returns. In addition, not holding Grab Holdings and PT Dian Swastatika Sentosa added value.

The manager favours businesses with enduring franchises, sustainable competitive advantages, reasonable growth runways, attractive valuations, healthy balance sheets, and strong management teams. For instance, Indofood is held for its resilient market leadership and entrenched competitive positioning, which is supported by strong brand equity and an integrated business model. The group continues to benefit from pricing power in its core noodle franchise and a broad distribution network.

Fidelity Funds

Asia Equity ESG Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 3,202 MILLION

Manager's Overview

Asia ex Japan equities advanced over the period. Although the period was marked with uncertainty around tariffs, investor sentiment recovered after the US began negotiations with key partners. Technology-focused markets including Taiwan and South Korea registered strong gains amid growing enthusiasm for AI-related stocks. However, towards the tail end of the period, an escalation in tensions between US-Israel and Iran pushed oil prices higher, adding to inflationary concerns and raising expectations of tighter monetary policy. Countries that are more reliant on imported energy were impacted the most. Chinese equities ended the period with muted returns. Indian equities declined. In ASEAN, Indonesian equities came under pressure.

The fund underperformed the comparative index over the period. Stock selections in the financials sector held back gains. Positions in ICICI bank, HDFC bank, HDFC Life Insurance and BDO Unibank too offset gains. On a positive note, security selection in the IT sector added value. Holdings in Samsung Electronics, Yageo, ASE Technology and ASML were supported by an AI-led rally in broader markets.

The fund is focused on engagement and a deeper integration of environmental, social and corporate governance (ESG) issues in the investment process to create a portfolio of high-quality growth companies that maintain high or improving sustainability characteristics. The portfolio had a 94.2% exposure to stocks with high ESG ratings, which are either rated A or B based on Fidelity's proprietary ESG rating or rated A and above by MSCI where FIL ratings are not available due to non-coverage. A total of 3.5% of the fund was invested in stocks with lower but improving ESG characteristics. These are companies rated C and below by FIL or BBB and below by MSCI, but here the fund's management team believes the company could demonstrate significant improvement via our engagement efforts.

Fidelity Funds

Asia Equity II ESG Fund [1,3,4,5,8]

FUND SIZE AS AT 30.04.2026 : USD 1,378 MILLION

Manager's Overview

Regional equities advanced over the period. Although the period was marked with uncertainty around tariffs, investor sentiment recovered after the US began negotiations with key partners. Technology-focused markets including Taiwan and South Korea registered strong gains amid growing enthusiasm for AI-related stocks. However, towards the tail end of the period, an escalation in tensions between US-Israel and Iran pushed oil prices higher, which added to inflationary concerns and raised expectations of tighter monetary policy. Countries that are more reliant on imported energy were impacted the most. Chinese equities ended the period with muted returns. Indian equities declined. In ASEAN, Indonesian equities came under pressure.

The fund underperformed the comparative index over the period. Stock selections in the financials sector held back gains. Positions in ICICI bank, HDFC bank, HDFC Life Insurance and BDO Unibank offset gains. On a positive note, security selections in the IT sector added value. Holdings in Samsung Electronics, Yageo, ASE Technology and ASML were supported by an AI-led rally in broader markets.

The fund has an overweight exposure to financials, notably banks and consumer discretionary companies. Positions in ICICI Bank and AIA Group are retained. ICICI Bank's fundamentals remain sound, supported by a strong franchise, resilient deposit base, and disciplined risk management. AIA Group has a long runway for growth. In Thailand, we have added exposure to health care through Bangkok Dusit Medical Services, where the position was added in anticipation of a recovery in medical tourism and domestic demand. In China, the economy remains structurally weak. As a result, we are focusing on selective, stock-specific opportunities with clear earnings drivers. Separately, the AI-driven technology cycle continues to dominate markets. We remain focused on core quality exposures including Samsung Electronics, ASE Technology and ASML, with a preference for Samsung over SK Hynix as the memory cycle matures.

Fidelity Funds

Asia Pacific Opportunities Fund

FUND SIZE AS AT 30.04.2026 : USD 1,098 MILLION

Manager's Overview

Asia Pacific ex Japan equities advanced over the period. Although the period was marked with uncertainty around tariffs, investor sentiment recovered after the US began negotiations with key partners. Technology-focused markets including Taiwan and South Korea registered strong gains amid growing enthusiasm for AI-related stocks. However, towards the tail end of the period, an escalation in tensions between US-Israel and Iran pushed oil prices higher, adding to inflationary concerns and raising expectations of tighter monetary policy. Countries that are more reliant on imported energy were impacted the most. Chinese equities ended the period with muted returns. Indian equities declined. In ASEAN, Indonesian equities came under pressure.

The fund underperformed the comparative index over the period. Selected positions held back gains. Positions in HDFC Bank, SEA and Tencent detracted from returns. Stock picking in the IT sector delivered divergent performance. Given the rally in AI-led stocks, underweight positions in SK Hynix, Taiwan Semiconductor Manufacturing Company and Samsung Electronics detracted from performance. Conversely, positions in Gold Circuit Electronics and Elite Material added value. Selective stock picking contributed to performance. The lack of exposures to Alibaba Group, Meituan, CSL, and ICICI Bank proved rewarding.

The manager favours companies that trade at attractive valuations, have an understandable business model and above-average earnings growth rate, alongside the ability to allocate capital effectively. Technology remains the largest sectoral underweight position. While the structural view on AI-related valuations remains cautious, portfolio positioning has evolved to reflect the realities of the market environment. China remains an area of focus, particularly consumer-facing businesses. While macro conditions are mixed, several companies continue to deliver strong performance. Yum China is a good example of providing robust returns, with consistent earnings growth, margin improvement and store expansion, despite a challenging consumer environment.

Fidelity Funds

Asian Smaller Companies Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 1,359 MILLION

Manager's Overview

The small-cap equities in the Asia Pacific ex Japan region ended the month in positive territory. Chinese and Hong Kong equities advanced. Technology-focused markets like South Korea and Taiwan reported positive returns. Meanwhile, Indian equities lagged the broader region. Within ASEAN, Singapore, Thailand and Malaysia advanced, while the Philippines lagged its peers.

The fund underperformed the index over the review period. Stock selection in Indonesia weighed on returns. Indofood CBP Sukses, Bank Central Asia, Ciputra Development and Bank Negara detracted from performance. On the positive side, energy stocks like Valaris and NAC Kazatomprom added value. Meanwhile, a conservative exposure to Taiwan Semiconductor Manufacturing Company proved rewarding.

The fund is managed to provide absolute returns. Each security is owned for what it can contribute to returns and not due to its inclusion in an index. The portfolio manager believes that over time, the quality of business and valuations will matter. The long-term value of the business will be driven by its cash flow. The manager looks for companies with strong competitive advantages and good management teams. The focus is on discovering undervalued stocks, which leads to a significant share of funds being invested in small- and mid-cap companies. The manager holds a portfolio of businesses that have a dominant position in their respective industries, secure good returns on capital, and are available at attractive valuations. The fund continues to avoid stocks that are in trend and where high valuations do not leave enough margin of safety, as well as businesses with high debt levels.

Fidelity Funds

Asian Special Situations Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,451 MILLION

Manager's Overview

Asian equities advanced over the period, supported by strong AI-driven demand and resilient earnings. Taiwan and South Korea led the gains on semiconductor strength and foreign inflows. China saw mixed performance amid policy support and structural concerns. India lagged due to foreign institutional investor (FII) outflows and rising oil prices towards the end of the period, while ASEAN markets remained subdued. Geopolitical tensions and tariff uncertainties added volatility, but sentiment was supported by growth in technology sectors.

The fund outperformed the index over the period. Security selection within the IT sector was the primary contributor to returns, particularly in South Korean and Taiwanese markets. Shares of Korea's diversified electronics major Samsung Electronics and semiconductor manufacturer SK Hynix rose, as rising memory chip prices and tight supply conditions continued to act as catalysts for semiconductor stocks. Both companies reported strong quarterly results and announced plans to increase investment spending, reinforcing sustainability of demand. Samsung Electro-Mechanics also added to gains, supported by strong demand for high-value components, particularly in AI and advanced electronics applications. Within Taiwan, Unimicron Technology and Elite Material contributed positively to returns, benefiting from robust demand and participating in the broader AI-driven rally. Conversely, our positions in Indian private lenders HDFC Bank and ICICI Bank weighed on relative returns amid persistent FII selling across Indian equities. Our structural underweight position in Taiwan Semiconductor Manufacturing Company also detracted from returns.

The manager looks for opportunities in companies that are strong franchises with durable management teams and provide a long-term runway of growth supporting an attractive long-term earnings profile. The fund has an overweight exposure to IT, communication services and consumer discretionary sectors as of 30 April 2026. The fund continues to be oriented towards Asian revenues, accounting for approximately 70% of the fund's revenue profile on average, and focused on intra-regional demand within Asian economies amidst changing consumption patterns, a growing middle class and favourable demographic shifts.

Fidelity Funds

Australian Diversified Equity Fund

FUND SIZE AS AT 30.04.2026 : AUD 512 MILLION

Manager's Overview

Australian equities delivered strong returns over the year, despite the ever-changing macro backdrop including tariffs, escalation in tensions between the US and Iran and slower-than-expected rate cuts globally. Persistent core inflation, alongside signs of a slowing yet robust labour market, undercut expectations of the Reserve Bank of Australia (RBA) extending its easing cycle into 2026. This reassessment weighed on equity valuations and led to a pullback towards the tail end of the period.

The fund underperformed the comparative index over the review period. A deep dive into sector attribution shows that our robust selection within the materials sector added notable value, as the sector advanced on the back of a sustained rally in industrial and precious metals prices. These gains were, however, largely offset by stock selections in financials. Additionally, our positioning in communication services and IT also weighed on performance as AI disruption drove broad weakness in these sectors. Consequently, WiseTech Global and SEEK emerged as the key detractors over the 12-month period, reflecting investor concerns around the resilience of SaaS business models in the context of AI-related disruption. Elsewhere, not holding oil and gas producer Woodside Energy also weighed on returns, as the stock benefited from higher global energy prices amid escalating tensions in the Middle East. On the other hand, Evolution Mining emerged as the top performer, benefiting from strength in gold prices, followed by IGO that gained from a sharp rebound in global lithium prices and an improvement in investor sentiment towards battery metal equities. Elsewhere, Rio Tinto and BHP Group advanced, supported by a broader rotation away from technology and into resources stocks, alongside favourable commodity price trends, particularly in copper.

The portfolio is invested in large-cap, highly liquid blue-chip stocks. The manager remains mindful of company fundamentals and focuses on the experience and competence of management teams. Australia remains home to innovative companies that are well positioned to deliver long-term growth. The manager favours high-quality companies with a sustainable competitive edge, strong free cash flow generation and robust earnings growth.

Fidelity Funds

China Consumer Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,738 MILLION

Manager's Overview

Chinese equities advanced over the period, bolstered by technology strength and policy support, despite volatility due to tariffs and geopolitical tensions. The "DeepSeek Moment" renewed global interest in China's technological capabilities, while active fiscal policy and accommodative monetary conditions added to the constructive backdrop. Economic data was mixed but showed tentative stabilisation.

The fund underperformed its benchmark index. The underweight exposure to China Construction Bank detracted from relative returns, as high-quality state-owned banks were favoured for their defensive characteristics and high dividend yields. Full Truck Alliance fell amid earnings concerns related to the downsizing of non-core businesses, while regulatory pressure also weighed on sentiment. ANTA Sports Products declined amid weakness in the domestic sportswear market. Conversely, Contemporary Amperex Technology rose, supported by a strong upcycle in energy storage systems and ongoing market share gains. The underweight position in Tencent Holdings added value as the company lagged clear leaders in the AI-driven rally. Shanghai Xizhi Technology contributed after a strong initial public offering (IPO) in April 2026, supported by its exposure to demand for enhanced communication links and early-mover advantages in optical computing solutions. The underweight position in Xiaomi helped as its shares fell amid smartphone weakness and intense electric vehicle competition.

Structural shifts in consumer behaviour towards digital, wellness and experiential consumption are reshaping the investment landscape. Consumption remains uneven across industries and categories, and dispersion in corporate performance is widening. This reinforces the importance of active management in identifying winners. Following the portfolio management change, the fund continues to focus on China's long-term consumption opportunity while broadening its exposure to consumption enablers beyond traditional consumer sectors. Portfolio construction balances direct consumption beneficiaries with companies supporting consumption through technology, logistics, financial infrastructure and innovation.

Fidelity Funds

China Focus Fund

FUND SIZE AS AT 30.04.2026 : USD 2,375 MILLION

Manager's Overview

Chinese equities advanced over the period, bolstered by technology strength and policy support, despite volatility due to tariffs and geopolitical tensions. The emergence of cost-effective AI startup DeepSeek renewed global interest in China's technological capabilities, while active fiscal policy and accommodative monetary policy added to the constructive backdrop. Economic data was mixed but showed signs of tentative stabilisation.

The fund outperformed the comparative index over the period. Not owning Xiaomi proved rewarding. Oil prices rose amid ongoing geopolitical tensions that led to an increased risk premium being priced in the oil market. Consequently, the exposure to oil driller and service provider Valaris supported performance. NAC Kazatomprom rose amid constrained global supply of uranium and renewed demand for stable electricity. On the flipside, China Overseas Property Holding, Full Truck Alliance and China Yongda Auto Services detracted from performance.

The portfolio manager continues to focus on bottom-up stock selection with a value-focused approach. He prefers good businesses that are available at attractive valuations with enough margin of safety, and run by competent and honest management teams that generate favourable return on capital. The fund is a diversified portfolio of 60-80 stocks, where we are currently finding opportunities in businesses that have domestic demand drivers. As of 30 April 2026, the fund retains its largest overweight stance in consumer staples followed by real estate. The fund maintains notable underweight holdings in IT and financials.

Fidelity Funds

China Innovation Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 188 MILLION

Manager's Overview

Chinese equities advanced over the period, driven by technology strength and policy support, despite volatility stemming from tariffs and geopolitical tensions. The "DeepSeek Moment" renewed global interest in China's technological capabilities, while active fiscal policy and accommodative monetary conditions added to the constructive backdrop. Economic data was mixed but showed tentative stabilisation.

The fund outperformed the benchmark index, driven by stock selection in the IT and industrials sectors. Taiwan Semiconductor Manufacturing Company (TSMC) maintained growth momentum amid robust AI-related semiconductor demand. Contemporary Amperex Technology (CATL) rose, supported by a strong upcycle in energy storage systems (ESS) and continued market share gains. Successful initial public offerings, including Shanghai Xizhi Technology and MiniMax Group, contributed to returns. Xizhi benefited from rising demand for enhanced communication links, supported by its capabilities in scale-up connectivity and early-mover advantage in optical computing. MiniMax, a rare listed pure-play in large language models and a leading global player, gained on rapid revenue growth and increasing adoption of its cost-competitive products. Conversely, near-term regulatory pressure on online platforms and AI disintermediation risks weighed on Full Truck Alliance and Trip.com Group. Scholar Education Group declined on earnings concerns, as aggressive expansion pressured margins before meaningful revenue contribution.

The fund takes a thematic approach to fundamental, bottom-up investment, seeking to capture China's innovation growth. It focuses on technological, lifestyle and environmental innovation, while integrating environmental, social and governance (ESG) considerations. Within technological innovation, TSMC is a world-leading semiconductor foundry, well placed to benefit from AI-driven chip demand. Within lifestyle innovation, PDD's low-price marketplace model supports market share gains and take rate growth. Within environmental innovation, CATL is a leading global battery manufacturer for electric vehicles and ESS, with growth supported by rising electrification.

Fidelity Funds

Climate Solutions Fund [4,9]

FUND SIZE AS AT 30.04.2026 : USD 45 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility from geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund outperformed the comparative index. The overweight stance in industrials and robust stock selection in the utilities sector supported returns. However, the underweight position in IT held back gains. At a stock level, allocations to Siemens Energy and Contemporary Amperex Technology added to performance, supported by investments in electrification and battery storage, and driven by data centre expansion and rising power demand. Conversely, holdings in Rockwool and the lack of exposure to technology major Alphabet held back gains.

The portfolio manager has identified four core categories for investment – carbon reduction, clean power, green fuels and green mobility – with investments in companies whose products and services are directly providing climate solutions. As a result of bottom-up stock selection within these themes, the fund has structurally overweight holdings in the industrials and utilities sectors. The exposure to industrials (tends to be more cyclical) and utilities (tends to be defensive) naturally hedge against each other, given the generally negative performance correlation between them.

Fidelity Funds

Emerging Asia Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 639 MILLION

Manager's Overview

Regional equities advanced during the period despite uncertainty around tariffs and rising geopolitical tensions. Investor sentiment improved after the US began trade negotiations with key partners. However, later in the period, escalating tensions between the US-Israel and Iran lifted oil prices, fuelling inflation concerns. Technology-focused markets such as Taiwan and South Korea posted strong gains, supported by strength in leading chipmakers and AI-driven demand. Chinese equities delivered muted returns despite firmer early-2026 economic data and supportive growth targets in the 15th Five-Year Plan. Indian equities declined as rising oil prices added to inflationary concerns, while persistent foreign institutional investor (FII) selling also weighed on sentiment. In ASEAN, Indonesian equities weakened after MSCI raised concerns over market transparency and trading restrictions, hurting investor confidence.

The fund performed in line with the comparative index over the period. Positioning in India and Taiwan contributed strongly to returns, while the exposure to Indonesia held back gains. At a stock level, Elite material, Gold Circuit Electronics, Samsung Electronics and Hyosung Heavy Industries advanced strongly, supported by optimism around AI-driven demand and improving earnings visibility across the region's semiconductor supply chain. Elsewhere, not holding Xiaomi also added value. Conversely, the underweight positions in SK Hynix and Taiwan Semiconductor Manufacturing Company weighed on relative returns. Positions in financials, including Bank Central Asia, HDFC Bank and ICICI Bank, also detracted from performance.

The manager favours businesses with enduring franchises, sustainable competitive advantages, reasonable growth runways, attractive valuations, healthy balance sheets, and strong management teams. For instance, the portfolio holds Full Truck Alliance as it is the leading digital freight platform in China, providing matching services between shippers and truckers. The company continues to benefit from structural migration from offline brokers to online platforms, supporting sustained growth in order volume and market penetration.

Fidelity Funds

Emerging Europe, Middle East and Africa Fund

FUND SIZE AS AT 30.04.2026 : USD 417 MILLION

Manager's Overview

Equities in the emerging Europe, Middle East and Africa (EMEA) region posted positive returns during the reporting period. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and strong support from the AI narrative, alongside movements in oil and commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, supported by a constructive backdrop for industrial metals. Later in the period, the asset class was supported by the US Fed's rate cuts, continued US dollar weakness and firmer commodity prices, with momentum extending into early 2026 on the back of AI-driven demand and strength in industrial and precious metals. Sentiment weakened towards end-February as tensions in Iran escalated, pushing oil prices higher and triggering a pullback, before markets rebounded on the back of a temporary ceasefire and strength in large-cap Asian technology names.

The fund outperformed the comparative index over the period. At a sector level, robust stock picking in financials and consumer staples added value. In these areas, Hungary's OTP Bank, Nigeria's Guaranty Trust and Greece's Optima Bank enhanced gains. Conversely, Saudi Arabia's Derayah Financial detracted from returns. Gold mining company Gold Fields was also a source of weakness.

The managers follow a bottom-up stock picking approach, as a result of which the fund's country and sector positioning reflects the number of attractive investment opportunities available. Financials is the largest absolute position, and we have an overweight holding compared to the index. Key holdings are OTP Bank and Al Rajhi Bank. The managers also like the prospects of UAE banks like Emirates NBD and Abu Dhabi Islamic Bank. They keep an underweight position in materials, with exposure centred around gold and copper. The fund has exposures to gold mining companies like AngloGold Ashanti and Gold Fields, and copper mining firms like First Quantum Minerals and Ivanhoe Mines.

Fidelity Funds

Emerging Markets Equity ESG Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 348 MILLION

Manager's Overview

Emerging markets (EMs) posted positive returns during the period. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and AI progress, alongside movements in oil and commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, supported by a constructive backdrop for industrial metals. Later in the period, the US Fed's rate cuts, continued US dollar weakness and firmer commodity prices supported EMs, with momentum extending into early 2026 on the back of AI-driven demand and strength in industrial and precious metals. Sentiment weakened towards end-February as tensions in Iran escalated, pushing oil prices higher and triggering a pullback, before markets rebounded on a temporary ceasefire and strength in large-cap Asian technology stocks.

The fund posted positive returns but underperformed the comparative index over the year. At a sector level, security selection in financials detracted the most from returns. Here, Indian private banks, ICICI Bank and HDFC Bank, and Indonesia's Bank Central Asia were among the top detractors. Encouragingly, the positions in Taiwanese technology sector including Gold Circuit Electronics and Delta Electronics were among the biggest contributors to returns.

During the period, the manager continued to look for high returns and well-capitalised businesses with under-levered balance sheets, meaning that the companies the fund holds should have a better risk-reward profile. Within IT, TSMC is the largest absolute holding in the fund. We also like Samsung Electronics amid strengthening memory fundamentals and robust DRAM and NAND pricing. We bought few new holdings in Taiwan, including Gold Circuit Electronics, a printed circuit board (PCB) supplier, and Advantech, a high-quality industrial computing leader.

Fidelity Funds

Emerging Markets Ex China Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 24 MILLION

Manager's Overview

Emerging markets ex China equities advanced during the period. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and strong support from the AI narrative, alongside movements in oil and commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, supported by a constructive backdrop for industrial metals. Later in the period, the asset class was supported by the US Fed's rate cuts, continued US dollar weakness and firmer commodity prices, with momentum extending into early 2026 on the back of AI-driven demand and strength in industrial and precious metals. Sentiment weakened towards end-February as tensions in Iran escalated, pushing oil prices higher and triggering a pullback, before markets rebounded on the back of a temporary ceasefire and strength in large-cap Asian technology stocks.

The fund posted positive returns and outperformed the comparative index over the year. At a sector level, overweight positioning in the IT sector supported performance. In this domain, ASPEED Technology, Samsung Electronics, Elite Material, and Chroma ATE were among the top contributors. Stock picking in financials weighed on performance. Positions in India's Nuvama Wealth Management and Home First Finance, and Brazil's Inter & Co. held back gains.

The portfolio managers look for high-quality companies capable of delivering consistent returns and are valued at a reasonable price. These are companies that exhibit strong management quality and solid corporate governance practices. The portfolio's largest overweight exposure at the sector level is to financials. Key holdings are a diversified set of stocks across a range of markets, including Hungary's OTP Bank, Greece's Optima Bank, Brazil's Inter & Co., India's Nuvama Wealth Management, and Nigeria's Guaranty Trust.

Fidelity Funds

Emerging Markets Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 3,828 MILLION

Manager's Overview

Emerging markets (EMs) advanced over the year and outperformed developed markets. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and strong support from AI progress, alongside movements in commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, supported by a constructive backdrop for industrial metals.

The fund outperformed the comparative index over the period. Robust stock selection in Taiwan and the underweight stances in China and India proved rewarding, while stock picking in South Africa held back gains. At a sector level, stock picking in IT and industrials contributed to performance, while the fund's positioning in the financials sector weighed on returns. At a stock level, Taiwanese copper clad laminate producer Elite Material rose following upbeat first-quarter 2026 results and ongoing capacity expansion. In Korea, the position in memory chip manufacturer SK Square (the holding company for memory producer SK Hynix) gained following robust performance at SK Hynix, driven by a memory upcycle and supply constraints. In China, the underweight exposure to internet company Tencent supported relative performance, as the stock declined amid concerns over elevated AI investment possibly pressuring profit margins. As a result, the position in South African holding company Naspers, which holds a large stake in China's Tencent, detracted from relative returns.

The focus remains on owning well-capitalised businesses with under-levered balance sheets. Country and sector positioning are a residual of a bottom-up stock picking approach, however, the prevailing environment is considered in our positioning, and we are closely monitoring both the macro and company-specific implications of the developments in the Middle East.

Fidelity Funds

Euro 50 Index Fund

FUND SIZE AS AT 30.04.2026 : EUR 782 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period despite a volatile geopolitical and macroeconomic backdrop. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility rose towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, increasing concerns around inflation, energy security and the policy outlook. Equities partially recovered in April, supported by a broader global risk-on rebound and a solid start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation, and energy supply risks.

As a "passive" or "index tracker" fund, the fund is managed to provide returns similar to the index, and in this case, it is a concentrated index of the 50 largest companies in the eurozone. However, the fund incurs costs and expenses that the index does not incur, although it can benefit from securities lending when the index cannot. This means fund returns should be similar to the index, rather than identical. Over the period, the primary A-EUR class of the fund returned 17.3% in net euro terms, outperforming the index, which returned 17.0%. Taxation was a positive source of tracking difference, where the fund's withholding tax treatment is more favourable versus the net total return index. Over the period, the same class ex-post tracking error averaged 0.37% (a 3-year annualised figure, based on 36 month-end data points, is used as it is regarded as more statistically valid). This measure of the variability of fund returns around the index can be influenced by a number of factors, including the aforementioned withholding tax differences, and the fund's partial swing pricing policy, which is designed to manage tracking difference as tightly as possible over time.

Geode Capital Management LLC, a leading specialist in the management of index tracking strategies, was appointed as the sub-investment manager to the fund on 3 January 2017. The managers aim to minimise deviation from the index by using an index tracking technique, which comprises full replication of the companies represented in the index. Please note, the fund's cash position, and investment of cash into a liquidity fund for diversification, does not mean that the fund is under exposed to the index, as such positions are typically equitised with equity index futures contracts. This helps to efficiently manage cashflows in the fund at reduced costs. When taking into account exposure achieved by these futures contracts, the fund's holdings weights more closely match the index.

Fidelity Funds

Europe Equity ESG Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 185 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader risk-on rebound and an encouraging start to the first-quarter corporate earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks. Against this backdrop, the ECB reduced key interest rates to 2.0% in 2025 and subsequently left policy unchanged, reiterating that future policy decisions would remain data dependent and assessed on a meeting-by-meeting basis.

The fund underperformed its benchmark over the period, primarily due to sector allocations, notably the lack of exposure to energy and positioning in materials and communication services. These headwinds were partially offset by positive stock selection and positioning in industrials, IT, and consumer staples. At a stock level, RELX detracted from performance as investors focused on potential AI disruption risks, while 3i Group weakened amid concerns over slowing growth at its key asset, Action. Conversely, Siemens Energy was the largest contributor to returns, supported by analyst upgrades, strong order growth, and robust profitability. BE Semiconductor Industries also added value, driven by sturdy AI-related demand, advanced packaging momentum, and improving semiconductor market conditions.

The fund leverages Fidelity's differentiated research capabilities and analyst top ideas to construct a concentrated portfolio that promotes sustainable characteristics with high stock-specific risk.

Fidelity Funds

European Dynamic Growth Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,027 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period despite a volatile geopolitical and macroeconomic backdrop. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility rose towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, increasing concerns around inflation, energy security and the policy outlook. Equities partially recovered in April, supported by a broader global risk-on rebound and a solid start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks.

The fund delivered negative returns and underperformed the index. This was partly driven by the market rotation towards value stocks, given the fund's strong anti-value bias. Sector allocation also detracted from returns, particularly exposures to professional services in industrials and software companies within the technology sector. Within industrials, holdings in RELX and Experian were among the largest detractors, while software companies Sage Group and SAP weighed on returns within technology, reflecting concerns around perceived 'AI losers'. However, positions in semiconductor companies STMicroelectronics and NXP Semiconductors offset some of the weakness. Several health care holdings also disappointed. Concerns over reimbursement under the US Medicare and Medicaid systems impacted stocks of Coloplast and Convatec. This was partly offset by the fund's lack of exposure to Novo Nordisk, whose shares weakened amid intensifying competition and moderating growth expectations.

The manager adopts a bottom-up investment approach, seeking high-quality European businesses trading below intrinsic value and supported by structural growth drivers rather than short-term macro trends. Macro forecasts play a limited role in the process, except where shifts in the economic environment may affect market sentiment and company valuations.

Fidelity Funds

European Growth Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 7,400 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader risk-on rebound and an encouraging start to the first-quarter corporate earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks. Against this backdrop, the ECB reduced key interest rates to 2.0% in 2025 and subsequently left policy unchanged, reiterating that future policy decisions would remain data dependent and assessed on a meeting-by-meeting basis.

The fund underperformed its benchmark over the period, with both stock selection and sector allocation detracting from returns, particularly in industrials, IT, financials, and communication services. However, an underweight position in health care and stock selection in consumer staples offset some losses. At a stock level, the largest detractor from performance was 3i Group, as concerns over slowing growth at its key asset, Action, weighed on performance. The underweight exposure to ASML proved unfavourable following strong fourth-quarter 2025 results and better-than-expected order intake. Conversely, AIB benefited from rising European bond yields and positive momentum following German fiscal announcements. TotalEnergies performed strongly, supported by higher oil and gas prices, resilient Q4 results, and a positive trading update.

The portfolio manager's long-term investment approach focuses on companies with quality characteristics such as attractive or improving returns on capital, strong competitive position, and high free cash flow conversion.

Fidelity Funds

European Smaller Companies Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 957 MILLION

Manager's Overview

European smaller equities delivered positive returns over the 12 months to April 2026 period despite a volatile geopolitical and macroeconomic backdrop. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility rose towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, increasing concerns around inflation, energy security and the policy outlook. Equities partially recovered in April, supported by a broader global risk-on rebound and a solid start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation, and energy supply risks.

The fund delivered positive returns but underperformed the index. Relative performance was driven by weak stock selection and disappointing positioning, primarily within the materials and industrials sectors. At a stock level, GlobalData (industrials) was the largest detractor from performance, while communication services holdings including Future Plc and Team Internet Group weighed on returns. The underweight position in energy further detracted from relative performance. On the positive side, technology holdings Spectris and Renishaw were among the leading contributors. Financials positions, including JTC, Permanent TSB, Alpha Group, and Molten Ventures, also added relative value.

The portfolio managers are focused on identifying well-managed, cash generative companies that have clear market leadership, sustainable competitive advantage, and generate profits from strong sales growth. Given the focus on bottom-up stock picking, sector allocation is primarily an outcome of where we find the most interesting opportunities. The fund currently has overweight positions in consumer discretionary, staples, communication services, and IT, and is underweight in the energy, real estate, industrials, and health care sectors.

Fidelity Funds

FIRST All Country World Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 548 MILLION

Manager's Overview

Global equities advanced during the 12-month period, supported by resilient corporate earnings, steady macroeconomic conditions and continued enthusiasm around AI. Easing trade tensions and interest rate cuts by the Fed, ECB and the BoE further supported sentiment. However, markets experienced periods of heightened volatility amid concerns over elevated AI valuations and escalating geopolitical tensions in the Middle East. Early 2026 saw a sharp market sell-off as tensions between the US-Israel alliance and Iran intensified, raising concerns around global growth, inflation and energy prices. Sentiment improved in April following signs of de-escalation and a temporary ceasefire, alongside renewed investor interest in AI-related stocks. Regionally, Emerging Markets, Japan and the US led gains. Within Emerging Markets, Taiwan and Korea benefited from strong performance in AI-linked technology stocks, while supportive policy measures in China aided sentiment. From a sector perspective, IT and energy outperformed, driven by sustained AI infrastructure investment and higher oil prices. A weaker US dollar also supported returns in local currency terms.

The fund was broadly in-line with the index over the period. Stock picking in health care and materials, positioning in industrials (mainly machinery and professional services) and holdings in IT (mainly software and overweight exposure to IT services), hampered relative performance. Nevertheless, these were significantly offset by gains from strong stock picking in consumer staples and financials, and the underweight allocations to communication services and real estate. Medical devices company Boston Scientific was a key detractor from returns over the period, as its shares weakened amid valuation concerns following a strong prior performance. Software companies Fair Isaac and Cognizant too declined. Fair Isaac saw profit-taking and weaker sentiment linked to regulatory concerns around credit scoring. Cognizant was impacted by subdued corporate IT spending and slowing demand trends. Kerry Group weakened on concerns around lesser consumer demand and margin pressures, while Genpact lagged amid weaker sentiment towards outsourcing companies and cautious client spending. On a positive note, Samsung Electronics contributed positively as improving memory chip pricing and rising AI-related demand supported the shares. Taiwan Semiconductor Manufacturing Company advanced on continued demand strength for advanced semiconductors linked to AI and high-performance computing. KLA Corp benefited from increased semiconductor industry capital expenditure, while Murata Manufacturing gained on improving demand for electronic components. Elsewhere, Endeavour Mining added value as higher gold prices and resilient operational performance boosted investor confidence.

The managers continue to focus on stocks having the highest conviction and most relevant ideas generated by Fidelity's global analyst base. By reducing unintended risks, they ensure that stock selection is the key driver of risks and returns. Portfolio positioning is therefore a result of our bottom-up stock selection process. Samsung Electronics, a diversified electronics company with the largest market share in memory and a large presence in mobiles, display and consumer electronics, is a key position in the portfolio. Diversified financial services company Morgan Stanley is another key holding. The bank has seen strong performance and is well positioned for long-term growth.

Fidelity Funds

Germany Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,236 MILLION

Manager's Overview

German equities delivered positive returns over the 12 months to April 2026 period despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and higher German defence spending commitments, supported markets. Gains extended into early 2026, although volatility increased towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, raising concerns around inflation, energy security and the policy outlook. Equities partially recovered in April, supported by a broader global risk-on rebound and a solid start to the first-quarter corporate earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks.

The fund underperformed the benchmark over the review period, with the allocation to health care and the underweight position in materials weighing on relative returns. Within health care, sector positioning and stock selection detracted from returns, particularly through Siemens Healthineers and Qiagen. The former was impacted by continued diagnostics segment weakness, especially in China, alongside tariff-related earnings pressures. A weaker QuantiFERON testing demand and subdued US immigration-related volumes weighed on the sentiment for Qiagen. On the positive side, financials was the strongest contributor to relative returns, supported by selective bank exposure and strong stock selection, notably ING Groep, while the underweight position in Munich Re also added value. IT also contributed to performance, with TSMC and AIXTRON benefiting from continued AI-related semiconductor and data centre demand.

The portfolio remains significantly overweight in health care, while keeping an underweight stance in materials, consumer discretionary and financials. More broadly, positioning reflects a balance between defensive areas and selective exposures to higher-growth cyclicals, while continuing to avoid structurally challenged sectors such as chemicals and automotive. Over the last 12 months, the overweight holding in health care has increased further, while exposures to real estate and utilities were reduced following strong performance and profit-taking in selected defensive holdings.

Fidelity Funds

Global Consumer Brands Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 835 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. The exposures to consumer discretionary and technology sectors weighed on returns, while security selection in financials contributed to performance. At a stock level, eyewear company EssilorLuxottica came under pressure as investors assessed the potential impact of increasing competition in the smart glasses segment on its core business. Streaming business Netflix declined following investor concerns over its forward earnings guidance, despite steady first-quarter earnings results. Conversely, semiconductor foundry business Taiwan Semiconductor Manufacturing Company added value, underpinned by strong quarterly revenues and an upbeat earnings outlook amid sustained optimism around the AI upcycle.

The strategy adopts a bottom-up, fundamental investment approach focused on quality, to capture how consumers spend their time and money - a fundamental pillar of the global economy. The portfolio manager looks to invest in businesses exhibiting strong consumer-facing brands with demonstrated competitive edges. These are reflected in superior pricing power, innovation, and valuable intellectual property, with importance placed on the quality of the management team and their track record. The manager focuses not only on companies in the consumer discretionary and staples sectors, but also opportunities in other sectors offering attractive opportunities with consumer-facing platforms, products, or experiences.

Fidelity Funds

Global Demographics Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 793 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. The exposure to the health care sector as well as stock picking within the technology sector weighed on returns. Meanwhile, security selection in consumer staples and financials contributed to performance. At a stock level, diversified medical devices company Boston Scientific detracted from returns, after investors reacted cautiously to the clinical trial data for its left atrial appendage closure device. Eyewear company EssilorLuxottica came under pressure as investors assessed the potential impact of increasing competition in the smart glasses segment on its core business. Conversely, semiconductor foundry business Taiwan Semiconductor Manufacturing Company added value, underpinned by strong quarterly revenues and an upbeat earnings outlook amid sustained optimism around the AI upcycle.

The fund invests in companies where predictable and long-term structural drivers related to demographics drive earnings and growth, with a pronounced focus on strong sustainability characteristics. Sector allocation is linked to three thematic drivers: resource efficiency, ageing populations, and evolving consumption. Rising dependency ratios and a peaking global population call for enhanced resource efficiency and automation to drive productivity gains. The global population is ageing, creating growing demand for products and services within the healthcare space and the 'silver economy'. Consumption trends are evolving as an emerging middle class drives demand for consumer goods and financial services, while e-commerce penetration continues to rise, benefiting digital players.

Fidelity Funds

Global Financial Services Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,187 MILLION

Manager's Overview

The global financials sector advanced in line with global equities during the 12-month period. The AI-driven demand, upbeat corporate earnings, and steady macro indicators led market performance, although concerns over AI valuations and the Middle East conflict posed significant headwinds. As the US agreed upon a milder tariff framework with key trade partners at the beginning of the period, equities gained over signs of reduced trade uncertainty. The US Fed's reduction in policy rate by a cumulative 75 bps from September to December 2025 provided additional momentum. Rate reductions by the ECB and the BoE amid decelerating inflation also aided sentiment. Nevertheless, early 2026 was marked by geopolitical tensions as the US doubled down on its combative stance regarding Venezuela, Greenland, and Iran. Markets experienced a sharp downturn in March as tensions rose between US-Israel and Iran. In April, markets strongly rebounded as the Middle East tensions de-escalated and a temporary ceasefire was announced, alongside a market rotation back into AI stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains. Within Emerging Markets, AI-linked technology stocks in Taiwan and Korea led the rally, besides favourable macro indicators and supportive policy in China. In Japan, policy optimism and pro-growth fiscal measures aided sentiment. At the industry level, banks led the gains, while financial services dragged on performance.

The fund underperformed the comparative index over the period. Weak stock selection in banks held back gains. Certain insurance stocks also underperformed given investor rotation out of defensive sectors like insurance and into more pro-cyclical exposures during the period. However, selected holdings in capital markets supported returns on the back of rising stock markets, strong consumer engagement, and steady investment banking activity. At a stock level, Arthur J. Gallagher, Berkshire Hathaway and Ares Management were the notable detractors from performance. By contrast, stocks like Interactive Brokers Group, Morgan Stanley and Mizuho Financial Group contributed positively to returns, helping offset some of the losses.

The fund is positive on investment banking and asset management businesses, which stand to gain from robust demand for wealth management and alternative assets, alongside a recovery in capital markets and the mergers and acquisitions (M&A) activity or IPO environment. Portfolio holdings feature diversified business models, high returns on equity, and margin expansion potential. Within banks, the preference for US banks like JPMorgan Chase remains, given solid GDP and loan growth, favourable margin dynamics, diversified earnings streams that are less reliant on central bank policy, improving regulation, and potential M&A opportunities. The fund has an overweight position in "multi-sector holdings" including Berkshire Hathaway and Investor AB. Exposure to these diversified groups combining pro-cyclical and defensive businesses, supported by healthy balance sheets and consistent cash generation, helps them perform well in all market conditions.

Fidelity Funds

Global Focus Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 932 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the benchmark over the review period. The biggest stock-specific detractors were software stocks, including Adobe, Salesforce, Intuit and Accenture, where concerns around AI disruption and growth visibility continued to weigh on sentiment. Meanwhile, semiconductor and AI-exposed holdings, including Broadcom, Kioxia and Taiwan Semiconductor Manufacturing Company, performed strongly as investor conviction in AI-driven demand and long-term earnings visibility recovered after a period of scrutiny over returns on heavy capital expenditure. Lam Research was the standout contributor over the period, supported by an upbeat outlook and continued confidence in AI-related spending across logic, memory chips and advanced packaging. Within financials, the fund's exposure to Shift4 Payments, Berkshire Hathaway and Arthur J. Gallagher detracted from relative returns amid broader market rotation towards higher-growth opportunities.

Regionally, the fund retains an overweight stnace in North America, while maintaining measured exposure to Europe ex UK and Emerging Markets for idiosyncratic growth opportunities. The portfolio maintains an overweight holding in IT, reflecting conviction in AI enablers, and in financials, given the exposure to high-quality franchises across insurance, banking, capital markets and exchanges.

Fidelity Funds

Global Healthcare Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,058 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index during the period. At an industry level, exposures to the health care equipment and supplies, and pharmaceuticals sub-sectors held back gains, while stock picking in biotechnology proved rewarding. At a stock level, diversified medical devices company Boston Scientific detracted from returns, after investors reacted cautiously to the clinical trial data for its left atrial appendage closure device. The underweight exposure to pharmaceutical major Eli Lilly and Novartis also weighed on returns. The underweight stance in Novo-Nordisk contributed to relative returns, as a weaker-than-expected revenue guidance weighed on stock performance.

The fund invests in high-quality companies that are set to benefit from long-term structural growth drivers within the health care sector, such as an ageing population and increased health care needs. Health care companies tend to be defensive, as demand for drugs and medical procedures will not change even in times of volatility and uncertainty.

Fidelity Funds

Global Industrials Fund

FUND SIZE AS AT 30.04.2026 : EUR 1,108 MILLION

Manager's Overview

Global cyclical sectors advanced in the 12-month period, despite intermittent volatility due to geopolitical tensions. Artificial intelligence (AI)-driven demand, upbeat corporate earnings, and steady macro indicators led market performance, although concerns over AI valuations and the Middle East conflict posed significant headwinds. As the US agreed upon a milder tariff framework with key trade partners at the beginning of the period, equities gained over signs of reduced trade uncertainty. The US Fed's reduction in policy rate by a cumulative 75 bps from September to December 2025 provided additional momentum. Rate reductions by the ECB and the BoE amid decelerating inflation also aided sentiment. Nevertheless, early 2026 was marked by geopolitical tensions as the US doubled down on its combative stance regarding Venezuela, Greenland, and Iran. Markets experienced a sharp downturn in March as tensions rose between US-Israel and Iran. In April, markets strongly rebounded as the Middle East tensions de-escalated and a temporary ceasefire was announced, alongside a market rotation back into AI stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains. Within Emerging Markets, AI-linked technology stocks in Taiwan and Korea led the rally, besides favourable macro indicators and supportive policy in China. In Japan, policy optimism and pro-growth fiscal measures aided sentiment.

The fund delivered strong positive returns and performed broadly in line with the comparative index over the period. Security selections in professional services and ground transportation stocks added value, while that in distributors and chemical stocks weighed on relative value. Shares in electrical equipment providers Siemens Energy and Sandvik performed well due to a combination of structural demand and improving execution that aided encouraging earnings outlook. By contrast, the lack of exposures to Caterpillar and GE Vernova dragged on performance as their stock prices rose during the period. Chemicals company Sika was weak amid broader weakness in the housing sector.

The manager continues to follow a consistent approach in allocation across industrials, materials and energy sectors, broadly in line with the benchmark and anchored to the global fixed asset investment theme. The focus remains on identifying high-quality businesses with sustainable competitive advantages, trading at reasonable valuations and undergoing underappreciated change, resulting in an asymmetric risk/reward profile. The portfolio reflects a balanced allocation across cyclical recovery opportunities and long-term structural themes, including industrial recapitalisation, reshoring, electrification, AI adoption and energy system expansion, while maintaining discipline on quality and valuation.

Fidelity Funds

Global Smaller Companies Fund

FUND SIZE AS AT 30.04.2026 : USD 5 MILLION

Manager's Overview

Global equities advanced despite bouts of volatility due to geopolitical tensions in the 12-month period. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the US Fed, ECB and BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan and the US leading the gains.

The fund was launched on 23 April 2026 and therefore does not have a full 12-month performance record for the period under review. The fund aims to achieve capital growth over the long term, by investing at least 70% of its assets in equities of small companies from across the world, including emerging markets. The portfolio manager's philosophy is based on the premise that the global small-cap market is an inefficient, under-researched asset class. This creates attractive opportunities to invest in companies that trade at a significant discount to their long-term fundamental fair value, potentially generating high returns while diversifying away from global large-caps.

Backed by the depth and scale of Fidelity Investments' global research team, the portfolio manager maintains a portfolio of around 125 quality-led smaller companies, each demonstrating strong growth characteristics while trading at attractive valuations.

Fidelity Funds

Global Technology Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 30,343 MILLION

Manager's Overview

Global equities advanced in the 12-month period, despite intermittent volatility due to geopolitical tensions. The AI-driven demand, upbeat corporate earnings, and steady macro indicators led market performance, although concerns over AI valuations and the Middle East conflict posed significant headwinds. As the US agreed upon a milder tariff framework with key trade partners at the beginning of the period, equities gained over signs of reduced trade uncertainty. The US Fed's reduction in policy rate by a cumulative 75 bps from September to December 2025 provided additional momentum. Rate reductions by the ECB and the BoE amid decelerating inflation also aided sentiment. Nevertheless, early 2026 was marked by geopolitical tensions as the US doubled down on its combative stance regarding Venezuela, Greenland, and Iran. Markets experienced a sharp downturn in March as tensions rose between US-Israel and Iran, which compounded risks for global growth and inflation. In April, markets strongly rebounded as the Middle East tensions de-escalated and a temporary ceasefire was announced, alongside a market rotation back into AI stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains. Within Emerging Markets, AI-linked technology stocks in Taiwan and Korea led the rally, besides favourable macro indicators and supportive policy in China. In Japan, policy optimism and pro-growth fiscal measures aided sentiment. From a sector perspective, energy and IT strongly advanced, amid growing expectations of higher-for-longer inflation driven by oil prices and sustained investment in AI infrastructure.

The fund recorded strong absolute returns, but underperformed the comparative index over the year. Not holding certain strong performers within the semiconductor and semiconductor equipment industry was a source of weakness, but selected stocks in this sub-industry contributed to performance, as did selected hardware stocks. Market selection, most notably the absence of exposure to AI-focused semiconductor names, impacted relative performance. In particular, Nvidia, Broadcom, Micron Technology and SK Hynix delivered strong returns, supported by continued strength in AI-related demand, particularly across data centre and memory markets, alongside resilient enterprise spending. Performance during the year was heavily concentrated in these areas of the market, which weighed on relative returns given the fund's more selective positioning. The holding in human resources software provider Workday detracted from performance, driven by a mix of valuation pressure, sector/macroeconomic worries, negative read-across from peers, and company-specific news around restructuring. On a positive note, the underweight stance in software major Microsoft contributed to relative returns as software stocks came under pressure amid investor concerns over the impact of generative AI on their businesses. The underweight stance in consumer technology major Apple also supported relative performance as its shares fell due to reports of foldable iPhone delays and slowing App Store growth. The holding in Alphabet contributed to returns as its shares rerated strongly on the back of robust innovation delivery, particularly in cloud and AI infrastructure.

The conflict in the Middle East has injected fresh volatility into global markets. Geopolitical developments can weigh on risk sentiment in the near term and contribute to increased market fluctuations. Within the technology sector, volatility may be amplified by existing scrutiny around software and ongoing concerns related to AI-driven disruption risk. As a result, short-term price movements may reflect a combination of macro uncertainty and sector-specific dynamics rather than changes in underlying fundamentals. The portfolio manager remains focused on long-term fundamentals rather than short-term geopolitical developments in portfolio construction.

Fidelity Funds

Global Thematic Opportunities Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 1,821 MILLION

Manager's Overview

Global equities rose over the 12-month period despite bouts of volatility driven by geopolitical tensions. The AI-led demand, strong corporate earnings, supportive macro data, and easing trade concerns boosted markets, while the Fed rate cuts totalling 75 bps between September and December 2025 added momentum. Rate reductions in Europe and the UK further improved sentiment. However, early 2026 saw renewed tensions involving the US, Venezuela, Greenland, Iran, and the wider Middle East, triggering a sharp market sell-off in March amid fears over growth and inflation. Markets rebounded in April following a temporary ceasefire and renewed interest in AI stocks. Against this backdrop, Emerging Markets, Japan, and the US outperformed. From a sector perspective, energy and IT strongly advanced, amid growing expectations of higher-for-longer inflation driven by oil prices and sustained investment in AI infrastructure.

The fund outperformed the comparative index over the period. At a strategy level, performance was led by multi thematic and climate solutions strategies, owing to their overweight positioning within the industrials sector. However, allocation to the global financial services strategy weighed on returns due to its weak security selection within the banking sector. At a thematic level, the grid upgrade basket contributed positively to relative performance.

The portfolio aims to achieve long-term capital growth and invests in equities that may benefit from structural or secular changes in economic and social factors. These can include themes such as disruptive technologies, demographic shifts and climate change. Over the year, allocation to global technology strategy and AI basket was increased to capture strong earnings momentum. This move was funded by reducing exposure to the global future leaders strategy, so as to lower risk from mid-cap companies, and exiting the defence basket due to expensive valuations and declining conviction. Capital was redeployed into health care stocks to reduce the underweight positioning, and a new robotics and automation basket was introduced reflecting confidence in long term automation trends.

Fidelity Funds

Global Value Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 64 MILLION

Manager's Overview

US equity markets posted strong gains in the 12-month period, driven by resilient corporate earnings and continued enthusiasm around AI investment despite episodes of geopolitical and macroeconomic volatility. For much of the period, market leadership remained concentrated in large-cap technology and semiconductor stocks, with AI beneficiaries continuing to dominate index returns. This cohort accounted for a disproportionate share of performance, reflecting strong earnings delivery and sustained investor demand in this structural growth theme. Towards the end of 2025, there were signs of modest broadening in market participation as advances in AI led to growing fears of AI disruption risk for capital light, knowledge intensive businesses, even as investors closely scrutinised returns on rising AI-linked capital expenditure. This resulted in a pronounced rotation into "hard asset" sectors such as energy, materials, and industrials, which are considered less vulnerable to AI disruption. The conflict in the Middle East reinforced the appeal of asset-backed companies having durable pricing power amid renewed inflationary pressures. However, this rotation was short-lived, and by April, the leadership had re-concentrated in mega-cap growth stocks, particularly within technology and AI-linked names. Geopolitical developments, such as the conflict in the Middle East, intermittently contributed to market volatility, impacting energy prices and risk sentiment. While these episodes led to short-term drawdowns and sector rotation, notably into energy and defensive assets, their overall impact on US equity market direction over the period was limited. On the monetary policy front, the Fed transitioned from a peak rate environment into an easing phase in the second half of 2025, delivering a series of rate cuts as inflation moderated. Nevertheless, policy remained relatively restrictive overall, with the Fed maintaining a cautious, data-dependent stance, and slowing the pace of easing into early 2026 given renewed inflationary pressures.

The fund underperformed the comparative index over the period, driven primarily by negative stock selection in the health care sector, alongside weaker contributions from materials, communication services and energy. The health care sector faced headwinds from policy and US regulatory uncertainty, including pricing pressure concerns, as well as mixed earnings delivery across managed care and medical technology companies. At a stock level, key detractors from returns included Boston Scientific, Planet Fitness and UnitedHealth. Conversely, the IT sector, particularly semiconductors, contributed positively, with the holdings in Lam Research, Marvell Technology and KLA gaining from the positive sentiment towards AI infrastructure beneficiaries. The underweight allocation to the financials sector enhanced relative value.

The fund was repurposed on 13 April 2026 from a US-focused sustainable strategy to a globally diversified value strategy, which changed its investment objective, universe and risk profile. The portfolio is now positioned as a high-conviction, bottom-up value portfolio of c. 40-60 stocks, with greater global diversification across developed and emerging markets. Current positioning reflects a focus on identifying good businesses trading below their intrinsic value, with an emphasis on quality companies, change-driven opportunities, and attractive valuation. The portfolio is constructed with a long-term investment horizon and high active share, allowing capital to be allocated flexibly across regions and sectors. Performance is primarily driven by stock-specific fundamentals rather than macro or geographic positioning. At a sector level, the fund has an overweight position in materials, health care and industrials.

Fidelity Funds

Greater China Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 789 MILLION

Manager's Overview

The stock market recovered strongly from the tariff-driven sell-off in April 2025. Mainland Chinese equities gained, supported by technology strength and policy support, despite volatility from tariffs, geopolitical tensions and oil price shocks. Economic data was mixed but showed tentative stabilisation. Hong Kong stocks benefited from elevated initial public offering (IPO) activity, improving residential property sentiment, steady fund flows and resilient earnings. Taiwan outperformed in a tech-led rally, as investors focused on its role in the global AI hardware supply chain. IT, materials and energy outperformed.

The fund underperformed the comparative index over the period, mainly due to selected holdings in IT, real estate and materials. The underweight position in Xiaomi contributed as its shares retreated from record highs amid weakening fundamentals, including a smartphone downcycle and intense competition in electric vehicles (EVs). Taiwanese companies related to AI infrastructure buildout rose on AI-linked growth and strong earnings. Positions in MediaTek, Unimicron Technology and Gold Circuit Electronics added value, while underweight exposure to Delta Electronics and Taiwan Semiconductor Manufacturing Company reduced relative returns. Near-term regulatory pressure on online platforms and AI disintermediation risks weighed on Trip.com Group and Full Truck Alliance.

The manager focuses on areas that can deliver sustainable quality growth over the next three to five years. As a result of the bottom-up stock selection process, the fund was overweight in China and underweight in Hong Kong and Taiwan. Selected consumer and industrial stocks were among the key holdings in the portfolio. Conviction holdings included MediaTek, a major Taiwanese chip design company; Contemporary Amperex Technology, a global leader in EV batteries and energy storage systems; and China Mengniu Dairy, a leading dairy producer in a duopoly market that may benefit as the raw milk cycle bottoms and industry supply rebalances.

Fidelity Funds

Iberia Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 321 MILLION

Manager's Overview

Iberian equities delivered strong positive returns, outperforming their European peers over the 12-month period. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader global risk-on rebound and an encouraging start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation, and energy supply risks.

The fund generated positive returns but underperformed the index. Negative stock selection and sector positioning detracted from relative performance. Within financials, the portfolio maintained a meaningful allocation to banks but continued the underweight stance relative to the benchmark, which proved unfavourable as European banks performed strongly over the period. In particular, the underweight position in CaixaBank detracted from returns. Stock selection within utilities was also disappointing, with Redeia among the key detractors. Within consumer discretionary, holdings in Amadeus IT lagged amid the 'AI losers' narrative, however, fundamentals remain intact. Conversely, stock selection within communication services contributed positively. The position in Zegona Communications added relative value, while the lack of exposure to Telefónica was also beneficial.

The portfolio is positioned to take advantage of opportunities across both Spanish and Portuguese equities through a diversified, bottom-up, style-agnostic approach. Country exposures are the outcome of stock selection rather than top-down allocation decisions, with a focus on identifying companies where the investment case is driven by a change in growth perception, an identifiable external catalyst, or a meaningful internal transformation.

Fidelity Funds

India Focus Fund [7,8]

FUND SIZE AS AT 30.04.2026 : USD 2,152 MILLION

Manager's Overview

Indian equities posted negative returns in the review period. Foreign institutional investors were the net sellers, while domestic institutional investors were the net buyers of Indian equities. On the economic front, inflation came slightly below expectations in March. The reading was within the central bank RBI's tolerance band of 2%-4%. RBI maintained its repo rate (the rate at which it lends to other banks) at 5.25%, while retaining its neutral stance. Meanwhile, the HSBC India Services Purchasing Managers' Index (PMI) climbed higher in April and remained in expansionary territory for the 57th consecutive month. The latest reading showed the strongest expansion since November last year, driven by a sharper increase in both new orders and output. However, growth in external demand weakened amid the Middle East conflict and muted inbound tourism. Meanwhile, employment figures rose, allowing firms to reduce outstanding workload.

The fund underperformed the comparative index over the period. High-quality private sector banks ICICI Bank and HDFC Bank came under pressure, while Five Star Business Finance, a non-banking financial company, also detracted from performance. On the positive side, Fortis Healthcare, KEI Industries and Rubicon Research contributed to performance.

Macroeconomic conditions continue to evolve rapidly, with frequently emerging uncertainties. Nevertheless, the core investment process remains unchanged and disciplined. Overall, the manager remains focussed on his investment process and quality bias, investing for the long term in sustainable growth businesses benefiting from India's structural growth trends, managed by strong management teams and trading at reasonable valuations. The portfolio maintains its defensive approach, keeping an overweight position in private sector financials and consumer discretionary businesses, where the manager finds structural growth opportunities at a more reasonable price. The portfolio has underweight holdings in consumer staples, materials and energy amid low growth and high valuations, and management interests too are not aligned with that of minority shareholders.

Fidelity Funds

Indonesia Fund

FUND SIZE AS AT 30.04.2026 : USD 152 MILLION

Manager's Overview

Indonesia was ASEAN's weakest-performing market over the period, weighed down by governance concerns, currency weakness and sustained foreign outflows. Investor sentiment deteriorated sharply after MSCI raised concerns over market investment conditions and data transparency in January 2026, triggering significant passive as well as active capital withdrawals. At the same time, the rupiah depreciated to record lows against the US dollar, prompting repeated intervention by Bank Indonesia and adding pressure to domestic financial assets.

The fund outperformed the comparative index over the period. Relative outperformance was supported by the manager's disciplined approach in avoiding momentum-driven, expensive & low-quality "meme stocks" such as Dian Swastatika Sentosa, Barito Renewables, GoTo Gojek and PT Chandra Asri Pacific, all of which de-rated significantly during the period. This reflected a broader normalisation in the Indonesian market, supported in part by increased scrutiny following the MSCI index developments, which contained excess valuations in these lower-quality segments. These gains at a fund level were partially offset by the portfolio's lack of exposure to some of the other "meme stocks" such as Barito Pacific and Bumi Resources Minerals. Within consumer staples, Mayora Indah and Indofood CBP Sukses also weighed on performance. Earnings growth across both businesses slowed in 2025 followed by further guidance downgrades in 2026. However, in our view the scale of the subsequent derating appears disproportionate relative to the underlying deterioration in fundamentals. Despite near-term operational challenges, we continue to have confidence in the long-term strength of these franchises, supported by established brands, resilient market positions, and experienced management teams. Meanwhile, weakness within the consumer space was largely offset by our holdings in Japfa Comfeed and Bumitama Agri at a sector level.

We employ a fundamental, bottom-up-driven investment approach, supported by stock selection, industry analysis and sustainability assessment. The focus is on identifying mispriced opportunities with attractive risk-reward profiles. The fund primarily has overweight positions in financials, industrials, real estate, and the consumer sectors.

Fidelity Funds

Italy Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 425 MILLION

Manager's Overview

Italian equities delivered strong gains over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Resilient corporate earnings, easing inflation and improved fiscal visibility supported markets. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader global risk-on rebound and an encouraging start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks.

The fund underperformed the comparative index over the period. The overweight exposures to industrials and health care, and the underweight allocation to energy hampered relative returns. Both stock selection and overweight positioning in the technology sector added value. The underweight exposure to consumer discretionary also proved rewarding. At a stock level, the underweight allocation to cable manufacturer Prysmian detracted from returns, as shares traded higher supported by grid modernisation and AI-driven demand. The underweight allocation to oil and gas company Eni detracted from performance as the shares rose on firmer oil prices. By contrast, the underweight position in luxury car maker Ferrari added value as the stock declined on the back of margin pressure and a higher cost base. Semiconductor company STMicroelectronics contributed positively on improving semiconductor demand and AI- and data centre-related opportunities.

The managers look for change opportunities in attractively valued Italian companies, where the market fails to see growth potential based on short-term issues or misconceptions. There is an additional focus on business with strong sustainable characteristics including, but not limited to, governance and superior management of environmental, social and governance issues.

Fidelity Funds

Japan Equity ESG Fund [8]

FUND SIZE AS AT 30.04.2026 : JPY 46,992 MILLION

Manager's Overview

The Japanese equity market rose strongly during the period, with both the Nikkei 225 and TOPIX reaching record closing highs. Concerns over US tariffs and their impact on the global economy weighed on investor sentiment earlier in 2025, but a pause in trade tariffs, gains in technology stocks and strong corporate earnings supported equities later. In July 2025, US President Donald Trump announced a trade deal with Japan, which will set tariffs on imports from the country at 15%, much lower than the initially announced rate. A positive market response to the formation of Prime Minister Sanae Takaichi's new administration also supported equities. The Bank of Japan's key short-term interest rate stood at 0.75% at the end of the review period, while the yen weakened to around ¥157 against the US dollar. Fundamentals remained supportive. Japan's October to December 2025 earnings season was robust, with aggregate profits rising in the mid-single digits and a high share of companies upgrading full-year guidance. All sectors recorded positive returns during the year, with energy, IT and materials topping the table.

The fund recorded strong absolute returns but underperformed the comparative index over the period. Stock selections in the electric appliances, and information and communication sectors, held back overall performance, while the underweight stance in non-ferrous metals also detracted from relative returns. Selected stocks in the construction and foods segments added value. Within the electric appliances sector, Sony Group and Fujitsu were among the key detractors. Higher memory chip costs weighed on Sony's share price. The longer-term case, however, is supported by improving gaming profitability and the scope for further efficiency gains from internal AI adoption. Fujitsu also declined as investors reacted to AI disruption risk and lower sector valuations. Nevertheless, we continue to see a favourable medium-term outlook for the stock, supported by demand for core system renewal and productivity gains from internal AI adoption. The lack of exposure to AI-related names such as semiconductor-equipment maker Advantest and technology investor SoftBank Group also weighed on relative returns. On a positive note, general contractor Kajima outperformed on rising expectations for sustained profit growth, driven by firm domestic order intake and pricing, and improving gross margins in its construction business. Expectation of enhanced shareholder returns and disposals of strategic shareholdings supported multiple expansion. Meanwhile, Tokyo Ohka Kogyo and DISCO outperformed as results and guidance strengthened confidence in AI-driven demand for leading-edge semiconductor production. The lack of exposure to video game maker Nintendo further supported relative performance.

The fund leverages Fidelity's differentiated research capabilities and analysts' top ideas to deliver a portfolio that promotes sustainable characteristics. The investment process is a direct reflection of our analysts' best sustainable ideas within the Japanese equity universe. Among the largest sector positions are electric appliances, banks, and construction. Mitsubishi UFJ Financial Group, Mizuho Financial Group and Hitachi are among the key active holdings.

Fidelity Funds

Japan Growth Fund [8]

FUND SIZE AS AT 30.04.2026 : JPY 4,189 MILLION

Manager's Overview

The Japanese equity market rose strongly during the period, with both the Nikkei 225 and TOPIX reaching record closing highs. Concerns over US tariffs and their impact on the global economy weighed on investor sentiment earlier in 2025, but a pause in trade tariffs, gains in technology stocks and strong corporate earnings supported equities later. In July 2025, US President Donald Trump announced a trade deal with Japan, which will set tariffs on imports from the country at 15%, much lower than the initially announced rate. A positive market response to the formation of Prime Minister Sanae Takaichi's new administration also supported equities. The Bank of Japan's key short-term interest rate stood at 0.75% at the end of the review period, while the yen weakened to around ¥157 against the US dollar. Fundamentals remained supportive. Japan's October to December 2025 earnings season was robust, with aggregate profits rising in the mid-single digits and a high share of companies upgrading full-year guidance. All sectors recorded positive returns during the year, with energy, IT and materials topping the table.

The fund recorded strong absolute returns but underperformed the comparative index over the period. Security selections in the information and communication, and services sectors detracted from returns, but left a positive impact on performance within the machinery, precision instruments and retail trade segments. Shares in Tokyo Electron fell after the semiconductor production equipment maker cut its earnings guidance during the third quarter of 2025. A confidential information leak exacerbated the correction. However, subsequent news flow regarding the memory chip cycle and leading edge/AI capital expenditure raised expectations for future earnings growth. The lack of exposure to AI-related stocks such as semiconductor-equipment maker Advantest and technology investor SoftBank Group also weighed on relative returns. The holding in entertainment group Anycolor detracted from returns due to the company revising down its full-year profit forecast. Despite an increase in overall sales, investor sentiment fell as higher operational costs, inventory disposals, and planned write-downs negatively impacted expected profits. The position in NAND flash memory maker Kioxia Holdings added value as rising demand for data storage from AI-focused companies led to expectations that higher prices will lead to faster revenue and earnings growth. In the retail sector, Ryohin Keikaku, operator of the MUJI brand of general merchandise stores, ranked among the key detractors over the period.

Japan continues to offer a plethora of under-researched mid/small-cap growth companies. As active managers based here on the ground, the portfolio managers have the opportunity not only to invest in established global leaders, but also to unearth less well-known companies, where lower levels of analyst coverage can often create some great mispriced opportunities. Identifying under-covered companies with idiosyncratic sources of growth represents a potential source of differentiated returns for the fund.

Fidelity Funds

Japan Value Fund [8]

FUND SIZE AS AT 30.04.2026 : JPY 573,522 MILLION

Manager's Overview

The Japanese equity market rose strongly during the period, with both the Nikkei 225 and TOPIX reaching record closing highs. Concerns over US tariffs and their impact on the global economy weighed on investor sentiment earlier in 2025, but a pause in trade tariffs, gains in technology stocks and strong corporate earnings supported equities later in the period. In July 2025, US President Donald Trump announced a trade deal with Japan, which will set tariffs on imports from the country at 15%, much lower than the initially announced rate. A positive market response to the formation of Prime Minister Sanae Takaichi's new administration also supported equities. The Bank of Japan's key short-term interest rate stood at 0.75% at the end of the review period, while the yen weakened to around ¥157 against the US dollar. Fundamentals remained supportive. Japan's October to December 2025 earnings season was robust, with aggregate profits rising in the mid-single digits and a high share of companies upgrading full-year guidance. All sectors recorded positive returns during the year, with energy, IT and materials topping the table.

The fund recorded strong absolute returns and outperformed the comparative index over the year. Strong security selections in the construction and non-ferrous metals sectors contributed to returns, but a combination of stock picking and market selection in the machinery and wholesale trade sectors detracted from returns. Positions in insurance companies detracted from performance amid periods of heightened macro and political uncertainties, and a pullback in ultra-long yields. Key detractors included Tokio Marine Holdings. Nevertheless, fundamentals remain on track and the stocks look attractive from a yield perspective. The underweight stance in technology investor SoftBank Group and semiconductor equipment group Tokyo Electron also held back relative returns. Meanwhile, holdings in non-ferrous metals added value. Optical cable makers Furukawa Electric and Sumitomo Electric Industries outperformed after corporate earnings results showed that demand linked to data centre and telecommunications investment was translating into stronger earnings. At Furukawa Electric, improved volumes and product mix supported profitability in IT solutions, while upgraded guidance pointed to a more sustained recovery. Sumitomo Electric Industries also reported a strong update, with solid fibre demand in telecommunications supporting margin improvement. Electrical engineering sub-contractor Kinden added value as it positively revised its full-year earnings guidance to reflect higher gross margins stemming from price hikes at the point of order, cost pass-through for works in progress and an increase in sales of high-margin redevelopment projects.

The portfolio manager follows a bottom-up stock selection approach grounded in valuation discipline, with a focus on companies that are undervalued relative to the strength of their balance sheets, cash flow generation and earnings growth potential. The fund retains a value bias, while maintaining exposure to structural growth areas such as AI and defence. The fund remains focused on domestic construction businesses, which are relatively insulated from the macroeconomic cycle, alongside financials stocks, mainly banks, which are more cyclical. Key active positions include Kinden, Mitsubishi Electric and Yokohama Financial Group.

Fidelity Funds

Latin America Fund

FUND SIZE AS AT 30.04.2026 : USD 417 MILLION

Manager's Overview

Latin American equities advanced during the period, outperforming broader emerging and developed markets. The region's largest markets, Brazil and Mexico, delivered positive returns. Brazilian equities initially weakened following the US administration's unexpected 50% tariff announcement on Brazilian goods, but they later recovered, supported by the first interest rate cuts in nearly two years. Mexican equities also performed strongly, supported by currency appreciation, resilient domestic demand, and the central bank Banxico's continued monetary policy easing. Smaller markets, including Peru, Chile and Colombia, also posted strong gains.

The fund posted positive returns but underperformed the comparative index. At a country level, security selections in Brazil and the US detracted, although these losses were offset by the fund's positioning in these markets. Meanwhile, both stock picking and overweight exposure to Peru, alongside holdings in Canada (via mining exposure), supported performance. The underweight position in Brazil's Petrobras (oil and gas) detracted, as did financials holdings like Banco do Brasil and AGI. Mexico's Regional Bank also held back gains. Within the materials exposure, Brazil's Aura Minerals (gold and copper mining firm), Peru's Buenaventura (gold mining company) and Canada listed Ero Copper (copper mining firm) enhanced gains.

The managers follow a high-conviction, bottom-up, quality growth approach, centred on the belief that companies that exhibit strong cash generation and robust balance sheets offer the most attractive opportunities for investors over the medium- to long-term. Financials is the largest absolute position. We hold several leading banking and financial services franchises such as Nubank, Banco do Brasil and Inter & Co (the holding company for banking app Banco Inter) in Brazil. The fund also has exposure to several Mexican financials stocks, including microfinance lender Gentera, and Regional Bank. Within materials, iron ore producer Vale and copper mining group Grupo Mexico are among the key holdings in the portfolio.

Fidelity Funds

Nordic Fund [8]

FUND SIZE AS AT 30.04.2026 : SEK 9,109 MILLION

Manager's Overview

Nordic equity markets delivered strong positive returns over the 12 months to April 2026 period, broadly in line with European equities despite elevated geopolitical and macroeconomic uncertainties. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments across Europe. Gains extended into early 2026, although volatility rose as the Middle East tensions triggered an energy shock, increasing concerns around inflation and energy security. Equities partially recovered in April amid improving risk sentiment and a solid start to the corporate earnings season.

The fund outperformed the comparative index, supported by its valuation-driven and contrarian investment approach, with strong stock selection and sector positioning across energy, industrial transportation, materials and selected cyclical exposures. Within energy, Neste, Subsea 7 and BW Energy benefited from stronger refining margins, firmer oil prices and improving offshore investment activity. Tanker holdings including Okeanis Eco Tankers and TORM also performed strongly as shipping markets were underpinned by geopolitical disruption, sanctions-related trade dislocations and constrained vessel supply. Not holding Novo Nordisk was the biggest contributor to relative returns, as the shares weakened following muted forward guidance, rising competitive pressures and pricing concerns. Conversely, Betsson detracted following regulatory tightening in Turkey and concerns around profitability. Lindex Group also weighed on returns as plans to separate the Stockmann department store business were poorly received by the market. Elsewhere, GN Store Nord detracted amid weaker sector sentiment and weak consumer demand.

The portfolio manager focuses on identifying under-owned businesses with improving fundamentals, including special situations, turnaround opportunities and undervalued growth compounders, supported by a disciplined valuation framework and robust risk controls. This differentiated approach seeks to capture valuation dispersion across sectors and styles rather than replicate index-driven exposures. At a sector level, the fund retains overweight positions in consumer discretionary and energy.

Fidelity Funds

Pacific Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 1,113 MILLION

Manager's Overview

Regional equities advanced during the period despite uncertainty around tariffs and rising geopolitical tensions. Investor sentiment improved after the US began trade negotiations with key partners. However later in the period, escalating US-Israel-Iran tensions lifted oil prices, fuelling inflation concerns. Technology-focused markets such as Taiwan and South Korea posted strong gains, while Chinese equities delivered muted returns despite firmer early-2026 economic data and supportive growth targets in the 15th Five-Year Plan. Australian equities benefited from commodity strength, while Japanese markets gained on expectations of pro-growth reforms. In ASEAN, Indonesian equities weakened after MSCI raised concerns over market transparency and trading restrictions, hurting investor confidence.

The fund outperformed the comparative index over the period. Stock selection within materials and IT sectors contributed strongly to returns. Unimicron Technology, Elite material and Samsung Electronics notably advanced, supported by optimism around AI-demand and improving earnings visibility across the region's semiconductor supply chain. Elsewhere, Vitzrocell and Moneytree also added value. Conversely, the lack of exposure to SK Hynix and the underweight position in TSMC weighed on relative returns. Not holding Delta Electronics also held back gains.

The manager prefers to own companies with strong structural growth prospects, robust fundamentals, and those that are available at attractive valuations. The focus is on innovative companies that are gaining market share in consumer, technology and healthcare sectors. Unimicron Technology benefits from rising AI and high-performance computing demand, supported by its leadership in advanced ABF substrates and improving product mix. Dialog Axiata is well positioned to capture long-term data consumption growth in Sri Lanka through its market-leading mobile and broadband platform, supported by ongoing digitalisation and resilient cash flow generation.

Fidelity Funds

Sustainable Eurozone Equity Fund [9]

FUND SIZE AS AT 30.04.2026 : EUR 428 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader global risk-on rebound and an encouraging start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks. Against this backdrop, the ECB reduced key interest rates to 2.0% in 2025 and subsequently left policy unchanged, reiterating that future policy decisions would remain data dependent and assessed on a meeting-by-meeting basis.

The fund underperformed the comparative index over the period. Positioning in health care (overweight) and energy (no exposure) detracted, as did stock selection in financials. By contrast, both stock selection and underweight positioning in communication services added value. The lack of exposure to the real estate sector also proved rewarding. At a stock level, leader in vitro diagnostics bioMérieux, luxury designer Hermes, insulation company Rockwool, and software business SAP were the top detractors from returns. Top performers included financials holdings including Commerzbank, BBVA, and AIB Group.

The managers look for companies with strong sustainability that also offer the best financial and non-financial performance potential. Sustainable characteristics may include, but are not limited to, governance and superior management of environmental and social issues. The fund remains concentrated with a focus on growth and quality stocks that offer sustainable returns.

Fidelity Funds

Sustainable Global Equity Fund [4,9]

FUND SIZE AS AT 30.04.2026 : USD 7 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index during the period. The fund's overweight stance in the health care sector held back gains. Within IT, allocations to Taiwan Semiconductor Manufacturing Company (TSMC) and LAM Research were the standout performers, supported by AI infrastructure build-out and signs of a broader cyclical recovery in semiconductors. However, the exposure to healthcare equipment manufacturer Boston Scientific held back gains.

The portfolio management team's investment approach focuses on companies that enable the transition to a sustainable economy and contribute to the United Nation's (UN) Sustainable Development Goals (SDGs). In essence, they believe the companies addressing the greatest environmental and social challenges with positive contribution to UN SDGs stand to earn higher and more durable returns over time. These quality franchises have favourable ESG characteristics, attractive financial fundamentals and/or sustainable or improving returns on invested capital, robust management with aligned incentives, and compelling valuations. The fund invests in SDG enablers across industrials, IT, utilities and healthcare - businesses aligned with structural growth themes and capable of delivering measurable environmental and societal impact. TSMC, the largest active position, combines a differentiated AI manufacturing moat, driven by leadership in leading-edge process nodes and deep partnerships with global chip designers - with strong revenue visibility and structurally high margins supported by scale and pricing power. It also contributes to selected UN SDGs through clear commitments towards energy efficiency, renewable electricity sourcing, responsible water stewardship, and strengthened supply-chain standards. Among the largest absolute positions in the portfolio are Nvidia and Microsoft.

Fidelity Funds

Switzerland Fund [8]

FUND SIZE AS AT 30.04.2026 : CHF 242 MILLION

Manager's Overview

Switzerland equities, along with their European peers, delivered positive returns over the 12-month period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including agreement on the EU's 2026 budget and increased defence spending commitments. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader global risk-on rebound and an encouraging start to the first-quarter earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks.

The fund generated positive returns but underperformed the index. The underperformance was driven by sector positioning, while security selection was positive. At a sector level, performance within financials was mixed, while losses from security selection were offset by the overweight positioning in the sector. Within financials, wealth managers Partners Group and VZ Holding were the top detractors from relative returns. The underweight stance in health care also dragged on relative returns. Health care names such as Tecan and Novartis (underweight) held back gains. Positively, stock picking in consumer staples and positioning in consumer discretionary added relative value. Among the top contributors were consumer stocks Callebaut and Avolta, and the underweight position in food business Nestle also added value.

The fund continues to focus on companies with high-quality business models and management teams. It maintains a sizable allocation to the health care, financials, industrials, and consumer staples sectors. Relative to the index, the fund has an underweight stance in health care, industrials, and consumer staples, and maintains an overweight holding in financials.

Fidelity Funds

Technology Opportunities Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 270 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility from geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund outperformed the comparative index over the period. An overweight stance in the IT sector supported returns. However, weak stock selection in communication services pared gains. Within IT, allocations to Unimicron and Samsung Electronics were the standout performers, supported by AI infrastructure build-out and signs of a broader cyclical recovery in semiconductors. Conversely, the allocation to SAP declined given the market's 'AI losers' narrative. The underweight position in Alphabet Inc also held back gains.

The portfolio managers focus on identifying inflection points in technology industry structures, business models, and technology cycles, constructing a balanced global portfolio that captures growth wherever it emerges. Building a portfolio of stocks at various stages of their cycles is expected to generate excess returns over time, with the co-location of the portfolio managers –in London and Hong Kong respectively – providing a truly global view of supply and demand patterns in the technology sector. The result is a concentrated portfolio of 40-70 high-conviction ideas across the global technology value chain.

Fidelity Funds

Thailand Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 136 MILLION

Manager's Overview

Thailand was the strongest-performing market in ASEAN during the period, supported by improving growth expectations, recovery in exports and tourism, and relatively stable domestic policy conditions. Investor sentiment improved significantly after Thailand reported GDP growth of 2.4% in 2025, which was ahead of expectations, prompting the government to maintain its 2026 growth outlook. Thailand additionally benefited from relative positioning within ASEAN. As governance concerns intensified in Indonesia and political uncertainty persisted in the Philippines, regional and international investors increasingly rotated into Thailand, attracted by its more stable macro backdrop and improving earnings outlook.

The fund underperformed the comparative index over the period. Stock selections in IT and energy contributed the most to returns. Against this backdrop, our underweight position in Delta Electronics (Thai) detracted from relative performance, as the stock continued to ride on the broader AI thematic momentum for power supplies and cooling solutions. Given its significant index weightage, the move had a notable impact. The manager continued the underweight allocation, taking the view that the premium valuation is not fully supported by fundamentals. The losses were however partially offset by holdings in Hana Microelectronics, Gold Circuit Electronics and Delta Electronics (Taiwan). Hana Microelectronics rebounded on improved sentiment, supported by contract wins related to thermal management in AI infrastructure. Meanwhile, Gold Circuit Electronics also added value as recent earnings results released in 2026 highlighted margin improvement, driven by demand from ASIC servers. Delta Electronics (Taiwan) is preferred as an AI proxy as it offers same thematic exposures, with similar structural growth drivers at a significantly lower valuation multiple. On the other hand, within consumer staples, our holdings in CP All and Taokaenoi Food & Market detracted the most from performance.

The fund employs a fundamental, bottom-up-driven investment approach, supported by stock selection, industry analysis and sustainability assessment. The focus is on identifying mispriced opportunities with attractive risk-reward profiles. As on 30 April 2026, the fund has sectoral overweight positions in health care, consumer discretionary and communication services, with key overweight holdings in Delta Electronics and CP All.

Fidelity Funds

UK Special Situations Fund

FUND SIZE AS AT 30.04.2026 : GBP 144 MILLION

Manager's Overview

UK equities delivered strong returns over the 12-month period. Performance was notably bifurcated across market caps, with large-cap stocks significantly outperforming their smaller counterparts. The UK market benefited from attractive valuations, which supported international inflows, mergers and acquisitions, and substantial share buyback activity. However, despite strong equity market performance, economic conditions remained fragile, with persistent inflation, subdued growth and fiscal uncertainty weighing on investor sentiment. Surprise US tariff announcements led to some volatility at the start of the review period, but markets eventually stabilised as most measures were suspended and trade negotiations progressed, with the UK securing the first bilateral agreement. As trade tensions eased, momentum improved through May and into the middle of the year, supported by resilient corporate earnings and a gradually more supportive monetary backdrop. Speculation around geopolitical developments, including a potential ceasefire in Ukraine, drove periodic swings in sentiment, while an accommodative shift by the Fed reinforced the global risk environment. Domestically, inflation remained above target but showed signs of easing as labour market conditions softened and wage growth slowed. The BoE cut interest rates by 100 bps over 2025, reflecting a balance between persistent price pressures and weakening demand. Fiscal uncertainty resurfaced ahead of the November Budget, weighing on smaller domestically-focused companies, but the announcement helped steady markets by avoiding major near-term tax or spending shocks and providing clearer guidance on borrowing and government bonds (gilts) issuance. In 2026, gains in January and February were largely offset by a sharp correction in March, as the Middle East conflict raised energy prices and renewed concerns around the outlook for inflation and economic growth. The resulting energy shock led to a repricing of inflation expectations, higher bond yields and tighter financial conditions.

The fund recorded positive returns but underperformed the comparative index over the year. The overweight stance in the consumer discretionary and industrials sectors detracted from returns. Meanwhile, security selection in the consumer staples sector and the underweight stance in the technology sector contributed to relative performance. The holding in WPP declined as the company lost market share following account losses and a cyclical downturn in advertising spending, alongside concerns around AI disruption. Digital media company Future detracted from performance, driven by a valuation de-rating given the impact of AI on web traffic. The company has taken steps to mitigate the impact by further diversifying and monetising its content, including a shift towards more direct and owned distribution channels. Elsewhere, weak underlying markets for recruitment company Hays weighed on performance. The lack of exposure to lender HSBC and energy major BP also held back relative returns. Within the banking sector, the position in Standard Chartered added value after it posted a better-than-expected profit before tax, driven by strong momentum in its wealth division. The holding in French-listed TotalEnergies was a notable contributor to returns, supported by similar market dynamics. The company also revealed resilient quarterly results and an upbeat trading update earlier in the quarter, highlighting stronger refining margins, upstream production and improving cash flows.

We remain positive on the long-term outlook for UK equities. UK valuations continue to trade at meaningful discounts to other major regions - both on outright price to earnings multiples and after adjusting for structural sector differences, such as the heavy weighting of technology in US indices. The UK still offers many pockets of value, particularly among smaller and mid-sized companies. There were early signs of an economic inflection, particularly across industrial and consumer-facing sectors that have faced a prolonged period of weakness. However, developments in the Middle East have clearly added complexity and increased near-term uncertainty. The duration of the conflict remains a key focus for markets, given its impact on oil prices, inflation, interest rate policy, growth expectations and the broader risk sentiment.

Fidelity Funds

US Equity Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 740 MILLION

Manager's Overview

US equity markets posted strong gains in the 12-month period, driven by resilient corporate earnings and continued enthusiasm around AI investment despite episodes of geopolitical and macroeconomic volatility. For much of the period, market leadership remained concentrated in large-cap technology and semiconductor stocks, with AI beneficiaries continuing to dominate index returns. This cohort accounted for a disproportionate share of performance, reflecting strong earnings delivery and sustained investor demand in this structural growth theme. Towards the end of 2025, there were signs of modest broadening in market participation as advances in AI led to growing fears of AI disruption risk for capital light, knowledge intensive businesses, even as investors closely scrutinised returns on rising AI-linked capital expenditure. This resulted in a pronounced rotation into "hard asset" sectors such as energy, materials, and industrials, which are considered less vulnerable to AI disruption. The conflict in the Middle East reinforced the appeal of asset-backed companies having durable pricing power amid renewed inflationary pressures. However, this rotation was short-lived, and by April leadership had re-concentrated in mega-cap growth stocks, particularly within technology and AI-linked names. Geopolitical developments, such as the conflict in the Middle East, intermittently contributed to market volatility, impacting energy prices and risk sentiment. While these episodes led to short-term drawdowns and sector rotation, notably in energy and defensive assets, their overall impact on US equity market direction over period was limited. On the monetary policy front, the Fed transitioned from a peak rate environment into an easing phase in the second half of 2025, delivering a series of rate cuts as inflation moderated. Nevertheless, policy remained relatively restrictive overall, with the Fed maintaining a cautious, data-dependent stance, and slowing the pace of easing into early 2026 given renewed inflationary pressures.

The fund delivered strong positive returns but underperformed the comparative index over the period. The underweight exposure to a narrow group of US mega-cap AI infrastructure beneficiaries that dominated index returns drove the underperformance, which was compounded by the exposure to selected companies perceived at risk from AI disruption. Among the 'Magnificent Seven', performance was mixed. The fund's small underweight position in Nvidia and its lack of exposure to Broadcom weighed on relative returns. Despite occasional pullbacks, both companies' share prices rose amid strong earnings and ongoing enthusiasm around AI/cloud infrastructure. Meanwhile, the overweight position in Alphabet was a leading contributor to returns. Its share price rose following strong earnings, alongside a step-up in 2026 capital expenditure plans towards funding AI infrastructure, signalling strong underlying demand and reinforcing its positioning as a key AI beneficiary. Elsewhere in the AI supply chain, positions in semiconductor equipment manufacturer KLA, analog chipmaker Analog Devices, and networking equipment provider Arista Networks traded higher on AI-related demand. As AI developments advanced, the overweight exposures to Microsoft, Salesforce and Fair Issac (FICO) pared gains as innovation in generative AI tools intensified perceived disruption risk across software, data-driven and knowledge-based businesses. In addition to sector rotation, shares in FICO fell over concerns of intensifying competition in credit scoring. Outside the AI theme, and more idiosyncratically, online sports betting group Flutter Entertainment fell on increasing competitive pressure from emerging prediction markets. Health care holdings in Boston Scientific and Insulet were also weak.

As of 1 July 2025, management of the Fund was transitioned to Sam Thomas, an established member of the US Equity Team. Effective 13 April 2026, the FF American Growth fund was renamed the FF US Equity Fund, and the investment policy has also been revised to better align to the strategy's investment approach and portfolio positioning as a large-cap blend US equity fund. Under Sam's management, the investment philosophy has evolved. The manager looks to identify companies with durable competitive advantages and operating in growing end-markets. He seeks to exploit market inefficiencies to drive outperformance. The fund's sectoral exposures are the result of the manager's bottom-up investment process, where he typically finds compelling investment opportunities across the market-cap spectrum. As such, the fund has overweight exposures to the communication services, utilities, and consumer discretionary sectors. Meanwhile, the fund has no allocation to the consumer staples sector, where in the current environment the manager does not find compelling opportunities that fit his investment philosophy.

Fidelity Funds

Water & Waste Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 828 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund outperformed the comparative index over the period. Robust stock selection within industrials and utilities supported returns. However, weak stock selection within the materials sector held back gains. Within industrials, shares in nVent Electric, an electric connection and protection solutions provider, added value, supported by exposure to high-growth data solutions and power utility verticals. Within utilities, holdings in Brazilian water utility firm SABESP added value, underpinned by regulated asset base expansion and efficiency gains following its privatisation. Conversely, an underweight stance in Ferguson Enterprises and the lack of exposure to Alfa Laval weighed on performance.

The managers look to maintain a high-purity thematic fund, which seeks to deliver long-term capital growth, through investment in sustainable water and waste practices. This objective is achieved by investing globally across water and waste value chains. The fund is fairly balanced across the water and waste sectors due to bottom-up stock selection, with a slight bias towards water holdings. The long-term megatrends of urbanisation, population growth, growing consumption, ageing infrastructure, climate change and responsible resource consumption are expected to drive the water and waste management sectors. Supportive regulations and larger-than-expected infrastructure investment underpin these megatrends. Companies exposed to the value chains of these core themes should provide above-benchmark returns across the market cycle.

Fidelity Funds

World Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 7,491 MILLION

Manager's Overview

Developed market equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Japan and US leading the gains.

The fund outperformed the comparative index over the period, driven by strong stock selection. Within the semiconductor and broader AI infrastructure value chain, Marvell Technology, Samsung Electronics, Monolithic Power Systems and BE Semiconductor contributed positively, supported by improving earnings expectations, robust data centre demand and continued strength across advanced packaging, memory and power management trends. Industrials and utilities stocks were supported by Siemens Energy and SSE, with company execution and AI/defence segment tailwinds aiding performance. Geographically, performance was relatively broad based, although stock picking in Japan detracted from returns. Diversification across styles helped navigate through periods of market rotation and saw holdings across all three of our stylistic pillars feature among the key contributors.

We are positioned with deliberate breadth across regions, sectors and our three stylistic pillars of Value, Quality and Growth, to ensure that stock-specific risk continues to primarily drive returns. The portfolio has an underweight allocation to the US, with diversified global exposure and a focus on resilience through multiple return sources. Value is tilted towards Europe and Asia, favouring balance sheet financials and restructuring stories. Quality includes longstanding compounders, with increased healthcare exposure following attractive entry points. Growth spans AI enablers and adopters, as well as non-tech structural innovators across regions. Financials positions include high-quality US and European banks. We have overweight holdings in consumer discretionary. Health care stocks are owned across all three pillars. Overall, we have an underweight stance in IT, with exposure across semiconductors, software and hardware.

Fidelity Funds

Asia Pacific Dividend Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 549 MILLION

Manager's Overview

Equities in the Asia Pacific ex Japan region delivered strong gains over the period, supported primarily by a sharp re-rating across the region's technology and semiconductor sectors amid accelerating global investment in AI infrastructure. Gains were concentrated in Taiwan and South Korea, where markets benefited from their central role within the global AI supply chain, particularly across advanced semiconductors, high-bandwidth memory and data centre infrastructure.

The fund underperformed the comparative index over the period. At a stock level, Samsung Electronics was the leading contributor to returns. Rising memory chip prices and ongoing tight supply conditions continued to act as tailwinds for semiconductor stocks. Samsung Electronics delivered robust fourth-quarter results, strengthening its presence in the high-bandwidth memory (HBM) segment, with group revenues and operating profits rising year-on-year for the quarter. Conversely, the lack of exposure to SK Hynix and our structural underweight position in Taiwan Semiconductor Manufacturing (TSMC) offset these gains. Meanwhile, positions in stocks with more defensive characteristics were a key source of resilience and added value over the period. Korean convenience retailer BGF Retail performed well, driven by improving same-store sales growth, continued market share gains and stable cash flow generation. Elsewhere in materials, Evolution Mining benefited from strength in gold prices.

The manager looks for companies with strong business moats and credible capital allocation policies, offering investors compounding returns and dividend payments. He prefers companies with a sustainable dividend stream that are supported by strong balance sheets and predictable cash flows. The fund continues to hold TSMC and Samsung Electronics as core technology holdings, given their franchise strength and long-term growth potential. TSMC remains the clear leader in advanced logic semiconductors, underpinned by its near-monopoly in leading edge technology and consistent execution, which enables it to benefit from a multi-year AI-driven upcycle. Samsung Electronics is a key beneficiary of a prolonged and structurally AI-driven memory super-cycle, where demand is increasingly driven by AI servers, inference workloads, and higher memory content across data centre and enterprise applications beyond traditional end-markets.

Fidelity Funds

European Dividend Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,305 MILLION

Manager's Overview

European equities delivered positive returns over the 12 months to April 2026 period, despite a volatile backdrop driven by geopolitical developments and macro uncertainty. Markets were supported by resilient corporate earnings, easing inflation and improved fiscal visibility, including an agreement on the EU's 2026 budget and increased defence spending commitments, particularly in Germany. Gains extended into early 2026, although volatility picked up towards the end of the first quarter as escalating Middle East tensions triggered an energy shock, heightening concerns over inflation, energy security and the policy outlook. Equities staged a partial recovery in April, supported by a broader risk-on rebound and an encouraging start to the first-quarter corporate earnings season, although sentiment remained cautious amid ongoing tariff, inflation and energy supply risks. Against this backdrop, the ECB reduced key interest rates to 2.0% in 2025 and subsequently left policy unchanged, reiterating that future policy decisions would remain data dependent and assessed on a meeting-by-meeting basis.

The fund underperformed its benchmark over the period, with both stock selection and sector allocation detracting from returns, particularly in industrials and financials. Positioning in IT and communication services also weighed on returns. These headwinds were partially offset by an underweight position in health care and positive stock selection in consumer staples. At a stock level, the lack of exposure to ASML detracted from performance following strong Q4 2025 results and better-than-expected order intake. Holdings in 3i Group were also weak amid concerns over slowing growth at its key asset, Action. Conversely, TotalEnergies contributed positively, supported by higher oil and gas prices, resilient Q4 results, and a constructive trading update. The lack of exposure to SAP also added value after the company reported muted Q4 results.

The portfolio manager's long-term investment approach focuses on companies with quality characteristics such as attractive or improving returns on capital, strong competitive position, and high free cash flow conversion.

Fidelity Funds

Global Defensive Equity Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 938 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility from geopolitical tensions. Markets were supported by AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. Stock selections in the financials and industrials sectors held back gains. Within financials, positions in Arthur J Gallagher and Progressive Corp detracted from relative returns. Within industrials, positions in RELX and Wolters Kluwer weighed on performance given the market's 'AI losers' narrative where certain stocks are seen to lose out amid the AI momentum. The lack of exposures to Alphabet, Nvidia and Broadcom detracted from relative returns as their shares advanced over the period. Meanwhile, positions in Taiwan Semiconductor Manufacturing Company and Texas instruments contributed to performance, supported by robust foundry demand and strong momentum in the semiconductor market.

The fund underwent a change in name to FF - Global Defensive Equity Fund with effect from 13 April 2026. The investment objective of the fund has been updated to explicitly reflect the fund's focus on capital preservation relative to the benchmark, alongside its existing objectives of capital growth and income. Regional and sector weightages are an outcome of the strategy's bottom-up approach to stock selection. The fund's largest absolute and relative sector exposure is to financials. However, our holdings within the sector are typically higher quality, defensive, long-term compounding businesses with low balance sheet risk. Meanwhile, industrials are an attractive source of investment ideas, given the exposure to long-term demand drivers. Our holdings within the IT sector primarily comprise technology hardware companies. We are absent from the richly valued 'Magnificent 7' stocks, which pay little to no dividends. The portfolio has no holding or a heavily underweight stance in certain areas of the market that are not compatible with the strategy's criteria.

Fidelity Funds

Global Dividend Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 21,181 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility from geopolitical tensions. Markets were supported by AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. Stock selections in the financials and industrials sectors held back gains. Within financials, the position in Progressive Corp detracted from relative returns. Within industrials, positions in RELX and Wolters Kluwer weighed on performance given the market's 'AI losers' narrative where some stocks are seen to be losing out amid the AI momentum. The lack of exposures to Alphabet, Nvidia and Broadcom detracted from relative returns as their shares advanced over the period. Meanwhile, positions in Taiwan Semiconductor Manufacturing Company, Samsung Electronics, and Texas instruments contributed to performance, supported by robust foundry demand and strong momentum in the semiconductor market.

The portfolio remains defensively positioned. The fund has key holdings in the consumer staples, non-life insurance, financial exchanges, pharmaceuticals and other sectors with limited correlation to economic growth. In the more cyclical parts of the market, the fund holds many mature businesses in the technology space, particularly in the semiconductor and hardware industries that meet its investment criteria. Industrials are an attractive source of investment ideas given the exposure to long-term demand drivers. Other large sector positions are held in consumer staples and utilities. These are more classically 'defensive' businesses where we seek out diversified businesses in strong end-markets.

Fidelity Funds

Global Dividend Plus Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,763 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. Stock selections in the financials sector held back gains. At a stock level, the position in 3i Group detracted from relative returns. The holding in RELX weighed on performance given the market's 'AI losers' narrative where some stocks are seen to be losing out amid the AI momentum. The lack of exposures to Alphabet, Nvidia and Broadcom detracted from relative returns as their shares advanced over the period. Meanwhile, positions in Taiwan Semiconductor Manufacturing Company and Samsung Electronics contributed to performance, supported by robust foundry demand and strong momentum in the semiconductor market.

Dividend strategies can offer diversification away from growth stocks whose valuations are susceptible to negative surprises. Given the fund's investment philosophy and objective to achieve both an attractive yield and capital growth with relatively low volatility versus the index and peer group, we are focused on stocks that provide a secure income and offer the prospect of dividend growth, while delivering low volatility on returns and steady capital growth over the long term. We will continue to invest in high-quality companies with strong balance sheets and attractive valuations, and where we have a high level of confidence in the persistence of cash flows across the cycle to support an attractive, growing dividend income.

Fidelity Funds

Global Equity Income ESG Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 1,017 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility from geopolitical tensions. Markets were supported by AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the comparative index over the period. Stock selection in the financials and industrials sectors held back gains. Within financials, positions in Marsh & McLennan and Progressive Corp detracted from relative returns. Within industrials, positions in RELX and Wolters Kluwer weighed on performance given the market's 'AI loser' narrative where certain stocks are seen to be losing out amid the AI momentum. The lack of exposures to Alphabet, Nvidia and Broadcom detracted from relative returns as their shares advanced over the period. Meanwhile, positions in Taiwan Semiconductor Manufacturing Company and Texas instruments contributed to performance, supported by robust foundry demand and strong momentum in the semiconductor market.

The fund focuses on sustainable businesses with strong environmental, social and governance (ESG) characteristics. Regional and sector weightages are an outcome of the strategy's bottom-up approach to stock selection. The fund's largest absolute and relative sector exposure is to the financials sector. However, our holdings within the sector are typically higher quality, defensive, long-term compounding businesses with low balance sheet risk. Meanwhile, industrials are an attractive source of investment ideas, given the exposure to long-term demand drivers. Our holdings within the IT sector primarily comprise technology hardware companies. We do not hold the richly valued 'Magnificent 7' stocks, which pay little to no dividends. The portfolio does not hold or has a heavily underweight stance in certain areas of the market that are not compatible with the strategy's criteria.

Fidelity Funds

Asia Pacific Multi Asset Growth & Income Fund [1,4]

FUND SIZE AS AT 30.04.2026 : USD 52 MILLION

Manager's Overview

Asia ex Japan equities advanced over the period, supported by AI demand and foreign inflows into technology-focused markets. Tariff uncertainties and geopolitical tensions drove volatility, with rising oil prices impacting energy-importing economies. US dollar-denominated Asian investment-grade and high-yield bonds rose, as spreads stayed tight despite elevated macro and geopolitical risks, supported by strong technical demand and improved risk-on sentiment.

The fund generated strong returns and attractive income in line with its objective. Equities contributed the most to performance, followed by alternatives and fixed income. The core allocations to Asian dividend and defensive equities supported performance amid strong investor confidence. Korean equities delivered stellar returns amid the AI-driven momentum. Broader Japanese equities and financials names, along with Chinese mid-cap equities, also added significant value. The allocations to Asian investment-grade and high-yield bonds benefited from tight credit spreads. Within alternatives, gold, copper, along with uranium and nuclear positions, acted as tailwinds.

Over the 12 months to April 2026, positioning was managed dynamically. The portfolio managers consistently rotated equity exposure, initially adding to Japan, India and Korea on domestic strength, while trimming the positions in Taiwan and taking profits in cyclical areas. As the AI momentum strengthened, allocations increasingly shifted towards technology, semiconductors and Korea, alongside selective US exposure, while maintaining downside protection through hedges. Entering 2026, the managers turned more cautious amid geopolitical risks, reducing equity beta, exercising disciplined profit-taking, and increasing hedges. They kept duration low and remained light on credit as high-yield bonds were priced to perfection. As markets rebounded in April, the portfolio returned to a risk-on stance, raising equity exposure with a strong tilt to AI capex (including robotics and Korea), rotating into renewable energy, and maintaining flexibility via cash and options.

Fidelity Funds

European Multi Asset Income Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 374 MILLION

Manager's Overview

European equities delivered positive returns despite geopolitical tensions and macro uncertainty, supported by resilient earnings, easing inflation and the ECB rate cuts. European corporate bonds performed well as investment-grade and high-yield credit spreads tightened. However, government bonds lagged amid energy-driven inflation concerns and uncertainty around the policy outlook.

The fund delivered income in line with its objective, generating positive returns over the period. Equities contributed the most to performance, followed by fixed income and alternatives. The core European dividend equities exposure helped amid positive investor sentiment. The allocation to emerging market equities delivered stellar returns given the AI-driven momentum. Meanwhile, exposures to global defence, financials and Switzerland equities also contributed to performance. Within fixed income, European high-yield bonds aided returns, driven by tight credit spreads amid an improved risk appetite. The emerging market local currency bonds, along with hybrid bonds, also acted as tailwinds to performance. The allocation to structured credit also enhanced gains.

Over the 12 months, the fund maintained a diversified and moderately risk-on positioning while actively increasing hedges amid rising geopolitical and macroeconomic uncertainties. The portfolio added exposures to European defence and infrastructure equities to benefit from increased fiscal and defence spending. Emerging market equities and debt were added for diversification and carry opportunities, alongside positions in copper mining companies. As valuations became stretched and the Middle East tensions escalated, risk was gradually reduced through profit-taking in defence and high-beta equities, alongside increased European equity hedges. Exposures to German mid-caps, emerging markets (EMs) and EM local currency bonds were reduced, while gold mining companies and lower-beta industrials were added. In April 2026, the managers added back to risk positions selectively through Nordic and Greek equities, while maintaining downside protection and reducing war-related hedges.

Fidelity Funds

Global Multi Asset Defensive Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 629 MILLION

Manager's Overview

Global equities rose over the 12-month period despite bouts of volatility driven by geopolitical tensions. The AI-led demand, strong corporate earnings, supportive macro data, and easing trade concerns boosted markets. However, early 2026 saw renewed tensions involving the US, Venezuela, Greenland, Iran, and the wider Middle East, triggering a sharp market sell-off in March amid fears over growth and inflation. Markets rebounded in April following a temporary ceasefire and renewed interest in AI stocks. Against this backdrop, Emerging Markets, Japan, and the US outperformed. From a sector perspective, energy and IT led the gains. Global fixed income delivered modest gains despite volatility due to shifting policy, inflation, and geopolitics. Sovereign yields rose and curves steepened across regions. Credit markets remained resilient, supported by strong technical demand despite periodic spread widening.

The fund generated positive returns over the review period. Within the tactical asset allocation (TAA) segment, both equity and fixed income contributed to returns. In equity, allocation to Asian equities and sectoral bets, particularly in Fidelity Global Energy and Fidelity Transition Materials strategies, supported performance. In fixed income, allocation to Emerging Markets (hard and local currency) further added value. In the strategic asset allocation (SAA) segment, returns were supported by exposure to global equities. The allocation to the Fidelity Global Technology strategy proved rewarding amid an outperformance by the broader IT sector. The position in broader commodities significantly aided returns, led by the allocation to silver. Within hedging assets, options used for protection were a cost to the fund, however, we believe the premium paid is hugely offset by the performance of the supplementary equity exposure we can afford to buy. Meanwhile, the exposure to gold too added value.

Fidelity Funds - Global Multi Asset Defensive Fund aims to achieve a better downside profile versus a blend of 20% MSCI All Country World Net Total Return EUR Index and 80% Bloomberg Global Aggregate EUR Hedged Index on a rolling three-year basis. This is an objective and not a guarantee. The fund does not use a comparative index for performance purposes.

Fidelity Funds

Global Multi Asset Dynamic Fund

FUND SIZE AS AT 30.04.2026 : USD 493 MILLION

Manager's Overview

Global equities advanced over the period despite intermittent volatility from geopolitical tensions. The AI-driven demand, strong corporate earnings and resilient macroeconomic data supported markets, although concerns over AI valuations and the Middle East tensions created headwinds. Easing trade uncertainty and policy rate cuts by the US Fed, ECB and BoE further supported sentiment. Markets weakened in March 2026 amid rising US-Israel and Iran tensions, before rebounding strongly in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Global fixed income markets delivered broadly positive returns despite volatility from shifting policy expectations, geopolitical tensions and trade uncertainty. Safe-haven demand supported US Treasuries early in the period, while Bunds and Gilts were pressured by fiscal and inflation concerns. As the period progressed, yields rose and curves steepened on persistent inflation concerns and fiscal uncertainty. In 2026, the Middle East tensions and higher oil prices revived stagflation concerns, prompting a reassessment of rate cuts. Credit markets remained resilient, with spreads largely stable.

The fund generated positive returns over the period through dynamic and diversified allocations. The preference for equity, specifically allocation to US equity, contributed meaningfully in the first half of the period, supported by Fed policy easing, stronger economic data, resilient earnings and easing trade tensions. Transition materials, copper-related holdings and selective allocation into global semiconductor holdings within AI-related exposure aided returns. Within fixed income, allocations to global income-paying bonds, emerging market debt and global convertible bonds added value. Exposure to commodities, including gold, silver, platinum and copper, also proved rewarding.

The managers remain focused on maintaining nimble and flexible positioning, while selectively allocating to areas of higher conviction. They continue to see robust demand driven by AI investment and have broadened exposure beyond semiconductors to include companies that are involved in data centres, connectivity, cooling systems and power infrastructure. They maintained diversified energy exposure to capture growth and hedge against geopolitical escalation. They remain cautious on European equities given their weaker earnings momentum, and on Japanese equities due to energy sensitivity. Meanwhile, they prefer credit over government bonds, focusing on income while limiting duration risk, and retaining broader commodities exposure to capture energy-related effects.

Fidelity Funds

Global Multi Asset Growth & Income Fund [4,6,8]

FUND SIZE AS AT 30.04.2026 : USD 150 MILLION

Manager's Overview

Global equities and bonds advanced over the period, supported by AI-led demand, corporate earnings, and steady macroeconomic indicators. Easing monetary policy globally improved sentiment. However, geopolitical tensions and valuation concerns drove volatility, with a sharp March decline followed by a recovery in April 2026. Credit markets mostly performed better than sovereign bonds.

The fund generated strong positive returns and attractive income in line with its objective. Equities contributed the most to performance, followed by alternatives and fixed income exposures. The core global equities strategies helped amid positive investor sentiment. The allocation to Korean equities delivered stellar returns given the AI-driven momentum. Japanese banks and mid-cap equities, along with Greek equities, also aided returns. Elsewhere, the allocation to emerging market local currency bonds aided returns amid positive currency movements. Within alternatives, gold, copper, uranium and nuclear holdings, along with structured credit, acted as tailwinds.

Over the 12 months to April 2026 period, the positioning evolved from a broadly pro-risk stance towards a more tactical and theme-driven allocation as geopolitical and valuation risks increased. The portfolio consistently focused on domestic revenue opportunities, adding to areas such as German, Japanese, Korean and Chinese mid-cap equities, alongside financials like Japanese and Greek banks, along with US financials stocks. As AI momentum strengthened, exposures to semiconductors, US technology, robotics and broader AI capex beneficiaries were increased, while energy equities were introduced as a hedge amid rising geopolitical tensions. In early 2026, managers reduced equity beta and increased hedges as Middle East risks escalated, taking profits from Korean, Japanese and Chinese positions. By April, the portfolio re-risked selectively through AI-linked equities and Korean names, while rotating out of energy equities into renewable energy. Duration remained low overall, credit exposure stayed limited, while options alongside cash were used to preserve flexibility.

Fidelity Funds

Global Multi Asset Income Fund [6,8]

FUND SIZE AS AT 30.04.2026 : USD 3,799 MILLION

Manager's Overview

Global equities and bonds advanced over the period, supported by AI-led demand, corporate earnings, and steady macroeconomic indicators. Easing monetary policy by major central banks improved sentiment. However, geopolitical tensions and valuation concerns drove volatility, with a sharp March decline followed by an April recovery in 2026. Credit markets mostly performed better than sovereign bonds.

The fund generated attractive income in line with its primary objective and delivered strong returns. Equities contributed the most to performance, followed by fixed income and alternatives. The core global and US dividend equities exposures helped amid positive investor sentiment. The allocation to Korean equities delivered stellar returns given the AI-driven momentum. The US semiconductor and power-related equities, along with Japanese banks, also aided returns. Within fixed income, emerging market local currency bonds exposure along with management of currency hedges later in the period proved fruitful. The diversified high-yield bonds exposure across US, Europe and Asia also acted as tailwinds wherein credit spreads tightened.

Over the 12 months, positioning evolved from a diversified but cautious stance to a more dynamic, pro-risk approach with structural hedging. The portfolio complimented global equity exposure with selective exposure to US technology stocks given their strong earnings momentum. Equity exposure was actively managed, increasing through 2025 with additions to US technology, Korean equities, defence, and Japanese banks, while selectively taking profits in China and later reducing allocations to Asia. The focus gradually shifted towards AI-linked themes, including semiconductors and power-related equities. Entering 2026, the managers reduced risk positions given geopolitical tensions, with profits taken and increase in hedges across US and European equities. As markets rebounded in April, the managers added back to risk via options, while maintaining downside protection. They added to emerging markets such as Korea, Brazil and China, reduced US dollar and EM currency hedges, and favoured themes like robotics and large-cap growth equities.

Fidelity Funds

Global Multiple Opportunities Fund [4,6,8]

FUND SIZE AS AT 30.04.2026 : EUR 58 MILLION

Manager's Overview

Global equities and bonds advanced over the period, supported by AI-led demand, corporate earnings, and steady macroeconomic indicators. Easing monetary policy by major central banks improved sentiment. However, geopolitical tensions and valuation concerns drove volatility, with a sharp March decline followed by an April recovery in 2026. Credit markets mostly performed better than sovereign bonds.

The fund was repurposed from FF Sustainable Multi Asset Income fund to FF – Global Multiple Opportunities on 3 November 2025. The fund aims to deliver long-term capital growth through a balanced exposure to global markets. The portfolio approach is unconstrained with high levels of flexibility to invest across different asset classes, sectors and regions. The fund leverages Fidelity's bottom-up equity and fixed income research, investing in high-conviction individual securities. The team complements security selection with top-down multi-asset portfolio construction expertise. The portfolio maintains diversified equity and fixed income exposures, with recent positioning changes including reduction in gold holdings and lowering the exposure to selected fixed income securities as credit spreads tightened. Within the equity allocation, the largest sector exposures are to IT, financials, industrials and healthcare sectors. The focus is on high-quality companies, with sustainable competitive edges, strong and consistent cash flow generation, high returns on invested capital and attractive opportunities for organic and inorganic growth. The fixed income allocation remains focused on a mix of high-yield, hybrid, investment-grade corporate and sovereign bonds.

Going forward, risks to markets and the global economy remain elevated, particularly if disruptions to energy supply persist. The team continue to focus on building a well-diversified portfolio centred on high-quality companies with strong cash flow generation, sustainable competitive advantages and attractive long-term growth opportunities.

Fidelity Funds

Multi Asset Dynamic Inflation Fund [4]

FUND SIZE AS AT 30.04.2026 : USD 146 MILLION

Manager's Overview

Global equities advanced over the period despite intermittent volatility from geopolitical tensions. AI-driven demand, strong corporate earnings and resilient macroeconomic data supported markets, although concerns over AI valuations and the Middle East tensions created headwinds. Easing trade uncertainty and policy rate cuts by the US Fed, ECB and the BoE further supported sentiment. Markets weakened in March 2026 amid rising US-Israel and Iran tensions, before rebounding strongly in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Global fixed income markets delivered broadly positive returns despite volatility from shifting policy expectations, geopolitical tensions and trade uncertainty. Safe-haven demand supported US Treasuries early in the period, while fiscal and inflationary concerns impacted German government bonds (Bunds) and UK sovereign bonds (Gilts). As the period progressed, yields rose and curves steepened on persistent inflation and fiscal uncertainty. In 2026, the Middle East tensions and higher oil prices revived stagflation concerns, prompting a reassessment of rate cuts. Credit markets remained resilient, with spreads largely stable despite episodic volatility.

The fund generated positive returns. Growth assets contributed the most to returns, supported by the exposures to growth alternatives, alongside developed and emerging market equities. Credit exposure also enhanced gains. Within inflation assets, commodities, particularly physical gold, proved rewarding on the back of a volatile market backdrop. Within defensive assets, exposure to defensive alternatives added value, while options used for protection offset some gains.

The fund invests in traditional and non-traditional asset classes and will use passive and active building blocks. It combines top-down macroeconomic insights with bottom-up research to make tactical asset allocation decisions, while using strategies, including quantitative signals and qualitative insights, to dynamically manage downside risk. The fund will dynamically change its asset allocation based on the prevailing inflation environment.

Fidelity Funds

Asia Pacific Bond ESG Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 16 MILLION

Manager's Overview

Asian fixed income markets delivered positive returns over the period, although they experienced bouts of volatility driven by shifting US monetary policy expectations, geopolitical tensions and US reciprocal tariff developments. Despite these challenges, Asian credit markets remained relatively resilient, supported by favourable technicals, resilient fundamentals and continued demand for high-quality yield. Periods of market stress led to temporary spread widening, however, Asian credit markets remained relatively more insulated compared to other global investment-grade (IG) markets, supported by resilient fundamentals and strong technical demand. China's macroeconomic backdrop stayed mixed but relatively stable, while markets such as Indonesia and the Philippines experienced intermittent volatility, particularly as rising oil prices linked to Middle East tensions weighed on sentiment. Across the region, Asian central banks adopted a more cautious tone in 2026 after beginning to ease policy alongside the US Fed during the second half of 2025. Overall, credit spreads remained relatively contained and, towards the end of the period in April 2026, sentiment improved modestly, with Asian IG spreads retracing part of the March 2026 sell-off as market conditions stabilised.

The fund posted positive returns over the period, supported by stable carry and coupon income, besides the credit selection strategy contributed the most to returns, while term structure positioning detracted slightly from relative performance. The overweight positions in sectors such as banks and brokers, insurance, other financials, utility, and capital goods contributed the most to performance. Conversely, the underweight positions in quasi-sovereigns, basic industry, energy and consumer non-cyclical detracted from relative performance. At an issuer level, Adani Green Energy (ADGREG), Renew Power (RPVIN) and Studio City Finance (STCITY) were among the key contributors. Conversely, the underweight exposures to Mitsubishi UFJ Fin Group (MUFG), Standard Chartered (STANLN) and Mizuho Financial Group (MIZUHO) detracted modestly from performance.

Asian IG fundamentals remain supportive, underpinned by resilient regional growth, attractive carry and favourable technicals amid limited net supply. Despite geopolitical uncertainty and evolving global macro conditions, Asian economies remain relatively resilient, supported by improving inflation dynamics, disciplined central bank policies and sufficient foreign exchange reserves. From a credit perspective, country selection remains a key part of our investment process. We remain constructive on high-quality sovereigns, quasi-sovereigns and financial issuers across Asia, supported by resilient fundamentals and stable funding conditions. We remain selective within China amid ongoing structural adjustments, while maintaining a constructive stance across high-quality, low beta and high growth markets including Japan, South Korea, Australia, Hong Kong, Singapore and India. Following recent market volatility, we selectively added high-quality credits where valuations and carry became more attractive. We continue to favour issuers with resilient balance sheets and stronger ESG characteristics, while participating selectively in attractive primary market opportunities.

Fidelity Funds

Asia Pacific Strategic Income Fund

FUND SIZE AS AT 30.04.2026 : USD 72 MILLION

Manager's Overview

Asian fixed income markets delivered positive returns over the period, although they experienced bouts of volatility driven by shifting US monetary policy expectations, geopolitical tensions and US reciprocal tariff developments. Despite these challenges, Asian credit markets remained relatively resilient, supported by favourable technicals, resilient fundamentals and continued demand for high-quality yield. Periods of market stress led to temporary spread widening, however, Asian credit markets remained relatively more insulated compared to other global investment-grade (IG) markets, supported by resilient fundamentals and strong technical demand. China's macroeconomic backdrop stayed mixed but relatively stable, while markets such as Indonesia and the Philippines experienced intermittent volatility, particularly as rising oil prices linked to Middle East tensions weighed on sentiment. Across the region, Asian central banks adopted a more cautious tone in 2026 after beginning to ease policy alongside the US Fed during the second half of 2025. Overall, credit spreads remained relatively contained and, towards the end of the period in April 2026, sentiment improved modestly, with Asian IG spreads retracing part of the March 2026 sell-off as market conditions stabilised.

The fund posted positive returns over the period, supported by stable carry and credit selection across Asian IG markets, while the term structure position detracted slightly from returns. At a sector level, contributions were driven by overweight exposure to sovereigns, quasi-sovereigns, financials and selected industrial issuers, while selected technology and higher volatility corporate exposures detracted modestly. At the issuer level, Philippine Government Local Currency Bonds (RPGB), Fortune Star BVI (FOSUNI) and Vedanta Resources (VEDLN) were among the key contributors, while Quanta Computer (QUANTA), SoftBank Group (SOFTBK) and Jinkai Investment (ZJMGCL) detracted from relative performance.

The fund maintained a constructive stance on Asian IG credit, supported by resilient fundamentals, attractive carry and favourable technicals. From a rates perspective, duration positioning remained active across USD and certain Asia local markets amid evolving rate expectations and geopolitical uncertainty. From a credit perspective, the fund remained focused on high-quality sovereigns, quasi-sovereigns and financial issuers, while maintaining selective exposure to higher beta credits where valuations remained attractive.

Fidelity Funds

Asian Bond Fund

FUND SIZE AS AT 30.04.2026 : USD 603 MILLION

Manager's Overview

Asian fixed income markets delivered positive returns over the period, although they experienced bouts of volatility driven by shifting US monetary policy expectations, geopolitical tensions and US reciprocal tariff developments. Despite these challenges, Asian credit markets remained relatively resilient, supported by favourable technicals, resilient fundamentals and continued demand for high-quality yield. Periods of market stress led to temporary spread widening, however, Asian credit markets remained relatively more insulated compared to other global investment-grade (IG) markets, supported by resilient fundamentals and strong technical demand. China's macroeconomic backdrop stayed mixed but relatively stable, while markets such as Indonesia and the Philippines experienced intermittent volatility, particularly as rising oil prices linked to Middle East tensions weighed on sentiment. Across the region, Asian central banks adopted a more cautious tone in 2026 after beginning to ease policy alongside the US Fed during the second half of 2025. Overall, credit spreads remained relatively contained and, towards the end of the period in April 2026, sentiment improved modestly, with Asian IG spreads retracing part of the March 2026 sell-off as market conditions stabilised.

The fund posted positive returns over the period, supported by stable carry and coupon income, while credit spread movements and term structure positioning detracted slightly from relative performance. The overweight positions in sectors such as banks and brokers, insurance, other financials, consumer cyclical and utilities contributed the most to performance, while industrial other and selected property-related exposures also supported returns. Conversely, the overweight exposures to technology and communications and basic industry detracted modestly from relative performance, while the underweight positioning in quasi / sovereign / supra / agency debt also weighed on returns. At an issuer level, Elect Global Inv Ltd (HYSAN), Hanwha Life Insurance (HLINSU) and Network I2I Ltd (BHARTI) were among the key contributors to returns. Conversely, Tencent Holdings (TENCNT), TSMC Arizona Corp (TAISEM) and Export-Import Bank Korea (EIBKOR) detracted modestly from performance.

The fund maintained a constructive stance on Asian IG credit, supported by resilient fundamentals, attractive carry and favourable technicals amid limited net supply. From a rates perspective, duration positioning remained active across USD and selective Asia local markets, with selective overweight exposures to JPY, AUD and SGD duration, while keeping an underweight position in KRW and a slightly underweight holding in CNY amid evolving rate expectations and geopolitical uncertainty. From a credit perspective, the fund remained focused on high-quality sovereigns, quasi-sovereigns and financials issuers, while selectively adding higher beta credits where valuations and carry remained attractive following episodes of market volatility. The fund maintained diversified exposure across sectors including financials, utilities, industrials and selected technology issuers.

Fidelity Funds

Asian High Yield Fund

FUND SIZE AS AT 30.04.2026 : USD 1,529 MILLION

Manager's Overview

The Asian high-yield market delivered positive returns over the period, supported by carry and selective spread tightening. Performance was uneven across months, as tariff-related risk aversion, China's property sector-linked headlines, and Middle East-related energy volatility periodically weighed on sentiment. Technical conditions were broadly supportive, with restrained primary supply focused mainly on refinancing and liability management, while demand for higher-carry, shorter-duration credit underpinned the market. Fundamentals remained resilient, particularly across Macau gaming credit, selected Indian issuers, Indonesian corporates and strong China credit markets. However, stressed property-linked issuers lagged amid weak sales, restructuring uncertainty and fragile liquidity conditions, although sentiment showed signs of recovery later in the period.

The fund posted positive returns over the period, led by both its yield and credit strategy. Conversely, the fund's term structure positioning detracted from returns. From a sector perspective, the fund's exposure to government-related issuers, and banks and brokers sectors contributed to performance. Conversely, the fund's exposure to the property and capital goods sectors held back gains. From a ratings perspective, positions across all the rating buckets contributed. At an issuer level, positions within Republic of Sri Lanka sovereigns and New World were among the top contributors, while positions in property names like Vanke Real Estate and GLP Pte held back gains.

Asia high-yield market continues to offer an attractive income profile, supported by higher outright yields and a shorter duration profile, which acts as a useful buffer against rates-driven volatility. We maintain a neutral stance, as returns are likely to be driven mainly by carry and single-name opportunities rather than broad market volatility, while tighter valuations, selective market technicals, and geopolitical uncertainty reinforce the need for disciplined credit selection and drawdown control.

Fidelity Funds

China High Yield Fund

FUND SIZE AS AT 30.04.2026 : USD 417 MILLION

Manager's Overview

China high-yield markets delivered modestly positive returns over the period, supported by carry and periods of spread tightening, but performance was repeatedly interrupted by China property sector-linked headlines and Middle East-related energy volatility. The period remained anchored by property sector developments and refinancing visibility, with outcomes increasingly differentiated by liquidity, funding access and progress in liability management. Policy support focused on incremental measures to stabilise housing activity, but broader sentiment remained cautious. China industrials were more resilient, although performance was idiosyncratic and sensitive to leverage and refinancing dynamics. Elsewhere, in Hong Kong performance was driven by issuer-specific balance sheet considerations, while Macau gaming issuers were comparatively resilient.

The fund posted positive returns over the period, led primarily by its yield strategy. Conversely, the fund's credit strategy and term structure positioning detracted from returns. From a sector perspective, the fund's exposure to the capital goods and government-related sectors contributed to performance, while positions within the property and consumer cyclical sectors detracted from returns. From a ratings perspective, positions within the BBB & Above and B rated segments contributed, while allocation to the BB and CCC & Below rated segments detracted. At an issuer level, positions in West China Cement and Studio City contributed, while positions in Vanke Real Estate and Roadking Infrastructure held back gains.

China high-yield continues to offer an attractive income opportunity, supported by high carry and relatively low duration, which helps cushion returns amid volatile US Treasury yields. The asset class remains largely domestically oriented and is expected to benefit from China's gradual economic stabilisation, while being relatively insulated from external geopolitical shocks. Beyond the property sector, fundamentals remain resilient, supported by earnings recovery and deleveraging. Property remains a key swing factor, with recovery likely to be gradual and issuer specific.

Fidelity Funds

China RMB Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : CNY 1,142 MILLION

Manager's Overview

Chinese offshore renminbi ("Dim Sum") bonds delivered positive returns, supported by strong liquidity and demand in the mainland for higher yields. Onshore bonds also performed well, aided by carry and policy support. The 10-year government bond yield ended the review period until April 2026 near 1.75%, which is 12bps higher year-on-year. The People's Bank of China boosted sentiment in May 2025 by cutting the seven-day reverse repo rate to 1.40% and lowering reserve requirements by 50bps, releasing about RMB1trn of liquidity. Growth improved but remained uneven: First quarter 2026 GDP rose 5.0% year-on-year, supported by industry and exports, while domestic demand and property stayed weak. The USD Chinese investment-grade bonds gained as spreads tightened.

The fund generated positive returns over the period, supported by stable coupon income and effective credit and term structure positioning. From a rates perspective, exposure to 0–1-year US Treasuries was the biggest contributor to performance amid rising yields. In addition, holdings in renminbi-denominated offshore bonds and Hong Kong dollar bonds also supported returns. At a sector level, allocations to quasi-sovereigns, banks and brokers, and consumer-related issuers contributed positively, while exposure to the basic industry sector detracted from performance. From an issuer perspective, holdings in MTR Corporation, Fortune Star, and Alibaba Group were among the top contributors, while exposures to Quanta Computer and Jinkai Investment undermined gains. From a ratings perspective, exposure to A-rated bonds added the most to performance.

The fund focuses on three main markets: renminbi-denominated markets, both onshore and offshore, to provide stable coupon income to anchor returns; and US dollar credits markets to offer tactical trading opportunities. Fundamentally, China's macro backdrop remains uneven, as resilient headline growth is supported by exports, high-tech manufacturing and policy easing, while weak domestic demand and the property downturn weighed on confidence. Low inflation expectations, ample liquidity and safe-haven demand support the bond environment, though stretched valuations warrant caution. The managers kept onshore RMB duration broadly stable at 0.4 years, with overall duration at 5.0 years, mainly in CNH. In credit, they fine-tuned risk after the rally, selectively adding attractive insurance exposure while maintaining high-quality defensive holdings.

Fidelity Funds

Climate Transition Bond Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 404 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns despite volatility from shifting policy expectations, geopolitical tensions, trade uncertainty and fiscal risks. Tariff announcements supported safe-haven demand for US Treasuries, while fiscal concerns, higher issuance expectations and sticky inflation pressured German sovereigns (Bunds) and UK sovereigns (Gilts). As the period progressed, long-end sovereign yields rose globally on higher term premia and persistent inflation concerns. Entering 2026, Middle East tensions, particularly the Iran conflict, lifted oil prices, reviving stagflation risks and pushing away rate cut expectations. By April 2026, central banks had adopted a more cautious tone, sovereign yields had risen across regions, and yield curves had steepened. Credit markets remained resilient, with spreads supported by strong technical demand and improved risk sentiment despite intermittent volatility.

The fund posted positive returns over the month. The fund's stable yield component and credit strategy contributed to performance, while its term structure positioning detracted from returns. The fund maintained a short to neutral credit risk position for the period. However, our credit selection more than offset the impact of the fund's beta position. The fund's exposure to securitised assets, quasi sovereign and utility issuers supported performance, while energy, consumer non-cyclical, and index CDS hedges offset the gains. Within ratings, our exposure to BBB-rated credits added value, while A-rated credits held back gains. At an issuer level, Southern Water Services and Westfield Stratford No 2 were the top contributors to returns, while Mobico Group Plc was the largest detractor. On interest rates positioning, our positioning on the AUD and GBP duration added modest value, while USD and EUR duration weighed on returns.

Positioning remains balanced and selective, reflecting a backdrop in which government bond markets price in greater inflation and geopolitical risk, while credit spreads and equities remain comparatively resilient. Higher oil prices and potential supply disruption have increased stagflation risks, particularly for energy-sensitive sectors, besides affecting technology supply chains and consumer demand. Strong technicals offset a significant underweight allocation to credit, but tight valuations warrant caution. The credit risk of the issuers versus market peers is managed around neutral to slightly short positions, with emphasis on higher-quality credit, shorter spread duration, disciplined rotation, and selective primary issuance. The managers are cautious on term structure positioning, with a preference to stay broadly neutral in rates given elevated volatility, uncertain policy paths, and persistent inflation risks.

Fidelity Funds

Emerging Market Corporate Debt Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 51 MILLION

Manager's Overview

Emerging market debt delivered positive returns over the period, with all three sub-asset classes generating gains. Hard currency sovereign and corporate bonds benefited from a tightening credit spread environment, while local currency assets were aided by a broad US dollar weakness. However, geopolitical tensions in the Middle East towards the latter part of the period made markets volatile, partially eroding the gains over the earlier period. Local currency debt was particularly affected, as higher energy prices increased inflation concerns for commodity-importing countries and led to a repricing of inflation risk premia.

The fund generated positive returns over the period, primarily driven by credit positioning and coupon income, while term structure positioning modestly detracted from performance. At a country level, exposures to Mexico, Colombia, and South Korea were among the strongest contributors to returns, with no notable detractors. Within Mexico, holdings in Gruma and El Puerto de Liverpool supported returns. In Colombia, exposures to Ecopetrol and Promigas added value. In Brazil, however, selected exposures, particularly in FS Agrisolutions and CNS, modestly weighed on performance.

We maintain a neutral stance on credit risks relative to the market in emerging market hard currency debt. The asset class continues to be supported by a weaker US dollar and easing global financial conditions. Markets have also demonstrated greater resilience compared to previous episodes of external shocks, underpinned by supportive technicals and a recovery in investor inflows. Nevertheless, valuations in certain segments remain relatively tight, reinforcing the importance of country selection and bottom-up differentiation in alpha generation.

Emerging Market Debt Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 539 MILLION

Manager's Overview

Emerging market debt delivered positive returns over the period, with all three sub-asset classes generating gains. Hard currency sovereign and corporate bonds benefited from a tightening credit spread environment, while local currency assets were aided by a broad US dollar weakness. However, geopolitical tensions in the Middle East towards the latter part of the period made markets volatile, partially eroding the gains over the earlier period. Local currency debt was particularly affected, as higher energy prices increased inflation concerns for commodity-importing countries and led to a repricing of inflation risk premia.

The fund generated positive returns over the period, primarily driven by credit positioning and coupon income, while term structure positioning modestly detracted from performance. At a country level, exposures to Venezuela, Nigeria and Mexico were among the strongest contributors, while Senegal weighed on returns. Venezuelan bonds rallied amid an improving political backdrop and rising expectations around a potential debt restructuring. In contrast, Senegal's external debt came under pressure following the disclosure of previously unreported liabilities and wider fiscal slippages. Market sentiment deteriorated further as the IMF programme discussions stalled, sovereign ratings were downgraded, and investors priced in higher refinancing and restructuring risks.

We maintain a neutral stance on credit risks relative to market peers in emerging market hard currency debt. The asset class continues to be supported by a weaker US dollar and easing global financial conditions. Markets have also demonstrated greater resilience compared to previous episodes of external shocks, underpinned by supportive technicals and a recovery in investor inflows. Nevertheless, valuations in certain segments remain relatively tight, reinforcing the importance of country selection and bottom-up differentiation in outperformance.

Fidelity Funds

Emerging Market Local Currency Debt Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 121 MILLION

Manager's Overview

Emerging market (EM) debt delivered positive returns over the period, with all three sub-asset classes generating gains. Hard currency sovereign and corporate bonds benefited from a tightening spread environment, while broad US dollar weakness aided local currency assets. However, geopolitical tensions in the Middle East towards the latter part of the period made markets volatile, partially eroding the gains over the earlier period. Local currency debt was particularly affected, as higher energy prices increased inflation concerns for commodity-importing countries and led to a repricing of inflation risk premia.

The fund delivered positive returns over the period, supported by coupon income, currency positioning, and term structure exposures. From a currency perspective, positions in the Mexican peso, South African rand, and Brazilian Real contributed positively to performance. However, exposure to the Indian rupee, Argentine peso, and Egyptian pound detracted from returns. From a duration standpoint, exposure to South African local duration added value, while Brazilian duration positioning also contributed. In contrast, positions in Indian and Czech local duration weighed on performance.

We continue to take a disciplined approach, assessing a range of macroeconomic and geopolitical outcomes. Latin America is relatively supported by high real yields and commodity exposure, while parts of Asia are vulnerable to energy import costs and inflation pass through effects. The path of oil prices and global financial conditions remains critical. A weaker US dollar is a potential medium-term tailwind, but near-term uncertainty around inflation and growth warrants caution. These factors support a cautiously positive outlook for EM local duration bonds. In terms of EM foreign exchange, a selective, neutral-to-positive stance is warranted, supported by resilient macro frameworks, stronger external buffers, and favourable terms of trade for commodity exporters. However, near-term risks remain for economies with current account deficits or high energy dependence.

Fidelity Funds

Emerging Market Total Return Debt Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 71 MILLION

Manager's Overview

Emerging market (EM) debt delivered positive returns over the period, with all three sub-asset classes generating gains. Hard currency sovereign and corporate bonds benefited from a tightening spread environment, while a broad US dollar weakness aided local currency assets. However, geopolitical tensions in the Middle East towards the latter part of the period reintroduced volatility across markets, partially eroding the earlier gains. Local currency debt was particularly affected, as higher energy prices increased inflation concerns for commodity-importing countries and led to a repricing of inflation risk premia.

The fund generated positive returns over the period, driven by coupon income and positioning in currencies, credit and term structure. At a country level, Venezuela, Ecuador and Turkey were among the strongest contributors to returns, while Senegal detracted from performance. From a currency perspective, exposure to the South African rand, Mexican peso and Brazilian Real added to performance, while the Indian rupee, Argentine peso and Chinese renminbi undermined returns. In duration, South African and Brazilian local rates positions contributed positively, while Indian and Czech local duration weighed on returns.

We are cautiously constructive on emerging market debt, supported by easing global financial conditions, a weaker US dollar and resilient EM fundamentals. Technicals remain favourable, with attractive yields continuing to support investor demand. However, valuations in parts of the market appear tight, limiting the margin for error and reinforcing the importance of selectivity. We continue to focus on relative value opportunities and country differentiation rather than broad directional exposure. While external buffers across many EM sovereign debt are stronger than in previous cycles, uncertainty around inflation, commodity prices and geopolitical developments warrants a disciplined and flexible approach to portfolio positioning.

Euro Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 710 MILLION

Manager's Overview

European fixed income markets were volatile, with early support from ECB's policy easing expectations, moderating inflation and resilient credit technicals that eventually gave way to higher sovereign yields, renewed inflation pressure and greater geopolitical risk. Government bonds were challenged by fiscal expansion, political uncertainty and shifting policy expectations, with German sovereign bond (Bund) yields rising significantly and the German yield curve steepening as markets reassessed the likelihood of further policy easing. French government bonds remained under pressure from fiscal and political instability, while peripheral markets were more resilient, supported by carry and stable domestic fundamentals. Euro investment-grade credit proved more resilient than sovereign debt, with spreads supported by investor demand, carry and stable corporate fundamentals, although higher underlying yields and intermittent risk aversion weighed on returns. The escalation of the Iran conflict and rise in energy prices in early 2026 reinforced stagflation concerns, pushed euro area inflation higher and led markets to price in a more restrictive policy path.

The fund posted positive returns over the period. The fund's stable yield component and credit strategy contributed to performance, while the term structure positioning detracted from returns. The fund maintained a defensive credit risk position for most of the period. Exposure to energy supported performance, while quasi-sovereign issuers and banks and brokers detracted from performance. Within ratings, exposure to AAA-rated credit added the most value from a total-return perspective. At an issuer level, TotalEnergies and Fiserv were among the leading contributors, while Volkswagen was the largest detractor. Interest rate exposure also weighed on performance.

The market backdrop remains complex, as growth is more resilient than expected and inflation continues to be sticky. Elevated energy prices and second-round effects suggest near-term inflation risks are underpriced, reducing the likelihood of rates returning to pre-conflict levels. Credit positioning remains defensive, with the franchise having an underweight position in credit risk despite strong technicals and the recent spread rally. Corporate credit valuations offer limited room for further tightening, while technology issuance, private credit stress and AI-related disruption remain as key risks. Preference continues for government spreads over corporate credit, with overweight exposures to Italy, Spain and France being funded by a short credit stance. Duration remains short, as markets continue to underprice European inflation risk, while energy names remain a source of pressure. Although there is lesser conviction in the curve outlook, the upward steepening position is retained. Short duration also acts as a hedge, while inflation and ECB policy uncertainty remain elevated.

Fidelity Funds

Euro Corporate Bond Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 294 MILLION

Manager's Overview

European fixed income markets were volatile, with early support from ECB's policy easing expectations, moderating inflation and resilient credit technicals that gave way to higher sovereign yields, renewed inflation pressure and greater geopolitical risk. Government bonds were challenged by fiscal expansion, political uncertainty and shifting policy expectations, with German sovereign bond (Bund) yields rising significantly and the German yield curve steepening as markets reassessed the likelihood of further policy easing. French government bonds remained under pressure from fiscal and political instability, while peripheral markets were more resilient, supported by carry and stable domestic fundamentals. Euro investment-grade credit proved more resilient than sovereign debt, with spreads supported by investor demand, carry and stable corporate fundamentals, although higher underlying yields and intermittent risk aversion weighed on returns. The escalation of the Iran conflict and rise in energy prices in early 2026 reinforced stagflation concerns, pushed euro area inflation higher and led markets to price in a more restrictive ECB policy path.

The fund posted positive returns over the period, supported by its stable yield component and credit strategy, while the term structure positioning detracted from returns. The stable yield contribution was primarily driven by carry, while credit performance reflected a defensive risk stance that was maintained throughout the period. From a sector perspective, the exposure to energy added value, whereas banks and brokers, and consumer non-cyclical issuers weighed on returns. At an issuer level, Procter & Gamble and Amcor plc were among the leading contributors, while Volkswagen was the main detractor. Within interest rate positioning, the fund's bias towards EUR duration supported performance, although the USD duration exposure offset some of the gains.

The market backdrop remains complex, as growth is more resilient than expected and inflation continues to be sticky. Elevated energy prices and second-round effects suggest near-term inflation risks remain underpriced, reducing the likelihood of rates returning to pre-conflict levels. Credit positioning remains defensive, with the franchise having an underweight stance in credit risk despite strong technicals and the recent spread rally. Corporate credit valuations offer limited room for further tightening, while technology issuance, private credit stress and AI-related disruption remain as key risks. Preference remains for government spreads over corporate credit, with overweight exposures to Italy, Spain and France being funded by a short credit stance. Duration remains short, as markets continue to underprice European inflation risk and energy issuers remain a source of pressure. Although there is lesser conviction in the curve outlook, the upward steepening position is retained. Short duration also acts as a hedge, while inflation and ECB policy uncertainty remain elevated.

Euro Short Term Bond Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 1,388 MILLION

Manager's Overview

European fixed income markets were volatile, with early support from ECB's policy easing expectations, moderating inflation and resilient credit technicals that eventually gave way to higher sovereign yields, renewed inflation pressure and greater geopolitical risk. Government bonds were challenged by fiscal expansion, political uncertainty and shifting policy expectations, with German sovereign bond (Bund) yields rising significantly and the German yield curve steepening as markets reassessed the likelihood of further policy easing. French government bonds remained under pressure from fiscal and political instability, while peripheral markets were more resilient, supported by carry and stable domestic fundamentals. Euro investment-grade credit proved more resilient than sovereign debt, with spreads supported by investor demand, carry and stable corporate fundamentals, although higher underlying yields and intermittent risk aversion weighed on returns. The escalation of the Iran conflict and rise in energy prices in early 2026 reinforced stagflation concerns, pushed euro area inflation higher and led markets to price in a more restrictive ECB policy path.

The fund posted positive returns over the period. The fund's stable yield component contributed to performance, primarily through carry, while the term structure positioning detracted from returns. The fund maintained a defensive credit risk position throughout the period. Exposure to technology and communications names supported performance, while quasi-sovereign issuers and, banks and brokers detracted. At an issuer level, Alphabet and Robert Bosch Finance were among the leading contributors, while Volkswagen was the largest detractor from performance. Within interest rate positioning, the bias towards EUR duration added value, while USD duration weighed on returns.

The market backdrop remains complex, as growth is more resilient than expected and inflation continues to be sticky. Elevated energy prices and second-round effects suggest near-term inflation risks remain underpriced, reducing the likelihood of rates returning to pre-conflict levels. Credit positioning remains defensive, with the franchise having an underweight position in credit risk despite strong technicals and the recent spread rally. Corporate credit valuations offer limited room for further tightening, while technology issuance, private credit stress and AI-related disruption remain as key risks. Preference continues for government spreads over corporate credit, with overweight exposures to Italy, Spain and France being funded by a short credit stance. Duration remains short, as markets continue to underprice European inflation risk and energy names remain a source of pressure. Although there is lesser conviction in the curve outlook, the upward steepening position is retained. Short duration also acts as a hedge, while inflation and ECB policy uncertainty remain elevated.

Fidelity Funds

European High Yield Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 2,752 MILLION

Manager's Overview

The European high-yield bond market delivered positive returns over the period, supported by spread tightening and carry income, although periodic increases in government bond yields weighed on bond performance. The ECB's June 2025 rate cut, followed by policy stability, shaped the backdrop, as investors balanced weaker growth momentum against inflation that initially moderated but later faced renewed pressure from energy-related dynamics. Technical conditions were constructive, underpinned by demand for yield and a functioning primary market, where refinancing remained a key driver of supply.

The fund posted positive returns over the period, led primarily by its yield strategy. Similarly, the fund's credit strategy contributed positively to returns. Conversely, the fund's term structure positioning detracted from returns. From a sector perspective, the fund's exposure to banks and brokers, and consumer cyclical sectors contributed to performance, while the positions in other financials and technology sectors detracted. From a ratings perspective, positions across all rating buckets contributed, except CCC and below. At an issuer level, positions within Metro Bank Holdings and Altice France were among the top contributors to returns, while positions in Grafunkelux and Petrofac held back gains.

European high-yield debt continues to offer an attractive income opportunity, with all-in yields supporting investor appetite despite compressed spreads. Market technicals remain constructive, as improving fund flows have helped absorb elevated primary market issuance, while lower-rated credit performance points to firmer risk appetite. However, the macro backdrop remains uncertain, with geopolitical risks, elevated energy prices and potential supply-chain disruption warranting a close watch. We maintain a neutral stance, as the positive income profile and supportive demand backdrop are balanced by rich valuations, ongoing macro uncertainty, and the need for disciplined credit selection.

Fidelity Funds

Flexible Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : GBP 93 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary widening.

The fund delivered positive returns over the period, supported primarily by carry, coupon and stable income, along with positive credit spread movement and currency positioning, while term structure positioning detracted from performance. From a sector perspective, the exposures to US Treasury, quasi-sovereigns and consumer non-cyclical sectors contributed the most to returns, while banks and brokers, insurance and consumer cyclical sectors also supported performance. Conversely, exposures to securitised credit and other financials detracted modestly from returns. From a rates perspective, the portfolio maintained duration long exposure across most major currencies, including USD, EUR, GBP and CAD, while remaining short on JPY. The USD, JPY and CAD duration positioning contributed positively to performance, partly offset by weaker contributions from EUR and GBP positioning. At the issuer level, HSBC Bank (HSBC), HCA Inc (HCA) and Bishopsgate Asset Financing (BISHOP) were among the key contributors, while Mosaic Solar Loans (MSAIC), Garfunkelux (GEKLDE), and Petrofac Holdco (PFCLN) detracted modestly from performance.

The portfolio remained actively positioned across rates, credit and currency markets amid elevated macro uncertainty and evolving monetary policy expectations. From a rates perspective, duration positioning remained tactical as markets reassessed the path of future easing cycles. From a credit perspective, the fund maintained diversified exposure across high-quality corporate issuers, financials and selective higher-yielding sectors where carry and valuations remained attractive. Currency positioning also contributed positively over the period, supported by active management across developed market exposures.

Fidelity Funds

Global Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 1,395 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary widening.

The fund delivered positive returns over the period. Term-structure positioning contributed positively to performance, while both credit strategy and coupon income detracted from returns. From a rates perspective, the fund's short duration positions in Japanese yen were the largest contributors, as Japanese government bond yields increased. In addition, a short bias in both the front and long ends of the EUR yield curve supported performance. Conversely, overweight exposure to GBP yield curve detracted from returns. From a sector allocation perspective, an overweight position in high-quality financials contributed positively, while an underweight allocation to quasi-sovereign debt weighed on returns. Furthermore, a short bias to peripheral European sovereign bonds detracted from performance, as spreads relative to German Bunds narrowed over the period.

The managers remain focused on US labour market conditions, consumption and inflation trends. Employment data have stabilised, while consumption remains resilient, supported by card spending, retail sales, tax refunds, interest income and wealth effects. Easing rental pressures may offset higher energy and health care costs, although the oil price uncertainty persists. The managers believe the Fed may need clearer inflation evidence before a sustained easing cycle, despite slower US growth supporting potential rate cuts. They maintain a modest long-duration bias via US Treasuries, Bunds and Gilts, while maintaining an underweight allocation to China and Japan government bonds. In credit, they retain a defensive stance, favour technology and non-US senior bank debt, and continues the underweight stance in bonds issued by business development companies (BDCs).

Fidelity Funds

Global Corporate Bond Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 411 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns despite volatility from shifting policy expectations, geopolitical tensions, trade uncertainty and fiscal risks. Tariff announcements supported safe-haven demand for US Treasuries, while fiscal concerns, higher issuance expectations and sticky inflation pressured German sovereigns (Bunds) and UK sovereigns (Gilts). As the period progressed, long-end sovereign yields rose globally on higher term premia and persistent inflation concerns. Entering 2026, Middle East tensions and the Iran conflict lifted oil prices, reviving stagflation risks and pushing away rate cut expectations. By April 2026, central banks had adopted a more cautious tone, sovereign yields had risen across regions, and yield curves had steepened. Credit markets remained resilient, with spreads supported by strong technical demand and improved risk sentiment despite intermittent volatility.

The fund posted positive returns over the period, supported by its stable yield component, credit strategy and currency positioning, while the term structure positioning detracted from performance. Within credit, the fund broadly maintained a neutral risk stance. Exposure to securitised assets and quasi-sovereign issuers supported performance, while exposures to technology and communications, and synthetic CDS detracted. At an issuer level, Southern Water Services and Westfield Stratford No. 2 were among the leading contributors, while JPMorgan Chase and Mobico Group weighed on returns. Within interest rate positioning, the bias towards AUD duration added value, while USD duration undermined returns.

Positioning remains balanced and selective, reflecting a backdrop in which government bond markets price in greater inflation and geopolitical risk, while credit spreads and equities remain comparatively resilient. Higher oil prices and potential supply disruption have increased stagflation risks, particularly for energy-sensitive sectors, technology supply chains and consumer demand. Strong technicals offset a material underweight allocation to credit, but tight valuations warrant caution. Credit risk relative to the market is managed around neutral to slightly short positions, with emphasis on higher-quality credit, shorter spread duration, disciplined rotation, and selective primary issuance. Term structure positioning remains cautious, with a preference to stay broadly neutral in rates given elevated volatility, uncertain policy paths, and persistent inflation risks.

Fidelity Funds

Global High Yield Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 199 MILLION

Manager's Overview

Global high yield delivered positive returns over the period, supported by carry and selective spread tightening, despite a volatile rates and geopolitical backdrop. The asset class remained resilient as demand for income, refinancing-led issuance and manageable default expectations supported credit markets, although higher sovereign yields periodically weighed on total returns. Performance was strongest in higher-quality
issuers, where income support, balance sheet visibility and refinancing access were better. Lower-rated and distressed credits remained more idiosyncratic, with weakness concentrated in issuers facing margin pressure, high interest costs, challenged business models or limited market access. Regionally, US and European high yield benefited from resilient demand, stable earnings and functioning primary markets, while Asia remained more uneven due to the ongoing stress in China's property sector.

The fund posted positive returns over the period, led primarily by its yield strategy. Similarly, the fund's credit strategy also contributed positively to returns. Conversely, the fund's term structure positioning detracted from returns. From a sector perspective, the fund's exposure to consumer cyclical and communications sectors contributed to performance. From a ratings perspective, positions across all rating buckets contributed. At an issuer level, positions in Western Digital and Metro Bank Holdings were among the top contributors to returns, while positions in Vanke Real Estate and Braskem held back gains.

Global high yield remains supported by attractive carry, resilient fundamentals and limited default expectations, while stronger primary market activity has generally been absorbed by investor demand. However, spreads have retraced much of their earlier widening, leaving valuations less forgiving and increasing the importance of sector, ratings and issuer selection. We maintain a neutral stance, with returns expected to be driven mainly by income, structure and bottom-up credit selection rather than broad market volatility.

Fidelity Funds

Global Hybrids Bond Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 53 MILLION

Manager's Overview

Global corporate hybrid bonds posted positive returns over the year to end-April 2026, supported by carry and largely resilient credit spreads, although performance was intermittently tested by higher rates volatility and rising long-end sovereign yields. Shifting policy expectations, trade and fiscal uncertainties, and a later-period energy shock linked to the Iran conflict shaped the global rates backdrop. The Middle East tensions lifted inflation concerns and pushed rate cut expectations further away. Corporate hybrids remained sensitive to these moves at the long end of the yield curve, given their duration and extension characteristics, but demand and market functioning stayed broadly supportive, allowing the sector to absorb bouts of volatility while maintaining a positive return profile.

The fund delivered positive returns over the period, primarily driven by a robust credit strategy as well as yield strategy. At a sector level, the fund's exposure to banks and brokers, insurance and quasi-sovereign sectors contributed to performance. Conversely, positions within consumer cyclicals detracted from performance. From a ratings standpoint, positions in all the rating buckets contributed to performance, except the fund's exposure to AA- rated credits. At an issuer level, the fund's exposure to Cooperative Rabobank and Barclays contributed to returns. Conversely, positions in Novo Banco and Nextera Energy detracted from returns.

Global hybrid bonds are likely to remain sensitive to interest rate volatility, regulatory developments and shifts in investor risk appetite in 2026. Additional Tier 1 and Tier 2 instruments could face periodic volatility if markets reassess bank's capital strength, call expectations or the risk of investors having to bear losses. Corporate hybrids may also be affected by higher refinancing costs, leverage trends and changes in rating agency assessment. Overall, the key risks are likely to come from tighter financial conditions, weaker fundamentals, regulatory uncertainty, and reduced market liquidity during periods of stress.

Fidelity Funds

Global Income Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 4,651 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary widening.

The fund delivered positive returns over the period. Stable carry and coupon income as well as credit exposure contributed positively to performance, while term structure positioning detracted from returns. From a credit perspective, the fund's exposure to financials (including banks and brokers, insurance, and other financials) issuers such as BNP Paribas, Natwest Group, Bank of Ireland, and AXA were among the leading contributors. Additionally, the allocation to consumer cyclical names, especially in automotive segment including Ford Motors, Flutter Treasury, Volkswagen International, and General Motors, also added value. Conversely, there was no notable detractor at a sector level, however, issuer names such as Avianca Midco and Arqiva Broadcast Finance detracted the most from returns. From a rates perspective, the duration positioning in USD, EUR, and GBP detracted from performance as yield curves steepened across developed markets, supported by resilient economic data, persistent inflation, additional US tariff measures, besides the Middle East tensions lifted oil prices towards the end of the period.

The outlook is driven by resilient fundamentals alongside elevated geopolitical uncertainty. While growth conditions and fiscal support remained supportive, the escalation of the Iran conflict and pressure on energy markets increased macro uncertainty. Against this backdrop, the portfolio remained selective, focusing on income resilience, bottom-up credit selection and active risk management. Investment-grade exposure stayed broadly stable, while high-yield allocation was selectively increased through attractive primary market opportunities. Banks remained the largest sector exposure, with selective exposure to real estate and consumer cyclicals where valuations and carry remained attractive. Emerging market exposure increased marginally, supported by resilient technicals and compelling yields. Duration increased modestly from 4.2 years in April 2025 to 4.8 years in April 2026, reflecting selective additions to front-end euro exposure, while front-end US dollar duration was reduced amid elevated volatility and fiscal concerns.

Fidelity Funds

Global Inflation-linked Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 528 MILLION

Manager's Overview

Inflation-linked bonds delivered positive returns as inflation accruals helped offset pressure from elevated real yields. Shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions, shaped market sentiment. US Treasury Inflation-Protected Securities (TIPS) outperformed over the period, supported by rising breakeven inflation rates despite firm nominal yields, while UK and European linkers were more volatile as higher energy prices raised inflation expectations. Central banks adopted a more cautious tone, delaying the policy easing path. Within this context, global breakevens in major markets increased, while real yields marginally declined in the US and Germany, while they rose in the UK.

The fund delivered positive returns over the period. Performance was negatively impacted by nominal duration positioning, while breakeven inflation exposures and real duration positioning contributed positively. Specifically, the fund's long US breakeven positions benefited from higher oil and broader commodity prices, which lifted near-term inflation expectations. In addition, the fund booked profit on a cross-market breakeven strategy initiated in March 2023 (long US 30-year inflation expectations versus short euro-area 30-year inflation expectations), which proved effective and generated gains. From a duration perspective, overweight positions in UK and EUR real duration added value, as real yields in these markets declined over the year-to-date period in 2026. In contrast, the fund's long Norwegian government bond (NOK) nominal duration detracted from performance, as short-dated NOK yields rose. This position was closed in February 2026.

The managers continue to view inflation breakevens as a key indicator of future inflation expectations. The fund holds US 5-year and 30-year breakevens to benefit from a potential repricing higher, as tariff-related inflation risks are not yet fully reflected. Front-end breakevens remain attractive, supported by favourable base effects, recent elevated inflation prints and upside risks from refined energy products. The managers have an overweight holding in front-end real yields via US inflation-linked bonds, reflecting our expectation of a meaningful repricing in the front end of the nominal yield curve. They also maintain Australian 10-year real yield duration, a US nominal curve steepener and a structural modest view on the US dollar.

Fidelity Funds

Global Short Duration Income Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,113 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary widening.

The fund delivered positive returns over the period. Stable carry and coupon income as well as credit exposure contributed positively to performance, while term structure positioning detracted from returns. From a credit perspective, the fund's exposure to financials (including banks and brokers, insurance, and other financials) issuers such as Aroundtown SA, OSB Group, Societe Generali, and Metro Bank were among the leading contributors. Additionally, the allocation to consumer cyclical names especially in the automotive segment including Renault, LVMH Moët Hennessy Louis Vuitton SE, Ford Motors, General Motors, Flutter Treasury, and Toyota added value. Conversely, there was no notable detractor at a sector level, however, issuer names such as Avianca Midco, Arqiva Broadcast Finance detracted the most from returns. From a rates perspective, the duration positioning in USD, EUR, and GBP detracted from performance as yield curves steepened across developed markets, supported by resilient economic data, persistent inflation, additional US tariff measures and the Middle East tensions that lifted oil prices towards the end of the period.

The outlook is marked by resilient fundamentals alongside elevated geopolitical uncertainty and volatility in global rates markets. Against this backdrop, the portfolio remained selective, focusing on income resilience, bottom-up credit selection and active risk management. Investment-grade exposure remained broadly stable, while selective additions were made in high-yield debt through attractive primary market opportunities. Banks remained the largest sector exposure in the fund, alongside selective exposures to real estate and consumer non-cyclicals where valuations and carry remained attractive. Duration remained unchanged at 2.2 years, with increased front-end euro exposure offset by lower US dollar duration.

Fidelity Funds

Strategic Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 335 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary spread widening.

The fund delivered positive returns over the period, supported primarily by yield, carry and currency positioning, while term structure positioning detracted from performance. From a rates perspective, currency positioning contributed positively, while term structure positioning dragged on returns over the period. The US dollar duration positioning added value, while the gains were offset by the EUR, GBP, JPY and other regional positionings. From a sector perspective, the exposure to US Treasury contributed the most to returns, followed by quasi/sovereigns and consumer non-cyclical sectors, while banks and brokers, insurance and consumer cyclical exposures also supported performance. Conversely, allocations to securitised credits and other financials detracted modestly from returns. At the issuer level, Bishopsgate Asset Financing (BISHOP), HSBC Bank Canada Funding (HSBC), Amgen and Tullow Oil (AMGV) were among the key contributors. Conversely, Garfunkelux Holdco (GFKLDE), Mosaic Solar Loans (MSAIC) and Petrofac (PFCLN) detracted modestly from performance.

The portfolio remained actively positioned across rates, credit and currency markets amid elevated macro uncertainty and evolving monetary policy expectations. From a rates perspective, duration positioning remained tactical as markets reassessed the pace of future easing cycles amid persistent inflation and geopolitical volatility. The fund maintained diversified exposure across USD, EUR and selected developed market duration opportunities, while actively managing yield curve positioning. From a credit perspective, the portfolio remained focused on resilient corporate issuers, financials and selective higher-yielding opportunities where carry and valuations remained attractive. The fund also maintained exposure to sovereign and quasi-sovereign issuers, alongside selective use of index CDS positions for risk management and portfolio diversification.

Fidelity Funds

Structured Credit Income Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 71 MILLION

Manager's Overview

The European structured credit market remained resilient over the period, despite intermittent volatility linked to tariff uncertainty, shifting interest rate expectations and broader geopolitical risks. Investor demand for floating-rate, short-duration credit remained intact, helping primary markets absorb elevated issuance across collateralised loan obligations (CLOs) and securitised credit. European CLO activity was particularly strong, with new issuance, refinancing and reset transactions reflecting continued appetite for senior secured loan exposure and higher carry. Broader securitisation markets also stayed active, led by residential mortgage-backed securities (RMBS) and asset backed securities (ABS), supported by stable collateral performance and demand from investors seeking diversified credit exposure. Spreads generally tightened for much of the period, although episodes of widening emerged around macro shocks, inflation concerns and risk-off sentiment. Commercial mortgage-backed securities (CMBS) remained more challenged, particularly in areas linked to weaker commercial real estate segments, while better-performing transactions and more defensive structures continued to attract demand. Towards the end of the period, concerns around inflation, potential changes in central bank policy and rising scrutiny of private credit and structured products created a more cautious tone. Overall, the market delivered solid performance, supported by strong technical demand and income generation, but with greater emphasis on sector selection, collateral quality and structural resilience.

The fund outperformed the European Short-Term Rate index over the period. Over the 12-month period, performance was driven mainly by European CLO mezzanine risk, supplemented by UK consumer finance / RMBS exposure and select CMBS positions. Overall, the returns over the period benefited from strong carry income and generally favorable mark-to-market performance across spread assets. From a positioning perspective, the fund maintained a preference for shorter spread duration, favouring refinancing and shorter-dated resets with strong liquidity and robust structural protections.

The fund has strategic allocation to CLOs diversified across sectors, coupled with tactical exposures to RMBS, CMBS and ABS, mostly rated investment-grade bonds.

Fidelity Funds

US Dollar Bond Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 4,058 MILLION

Manager's Overview

US bond markets delivered broadly positive returns, as income helped offset pressure from higher long-end yields and episodic volatility. The US Treasury yield curve twisted steepened (widening spread between short and long end of the curve), with short-end yields lower and long-end yields higher, reflecting firmer growth, persistent inflation risks, heavy Treasury supply and changing expectations for Fed policy. Early in the period, weaker labour market indicators reinforced expectations of policy easing, with the US Fed beginning a gradual rate cutting cycle. Entering 2026, higher oil prices revived inflation concerns, leading markets to reassess the pace of future Fed policy easing. Credit markets performed better, supported by steady corporate fundamentals and investor demand for yield; both investment-grade spreads and high-yield spreads tightened over the period, despite temporary widening during periods of trade, AI-related and Middle East stress.

The fund delivered positive returns over the period. Curve positioning and credit strategy weighed on performance, while coupon income and currency exposure contributed positively. Credit strategy detracted from returns, as the fund's defensive positioning weighed on performance in an environment where spreads narrowed across regions. At a sector level, exposures to banks and brokers, consumer cyclicals, and other financials contributed positively, while holdings in quasi-sovereign and consumer non-cyclical sectors detracted significantly from returns. From an issuer perspective, AerCap and AIB Group were among the top contributors, with no notable detractors. Interest rate exposure across US, German, and UK markets detracted from performance as sovereign bond yields rose.

Looking ahead, the managers remain focused on labour market conditions, consumption, and inflation trends. Employment data points to some stabilisation, while consumption remains resilient. Easing rental pressures may help offset rising energy and health care costs, although the uncertainty around oil prices persists. Against this backdrop, the fund maintains a modest long-duration bias through exposure to US Treasuries, German Bunds, and UK Gilts. Within US dollar duration, the fund has an overweight position in the belly and long end of the yield curve. The managers retain an off-benchmark long position in German duration and see scope to extend exposure further, supported by attractive valuations and structurally low trend growth. Within credit, the managers remain defensively positioned while actively engaging in primary and secondary market opportunities, particularly within the technology and banking sectors.

Fidelity Funds

US High Yield Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,521 MILLION

Manager's Overview

The US high yield bond market delivered positive returns over the period, supported by carry income and spread tightening, although rate volatility created uneven monthly price performance. A shift towards a Fed policy easing, resilient but moderating economic growth, and persistent inflation uncertainty, alongwith energy price pressures and geopolitical risks, periodically weighed on sentiment. Technical conditions were constructive overall, supported by investor demand for yield and active primary markets, where refinancing and maturity extension remained the key drivers of supply. Higher-quality issuers continued to benefit from market access and stable fundamentals, while stress remained concentrated in weaker credits, keeping performance dispersion high.

The fund posted positive returns over the period, led primarily by its yield strategy. Similarly, the fund's credit strategy contributed positively to returns. Conversely, the term structure positioning detracted from returns. From a sector perspective, the fund's exposure to all sectors contributed to performance, led by the communications, consumer cyclicals and energy sectors. From a ratings perspective, positions across all rating buckets added value. At an issuer level, positions in Western Digital and Venture Global were among the top contributors, while positions in CSC Holdings and Ion Platform held back gains.

The market remains supported by attractive carry, resilient US growth and a contained default outlook, although spreads have largely retraced to pre-conflict levels and valuations are less compelling after the recent rally. We maintain a neutral stance, with income, credit selection and sector allocation expected to drive returns, while elevated supply, geopolitical risks and uncertainty around growth, earnings and Fed policy warrant a selective approach.

Fidelity Funds

Euro Cash Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 1,521 MILLION

Manager's Overview

Euro cash and short-duration fixed income markets remained influenced by evolving ECB monetary policy expectations, moderating inflation and geopolitical uncertainty over the period. During the second half of 2025, expectations that European policy rates had peaked and subsequent ECB monetary easing announcements supported front-end euro fixed income markets and income generation across cash strategies. However, sentiment remained volatile amid persistent core inflation, evolving tariff developments and geopolitical tensions, particularly during early 2026. In March and April 2026, escalating Middle East tensions pushed energy prices higher and increased stagflation concerns, leading markets to reassess the pace of future easing. Despite these fluctuations, euro credit markets remained broadly resilient, supported by stable corporate fundamentals, strong liquidity conditions and continued demand for high-quality short-duration instruments.

The fund delivered positive returns over the period, supported primarily by stable carry and coupon income amid elevated front-end euro yields. Performance also benefited from active security selection and diversified exposure across high-quality short-duration issuers, while maintaining a conservative risk profile during periods of market volatility.

The portfolio remained conservatively positioned with a focus on liquidity, capital preservation and resilient income generation. Exposure remained concentrated in high-quality short-duration corporate issuers, financials and liquidity instruments, while maintaining diversified maturity positioning amid evolving ECB policy expectations and macro uncertainty.

Fidelity Funds

US Dollar Cash Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 2,911 MILLION

Manager's Overview

US dollar cash and short-duration fixed income markets remained influenced by evolving US monetary policy expectations, persistent inflation and geopolitical uncertainty over the period. During the second half of 2025, markets increasingly anticipated that US policy rates had peaked as inflation moderated and labour market conditions softened, leading the Fed to begin its monetary easing cycle and deliver cumulative rate cuts of around 75–100 bps by early 2026. These announcements supported front-end fixed income markets and income generation across cash strategies as front-end yields gradually declined. Towards late 2025 and into early 2026, sentiment became more mixed as resilient US economic data, sticky core inflation and stronger-than-expected payrolls led markets to reassess the pace of future easing. In March and April 2026, escalating Middle East tensions pushed oil prices higher and increased stagflation concerns, prompting the Fed to maintain a more aggressive tone despite earlier easing expectations. As a result, the US Treasury yield curve steepened over the period, with front-end yields declining while longer-dated yields moved higher due to persistent inflation concerns, fiscal deficits and rising term premium expectations. Despite these fluctuations, credit markets remained broadly resilient, supported by stable corporate fundamentals, strong liquidity conditions and continued demand for high-quality short-duration instruments.

The fund delivered positive returns over the period, supported primarily by stable carry and coupon income amid elevated front-end US dollar yields. Performance also benefited from active security selection and diversified exposure across high-quality short-duration issuers, while maintaining a conservative risk profile throughout periods of market volatility.

The fund remained conservatively positioned with a focus on liquidity, capital preservation and resilient income generation. Exposure remained concentrated in high-quality short-duration corporate issuers, financials and liquidity instruments, while maintaining diversified maturity positioning amid evolving interest rate expectations and macro uncertainty.

Fidelity Target™ 2025 Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 174 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and the Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive absolute returns over the period. Within fixed income, holdings in the Fidelity Global Bond and the Fidelity Renaissance 2 strategies contributed positively through stable coupon income and credit exposure, while exposure to the Fidelity Systematic Global Government Bond strategy detracted from performance. Within equities, the underlying Global Technology strategy added value as technology stocks rose due to sustained investment in AI infrastructure, strong corporate earnings and resilient demand for semiconductors and related hardware. Elsewhere, exposure to the Fidelity Global Multi Asset Defensive strategy also provided some support.

The fund follows a dynamic asset allocation model, which will comprise 100% cash at maturity. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage in equities over time until maturity.

Fidelity Target™ 2030 Fund [8]

FUND SIZE AS AT 30.04.2026 : EUR 480 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and the Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive absolute returns over the period. Equities added the most value, with the Fidelity US Equity Research Enhanced and the Fidelity Emerging Markets Equity Research Enhanced strategies benefiting from their positions in the IT sector. Technology stocks rose during the period due to sustained investment in AI infrastructure, strong corporate earnings and resilient demand for semiconductors. Within fixed income, the underlying Fidelity Sustainable USD Emerging Market Bond strategy added value due to its credit exposure and term structure positioning. Moreover, within alternatives, exposure to the underlying Fidelity Global Multi Asset Defensive strategy provided some support.

The fund follows a dynamic asset allocation model, which will comprise 100% cash at maturity. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage in equities over time until maturity.

Fidelity Target™ 2035 Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 456 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and the Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive absolute returns over the period, with underlying strategies in the US contributing the most to performance. In particular, the Fidelity US Equity Research Enhanced strategy was the largest contributor, while the Fidelity US Core Equity strategy also added value, supported by positive contributions from the IT and communication services sectors. Meanwhile, exposures to the Fidelity Emerging Markets Equity Research Enhanced and the Fidelity Asia Equity ESG Fund also aided, owing to favourable contribution from the IT sector. Technology stocks rose during the period due to sustained investment in AI infrastructure, strong corporate earnings, and resilient demand for semiconductors.

The fund follows a dynamic asset allocation model, which will comprise 100% cash at maturity. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage in equities over time until maturity.

Fidelity Funds

Fidelity Target™ 2055 Fund [4,8]

FUND SIZE AS AT 30.04.2026 : EUR 78 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and the Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive absolute returns over the period, with underlying strategies in the US contributing the most to performance. In particular, the Fidelity US Equity Research Enhanced strategy was the largest contributor, while the Fidelity US Core Equity strategy also added value, supported by positive contributions from the IT and communication services sectors. Meanwhile, exposures to the Fidelity Emerging Markets Equity Research Enhanced and the Fidelity Asia Equity ESG Fund also aided, owing to favourable contribution from the IT sector. Technology stocks rose during the period due to sustained investment in AI infrastructure, strong corporate earnings, and resilient demand for semiconductors.

The fund follows a dynamic asset allocation model, which will comprise 100% cash at maturity. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage in equities over time until maturity.

Fidelity Institutional Target™ 2020 (Euro) Fund [1,4,5]

FUND SIZE AS AT 30.04.2026 : EUR 15 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive returns over the period but underperformed the comparative index, which can be attributed to its equity exposure. Meanwhile, the fixed income allocation contributed positively. Within equities, the Fidelity European Dynamic Growth strategy was a major detractor from returns, driven by its exposure to the health care sector. Meanwhile, the Fidelity US Equity Research Enhanced strategy contributed to performance, supported by its overweight exposure to the IT sector. Technology stocks rose during the period due to sustained investment in AI infrastructure, strong corporate earnings and resilient demand for semiconductors. In fixed income, the underlying Fidelity Global Inflation-Linked strategy performed positively due to stable coupon income and favourable currency exposure.

The fund follows a dynamic asset allocation model. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage to equities over time until maturity.

Fidelity Institutional Target™ 2045 (Euro) Fund [1,4,5]

FUND SIZE AS AT 30.04.2026 : EUR 677 MILLION

Manager's Overview

Global equities advanced over the 12-month period, supported by AI-driven demand, resilient corporate earnings and easing monetary policy, despite geopolitical tensions. Early gains were driven by reduced trade uncertainty and rate cuts by major central banks, while volatility increased in early 2026 amid the Middle East tensions and rising inflation concerns. Markets rebounded later as tensions eased and AI stocks regained momentum. Emerging Markets, Japan and the US led returns, with energy and technology sectors outperforming. Global fixed income markets delivered positive returns amid volatility driven by shifting monetary policy expectations, geopolitical risks and fiscal uncertainty. Safe-haven demand initially supported US Treasuries, while European bonds were pressured by fiscal concerns and inflation. As the period progressed, rising oil prices and Middle East tensions pushed yields higher and delayed rate cut expectations. Yield curves steepened across regions, while credit markets remained resilient with tight spreads despite intermittent volatility.

The fund delivered positive returns over the period, outperforming its comparative benchmark. The performance is attributable to the fund's equity exposure. The Fidelity US Equity Research Enhanced strategy was a major contributor to returns, supported by its exposure to the IT sector. Technology stocks performed strongly amid sustained investment in AI infrastructure, resilient semiconductor demand and robust corporate earnings. The Fidelity CCF II Global Emerging Markets Equity Fund and Fidelity Emerging Markets Equity Research Enhanced strategies also added value, benefiting from strong emerging market equity performance. Meanwhile, stock selections in Fidelity Europe Equity Research Enhanced and Fidelity CCF II Europe ex UK strategies held back gains.

The fund follows a dynamic asset allocation model. The monthly migration path towards the final portfolio is set to have an increasing exposure to bonds and cash, and a decreasing weightage to equities over time until maturity.

Fidelity Funds

Absolute Return Global Equity Fund [4]

FUND SIZE AS AT 30.04.2026 : USD 1,617 MILLION

Manager's Overview

Global equities advanced during the 12-month period, supported by resilient corporate earnings, steady macroeconomic conditions and continued enthusiasm around AI. Easing trade tensions and interest rate cuts by the US Fed, ECB and the BoE further supported sentiment. However, markets experienced periods of heightened volatility amid concerns over elevated AI valuations and escalating geopolitical tensions in the Middle East.

The fund outperformed the cash benchmark over the review period, delivering resilient and fairly consistent returns despite changing macro conditions, sharp style rotations and episodes of market stress. The fund saw exceptional performance in fourth-quarter 2025, however, it experienced some pullback over the next quarter, due to normalisation of returns. The strategy continued to exhibit neutrality to beta and other factor risks, as per its design, resulting in active returns predominantly driven by stock-specific risks rather than factor risks. Stock picking added value in all sectors except health care, with strong performance in IT, energy and materials. Regionally, Europe ex UK and Emerging Markets added value, while Japan weighed on returns. At a stock level, the long position in Siemens Energy aided returns, as it benefited from robust order growth, margin expansion and improving cash flow visibility. Utilities company SSE also gained. Meanwhile, the short position in a financial services company with weak fundamentals added value. Conversely, the long position in medical devices maker Boston Scientific detracted from returns, as investors questioned valuations following a strong prior performance. The short position in a power electronics manufacturer declined as its shares rebounded despite continued fundamental headwinds.

Managed by Fidelity's Systematic Investing team, Absolute Return Global Equity (ARGE) is a geared long/short absolute return market neutral fund that offers investors a diversified source of absolute returns, with little dependence on overall market movements. It gives exposure to the breadth and depth of Fidelity's fundamental research by taking long exposure in high conviction Buy rated companies and short exposure in the high conviction Sell rated companies in a portfolio of around 150-200 stocks. The strategy aims to deliver positive returns primarily through stock selection and other factor risks are broadly mitigated. It is market neutral, with no unintended bias towards other factors such as beta, style, country, or sector. Portfolio positioning is therefore a result of our bottom-up stock selection process.

Fidelity Funds

Absolute Return Global Fixed Income Fund [4]

FUND SIZE AS AT 30.04.2026 : USD 34 MILLION

Manager's Overview

Global fixed income markets delivered broadly positive returns, despite periods of heightened volatility driven by shifting monetary policy expectations, geopolitical tensions, trade policy uncertainty and evolving fiscal dynamics across major regions. Early in the period, safe-haven demand supported US Treasuries, while German sovereigns (Bunds) and UK sovereigns (Gilts) faced pressure from fiscal concerns and persistent inflation. However, yield curves steepened across developed markets, supported by resilient economic data, persistent inflation and additional US tariff measures. Towards the end of the period, escalating Middle East tensions lifted oil prices, increasing stagflation risks and prompting a reassessment of rate cut expectations. Central banks adopted a more cautious tone, delaying its policy easing path. Credit markets remained resilient, with spreads relatively tight and supported by strong demand, although bouts of volatility led to temporary spread widening.

The fund delivered positive returns over the period, supported primarily by yield, carry and currency positioning, while credit positioning detracted modestly from performance. Yield and carry positioning were the largest contributors to returns, supported by elevated front-end rates and resilient income generation across diversified fixed income exposures. Currency positioning also contributed positively, driven mainly by selective EUR and diversified non-USD exposures. From a rates perspective, active positioning across USD, EUR, GBP and JPY markets added value through tactical duration management, while term structure positioning contributed modestly through selective curve positioning across developed markets. At an issuer level, Erna Srl contributed positively to performance over the period.

The portfolio remained actively positioned across rates, credit and currency markets amid elevated macro uncertainty and evolving monetary policy expectations. From a rates perspective, duration positioning remained tactical as markets reassessed the path of future easing cycles. From a credit perspective, the fund maintained diversified exposure across high-quality corporate issuers, financials and selective higher-yielding sectors where carry and valuations remained attractive. Currency positioning also contributed positively over the period, supported by active management across developed market exposures.

Fidelity Funds

Absolute Return Multi Strategy Fund [4]

FUND SIZE AS AT 30.04.2026 : USD 48 MILLION

Manager's Overview

Global equities rose over the 12-month period despite bouts of volatility driven by geopolitical tensions. AI-led demand, strong corporate earnings, supportive macro data, and easing trade concerns boosted markets, while Fed rate cuts totalling 75 bps between September and December 2025 added momentum. Rate reductions in Europe and the UK further improved sentiment. However, early 2026 saw renewed tensions involving the US, Venezuela, Greenland, Iran, and the wider Middle East, triggering a sharp market sell-off in March amid fears over growth and inflation impact. Markets rebounded in April following a temporary ceasefire and renewed interest in AI stocks. Against this backdrop, Emerging Markets, Japan, and the US outperformed. From a sector perspective, energy and IT strongly advanced, amid growing expectations of higher-for-longer inflation driven by oil prices and sustained investment in AI infrastructure. Global fixed income delivered modest gains despite volatility from shifting policy, inflation, and geopolitics. Sovereign yields rose and curves steepened across regions. Credit markets remained resilient, supported by strong technical demand despite periodic spread widening.

The fund delivered positive returns over the period. Fixed income and Macro strategies were the primary contributors to performance, led by the allocation to the Fidelity Global Macro strategy. Meanwhile, the exposure to physical gold enhanced gains due to increased safe-haven demand amid geopolitical uncertainty. Within equity hedge, the allocation to the Absolute Return Global Equity strategy, focused on high-conviction analyst picks, also supported gains. Elsewhere, within Arbitrage and Opportunistic segment, the exposure to listed alternatives proved rewarding. However, hedging positions weighed on returns.

The fund is actively managed and aims to provide investors with positive absolute returns, with a low correlation to traditional asset classes over the medium- to long-term. The fund invests in a combination of diversified underlying strategies that sit within the asset classes of equity hedges, fixed income and macro, opportunistic and arbitrage.

Fidelity Funds

Institutional Emerging Markets Equity Fund [8]

FUND SIZE AS AT 30.04.2026 : USD 95 MILLION

Manager's Overview

Emerging markets (EMs) advanced over the year and outperformed developed markets. The period was marked by volatility driven by shifting trade dynamics, evolving monetary policy expectations, geopolitical developments and strong support from AI progress, alongside movements in commodity prices. Sentiment improved as trade tensions eased following a temporary pause on tariffs, while US dollar weakness and continued optimism around AI underpinned returns, supported by a constructive backdrop for industrial metals.

The fund outperformed the comparative index over the period. Robust stock selection in Taiwan and the underweight positions in China and India proved rewarding, while stock picking in South Africa held back gains. At a sector level, stock picking in IT and industrials contributed to performance, while the fund's positioning in the financials sector weighed on returns. At a stock level, Taiwanese copper clad laminate producer Elite Material rose following upbeat first-quarter 2026 results and ongoing capacity expansion. In Korea, the position in memory chip manufacturer SK Square (the holding company for memory producer SK Hynix) gained following robust performance at SK Hynix, driven by a memory upcycle and supply constraints. In China, the underweight exposure to internet company Tencent supported relative performance, as the stock declined amid concerns over elevated AI investment possibly pressuring profit margins. As a result, the position in South African holding company Naspers, which holds a large stake in China's Tencent, detracted from relative returns.

The focus remains on owning well-capitalised businesses with under-levered balance sheets. Country and sector positioning are a residual of a bottom-up stock picking approach, however, the prevailing environment is considered in our positioning, and we are closely monitoring both the macro and company-specific implications of the developments in the Middle East.

Fidelity Funds

Institutional Global Focus Fund [4,8]

FUND SIZE AS AT 30.04.2026 : USD 266 MILLION

Manager's Overview

Global equities advanced over the 12-month period despite bouts of volatility due to geopolitical tensions. The AI-driven demand, strong corporate earnings, easing trade uncertainty, and interest rate cuts by the Fed, ECB, and the BoE amid moderating inflation, supported markets. However, sentiment weakened in early 2026 as geopolitical risks intensified, particularly in the Middle East. Markets fell sharply in March amid escalating US-Israel-Iran tensions and concerns over global growth and inflation, before rebounding in April following a temporary ceasefire and renewed investor interest in AI-related stocks. Overall, key regional markets ended higher during the period, with equities in Emerging Markets, Japan, and US leading the gains.

The fund underperformed the benchmark over the review period. The biggest stock-specific detractors were the software names, including Adobe, Salesforce, Intuit and Accenture, where concerns around AI disruption and growth visibility continued to weigh on sentiment. Meanwhile, semiconductor and AI-exposed holdings, including Broadcom, Kioxia and Taiwan Semiconductor Manufacturing Company, performed strongly as investor conviction in AI-driven demand and long-term earnings visibility recovered after a period of scrutiny over returns on heavy capex. Lam Research was the standout contributor over the period, supported by an upbeat outlook and continued confidence in AI-related spending across logic, memory chip and advanced packaging. Within financials, the fund's exposures to Shift4 Payments, Berkshire Hathaway and Arthur J. Gallagher detracted from relative returns amid a broader market rotation toward higher-growth opportunities.

Regionally, the fund retains an overweight position in North America, while maintaining measured exposure to Europe ex UK and Emerging Markets for idiosyncratic growth opportunities. The portfolio maintains an overweight holding in IT, reflecting conviction in AI enablers, and in financials, given the exposure to high-quality franchises across insurance, banking, capital markets and exchanges.
